### Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component.

The variable component reflects the performance-based variable compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

▸ Refer to "Compensation and benefits" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2013 for further information.

# Private Banking & Wealth Management

In 2Q14, we reported a loss before taxes of CHF 749 million and net revenues of CHF 3,046 million.

In our strategic businesses, we reported income before taxes of CHF 882 million and net revenues of CHF 2,932 million. Net revenues were slightly lower compared to 1Q14 mainly due to lower transaction- and performance-based revenues and lower other revenues. Compared to 2Q13, income before taxes decreased 13%, mainly driven by lower transaction- and performance-based revenues and lower net interest income, partially offset by lower operating expenses.

In our non-strategic businesses, we reported a loss before taxes of CHF 1,631 million, driven by the litigation settlement charge of CHF 1,618 million relating to the final settlement of all outstanding US cross-border matters.

In 2Q14, assets under management for the division were CHF 1,329.7 billion and we attracted net new assets of CHF 10.1 billion.

### KEY PERFORMANCE INDICATORS

We target a divisional cost/income ratio of 65% for the Private Banking & Wealth Management division. In 2Q14, the cost/income ratio was 123.8%, driven by the litigation settlement charge relating to the final settlement of all outstanding US cross-border matters. The cost/income ratio for our strategic results was 68.9% in 2Q14, up one percentage point compared to 2Q13 and 1Q14.

We also target net new assets growth of 6% for both the Wealth Management Clients and Asset Management businesses. In 2Q14, the annualized quarterly growth rates in Wealth Management Clients and Asset Management were 3.7% and 4.5%, respectively.

▸ Refer to "Key performance indicators" in Core Results for further information.

# Strategic results

### OVERVIEW

Our strategic results comprise businesses from Wealth Management Clients, Corporate & Institutional Clients and Asset Management.

### 2Q14 results

In 2Q14, our strategic businesses reported income before taxes of CHF 882 million and net revenues of CHF 2,932 million.

Net revenues decreased 3% compared to 1Q14, largely driven by lower transaction- and performance-based revenues and lower other revenues. Compared to 2Q13, net revenues decreased 9% with lower transaction- and performance-based revenues and lower net interest income. Provision for credit losses was CHF 30 million on a net loan portfolio of CHF 221.8 billion. Total operating expenses were 8% lower compared to 2Q13 and stable compared to 1Q14.

2 Includes the impact from external methodology changes in operational risk of CHF 2.2 billion in 1Q14.

## RESULTS DETAIL

The following provides a comparison of our 2Q14 strategic results versus 2Q13 (YoY) and versus 1Q14 (QoQ).

### Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

**YoY: Down 9% from CHF 3,232 million to CHF 2,932 million**

Net revenues decreased primarily reflecting lower transaction- and performance-based revenues and decreased net interest income. The decrease in transaction- and performance-based revenues reflected lower revenues across most major revenue categories, primarily from foreign exchange client business, carried interest on realized private equity gains and semi-annual performance fees from Hedging-Griffo. In a low interest rate environment, net interest income decreased due to significantly lower deposit margins on stable average deposit volumes and slightly lower loan margins on higher average loan volumes. Slightly lower recurring commissions and fees reflected decreased investment product management fees, partially offset by higher discretionary mandate management fees and slightly higher asset management fees.

**QoQ: Down 3% from CHF 3,031 million to CHF 2,932 million**

Slightly lower net revenues primarily reflected lower transaction- and performance-based revenues and lower other revenues. The decrease in transaction- and performance-based revenues reflected lower brokerage and product issuing fees, lower performance fees and carried interest, lower placement and transaction fees and lower foreign exchange client business, partially offset by higher equity participations income. Lower other revenues mainly reflected a fair value decrease on Clock Finance, a credit securitization transaction. Stable net interest income reflected lower deposit margins on stable average deposit volumes and stable loan margins on slightly higher average loan volumes. Stable recurring commissions and fees mainly reflected lower banking services fees and lower investment product management fees, largely offset by slightly higher asset management fees and slightly higher discretionary mandate management fees.

### Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

**YoY: Up 58% from CHF 19 million to CHF 30 million**

Provision for credit losses increased CHF 11 million. Wealth Management Clients recorded net provisions of CHF 17 million and Corporate & Institutional Clients recorded net provisions of CHF 13 million in 2Q14, reflecting a small number of individual cases.

**QoQ: Up 76% from CHF 17 million to CHF 30 million**

Provision for credit losses was higher in Wealth Management Clients and higher in Corporate & Institutional Clients. In 1Q14, Wealth Management Clients recorded net provisions of CHF 16 million while Corporate & Institutional Clients recorded net provisions of CHF 1 million.

### Operating expenses

#### Compensation and benefits

**YoY: Down 7% from CHF 1,273 million to CHF 1,184 million**

Lower compensation and benefits mainly reflected lower salary expenses, driven by lower headcount.

**QoQ: Down 3% from CHF 1,225 million to CHF 1,184 million**

Slightly lower compensation and benefits included lower discretionary performance-related compensation.

#### General and administrative expenses

**YoY: Down 7% from CHF 726 million to CHF 672 million**

Lower general and administrative expenses primarily reflected the results of our ongoing efficiency measures and lower expense provisions.

**QoQ: Up 2% from CHF 660 million to CHF 672 million**

Slightly higher general and administrative expenses primarily reflected higher travel and entertainment expenses and slightly higher professional services fees.

### Business developments

In July 2014, we entered into an agreement to sell Private Banking & Wealth Management's local affluent and upper affluent business in Italy to Banca Generali S.p.A. The transaction also includes approximately 60 agents of Credit Suisse (Italy) S.p.A., with over Euro 2.0 billion of assets under management. The transaction is expected to close by November 2014, subject to customary closing conditions, including related to regulatory requirements and labor agreements.

## WEALTH MANAGEMENT CLIENTS

### Net revenues

#### Net interest income

**YoY: Down 12% from CHF 778 million to CHF 688 million**

Lower net interest income reflected the low interest rate environment, significantly lower deposit margins on stable average deposit volumes and lower loan margins on higher average loan volumes and lower levels of deposits eligible as stable funding.

**QoQ: Down 3% from CHF 706 million to CHF 688 million**

Slightly lower net interest income reflected lower deposit margins on stable average deposit volumes and lower loan margins on slightly higher loan volumes.

#### Recurring commissions and fees

**YoY: Down 3% from CHF 750 million to CHF 728 million**

Recurring commissions and fees were slightly lower, driven by lower investment product management fees and slightly lower investment account and services fees, partially offset by higher discretionary mandate management fees and slightly higher banking services fees.

**QoQ: Stable at CHF 728 million**

Recurring commissions and fees were stable with lower investment product management fees and lower banking services fees, reflecting lower account statement fees, offset by increases across other categories.

#### Transaction- and performance-based revenues

**YoY: Down 15% from CHF 711 million to CHF 601 million**

Lower transaction- and performance-based revenues mainly reflected lower market activity adversely impacting foreign exchange client business and brokerage and product issuing fees, as well as lower equity participations income, due to an increased dividend in 2Q13 related to our ownership interest in SIX Group AG, and lower performance fees from Hedging-Griffo.

**QoQ: Down 6% from CHF 638 million to CHF 601 million**

Transaction- and performance-based revenues decreased, mainly driven by lower brokerage and product issuing fees and lower placement and transaction fees, partially offset by higher equity participations income.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation.

[1] Net revenues divided by average assets under management.

[2] Income before taxes divided by average assets under management.

### Gross margin

Our gross margin was 99 basis points in 2Q14, 13 basis points lower compared to 2Q13, mainly reflecting lower transaction- and performance-based revenues, a continued adverse interest rate environment and a 2.5% increase in average assets under management. Compared to 1Q14, our gross margin was down five basis points, driven by a 2.7% increase in average assets under management, a change in client mix, lower fee-based revenues and slightly lower net interest income.

### Net margin

Our net margin was 28 basis points in 2Q14, three basis points lower compared to 2Q13, reflecting lower transaction- and performance-based revenues and lower net interest income, partially offset by lower operating expenses. Compared to 1Q14, our net margin was one basis point lower, driven by slightly lower income before taxes.

## CORPORATE & INSTITUTIONAL CLIENTS

### Net revenues

#### Net interest income

**YoY: Down 4% from CHF 276 million to CHF 266 million**
The decrease reflected the low interest rate environment, significantly lower deposit margins on higher average deposit volumes and lower levels of deposits eligible as stable funding, partially offset by slightly higher loan margins on higher average loan volumes.
**QoQ: Up 4% from CHF 257 million to CHF 266 million**
The increase reflected higher loan margins on slightly higher average loan volumes, partially offset by lower deposit margins on stable average deposit volumes.

#### Recurring commissions and fees

**YoY: Down 2% from CHF 115 million to CHF 113 million**
Recurring commissions and fees decreased slightly, with lower investment product management fees and lower banking services fees, partially offset by higher discretionary mandate management fees.
**QoQ: Down 7% from CHF 122 million to CHF 113 million**
The decrease primarily reflected lower banking services fees.

#### Transaction- and performance-based revenues

**YoY: Down 7% from CHF 127 million to CHF 118 million**
Lower transaction- and performance-based revenues reflected lower sales and trading revenues, lower brokerage and product issuing fees and slightly lower foreign exchange client business.
**QoQ: Stable at CHF 118 million**
Stable transaction- and performance-based revenues reflected higher equity participations income, offset by slightly lower foreign exchange client business.

# ASSET MANAGEMENT

## Net revenues

### Fee-based revenues

**YoY: Down 8% from CHF 467 million to CHF 428 million**

The decrease reflected lower carried interest on realized private equity gains and the absence of performance fees from Hedging-Griffo funds due to year-to-date returns performing below their respective high-water marks, partially offset by higher placement fees and slightly higher asset management fees due to higher average assets under management.

**QoQ: Down 2% from CHF 438 million to CHF 428 million**

Fee-based revenues were slightly lower reflecting lower carried interest on realized private equity gains and lower real estate transaction fees, partially offset by slightly higher asset management fees and higher placement fees.

### Investment-related gains/(losses)

**YoY: Up 200% from CHF 2 million to CHF 6 million**

Investment-related gains were higher compared to 2Q13 driven by gains in hedge fund investments.

**QoQ: Down 68% from CHF 19 million to CHF 6 million**

Investment-related gains were lower in 2Q14 primarily due to gains in the real estate sector in 1Q14 that were not replicated in 2Q14.

### Equity participations and other gains/(losses)

**YoY: Up from zero to CHF 3 million**

In 2Q14, we recognized a gain of CHF 3 million from the sale of an equity stake in a joint venture.

**QoQ: Up from zero to CHF 3 million**

In 2Q14, we recognized the gain from the sale of an equity stake in a joint venture.

# Non-strategic results

## OVERVIEW

Our non-strategic businesses for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to US cross-border matters, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

### 2Q14 results

In 2Q14, our non-strategic businesses reported a loss before taxes of CHF 1,631 million. In May 2014, we announced a comprehensive and final settlement regarding all outstanding US cross-border matters. The final settlement amount was USD 2,815 million (CHF 2,510 million). In prior quarters, we had taken litigation provisions totaling CHF 892 million related to this matter. As a result, a pre-tax litigation settlement charge of CHF 1,618 million was recognized in 2Q14. In 1Q14, our non-strategic businesses reported income before taxes of CHF 47 million, including an equity participation gain of CHF 91 million from the sale in January 2014 of CFIG, our private equity fund of funds and co-investment business.

## RESULTS DETAIL

The following provides a comparison of our 2Q14 non-strategic results versus 2Q13 (YoY) and versus 1Q14 (QoQ).

### Net revenues

**YoY: Down 39% from CHF 187 million to CHF 114 million**

The decrease in net revenues primarily reflected lower recurring commissions and fees due to the sale in prior quarters of businesses relating to the restructuring of the former Asset Management division.

**QoQ: Down 45% from CHF 209 million to CHF 114 million**

The decrease mainly reflected the gain of CHF 91 million from the sale of CFIG in 1Q14.

### Operating expenses

**YoY: Up from CHF 258 million to CHF 1,752 million**

Higher operating expenses were driven by the litigation settlement charge of CHF 1,618 million relating to the final settlement of all outstanding US cross-border matters. Compensation and benefits were lower, reflecting the sale of businesses.

**QoQ: Up from CHF 146 million to CHF 1,752 million**

Higher operating expenses were driven by the litigation settlement charge relating to the final settlement of all outstanding US cross-border matters. Compensation and benefits were lower due to higher severance costs in 1Q14.

# Assets under management

In 2Q14, assets under management of CHF 1,329.7 billion increased CHF 37.2 billion compared to the end of 1Q14, driven mainly by positive market movements, net new assets and favorable foreign exchange-related movements.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 7.4 billion in 2Q14 with continued strong inflows from emerging markets, particularly in Asia Pacific, and Switzerland, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 0.6 billion in 2Q14. Asset Management reported net new assets of CHF 4.1 billion in 2Q14, driven by inflows in traditional products, with substantial contributions from index strategies, and inflows from hedge funds and credit products.

Assets under management in our non-strategic portfolio were stable at CHF 25.9 billion.

# Investment Banking

In 2Q14, Investment Banking reported income before taxes of CHF 752 million and net revenues of CHF 3,342 million. Investment Banking delivered solid results driven by the strength of our diversified strategic franchise and an accelerated wind-down of risk-weighted assets and leverage exposure in our non-strategic unit. In our strategic businesses, net revenues declined 6% compared to 2Q13 primarily driven by less favorable trading conditions in our equity sales and trading businesses and continued weakness in global macro products, particularly in foreign exchange and commodities. Compared to 1Q14, net revenues declined 5% in our strategic businesses as less favorable trading conditions in certain fixed income businesses and equity sales and trading, offset strong results in underwriting and advisory. In 2Q14, we accelerated the wind-down of the non-strategic unit, reducing Swiss leverage exposure by USD 3 billion, or 4%, and Basel III risk-weighted assets by USD 6 billion, or 32%, compared to 1Q14.

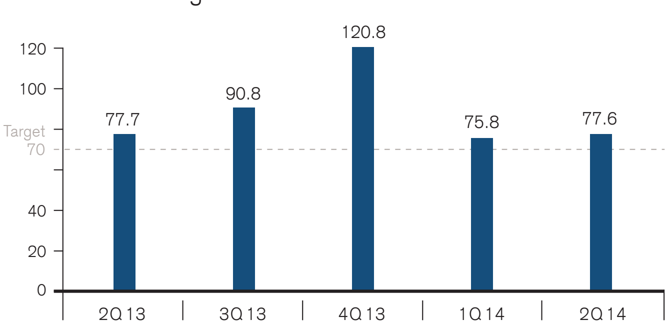
Investment Banking



### EVOLVING THE INVESTMENT BANKING BUSINESS MODEL

Over the past year, we have made significant progress in transforming the macro products franchise to adapt to the evolving operating and regulatory environment. In line with this strategy, in 2Q14, we announced an exit from the commodities trading business in order to redeploy resources to more profitable businesses. The results of this business during the wind-down period will be reflected in the non-strategic unit beginning in 3Q14. We expect to achieve incremental expense savings of approximately USD 75 million, and a reduction in Basel III risk-weighted assets of USD 2 billion and Swiss leverage exposure of USD 5 billion from 2Q14 to the end-state. Additionally, we will also re-focus the foreign exchange business towards a combination of electronic trading and voice offering for larger and more complex trades and will further simplify our rates product offering to focus primarily on satisfying client liquidity needs in cash products and derivatives.

# Strategic results

## OVERVIEW

In 2Q14, our strategic businesses reported income before taxes of CHF 1,034 million and net revenues of CHF 3,395 million.

Fixed income revenues were higher compared to 2Q13, reflecting continued investor demand for yield products, but were partially offset by challenging trading conditions in global macro products. Revenues decreased compared to 1Q14, as lower global credit products and securitized products results, following a seasonally stronger 1Q14 for these businesses, more than offset a rebound in emerging markets revenues.

Equities sales and trading results declined from strong 2Q13 levels, driven by less favorable trading conditions, specifically a low volatility and low volume environment, resulting in reduced client activity. Revenues were lower than 1Q14, primarily driven by weak client activity in our equity derivatives business.

Underwriting and advisory results were higher compared to 2Q13 and 1Q14, reflecting significantly higher equity underwriting revenues, as origination remained robust.

Results in 2Q14 were impacted by the weakening of the average rate of the US dollar against the Swiss franc, which negatively impacted revenues and favorably impacted expenses. Compared to 2Q13, revenues decreased 6% and total operating expenses decreased 3% in Swiss francs while revenues were stable and total operating expenses increased 4% in US dollars.

As of the end of 2Q14, we reported Basel III risk-weighted assets of USD 168 billion, up USD 2 billion from 1Q14. Additionally, we reported Swiss leverage exposure in our strategic businesses of USD 781 billion, an increase of USD 5 billion from 1Q14.

The following provides a comparison of our strategic 2Q14 results versus 2Q13 (YoY) and versus 1Q14 (QoQ).

### Net revenues

#### Debt underwriting

**YoY: Down 10% from CHF 534 million to CHF 483 million**

We had significantly lower revenues from emerging markets following strong performance in 2Q13, particularly in structured lending and Brazil. This decrease was partially offset by higher investment grade revenues, driven by market share gains and higher global industry-wide issuance volumes. Results also reflected higher leveraged finance revenues, driven by high yield market share gains, and increased global high yield industry-wide issuance volumes.

**QoQ: Up 3% from CHF 468 million to CHF 483 million**

The increase was driven by continued strength in leveraged finance as global high yield industry-wide issuance volumes more than offset slightly lower market share. We also had higher investment grade results driven by increased global industry-wide issuance volumes.

#### Equity underwriting

**YoY: Up 30% from CHF 206 million to CHF 268 million**

The increase reflected significantly higher revenues from initial public offerings (IPOs), reflecting substantially higher global industry-wide issuance activity. We also had higher results from follow-on offerings and solid performance in convertibles, as higher global industry-wide issuance volumes more than offset lower market share in both products.

**QoQ: Up 46% from CHF 183 million to CHF 268 million**

The increase was primarily driven by higher revenues from IPOs, reflecting market share gains and substantially higher global industry-wide issuance activity. We also had higher results from follow-on offerings and convertibles, as higher global industry-wide issuance volumes more than offset lower market share in both products.

| Swiss leverage exposure | 692,836 | 685,298 | 780,563 | 1 | (11) | 692,836 | 780,563 | (11) |

[1] Calculated using income after tax denominated in USD; assumes tax rate of 30% in 2Q14, 1Q14, 2Q13, 6M14 and 27% in 6M13 and capital allocated based on average of 10% of average risk-weighted assets and 2.4% of average leverage exposure.

### Advisory and other fees

**YoY: Down 4% from CHF 167 million to CHF 161 million**

The decrease was due to lower market share and lower industry-wide completed M&A activity. Additionally, results were adversely impacted as 2Q13 included higher restructuring advisory fees.

**QoQ: Down 11% from CHF 180 million to CHF 161 million**

The decrease was driven by lower M&A fees as a slowdown in completed M&A activity, relative to robust 1Q14 levels, more than offset higher market share.

### Fixed income sales and trading

**YoY: Up 4% from CHF 1,434 million to CHF 1,485 million**

Fixed income results reflected continued investor demand for yield products, specifically credit and securitized products in a low rate environment. 2Q13 performance was adversely impacted by a significant decline in trading activity due to rising rates and widening credit spreads from the US Federal Reserve's announcement to reduce its bond buying program. Emerging markets revenues improved substantially, primarily driven by strong financing activity. Results also reflected higher revenues from corporate lending. Securitized products revenues increased, driven by higher revenues in agency securities and mortgage servicing and consistent performance in asset finance. We had solid performance in global credit products, as strong origination activity led to higher secondary trading in our investment grade and leveraged finance franchises. We had significantly lower global macro products revenues as a low volatility environment resulted in subdued client activity, particularly in our foreign exchange and commodities businesses. We had lower rates revenues driven by declines in Japan and the US.

**QoQ: Down 8% from CHF 1,609 million to CHF 1,485 million**

Fixed income sales and trading revenues declined, primarily due to lower results in our global credit products and securitized products, following a seasonally stronger 1Q14 for these businesses. We had significantly lower revenues from global credit products, driven by lower leveraged finance trading revenues. Securitized products revenues declined, as lower revenues across agency and non-agency securities and mortgage servicing offset continued momentum in our leading asset finance franchise. We also had lower results from global macro products, as weakness in foreign exchange and commodities more than offset higher rates revenues in the US and Europe. These decreases were partially offset by significantly improved emerging markets results due to improved trading conditions across regions and higher financing activity.

#### Equity sales and trading

**YoY: Down 18% from CHF 1,368 million to CHF 1,119 million**

The decrease was driven by less favorable trading conditions, specifically a low volatility and low volume environment, resulting in reduced client activity. We had substantially lower revenues from systematic market making, reflecting significantly less favorable trading conditions compared to 2Q13, which included the positive impact of quantitative easing in Japan. We also had lower derivatives revenues, as a significant decline in volatility resulted in weaker client activity, particularly in our US flow businesses, and 2Q13 results benefitted from strong performance in Asia and the US. Cash equities revenues declined significantly, as reduced commission revenues, reflecting lower global market volumes, more than offset market share gains in the US. We had solid prime services results, reflecting continued market leadership, increased activity in Europe and growth in client clearing services.

**QoQ: Down 7% from CHF 1,207 million to CHF 1,119 million**

The decline was primarily driven by lower derivatives revenues following a strong 1Q14 performance. We also had lower results from systematic market making, driven by less favorable trading conditions. Cash equities revenues were higher, reflecting improved trading conditions in Latin America. We also had solid results in prime services, driven by increased revenues from the European dividend season.

### Operating expenses

#### Compensation and benefits

**YoY: Up 3% from CHF 1,438 million to CHF 1,476 million**

Compensation and benefits increased, driven by higher deferred compensation expense, as new award accruals more than offset roll-offs from prior year awards. We also had higher discretionary compensation expense, reflecting a change in the variable compensation accrual methodology.

**QoQ: Stable at CHF 1,476 million**

We had lower deferred compensation expense from prior-year awards and lower discretionary compensation expense. The decreases were offset by higher employee benefits and higher salaries.

#### General and administrative expenses

**YoY: Down 9% from CHF 758 million to CHF 688 million**

The decrease was driven by lower technology costs and lower UK bank levy expenses.

**QoQ: Down 6% from CHF 735 million to CHF 688 million**

The decrease was driven by lower technology costs and lower UK bank levy expenses.

## Non-strategic results

### OVERVIEW

Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily non-exchange-cleared instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

In 2Q14, we continued the wind-down of the non-strategic unit, including the reduction of Basel III risk-weighted assets and Swiss leverage exposure. We reported a loss before taxes of CHF 282 million and net revenue losses of CHF 53 million. The smaller loss reflected portfolio net valuation gains and improved funding costs from proactive management of both our legacy debt instruments and trading assets. Total operating expenses increased compared to both 2Q13 and 1Q14, driven by higher litigation provisions.

As of the end of 2Q14, we reported Basel III risk-weighted assets of USD 13 billion, down USD 7 billion, or 35%, from 2Q13. Additionally, we have reduced Basel III risk-weighted assets by USD 6 billion, or 32%, from 1Q14. This compares to our risk-weighted assets target of USD 6 billion by year-end 2015. We reported Swiss leverage exposure of USD 72 billion, a reduction of USD 21 billion, or 23%, from 2Q13 and a reduction of USD 3 billion, or 4%, from 1Q14. This compares to our target of USD 24 billion in Swiss leverage exposure by year-end 2015.

The following provides a comparison of our non-strategic 2Q14 results versus 2Q13 (YoY) and versus 1Q14 (QoQ).

### Net revenues

**YoY: From CHF (204) million to CHF (53) million**

We had lower losses, reflecting net valuation gains in our portfolio and lower funding costs from proactive management of both our legacy debt instruments and trading assets.

**QoQ: From CHF (147) million to CHF (53) million**

We had lower losses, reflecting net valuation gains in our portfolio and lower funding costs from proactive management of both our legacy debt instruments and trading assets.

### Total operating expenses

**YoY: Up 10% from CHF 208 million to CHF 229 million**

The increase was driven by significantly higher litigation provisions, primarily in connection with mortgage-related matters.

**QoQ: Up 53% from CHF 150 million to CHF 229 million**

The increase was driven by significantly higher litigation provisions, primarily in connection with mortgage-related matters.

# Corporate Center

In 2Q14, we recorded a loss before taxes of CHF 373 million, primarily reflecting business realignment costs and IT architecture simplification expenses.

## RESULTS OVERVIEW

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Corporate Center separately presents non-strategic items, which management does not consider representative of our core performance. Such items include the valuation impacts from movements in credit spreads on our own liabilities carried at fair value, certain business realignment costs, IT architecture simplification expenses, certain litigation provisions, business wind-down costs and impairments not included in the divisional non-strategic units and legacy funding costs associated with non-Basel III compliant debt instruments not included in the results of the Investment Banking non-strategic unit.

In **2Q14**, losses before taxes of CHF 373 million increased 185% compared to 2Q13, mainly reflecting a fair value loss from movements in own credit spreads of CHF 10 million in 2Q14 compared to fair value gains of CHF 130 million in 2Q13. Fair value losses of CHF 29 million on own long-term vanilla debt reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. The higher losses in 2Q14 results also reflected higher IT architecture simplification expenses of CHF 81 million in 2Q14 compared to CHF 19 million in 2Q13.

1 Business realignment costs relating to divisional realignment costs are prospectively presented in the relevant divisional non-strategic results beginning in 4Q13.
2 Represents legacy funding costs associated with non-Basel III compliant debt instruments.
3 Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of ETF, secondary private equity and CFIG businesses and the announced sale of domestic private banking business booked in Germany.

## Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

# Assets under management

We had net asset inflows from continuing operations of CHF 10.7 billion during 2Q14 and assets under management from continuing operations of CHF 1,319.6 billion as of the end of 2Q14.

### Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic business are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

Assets under management from continuing operations of CHF 1,319.6 billion increased CHF 38.5 billion or 3.0% compared to the end of 1Q14, driven mainly by positive market movements, net new assets and favorable foreign exchange-related movements. Compared to the end of 2Q13, assets under management from continuing operations were CHF 74.2 billion higher, primarily reflecting positive market movements and net new assets of CHF 38.4 billion, partially offset by adverse foreign exchange-related movements.

▸ Refer to “Private Banking & Wealth Management” in I – Credit Suisse results and “Note 37 – Assets under management” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

[1] Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic businesses.

### Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

### Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management. Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

We recorded net new assets from continuing operations of CHF 10.7 billion in 2Q14.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 7.4 billion in 2Q14 with continued strong inflows from emerging markets, particularly in Asia Pacific, and Switzerland, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 0.6 billion in 2Q14. Asset Management reported net new assets of CHF 4.1 billion in 2Q14, driven by inflows in traditional products, with substantial contributions from index strategies, and inflows from hedge funds and credit products. In our non-strategic portfolio, net asset outflows of CHF 1.7 billion reflected our exit of certain businesses, of which CHF 0.6 billion were classified as discontinued operations.

# II

# Treasury, risk, balance sheet and off-balance sheet

# Liquidity and funding management

During 2Q14, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

**Overview**

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Our internal liquidity risk management framework is subject to review and monitoring by the FINMA, other regulators and rating agencies.

▸ Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2013 for further information on liquidity and funding management.

**Liquidity risk management framework**

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

In December 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR).

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of the stock of high-quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and, once it becomes effective, should always be at least 100%.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as one of our primary tools, in parallel with the liquidity barometer, to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. We estimate that our NSFR under the current FINMA framework was approximately 100% as of the end of 2Q14. Our estimate is based on the definitions and methodologies outlined in the aforementioned BCBS Basel III international framework for liquidity risk measurement, standards and monitoring issued in December 2010, the Liquidity ordinance discussed below implementing the Basel III liquidity requirements into Swiss law, and other guidance and requirements of FINMA. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions which may not be consistent with those of other financial institutions or what may ultimately be required by the BCBS and FINMA. The NSFR is based on regulatory metrics, the disclosure of which is not yet required, and, as such, it represents a non-GAAP financial measure.

In January 2014, the BCBS issued final LCR rules and disclosure requirements that are to be implemented as part of banks' regular disclosures after January 1, 2015. The BCBS also proposed revisions to the NSFR, which are expected to become the minimum standard by the previously announced date of January 1, 2018.

In June 2014, the Swiss Federal Council approved proposed revisions to a liquidity ordinance, adopted in November 2012 (Liquidity ordinance), which requires Swiss banks to maintain a specified liquidity standard and implements Basel III liquidity requirements into Swiss law. The purpose of the revisions is to reflect the final Basel III LCR rules in the Liquidity ordinance. Pursuant to the revisions, all Swiss banks will be subject to an LCR requirement. Systemically relevant banks like us will be subject to an initial minimum LCR requirement of 100% beginning on January 1, 2015, while other banks will be subject to an initial 60% LCR requirement, with incremental increases by 10% per year until January 1, 2019. The revisions will enter into force on January 1, 2015. Following these revisions, beginning in 2Q14 the majority of the balance sheet usage related to a portfolio of high-quality liquid assets managed by our Treasury function and previously recorded in the Corporate Center has been allocated to the business divisions to allow for a more efficient management of their business activities from an overall Group perspective with respect to LCR and Swiss leverage requirements arising from the portfolio of assets. Prior periods have been restated for the related impact on assets and Swiss leverage exposures.

Our revised liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

### Funding sources and uses

We fund our balance sheet primarily through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency, tenor, geography and maturity, and whether they are secured or unsecured. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

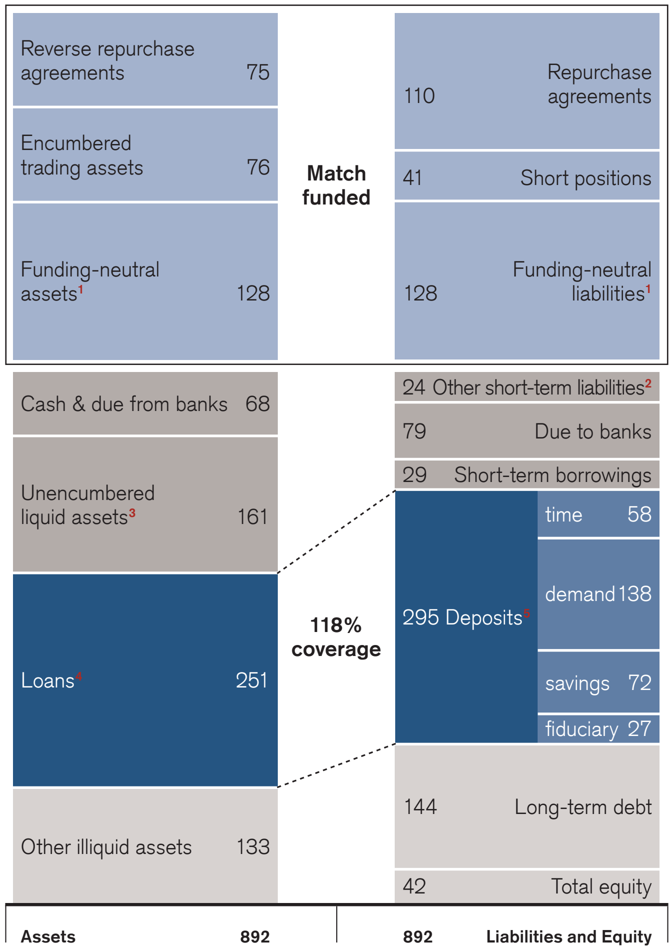
Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

These assets include our liquidity pool, which as of the end of 2Q14 based on our internal model was CHF 153 billion, net of a stress test level haircut. The liquidity pool consisted of CHF 47 billion of cash held at major central banks, primarily the Fed, SNB and the ECB, CHF 70 billion of securities issued by governments and government agencies, primarily of the US, Britain and France and CHF 36 billion of other highly liquid assets including equity securities that form part of major indices. As of June 30, 2014, our internal model included the application of a stress test level average haircut equal to approximately 35% of the market value of non-cash positions in the liquidity pool, a decrease compared to prior periods reflecting a refinement in the calculation through elimination of certain loan balances which had previously received a 100% haircut. The haircut reflects our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 18% as of the end of 2Q14 compared to 22% as of the end of 1Q14, reflecting a slight increase in loans and a slight decrease in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as a haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

### Balance sheet funding structure

as of June 30, 2014 (CHF billion)



[1] Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.
[2] Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.
[3] Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.
[4] Excludes loans with banks.
[5] Excludes due to banks and certificates of deposit.

Our core customer deposits totaled CHF 295 billion as of the end of 2Q14 compared to CHF 301 billion as of the end of 1Q14, reflecting a stable customer deposit base in Private Banking & Wealth Management. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

▸ Refer to the chart "Balance sheet funding structure" and "Balance sheet and off-balance sheet" for further information.

## Liquidity pool

| June 30, 2014 | Swiss franc | US dollar | Euro | Other currencies | Total |
|---|---|---|---|---|---|
| **Liquidity pool by currencies (CHF billion)** | | | | | |
| Cash held at central banks | 20.7 | 23.7 | 1.8 | 0.6 | 46.8 |
| Government bonds | 2.5 | 43.5 | 10.0 | 14.3 | 70.3 [1] |
| Fixed income securities | 1.6 | 7.0 | 0.6 | 5.4 | 14.6 |
| Liquid equity securities | - | 15.0 | - | 6.2 | 21.2 |
| **Total liquidy pool (based on internal model)** | **24.8** | **89.2** | **12.4** | **26.5** | **152.9** |

[1] Includes reverse repurchases of government bonds of CHF 24.6 billion.

### Debt issuances and redemptions

Our long-term debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

The table below provides information on long-term debt issuances, maturities and redemptions in 2Q14, excluding structured notes.

## Debt issuances and redemptions

| in 2Q14 | Senior | Subordinated | Long-term debt |
|---|---|---|---|
| **Long-term debt (CHF billion, notional value)** | | | |
| **Issuances** | **9.1** | **2.2** | **11.3** |
| of which unsecured | 9.1 | 2.2 | 11.3 |
| **Maturities / Redemptions** | **3.9** | **–** | **3.9** |
| of which unsecured | 3.8 | – | 3.8 |
| of which secured [1] | 0.1 | – | 0.1 |

Excludes structured notes.

[1] Includes covered bonds.

As of the end of 2Q14, we had outstanding long-term debt of CHF 144 billion, which included senior and subordinated instruments. We had CHF 41.7 billion and CHF 16.8 billion of structured notes and covered bonds outstanding, respectively, as of the end of 2Q14 compared to CHF 38.4 billion and CHF 16.9 billion, respectively, as of 1Q14.

‣ Refer to "Capital issuances and redemptions" in Capital management for information on issuances of capital notes, all of which constitute subordinated debt instruments.

As of the end of 2Q14, the weighted average maturity of long-term debt was 6.6 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Short-term borrowings increased 22% to CHF 29.4 billion as of the end of 2Q14 compared to CHF 24.2 billion in 1Q14.

### Credit ratings

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 1.2 billion, CHF 2.9 billion and CHF 4.0 billion, respectively, as of the end of 2Q14, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

As of the end of 2Q14, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

‣ Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Liquidity and funding management in the Credit Suisse Annual Report 2013 for further information.

# Capital management

As of the end of 2Q14, our CET1 ratio was 13.8% under Basel III and 9.5% on a look-through basis. Our RWA under Basel III were CHF 285.4 billion and our Swiss leverage ratio was 4.8%.

## REGULATORY CAPITAL FRAMEWORK

### Overview

Effective January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements). Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business.

References to phase-in and look-through included herein refer to Basel III capital requirements. Phase-in reflects that, for the years 2014 – 2018, there will be a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

‣ Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet and "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2013 for further information.

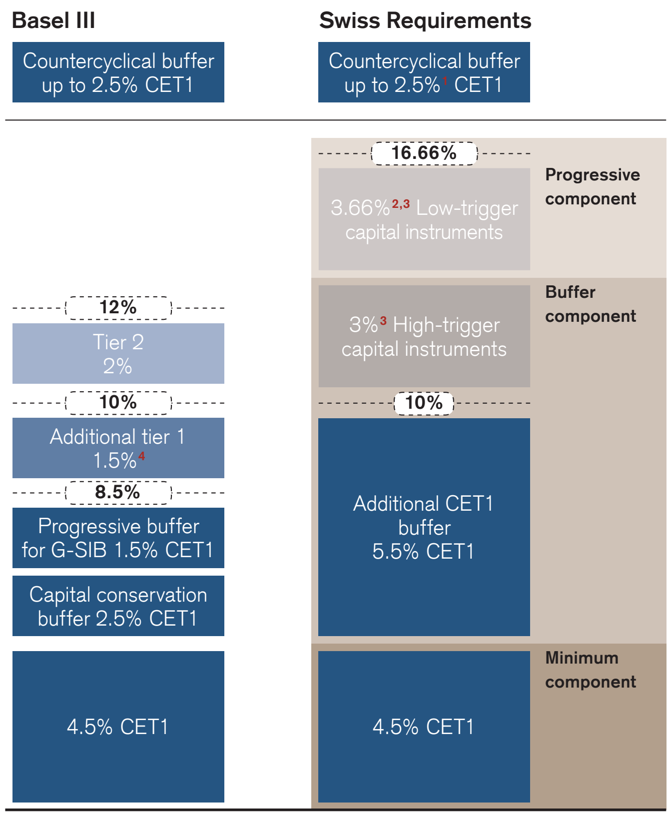
### Capital structure under Basel III

The BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

‣ Refer to the table "Basel III phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum common equity tier 1 (CET1) requirement is 4.5% of risk-weighted assets (RWA). In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress.

### Capital frameworks for Credit Suisse



[1] As of June 30, 2014, banks are required to hold CET1 capital in the amount of 2% of RWA pertaining to mortgage loans that finance residential property in Switzerland.
[2] The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2015, FINMA increased our 2019 progressive component requirement from 3.66% to 4.05% due to the latest assessment of relevant market shares.
[3] Counts towards Basel III minimum requirements as tier 1 or tier 2 capital depending on the quality of the underlying instruments.
[4] Additional tier 1 instruments must provide for principal loss absorption through a conversion into common equity or write-down feature. The trigger for such a conversion or write-down must include a CET1 ratio of at least 5.125%.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified us as a G-SIB and requires us to maintain a 1.5% progressive buffer.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital. To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125%.

## Basel III phase-in requirements for Credit Suisse

| Effective January 1, for the applicable year | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |
|---|---|---|---|---|---|---|
| **Capital ratios** | | | | | | |
| CET1 | 4.0% [1] | 4.5% | 4.5% | 4.5% | 4.5% | 4.5% |
| Capital conservation buffer | | | 0.625% [1] | 1.250% [1] | 1.875% [1] | 2.5% |
| Progressive buffer for G-SIB | | | 0.375% [1] | 0.750% [1] | 1.125% [1] | 1.5% |
| **Total CET1** | **4.0%** | **4.5%** | **5.5%** | **6.5%** | **7.5%** | **8.5%** |
| Additional tier 1 | 1.5% | 1.5% | 1.5% | 1.5% | 1.5% | 1.5% |
| **Total tier 1** | **5.5%** | **6.0%** | **7.0%** | **8.0%** | **9.0%** | **10.0%** |
| Tier 2 | 2.5% [1] | 2.0% | 2.0% | 2.0% | 2.0% | 2.0% |
| **Total capital** | **8.0%** | **8.0%** | **9.0%** | **10.0%** | **11.0%** | **12.0%** |
| Phase-in deductions from CET1 [2] | 20.0% [1] | 40.0% [1] | 60.0% [1] | 80.0% [1] | 100.0% | 100.0% |
| Capital instruments subject to phase-out | Phased out over a 10-year horizon beginning 2013 through 2022 | | | | | |

[1] Indicates phase-in period.
[2] Includes goodwill, other intangible assets, certain deferred tax assets and participations in financial institutions.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1 or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through January 1, 2019.

Capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out.

### Swiss Requirements

The legislation implementing the Basel III framework in Switzerland in respect of capital requirements for systemically relevant banks goes beyond Basel III's minimum standards, including requiring us, as a systemically relevant bank, to have the following minimum, buffer and progressive components.

▸ Refer to "Swiss Requirements" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2013 for further information.

▸ Refer to the chart "Swiss capital and leverage ratio phase-in requirements for Credit Suisse" for Swiss capital requirements and applicable effective dates during the phase-in period.

The minimum requirement of CET1 capital is 4.5% of RWA.

The buffer requirement is 8.5% and can be met with additional CET1 capital of 5.5% of RWA and a maximum of 3% of high-trigger capital instruments. High-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below 7%.

The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business. Effective in 2014, FINMA set our progressive component requirement at 3.66% for 2019. On July 28, 2014, FINMA notified us that, effective in 2015, the progressive component requirement for 2019 will be increased from 3.66% to 4.05% due to the latest assessment of relevant market shares. The progressive component requirement may be met with CET1 capital or low-trigger capital instruments. In order to qualify, low-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below a specified percentage, the lowest of which may be 5%. In addition, until the end of 2017, the progressive component requirement may also be met with high-trigger capital instruments. Both high and low-trigger capital instruments must comply with the Basel III minimum requirements for tier 2 capital (including subordination, point-of-non-viability loss absorption and minimum maturity).

Similar to Basel III, the Swiss Requirements include a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth. Effective September 2013, the buffer was activated and initially required banks to hold CET1 capital in the amount of 1% of their RWA pertaining to mortgages that finance residential property in Switzerland. In January 2014, upon the request of SNB, the Swiss

Federal Council increased the countercyclical buffer from 1% to 2%, effective June 30, 2014. As of the end of 2Q14, our countercyclical buffer was CHF 299 million, which is equivalent to an additional requirement of 0.10% of CET1 capital.

In 2013, FINMA introduced increased capital charges for mortgages that finance owner occupied residential property in Switzerland (mortgage multiplier) to be phased in through January 1, 2019. The mortgage multiplier applies for purposes of both Bank for International Settlements (BIS) and FINMA requirements.

In December 2013, FINMA issued a decree (FINMA Decree) specifying capital adequacy requirements for the Bank, on a standalone basis (Bank parent company), and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions.

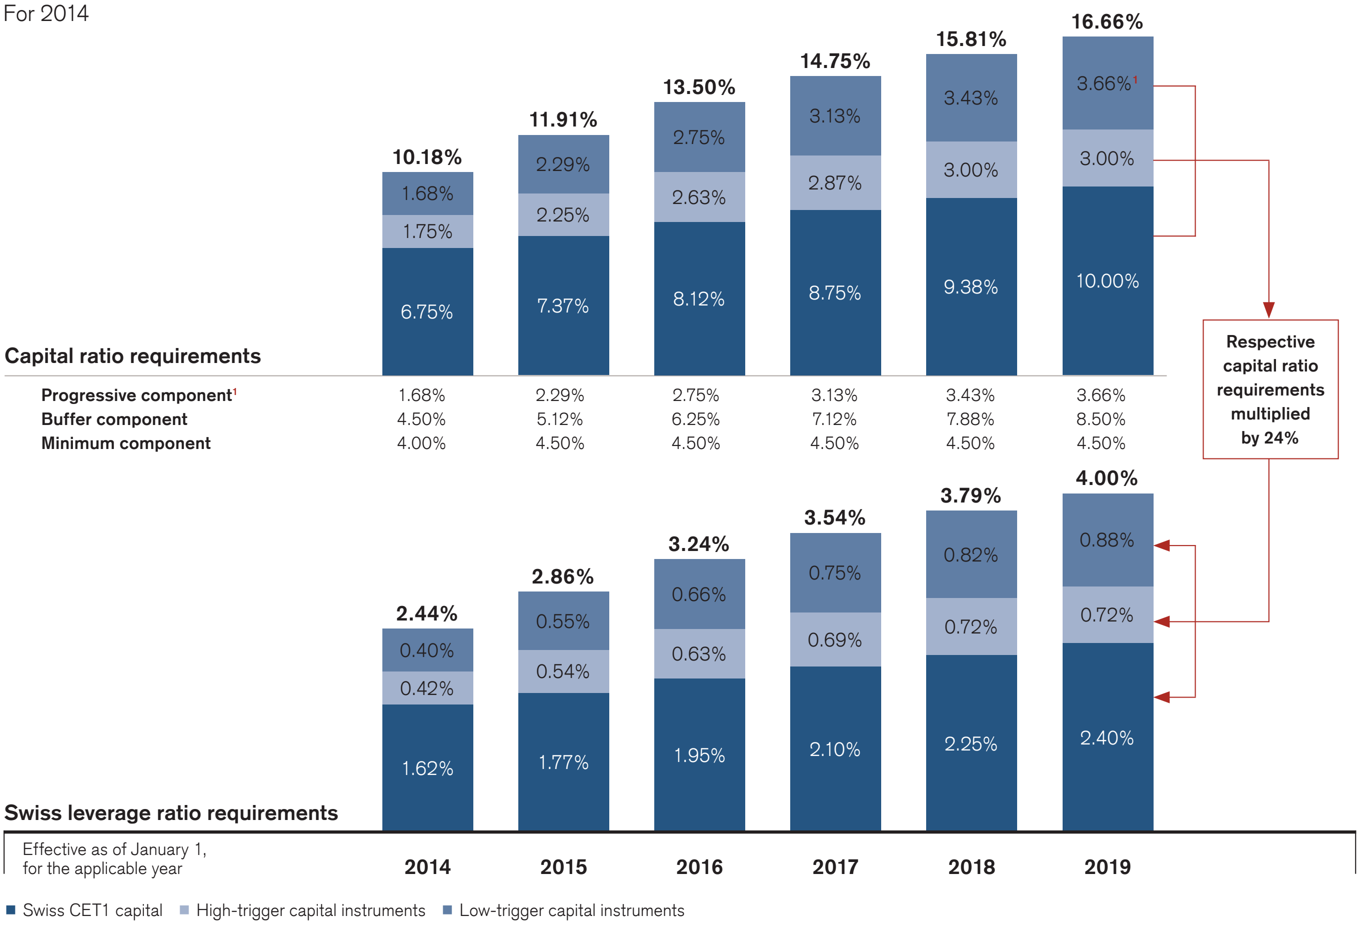
▸ Refer to “Capital management” in II – Treasury, risk, balance sheet and off-balance sheet in the Financial Report 1Q14 for further information on the FINMA Decree.

Beginning in 1Q14, we adjusted the presentation of our Swiss capital metrics and terminology and we now refer to Swiss Core Capital as Swiss CET1 capital and Swiss Total Capital as Swiss total eligible capital. Swiss Total Capital previously reflected the tier 1 participation securities, which were fully redeemed in 1Q14. Swiss CET1 capital consists of BIS CET1 capital and certain other Swiss adjustments. Swiss total eligible capital consists of Swiss CET1 capital, high-trigger capital instruments, low-trigger capital instruments and additional tier 1 instruments and tier 2 instruments subject to phase-out and phase-in deductions from CET1.

We must also comply with a leverage ratio applicable to Swiss systemically relevant banks (Swiss leverage ratio). This leverage ratio must be at least 24% of each of the respective minimum, buffer and progressive component requirements. Since the ratio is defined by reference to capital requirements subject to phase-in arrangements, the ratio will also be phased in.

## Swiss capital and leverage ratio phase-in requirements for Credit Suisse

For 2014



Excludes countercyclical buffer that was required as of September 30, 2013.

[1] The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2015, FINMA increased our 2019 progressive component requirement from 3.66% to 4.05% due to the latest assessment of relevant market shares, which leads to a total capital ratio requirement of 17.05% and a Swiss leverage ratio requirement of 4.09%.

### Risk measurement models

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge (IRC), stressed Value-at-Risk (VaR), risks not in VaR, comprehensive risk measure framework and advanced credit valuation adjustment (CVA).

FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period. In 2Q14, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

▸ Refer to “Risk measurement models” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2013 for further information.

▸ Refer to “Market risk” in Risk management for further information on Credit Suisse’s risk measurement models and backtesting exceptions.

## REGULATORY DEVELOPMENTS AND PROPOSALS

In June 2014, FINMA released a draft circular regarding the implementation of the leverage ratio requirements in Switzerland in response to the BCBS publication of the framework and disclosure requirements for the Basel III leverage ratio. The required Basel III leverage ratio, which seeks to measure tier 1 capital against exposure, is expected to be at least 3%. Although the effective date of the Basel III leverage ratio is not until 2018, banks will be required to disclose the ratio on a consolidated basis beginning in 2015, subject to implementation by national regulators.

In April 2014, the BCBS finalized its large exposures framework standard, with implementation required by January 1, 2019. The standard calls for a limit on all of a bank’s exposures to a single counterparty. In the case of G-SIBs like us, the limit is 15% of tier 1 capital.

Also in April 2014, the BCBS published its final standard for the capital treatment of bank exposures to central counterparties. Disclosure requirements will be effective in January 2017. The standard introduces a cap on capital charges applied to bank exposures to qualifying central counterparties.

In accordance with BCBS’s G-SIB loss absorbency requirements and FINMA’s capital adequacy disclosure requirements, banks with a balance sheet exceeding EUR 200 billion must publish annually 12 financial indicators, such as size and complexity. Depending on these financial indicators, the FSB will set the progressive buffer for G-SIBs. The reporting requirement became effective December 31, 2013 and we included the required disclosures as of such date on our web site as required before April 30, 2014.

## CAPITAL ISSUANCES AND REDEMPTIONS

In June 2014, we issued USD 2.5 billion 6.25% tier 1 capital notes.

### Higher Trigger Capital Amount

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert or be written down prior to the write down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion or write down is referred to as the Higher Trigger Capital Amount.

With respect to the capital instruments that specify a 5.125% trigger event if the CET1 ratio were to fall below 5.125%, the Higher Trigger Capital Amount was CHF 8.3 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 2.9%, both as of the end of 2Q14.

With respect to the capital instruments that specify a 5% trigger event if the CET1 ratio were to fall below 5%, the Higher Trigger Capital Amount was CHF 12.8 billion and the Higher Trigger Capital Ratio was 4.5%, both as of the end of 2Q14.

▸ Refer to the table “BIS statistics – Basel III – Group” for further information on the BIS statistics used to calculate such measures.

▸ Refer to “Capital issuances and redemptions” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2013 for further information on Higher Trigger Capital Amount.

## BIS CAPITAL METRICS

### Regulatory capital and ratios

Our CET1 ratio was 13.8% as of the end of 2Q14, compared to 14.3% as of the end of 1Q14, reflecting a decrease in CET1 capital. Our tier 1 ratio was 16.0% as of the end of 2Q14, compared to 15.6% as of the end of 1Q14. Our total capital ratio increased to 19.5% as of the end of 2Q14 compared to 19.1% as of the end of 1Q14.

CET1 capital was CHF 39.5 billion as of the end of 2Q14 compared to CHF 40.9 billion as of the end of 1Q14, mainly reflecting the net loss and the net effect of share-based compensation. CET1 capital was also impacted by a quarterly dividend accrual.

Additional tier 1 capital increased to CHF 6.1 billion, mainly due to the issuance of the USD 2.5 billion 6.25% tier 1 capital notes in June 2014. Tier 2 capital increased slightly to CHF 10.1 billion as of the end of 2Q14.

Total eligible capital was CHF 55.6 billion as of the end of 2Q14 compared to CHF 54.6 billion as of the end of 1Q14, reflecting the increase in additional tier 1 capital, partially offset by the decrease in CET1 capital.

We reported a look-through CET1 ratio of 9.5% as of the end of 2Q14, compared to a year-end target of 10.0% and a long-term target of 11.0%. As of the end of 2Q14, the look-through total capital ratio was 15.4%, compared to 15.1% as of the end of 1Q14.

[1] Reflects the net effect of share-based compensation, a dividend accrual and a change in other regulatory adjustments.

### Other regulatory disclosures

In connection with the implementation of Basel III, additional regulatory disclosures are required. Additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base of the Group, G-SIB financial indicators, subsidiary regulatory reporting, reconciliation requirements, Pillar 3 disclosures and additional capital disclosures for the Bank parent company can be found on our website.

▸ Refer to https://www.credit-suisse.com/investors/en/regulatory_disclosures/index.jsp for additional information.

### Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as market, credit, operational and non-counterparty risk RWA. When assessing RWA, it is not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in credit risk RWA. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty risk RWA primarily reflect the capital requirements for our premises and equipment.

[1] Represents changes in portfolio size.
[2] Represents changes in average risk weighting across credit risk classes.
[3] Represents movements arising from updates to models and recalibrations of parameters.
[4] Represents internal changes impacting how exposures are treated.
[5] Represents externally prescribed regulatory changes impacting how exposures are treated.

RWA were stable at CHF 285.4 billion as of the end of 2Q14, reflecting a decrease in credit risk related to CVA and market risk largely offset by increases in credit risk (excluding CVA) and operational risk and an increase resulting from foreign exchange translation.

The decrease in **credit risk related to CVA** was primarily driven by decreases in risk levels within Investment Banking. Decreases in book size resulted from increased hedging and changes in book quality from credit spread tightening.

The decrease in **market risk** was driven by decreases relating to model and parameter updates, internal methodology changes and movements in risk levels. The decrease resulting from model and parameters was due to market data updates for stress spreads within Investment Banking. Methodology impacts were primarily driven by updates to the IRC rating migration approach. Movements in risk levels were driven by a decrease in Private Banking & Wealth Management resulting from lower stressed VaR and IRC within our securities trading business in Switzerland. Risk levels in Investment Banking were stable reflecting increases in VaR, offset by decreases in trading book securitization exposures.

The increase in **credit risk (excluding CVA)** was driven by increases from internal methodology changes partially offset by decreases in credit risk levels. Methodology changes were mainly due to the removal of initial margin benefits pending enhancements to the derivatives model in Investment Banking. The increase in credit risk levels attributed to book size was driven by increases in Private Banking & Wealth Management due to investments in asset management firms. This was partially offset by decreases in Investment Banking, which was primarily driven by the securitization of an over-the-counter (OTC) derivatives portfolio, offset by increases in lending predominantly within global credit products. The decrease in credit risk levels attributed to book quality was driven by Investment Banking resulting from decreases in average risk weighting for lending across emerging markets and leverage financing.

The increase in **operational risk** resulted from model parameter updates relating to the recent settlements of the previously outstanding FHFA and US cross-border matters. This was partially offset by internal methodology updates resulting from an agreement with FINMA to remove the limitation it had set on the capital benefit for insurance-based risk transfer. Operational risk was also impacted by external methodology updates which resulted in a decrease in the add-on component of the capital related to the aggregate range of reasonably possible litigation losses due to the reduction in the maximum value of this range.

## SWISS CAPITAL METRICS

### Swiss regulatory capital and ratios

▸ Refer to "Swiss Requirements" for further information on Swiss regulatory requirements.

As of the end of 2Q14, our Swiss CET1 capital and Swiss total capital ratios were 13.7% and 19.4%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.75% and 10.18%, respectively.

On a look-through basis, our Swiss CET1 capital was CHF 26.2 billion and our Swiss CET1 ratio was 9.4% as of the end of 2Q14. Our Swiss total eligible capital was CHF 42.9 billion and our Swiss total capital ratio was 15.3% as of the end of 2Q14, each on a look-through basis.

[2] Excludes countercyclical buffer that was required as of September 30, 2013.

### Swiss leverage ratio

The Swiss leverage ratio is calculated as Swiss total eligible capital, divided by a three-month average exposure, which consists of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments, including cash collateral netting reversals and derivative add-ons. As of the end of 2Q14, our Swiss leverage ratio was 4.8% and the total average exposure was CHF 1,159.2 billion. As of the end of 2Q14, our total exposure was CHF 1,156 billion, compared to our long-term target of approximately CHF 1,000 billion.

The Group's look-through Swiss leverage ratio was 3.7% as of the end of 2Q14, compared to the 4% requirement for 2019, reflecting our progressive component requirement for 2014.

## Swiss leverage ratio – Group

Rounding differences may occur.
[1] The leverage requirements are based on a percentage of total average exposure.

### Total shareholders' equity

Our total shareholders' equity decreased to CHF 40.9 billion as of the end of 2Q14 compared to CHF 43.2 billion as of the end of 1Q14. Total shareholders' equity was negatively impacted by dividend payments, transactions relating to the settlement of share-based compensation awards and the net loss. These movements were partially offset by the increases to the share-based compensation obligation and the impact of foreign exchange-related movements on cumulative translation adjustments.

▸ Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

## Capital

| **Tangible book value per share** [1] | **20.45** | **22.08** | **21.34** | (7) |

[1] Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

# Risk management

In 2Q14, overall position risk increased 10%, utilized economic capital increased 3%, average risk management VaR in US dollars decreased 2% and gross impaired loans were stable at CHF 1.5 billion.

## ECONOMIC CAPITAL AND POSITION RISK

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is our core Group-wide risk management tool for measuring and reporting all quantifiable risks. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating).

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of methodology changes, prior-period balances are restated in order to show meaningful trends.

In 2Q14, we made an enhancement to the position risk methodology for risk management purposes. For fixed income trading, we improved the aggregation of trading risks by aligning the time series' lengths among developed and emerging markets trading risks, and by using implicit correlations instead of an assumed fixed correlation. The net impact of this methodology change on position risk for the Group as of the end of 1Q14 was a decrease of CHF 248 million, or 2.2%.

For utilized economic capital used for capital management purposes, in addition to adopting the above position risk methodology change, we updated insurance policy parameters in our operational risk model. The net impact of the methodology changes on utilized economic capital for the Group as of the end of 1Q14 was a decrease of CHF 571 million, or 1.8%.

▸ Refer to "Economic capital and position risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information on economic capital and position risk.

▸ Refer to "Operational risk" for further information on the revised advanced measurement approach (AMA) model to calculate the regulatory capital requirement for operational risk.

### Key position risk trends

Position risk for risk management purposes as of the end of 2Q14 increased 10% compared to the end of 1Q14, mainly due to increased traded credit spread exposures in fixed income trading. Higher emerging markets country event risk was driven by increased exposures in Latin America. Higher risk in real estate & structured assets was mainly related to an increase in residential mortgage-backed securities (RMBS) exposures. Higher international lending & counterparty exposures were mainly due to increased counterparty risk in Investment Banking.

## Position risk

| | | | | end of | | | % change |
|---|---|---|---|---|---|---|---|
| | **2Q14** | 1Q14 | 4Q13 | 2Q13 | QoQ | Ytd | YoY |

| **Position risk (99% confidence level for risk management purposes)** | **12,023** | **10,919** | **11,364** | **11,685** | 10 | 6 | 3 |

Prior-period balances have been restated for methodology changes in order to show meaningful trends.
1 This category comprises fixed income trading, foreign exchange and commodity exposures.
2 This category comprises commercial and residential real estate (including RMBS and CMBS), asset-backed securities exposure, real estate acquired at auction and real estate fund investments.
3 Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Compared to the end of 2Q13, position risk for risk management purposes increased 3%. Excluding the US dollar translation impact, position risk increased 9%, mainly due to higher risk in fixed income trading, primarily from traded credit spread exposures, as well as increased counterparty risk and new loan commitments in Investment Banking in international lending & counterparty exposures.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

| Investment Banking | 19,872 | 19,538 | 18,910 | 19,362 | 2 | 5 | 3 |
| Corporate Center [3] | 2,190 | 2,220 | 2,250 | 2,254 | (1) | (3) | (3) |
| **Average utilized economic capital – Credit Suisse [5]** | **31,322** | **31,092** | **30,604** | **31,452** | 1 | 2 | 0 |

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

1 Includes primarily high-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to Look-through CET1 capital to enable comparison between economic capital utilization and economic capital resources under the Basel III framework.

2 Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain methodology changes planned for 2014.

3 Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital.

4 Includes a diversification benefit of CHF 20 million, CHF 20 million, CHF 20 million and CHF 21 million as of the end of 2Q14, 1Q14, 4Q13 and 2Q13, respectively.

5 Includes a diversification benefit of CHF 20 million, CHF 20 million, CHF 20 million and CHF 20 million as of the end of 2Q14, 1Q14, 4Q13 and 2Q13, respectively.

**Utilized economic capital trends**

In 2Q14, our utilized economic capital increased 3%, mainly due to higher position risk, primarily in Investment Banking, partially offset by decreased share-based compensation in both business divisions and the Corporate Center.

For Private Banking & Wealth Management, utilized economic capital decreased 1%. Excluding the US dollar translation impact, utilized economic capital decreased 2%, mainly due to reductions in deferred share-based compensation awards and owned real estate risk in other risks, partially offset by higher operational risk and increased position risk in private banking corporate & retail lending.

For Investment Banking, utilized economic capital increased 5%, mainly due to increased position risk in fixed income trading, partially offset by decreased deferred share-based compensation awards in other risks.

For Corporate Center, utilized economic capital decreased 1%, mainly due to slightly decreased deferred share-based compensation awards in other risks.

## MARKET RISK

**Trading portfolios**

We primarily assume market risk through the trading activities in Investment Banking. Private Banking & Wealth Management also engages in trading activities, but to a much lesser extent. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products (some of which are customized transactions using combinations of derivatives and executed to meet specific client or proprietary needs). As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations. Risks associated with the embedded derivative elements of our structured products are actively monitored and managed on a portfolio basis as part of our overall trading portfolio and are reflected in our VaR measures.

Trading risks are measured using VaR along with a number of other risk measurement tools. VaR measures the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon at a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no abrupt changes in market conditions. We use risk management VaR for internal risk management purposes and regulatory VaR for regulatory capital purposes. For risk management VaR, we use a one-day holding period and a 98% confidence level. This means there is a 1-in-50 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. For regulatory VaR, we present one-day, 99% VaR, which is a ten-day VaR adjusted to a one-day holding period. Our VaR methodology is the same for both VaR measures, except for the confidence levels and holding periods. Other tools, including stress testing, are more appropriate for modeling the impact from severe market conditions.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 2Q14, there were no material changes to the VaR methodology.

For regulatory capital purposes, we operate under the Basel III market risk framework which includes an IRC, stressed VaR and, since January 1, 2013, consideration of the impact of changes in a counterparty's credit spreads (also known as CVA).

▸ Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information.

In order to show the aggregate market risk in our trading books, the chart entitled "Daily risk management VaR" shows the trading-related market risk on a consolidated basis.

We measure VaR in US dollars, as substantially all market risk relates to Investment Banking.

Average risk management VaR decreased 2% to USD 45 million from 1Q14, driven by reductions in equity and foreign exchange exposures. Compared to 2Q13, average risk management VaR increased 7% due to an increase in equity exposures and reduced portfolio diversification benefit, partially offset by reduced interest rate and credit spread exposures.

Period-end risk management VaR increased 11% to USD 52 million from 1Q14, mainly reflecting increased equity exposures. Compared to 2Q13, period-end risk management VaR increased 53%, mainly reflecting increased equity, credit spread and foreign exchange exposures and reduced portfolio diversification benefit.

## One-day, 98% risk management VaR and one-day, 99% regulatory VaR (CHF)

| | | | | | | | Risk management VaR (98%) | Regulatory VaR (99%) |
|---|---|---|---|---|---|---|---|---|
| in / end of | Interest rate | Credit spread | Foreign exchange | Commodity | Equity | Diversi-fication benefit | **Total** | **Total** |
| **2Q14 (CHF million)** | | | | | | | | |
| Average | 13 | 30 | 8 | 2 | 16 | (29) | 40 | 30 |
| Minimum | 11 | 28 | 5 | 1 | 13 | – [1] | 35 | 25 |
| Maximum | 16 | 33 | 12 | 3 | 22 | – [1] | 46 | 36 |
| End of period | 12 | 32 | 7 | 2 | 20 | (27) | 46 | 31 |
| **1Q14 (CHF million)** | | | | | | | | |
| Average | 13 | 31 | 10 | 3 | 19 | (35) | 41 | 35 |
| Minimum | 9 | 29 | 5 | 1 | 14 | – [1] | 36 | 26 |
| Maximum | 17 | 33 | 17 | 4 | 24 | – [1] | 46 | 45 |
| End of period | 14 | 31 | 9 | 2 | 15 | (29) | 42 | 34 |
| **2Q13 (CHF million)** | | | | | | | | |
| Average | 22 | 36 | 9 | 3 | 15 | (45) | 40 | 42 |
| Minimum | 14 | 30 | 6 | 1 | 12 | – [1] | 33 | 32 |
| Maximum | 36 | 41 | 15 | 3 | 18 | – [1] | 50 | 54 |
| End of period | 14 | 30 | 6 | 3 | 15 | (35) | 33 | 32 |

Excludes risks associated with counterparty and own credit exposures.
[1] As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

## One-day, 98% risk management VaR and one-day, 99% regulatory VaR (USD)

| | | | | | | | Risk management VaR (98%) | Regulatory VaR (99%) |
|---|---|---|---|---|---|---|---|---|
| in / end of | Interest rate | Credit spread | Foreign exchange | Commodity | Equity | Diversi-fication benefit | **Total** | **Total** |
| **2Q14 (USD million)** | | | | | | | | |
| Average | 14 | 34 | 9 | 2 | 18 | (32) | 45 | 34 |
| Minimum | 12 | 31 | 6 | 1 | 15 | – [1] | 40 | 28 |
| Maximum | 18 | 37 | 14 | 3 | 24 | – [1] | 52 | 41 |

| **1Q14 (USD million)** | | | | | | | | |
| Average | 14 | 35 | 12 | 3 | 21 | (39) | 46 | 40 |
| Minimum | 10 | 33 | 6 | 1 | 15 | – [1] | 41 | 28 |
| Maximum | 19 | 37 | 19 | 5 | 27 | – [1] | 52 | 51 |
| End of period | 16 | 35 | 10 | 2 | 17 | (33) | 47 | 38 |
| **2Q13 (USD million)** | | | | | | | | |
| Average | 23 | 38 | 10 | 3 | 16 | (48) | 42 | 45 |
| Minimum | 15 | 32 | 6 | 2 | 12 | – [1] | 34 | 33 |
| Maximum | 37 | 43 | 16 | 4 | 19 | – [1] | 51 | 55 |
| End of period | 15 | 32 | 6 | 3 | 16 | (38) | 34 | 34 |

Excludes risks associated with counterparty and own credit exposures.
[1] As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

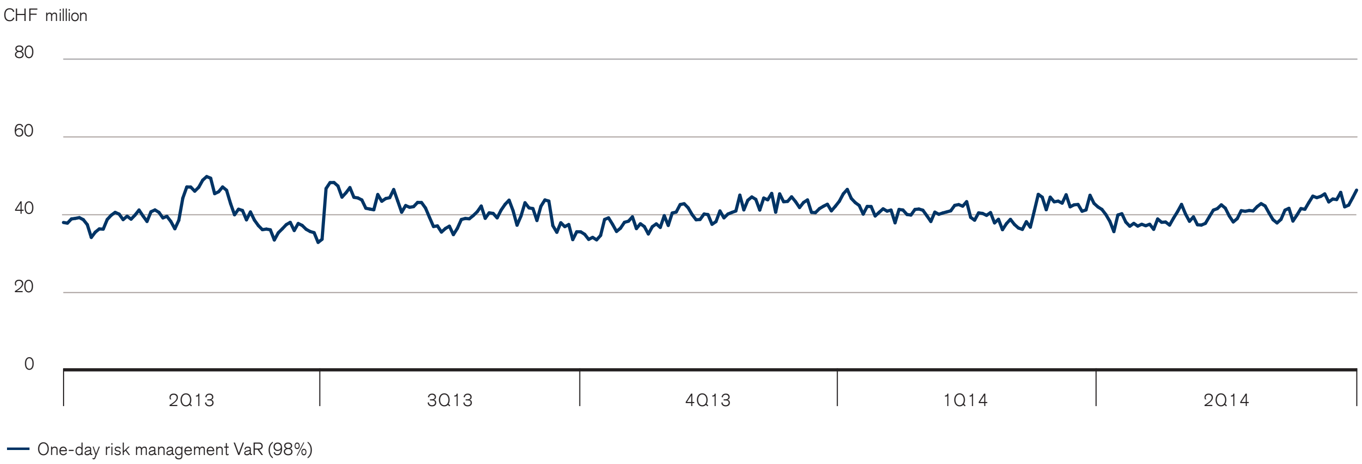
Various techniques are used to assess the accuracy of the regulatory VaR model used for trading portfolios, including backtesting. We conduct such backtesting using actual daily trading revenues. Actual daily trading revenues are compared with a regulatory 99% VaR calculated using a one-day holding period. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. We had no such backtesting exceptions in 2Q14 and in the 12-month-period through 2Q14. Since there were fewer than five backtesting exceptions in the rolling 12-month period through 2Q14, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR exception over four in the prior rolling 12-month period calculated using a subset of actual daily trading revenues.

▸ Refer to “Risk measurement models” in Capital management – Regulatory capital framework for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

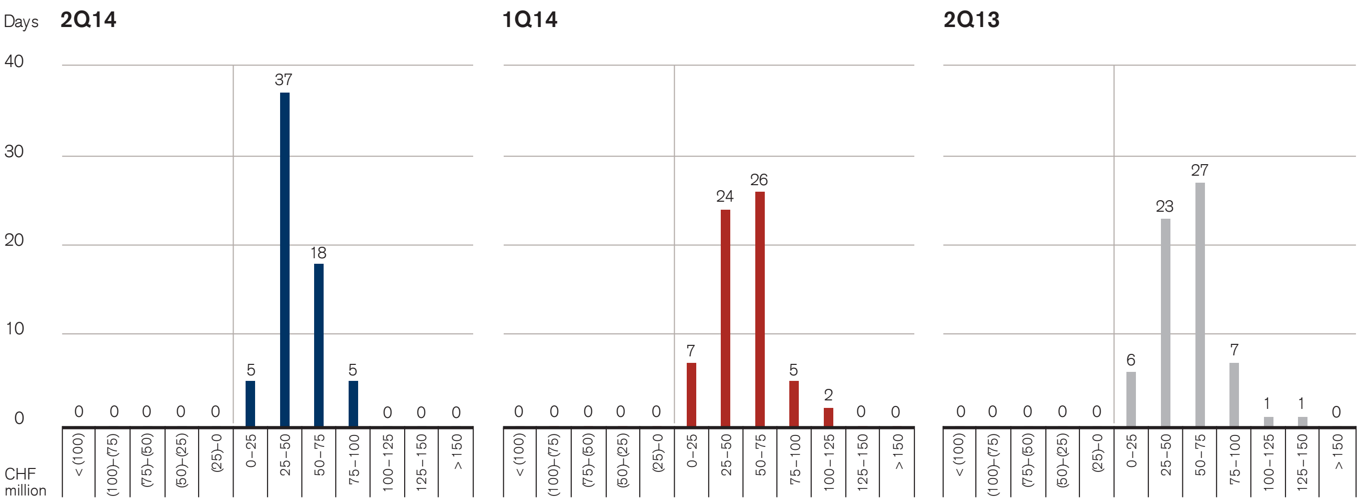
The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 2Q14 with those for 1Q14 and 2Q13. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 2Q14 and 1Q14, we had no trading loss days.

## Daily risk management VaR



Excludes risks associated with counterparty and own credit exposures.

## Actual daily trading revenues



Excludes Neue Aargauer Bank.
Trading revenues do not include valuation adjustments associated with counterparty and own credit exposures.

### Banking portfolios

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking & Wealth Management and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking & Wealth Management to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and certain other areas of the Group running interest rate risk positions actively manage the positions within approved limits. This risk is monitored on a daily basis.

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have amounted to a valuation increase of CHF 5.1 million as of the end of 2Q14, compared to a valuation increase of CHF 6.9 million as of the end of 1Q14.

## CREDIT RISK

Credit risk is the possibility of a loss being incurred by us as the result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a customer default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, or the restructuring of the debtor company. A change in the credit quality of a counterparty has an impact on the valuation of assets eligible for fair value measurement, with valuation changes recorded in the consolidated statements of operations.

### Sources of credit risk

The majority of our credit risk is concentrated in the Wealth Management Clients and Corporate & Institutional Clients businesses within the Private Banking & Wealth Management division and in the Investment Banking division. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions.

Our regular review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment. We regularly review the appropriateness of allowances for credit losses. Changes in the credit quality of counterparties of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance.

▸ Refer to “Credit risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information on credit risk.

▸ Refer to “Note 27 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information on counterparty credit risk.

### Credit risk overview

The following table represents credit risk from loans, irrevocable loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable securities or credit hedges. Irrevocable loan commitments include irrevocable credit facilities for Investment Banking and Private Banking & Wealth Management, but do not include unused credit limits which can be revoked at our sole discretion upon notice to the client.

[1] Includes Corporate Center, in addition to Private Banking & Wealth Management and Investment Banking.
[2] Prior period has been corrected to reclassify certain counterparty exposures from real estate and commercial and industrial loans to loans to financial institutions and from governments and public institutions to commercial and industrial loans, respectively.
[3] Includes loans secured by financial collateral and mortgages. The value of financial collateral and mortgages, considered up to the amount of the related loans, was CHF 72,316 million, CHF 70,566 million and CHF 66,934 million as of the end of 2Q14, 1Q14 and 2Q13, respectively.
[4] Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value.
[5] Prior period has been corrected to reclassify a counterparty exposure from potential problem loans to restructured loans.
[6] Excludes loans carried at fair value.

### Loan exposure

Compared to the end of 1Q14, gross loans increased CHF 3.8 billion to CHF 255.5 billion. In Private Banking & Wealth Management, gross loans were CHF 226.0 billion, up CHF 4.2 billion from 1Q14, reflecting increased lending driven by commercial and industrial loans, loans collateralized by securities and residential mortgages. Gross loans in Investment Banking decreased CHF 0.3 billion to CHF 29.4 billion, primarily reflecting decreases in commercial and industrial loans and loans to the real estate sector, mostly offset by higher loans to financial institutions.

Gross impaired loans were stable at CHF 1.5 billion. In Private Banking & Wealth Management, gross impaired loans decreased CHF 37 million to CHF 1.2 billion, primarily due to repayments and write-offs and the restructuring of potential problem loans. In Investment Banking, gross impaired loans increased CHF 10 million to CHF 234 million, driven by a new non-performing loan and a reclassification of a potential problem loan to non-performing.

We recorded a net provision for credit losses of CHF 18 million in 2Q14, compared to CHF 34 million in 1Q14, with a net provision of CHF 23 million in Private Banking & Wealth Management and a release in provision of CHF 5 million in Investment Banking.

Compared to the end of 2Q13, gross loans increased 3%. An increase in Private Banking & Wealth Management of 5% was primarily due to an increase in loans collateralized by securities, higher residential mortgages and higher commercial and industrial loans, partially offset by the US dollar translation impact and a decrease in consumer finance. In Investment Banking, a decrease of 8% was driven by the US dollar translation impact and lower loans to financial institutions, partially offset by higher loans to governments and public institutions. Gross impaired loans decreased 12% driven by decreases in potential problem and non-performing loans in Private Banking & Wealth Management, mainly due to write-offs, and the repayment of a restructured loan in Investment Banking in 4Q13, partially offset by new restructured loans in Private Banking & Wealth Management.

### Selected European credit risk exposures

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion. We believe this external rating is a useful measure in determining the financial ability of countries to meet their financial obligations, including giving an indication of vulnerability to adverse business, financial and economic conditions.

#### Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses on our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G-7 and non-G-7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

#### Presentation of selected European credit risk exposures

The basis for the presentation of the country exposure is our internal risk domicile view. The risk domicile view is based on the domicile of the legal counterparty, i.e., it may include exposure to a legal entity domiciled in the reported country where its parent is located outside of the country.

The credit risk exposure in the table and the related description of developments is presented on a risk-based view before deduction of any related allowance for loan losses. We present our credit risk exposure and related risk mitigation for the following distinct categories:

- *Gross credit risk exposure* includes the principal amount of loans drawn, letters of credit issued and undrawn portions of committed facilities, the positive replacement value (PRV) of derivative instruments after consideration of legally enforceable netting agreements, the notional value of investments in money market funds and the market values of securities financing transactions and the debt cash trading portfolio (short-term securities) netted at issuer level.
- *Risk mitigation* includes credit default swaps (CDS) and other hedges, at their net notional amount, guarantees, insurance and collateral (primarily cash, securities and, to a lesser extent, real estate, mainly for Private Banking & Wealth Management exposure to corporates & other). Collateral values applied for the calculation of the net exposure are determined in accordance with our risk management policies and reflect applicable margining considerations.
- *Net credit risk exposure* represents gross credit risk exposure net of risk mitigation.
- *Inventory* represents the long inventory positions in trading and non-trading physical debt and synthetic positions, each at market value, all netted at issuer level. Physical debt is non-derivative debt positions (e.g., bonds), and synthetic positions are created through OTC contracts (e.g., CDS purchased and/or sold and total return swaps (TRS)).

1 Includes other hedges (derivative instruments), guarantees, insurance and collateral.
2 Represents long inventory positions netted at issuer level.
3 Substantially all of which results from CDS; represents long positions net of short positions.

CDS presented in the risk mitigation column are purchased as a direct hedge to our OTC exposure and the risk mitigation impact is considered to be the notional amount of the contract for risk purposes, with the mark-to-market fair value of CDS risk-managed against the protection provider. Net notional amounts of CDS reflect the notional amount of CDS protection purchased less the notional amount of CDS protection sold and are based on the origin of the CDS reference credit, rather than that of the CDS counterparty. CDS included in the inventory column represent contracts recorded in our trading books that are hedging the credit risk of the instruments included in the inventory column and are disclosed on the same basis as the value of the fixed income instrument they are hedging.

We do not have any tranched CDS positions on these European countries and only an insignificant amount of indexed credit derivatives is included in inventory.

The credit risk of CDS contracts themselves, i.e., the risk that the CDS counterparty will not perform in the event of a default, is managed separately from the credit risk of the reference credit. To mitigate such credit risk, all CDS contracts are collateralized and executed with counterparties with whom we have an enforceable International Swaps and Derivatives Association (ISDA) master agreement that provides for daily margining.

#### Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Croatia, Cyprus, Greece, Ireland, Italy, Portugal and Spain as of the end of 2Q14 was EUR 4.8 billion, down from EUR 5.1 billion as of the end of 1Q14. Our net exposure to these sovereigns was EUR 1.0 billion, down from EUR 1.4 billion compared to the end of 1Q14. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 2Q14 included net exposure to financial institutions of EUR 2.8 billion and to corporates and other counterparties of EUR 1.6 billion, compared to EUR 2.2 billion and EUR 1.5 billion, respectively, as of the end of 1Q14. A significant majority of the purchased credit protection is transacted with banks outside of the disclosed countries. For credit protection purchased from banks in the disclosed countries, such credit risk is reflected in the gross and net exposure to each respective country.

#### Sovereign debt rating developments

In 2Q14, the long-term sovereign debt ratings of the countries listed in the table were affected as follows: Standard & Poor's increased Cyprus's rating to B from B–, Ireland's rating to A– from BBB+ and Spain's rating to BBB from BBB–. Fitch increased Spain's rating to BBB+ from BBB. Moody's increased Ireland's rating to Baa1 from Baa3 and Portugal's rating to Ba2 from Ba3. The rating changes did not have a significant impact on the Group's financial position, result of operations, liquidity or capital resources.

## OPERATIONAL RISK

Effective January 1, 2014, we have implemented a revised FINMA-approved internal AMA model to calculate the regulatory capital requirement for operational risk. The AMA capital calculation includes all litigation-related provisions and also an add-on component relating to the aggregate range of the reasonably possible litigation losses that are disclosed in our financial statements but are not covered by existing provisions.

‣ Refer to "Operational risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information on the revised AMA model used for regulatory capital calculation.

In 2Q14, a slight increase in capital required for operational risk primarily reflected the impact of incorporating into the AMA model the FHFA settlement in March 2014 and the settlement of all outstanding US cross-border matters in May 2014. The impact from these settlements was partially offset by the agreement with FINMA to remove the limitation it had set on the capital benefit for insurance-based risk transfer and a decrease in the add-on component of the capital related to the aggregate range of reasonably possible litigation losses due to the reduction in the maximum value of this range.

# Balance sheet and off-balance sheet

Total assets were CHF 891.6 billion, total liabilities were CHF 849.6 billion and total equity was CHF 42.0 billion. Both total assets and total liabilities were up 2% for the quarter due to higher operating activities and the foreign exchange translation impact. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

## BALANCE SHEET

Total assets were CHF 891.6 billion as of the end of 2Q14, up CHF 13.5 billion, or 2%, from the end of 1Q14, reflecting an increase from operating activities and foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets increased CHF 10.3 billion.

Compared to the end of 1Q14, brokerage receivables increased CHF 7.0 billion, or 14%, driven by futures and margin lending, partially offset by open trades. Net loans increased CHF 3.9 billion, or 2%, primarily reflecting an increase in loans to financial institutions in Investment Banking and increases in loans collateralized by securities and residential mortgages in Private Banking & Wealth Management. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions increased CHF 2.9 billion, or 2%, mainly driven by an increase in stock borrowings and an increase in reverse repurchase transactions, partially offset by a decrease in cash collateral for stock borrowings. Cash and due from banks were stable at CHF 66.5 billion. Trading assets were stable at CHF 235.4 billion, mainly reflecting decreases in debt securities offset by increases in equity securities and derivative instruments. All other assets were stable at CHF 113.1 billion, including an increase of CHF 2.3 billion of other assets and a decrease of CHF 1.4 billion of securities received as collateral.

Total liabilities were CHF 849.6 billion as of the end of 2Q14, up CHF 15.7 billion, or 2%, from the end of 1Q14, driven by an increase from operating activities and foreign exchange translation impact. Excluding the foreign exchange translation impact, total liabilities increased CHF 12.9 billion.

Compared to the end of 1Q14, long-term debt increased CHF 11.4 billion, or 9%, primarily driven by issuances of senior and subordinated debt, partially offset by maturities of senior debt. Due to banks increased CHF 2.5 billion, or 10%, mainly driven by new bank deposits and higher bank balances. Trading liabilities increased CHF 2.1 billion, or 3%, mainly driven by an increase in derivative instruments. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions were stable at CHF 88.1 billion. Customer deposits were stable at CHF 346.3 billion. Brokerage payables were down by CHF 1.4 billion, or 2%, mainly reflecting lower margin lending and other brokerage payables. All other liabilities increased CHF 3.9 billion, or 4%, including an increase of CHF 5.2 billion in short-term borrowings and a decrease of CHF 1.4 billion in obligation to return securities received as collateral.

▸ Refer to “Funding sources and uses” in Liquidity and funding management and “Capital management” for further information, including our funding of the balance sheet and the leverage ratio.

## OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

▸ Refer to “Liquidity and funding management” in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2013 and “Note 25 – Guarantees and commitments” and “Note 29 – Litigation” in III – Condensed consolidated financial statements – unaudited for further information.

Report of Independent Registered Public Accounting Firm to the Board of Directors of

**Credit Suisse Group AG, Zurich**

We have reviewed the accompanying condensed consolidated balance sheets of Credit Suisse Group AG and subsidiaries (the "Group") as of June 30, 2014 and 2013 and the related condensed consolidated statements of operations, changes in equity and comprehensive income for the three and six-month periods ended June 30, 2014 and 2013 and the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2014 and 2013. These condensed consolidated financial statements are the responsibility of the Group's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Group as of December 31, 2013, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows for the year then ended (not presented herein); and in our report dated April 3, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2013, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

1 Distributions to owners in funds include the return of original capital invested and any related dividends.
2 Transactions with and without ownership changes related to fund activity are all displayed under "not changing ownership".
3 Includes a net tax benefit of CHF 10 million from the excess fair value of shares delivered over recognized compensation expense.
4 The Group had purchased certain call options on its own shares to economically hedge share-based compensation awards. In accordance with US GAAP, these call options were designated as equity instruments and, as such, were initially recognized in shareholders' equity at their fair values and not subsequently remeasured.
5 Paid out of reserves from capital contributions.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

**Basis of presentation**

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2013 included in the Credit Suisse Annual Report 2013.

‣ Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for a description of the Group's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 1Q14 consolidated statements of operations and comprehensive income, the 1Q14 and 2Q13 consolidated balance sheets and the 2Q14, 1Q14 and 2Q13 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2 Recently issued accounting standards

**Recently adopted accounting standards**

The following provides the most relevant recently adopted accounting standards.

‣ Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for a description of accounting standards adopted in 2013.

### ASC Topic 210 – Balance Sheet

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, "Disclosures about Offsetting Assets and Liabilities" (ASU 2011-11), an update to Accounting Standards Codification (ASC) Topic 210 – Balance Sheet. The amendments in ASU 2011-11 require an entity to prepare additional disclosures about offsetting and related arrangements. In January 2013, the FASB issued ASU 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities" (ASU 2013-01), an update to ASC Topic 210 – Balance Sheet. ASU 2013-01 clarifies the scope of ASU 2011-11. The adoption of ASU 2011-11 and ASU 2013-01 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

‣ Refer to "Note 20 – Offsetting of financial assets and financial liabilities" for further information.

### ASC Topic 220 – Comprehensive Income

In January 2013, the FASB issued ASU 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" (ASU 2013-02), an update to ASC Topic 220 – Comprehensive Income. The amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. The adoption of ASU 2013-02 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

‣ Refer to "Note 19 – Accumulated other comprehensive income and additional share information" for further information.

### ASC Topic 830 – Foreign Currency Matters

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity" (ASU 2013-05), an update to ASC Topic 830 – Foreign Currency Matters. The amendments provide guidance for the treatment of the cumulative translation adjustment when an entity ceases to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity. ASU 2013-05 is effective prospectively for interim and annual reporting periods beginning after December 15, 2013 with early adoption permitted. The Group elected to early adopt ASU 2013-05 on January 1, 2013 which did not have a material impact on the Group's financial position, results of operations or cash flows.

### ASC Topic 946 – Financial Services – Investment Companies

In June 2013, the FASB issued ASU 2013-08, "Amendments to the Scope, Measurement, and Disclosure Requirements" (ASU 2013-08) an update to Topic 946 – Financial Services – Investment Companies. The amendments change the approach to the investment company assessment in Topic 946, clarify the characteristics of an investment company and provide comprehensive guidance for assessing whether an entity is an investment company. The adoption of ASU 2013-08 on January 1, 2014 did not have a material impact on the Group's financial position, results of operations or cash flows.

**Standards to be adopted in future periods**

**ASC Topic 205 – Presentation of Financial Statements**
**ASC Topic 360 – Property, Plant, and Equipment**

In April 2014, the FASB issued ASU 2014-08, "Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity" (ASU 2014-08), an update to Topic 205 – Presentation of Financial Statements and Topic 360 – Property, Plant, and Equipment. The amendments change the requirements for reporting discontinued operations and require additional disclosures about discontinued operations. ASU 2014-08 is effective for interim and annual reporting periods beginning after December 15, 2014 with early adoption permitted. The Group will evaluate the impact of adoption of ASU 2014-08 on the Group's financial position, results of operations and cash flows when any future discontinued operations or disposals are identified.

**ASC Topic 606 – Revenue from Contracts with Customers**

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), an update to Topic 606 – Revenue from Contracts with Customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU outlines key steps that an entity should follow to achieve the core principle. ASU 2014-09 is effective for annual periods beginning after December 15, 2016. The Group is currently evaluating the impact of the adoption of ASU 2014-09 on the Group's financial position, results of operations and cash flows.

**ASC Topic 718 – Compensation – Stock Compensation**

In June 2014, the FASB issued ASU 2014-12, "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period" (ASU 2014-12), an update to Topic 718 – Compensation – Stock Compensation. The amendments require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 is effective for interim and annual periods beginning after December 15, 2015 with early adoption permitted. The Group is currently evaluating the impact of the adoption of ASU 2014-12 on the Group's financial position, results of operations and cash flows.

**ASC Topic 860 – Transfers and Servicing**

In June 2014, the FASB issued ASU 2014-11, "Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures" (ASU 2014-11), an update to Topic 860 – Transfers and Servicing. ASU 2014-11 amends the accounting guidance for repurchase-to-maturity transactions and repurchase financing arrangements. As a result of these amendments repurchase-to-maturity transactions will be reported as secured borrowings. For repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. The amendments also specify new disclosures that entities must include. ASU 2014-11 is effective for interim and annual periods beginning after December 15, 2014. The Group is currently evaluating the impact of the adoption of ASU 2014-11 on the Group's financial position, results of operations and cash flows.

## 3 Business developments

**Business developments**

▸ Refer to "Note 4 – Discontinued operations" for information on business divestitures in 1Q14.

In July 2014, the Group entered into an agreement to sell Private Banking & Wealth Management's local affluent and upper affluent business in Italy to Banca Generali S.p.A. The transaction also includes approximately 60 agents of Credit Suisse (Italy) S.p.A., with over EUR 2.0 billion of assets under management. The transaction is expected to close by November 2014, subject to customary closing conditions, including related to regulatory requirements and labor agreements.

In July 2014, the Group announced that with respect to the global macro products business, it decided to exit its small commodities trading business. The Group will also re-focus its foreign exchange business towards a combination of electronic trading and voice offering for larger and more complex trades and will further simplify its rates product offering to focus primarily on satisfying client liquidity needs in cash products and derivatives.

## 4 Discontinued operations

In December 2013, the Group announced the sale of its domestic private banking business booked in Germany (German private banking business) to Bethmann Bank AG, a subsidiary of ABN AMRO. This transaction is subject to customary closing conditions and is expected to close in the course of 2014. As of the end of 2Q14, the German private banking business had total assets and liabilities of CHF 979 million and CHF 742 million, respectively, that were held-for-sale. Bethmann Bank AG and ABN AMRO are companies unrelated to the Group.

In January 2014, the Group completed the sale of CFIG, its private equity fund of funds and co-investment business, to Grosvenor Capital Management and recognized a pre-tax gain on disposal of CHF 91 million in 1Q14 net of allocated goodwill of CHF 23 million. As of the end of 4Q13, CFIG had total assets of CHF 31 million that were held-for-sale. The Group continues to hold investments in, and have unfunded commitments to, investment funds managed by CFIG. Grosvenor Capital Management is a company unrelated to the Group.

In March 2014, the Group completed the spin-off of DLJ Merchant Banking Partners, the Group's mid-market leveraged buyout business, for no consideration to aPriori Capital Partners L.P., an independent advisory firm established and controlled by members of the business' management. The transaction was completed with no gain or loss from disposal and insignificant impact on net revenues, operating expenses and net income/(loss) from discontinued operations for 1Q14 and prior periods have not been restated. The Group will retain certain carried interest rights. aPriori Capital Partners L.P. is a company unrelated to the Group.

▸ Refer to "Note 4 – Discontinued operations" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

| **Total liabilities held-for-sale** | **742** | **781** | **1,140** |
| **Group (CHF million)** | | | |
| **Total liabilities held-for-sale** | **742** | **781** | **1,140** |

For the operations discontinued in 2013 and 2014, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center.

The results of operations of the businesses sold have been reflected in income/(loss) from discontinued operations in the consolidated statements of operations for the relevant periods presented. The assets and liabilities of discontinued operations for which the sale has not yet been completed are presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, and prior periods are not reclassified.

## 5 Segment information

### Overview

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of two segments: Private Banking & Wealth Management and Investment Banking. The two segments are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT. Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses. For the operations discontinued, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center.

Beginning in 2Q14, the majority of the balance sheet usage related to a portfolio of high-quality liquid assets managed by the Treasury function and previously recorded in the Corporate Center has been allocated to the business divisions to allow for a more efficient management of their business activities from an overall Group perspective with respect to LCR and Swiss leverage requirements arising from the portfolio of assets. Prior periods have been restated for the related impact on total assets.

▸ Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on segment information, revenue sharing and cost allocation, funding and taxes.

### Net revenues and income before taxes

| in | **2Q14** | 1Q14 | 2Q13 | **6M14** | 6M13 |
|---|---|---|---|---|---|
| **Net revenues (CHF million)** | | | | | |
| Private Banking & Wealth Management | 3,046 | 3,240 | 3,419 | 6,286 | 6,697 |

| **Net interest income** | **2,586** | **2,178** | **2,640** | **4,764** | **4,446** |

## 7 Commissions and fees

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Commissions and fees (CHF million)** | | | | | |
| Lending business | 454 | 434 | 489 | 888 | 930 |
| Investment and portfolio management | 891 | 934 | 1,002 | 1,825 | 1,906 |
| Other securities business | 25 | 23 | 26 | 48 | 54 |
| Fiduciary business | 916 | 957 | 1,028 | 1,873 | 1,960 |
| Underwriting | 603 | 460 | 479 | 1,063 | 898 |
| Brokerage | 890 | 973 | 1,119 | 1,863 | 2,164 |
| Underwriting and brokerage | 1,493 | 1,433 | 1,598 | 2,926 | 3,062 |
| Other services | 446 | 451 | 423 | 897 | 834 |
| **Commissions and fees** | **3,309** | **3,275** | **3,538** | **6,584** | **6,786** |

## 8 Trading revenues

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Trading revenues (CHF million)** | | | | | |
| Interest rate products | 2,969 | 1,250 | (1,109) | 4,219 | 588 |
| Foreign exchange products | (1,337) | (1,014) | 519 | (2,351) | 903 |
| Equity/index-related products | (680) | 176 | 571 | (504) | 489 |
| Credit products | (850) | 40 | 316 | (810) | (44) |
| Commodity, emission and energy products | (17) | 63 | 148 | 46 | 191 |
| Other products | 112 | 123 | (88) | 235 | 45 |
| **Trading revenues** | **197** | **638** | **357** | **835** | **2,172** |

Represents revenues on a product basis which are not representative of business results within segments, as segment results utilize financial instruments across various product types.

▸ Refer to "Note 8 – Trading revenues" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on trading revenues and managing trading risks.

## 9 Other revenues

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Other revenues (CHF million)** | | | | | |
| Noncontrolling interests without SEI | 25 | 358 | 152 | 383 | 216 |
| Loans held-for-sale | (1) | 1 | 2 | 0 | (3) |
| Long-lived assets held-for-sale | (2) | 28 | (7) | 26 | (22) |
| Equity method investments | 55 | 61 | 30 | 116 | 66 |
| Other investments | 97 | 110 | 82 | 207 | 139 |
| Other | 197 | 180 | 158 | 377 | 241 |
| **Other revenues** | **371** | **738** | **417** | **1,109** | **637** |

## 10 Provision for credit losses

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Provision for credit losses (CHF million)** | | | | | |
| Provision for loan losses | 22 | 30 | 49 | 52 | 69 |
| Provision for lending-related and other exposures | (4) | 4 | 2 | 0 | 4 |
| **Provision for credit losses** | **18** | **34** | **51** | **52** | **73** |

## 11 Compensation and benefits

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Compensation and benefits (CHF million)** | | | | | |
| Salaries and variable compensation | 2,536 | 2,653 | 2,462 | 5,189 | 5,044 |
| Social security | 283 | 188 | 229 | 471 | 451 |
| Other [1] | 154 | 152 | 235 | 306 | 422 |
| **Compensation and benefits [2]** | **2,973** | **2,993** | **2,926** | **5,966** | **5,917** |

[1] Includes pension and other post-retirement expense of CHF 85 million, CHF 84 million, CHF 157 million, CHF 169 million and CHF 267 million in 2Q14, 1Q14, 2Q13, 6M14 and 6M13, respectively.
[2] Includes severance and other compensation expense relating to headcount reductions of CHF 63 million, CHF 24 million, CHF 90 million, CHF 87 million and CHF 157 million as of 2Q14, 1Q14, 2Q13, 6M14 and 6M13, respectively.

## 12 General and administrative expenses

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **General and administrative expenses (CHF million)** | | | | | |
| Occupancy expenses | 305 | 273 | 283 | 578 | 571 |
| IT, machinery, etc. | 347 | 341 | 377 | 688 | 761 |
| Provisions and losses | 1,810 | 111 | 273 | 1,921 | 443 |
| Travel and entertainment | 90 | 81 | 92 | 171 | 181 |

| **Diluted earnings/(loss) per share available for common shares** | **(0.46)** | **0.48** | **0.52** | **0.05** | **1.28** |

[1] Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.

[2] Reflects changes in the fair value of the PAF2 units which were reflected in the net results of the Group until the awards were finally settled. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.

[3] Reflects weighted-average shares outstanding on PAF2 units. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.

[4] Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 8.8 million, 9.1 million, 12.1 million, 8.9 million and 12.9 million for 2Q14, 1Q14, 2Q13, 6M14 and 6M13, respectively.

[5] Due to the net loss in 2Q14, 1.3 million weighted-average share options and warrants outstanding and 12.2 million weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

## 14 Trading assets and liabilities

| end of | 2Q14 | 1Q14 | 4Q13 | 2Q13 |
|---|---|---|---|---|
| **Trading assets (CHF million)** | | | | |
| Debt securities | 105,038 | 112,678 | 110,116 | 116,923 |
| Equity securities [1] | 88,159 | 83,044 | 76,695 | 78,281 |
| Derivative instruments [2] | 30,957 | 30,538 | 31,603 | 39,240 |
| Other | 11,273 | 10,809 | 10,999 | 11,390 |
| **Trading assets** | **235,427** | **237,069** | **229,413** | **245,834** |
| **Trading liabilities (CHF million)** | | | | |
| Short positions | 40,617 | 40,647 | 40,161 | 49,214 |

There were no unrealized losses on investment securities as of the end of 2Q14. No significant impairment charges were recorded as the Group does not intend to sell the investments, nor is it more likely than not that the Group will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

## 16 Loans, allowance for loan losses and credit quality

Loans are divided in two portfolio segments, "consumer" and "corporate & institutional". Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

The determination of the loan classes is primarily driven by the customer segmentation in the two business divisions, Private Banking & Wealth Management and Investment Banking, both of which are engaged in credit activities.

The Group assigns both counterparty and transaction ratings to its credit exposures. The counterparty rating reflects the probability of default of the counterparty. The transaction rating reflects the expected loss, considering collateral, on a given transaction if the counterparty defaults. Credit risk is assessed and monitored on the single obligor and single obligation level as well as on the credit portfolio level as represented by the classes of loans. Credit limits are used to manage counterparty credit risk.

▸ Refer to "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on loans, allowance for loan losses, credit quality and impaired loans.

1 Includes drawdowns under purchased loan commitments.
2 Includes loans previously reclassified to held-for-sale that were not sold and were reclassified back to loans held-to-maturity.
3 All loans held at amortized cost which are sold are reclassified to loans held-for-sale on or prior to the date of the sale.

**Credit quality of loans held at amortized cost**
Management monitors the credit quality of loans through its credit risk management processes, which are structured to assess, quantify, measure, monitor and manage risk on a consistent basis. This process requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Management evaluates many factors when assessing the credit quality of loans. These factors include the volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic factors. For the purpose of credit quality disclosures, the Group uses internal risk ratings as credit quality indicators.

The Group employs a set of credit ratings for the purpose of internally rating counterparties. Credit ratings are intended to reflect the risk of default of each obligor or counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

▸ Refer to "Credit quality of loans held at amortized cost" in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality in the Credit Suisse Annual Report 2013 for further information on internal ratings and the scope of the credit quality disclosures.

[1] Includes the value of collateral up to the amount of the outstanding related loans. For mortgages, collateral values are generally values at the time of granting the loan.

### Value of collateral

In Private Banking & Wealth Management, all collateral values for loans are regularly reviewed according to our risk management policies and directives, with maximum review periods determined by market liquidity, market transparency and appraisal costs. For example, traded securities are revalued on a daily basis and property values are appraised over a period of more than one year considering the characteristics of the borrower, current developments in the relevant real estate market and the current level of credit exposure to the borrower. If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be appraised more frequently. Management judgment is applied in assessing whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macro-economic research. For impaired loans, the fair value of collateral is determined within 90 days of the date the impairment was identified and thereafter regularly revalued by Group credit risk management within the impairment review process.

In Investment Banking, few loans are collateral dependent. The collateral values for these loans are appraised on at least an annual basis, or when a loan-relevant event occurs.

| Tax expense | 6 | 5 | 9 | 11 | 16 |
| **Net of tax** | **(22)** | **(20)** | **(31)** | **(42)** | **(58)** |

1 Includes net releases of CHF 46 million in 1Q13 on the sale of JO Hambro. Upon settlement in 3Q13, further net releases of CHF 38 million were recognized. These were reclassified from cumulative translation adjustments and included in net income in other revenues, offset by a gain on the transaction.
2 These components are included in the computation of total benefit costs. Refer to "Note 23 – Pension and other post-retirement benefits" for further information.

1 At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 680,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.
2 At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 661,049,598 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.
3 At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 662,873,212 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.

## 20 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

**Derivatives**

The Group transacts bilateral OTC derivatives mainly under ISDA Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcatable hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

[1] Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

**Reverse repurchase and repurchase agreements and securities lending and borrowing transactions**

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, substantially all of the collateral received that may be sold or repledged was sold or repledged as of June 30, 2014 and December 31, 2013. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

**Offsetting of securities purchased under resale agreements and securities borrowing transactions**

| | | | 2Q14 | | | 4Q13 |
|---|---|---|---|---|---|---|
| end of | Gross | Offsetting | Net | Gross | Offsetting | Net |
| **Securities purchased under resale agreements and securities borrowing transactions (CHF billion)** | | | | | | |
| Securities purchased under resale agreements | 113.6 | (32.4) | 81.2 | 112.0 | (25.1) | 86.9 |

| **Total not subject to enforceable master netting agreements** [1] | **67.8** | **–** | **67.8** | **52.1** | **–** | **52.1** |
| **Total** | **198.1** | **(32.4)** | **165.7** [2] | **186.8** | **(26.8)** | **160.0** [2] |

[1] Represents securities purchased under resale agreements and securities borrowing transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.
[2] CHF 86,586 million and CHF 96,587 million of the total net amount as of the end of 2Q14 and 4Q13, respectively, are reported at fair value.

The following table presents the gross amount of securities sold under repurchase agreements and securities lending transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities sold under repurchase agreements and securities lending transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

## Offsetting of securities sold under repurchase agreements and securities lending transactions

| | | | 2Q14 | | | 4Q13 |
|---|---|---|---|---|---|---|
| end of | Gross | Offsetting | **Net** | Gross | Offsetting | **Net** |
| **Securities sold under repurchase agreements and securities lending transactions (CHF billion)** | | | | | | |
| Securities sold under repurchase agreements | 82.8 | (32.4) | 50.4 | 86.5 | (26.8) | 59.7 |
| Securities lending transactions | 9.3 | 0.0 | 9.3 | 6.6 | 0.0 | 6.6 |
| Obligation to return securities received as collateral, at fair value | 17.3 | 0.0 | 17.3 | 18.5 | 0.0 | 18.5 |
| **Total subject to enforceable master netting agreements** | **109.4** | **(32.4)** | **77.0** | **111.6** | **(26.8)** | **84.8** |
| **Total not subject to enforceable master netting agreements** [1] | **32.7** | **–** | **32.7** | **32.0** | **–** | **32.0** |
| **Total** | **142.1** | **(32.4)** | **109.7** | **143.6** | **(26.8)** | **116.8** |
| of which securities sold under repurchase agreements and securities lending transactions | 120.5 | (32.4) | 88.1 [2] | 120.8 | (26.8) | 94.0 [2] |
| of which obligation to return securities received as collateral, at fair value | 21.6 | 0.0 | 21.6 | 22.8 | 0.0 | 22.8 |

[1] Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.
[2] CHF 60,529 million and CHF 76,104 million of the total net amount as of the end of 2Q14 and 4Q13, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

## Amounts not offset in the consolidated balance sheets

| | | | | 2Q14 | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|
| end of | Net | Financial instruments [1] | Cash collateral received/ pledged [1] | **Net exposure** | Net | Financial instruments [1] | Cash collateral received/ pledged [1] | **Net exposure** |
| **Financial assets subject to enforceable master netting agreements (CHF billion)** | | | | | | | | |
| Derivatives | 23.9 | 4.2 | 0.0 | 19.7 | 23.6 | 4.9 | 0.1 | 18.6 |
| Securities purchased under resale agreements | 81.2 | 81.2 | 0.0 | 0.0 | 86.9 | 86.9 | 0.0 | 0.0 |
| Securities borrowing transactions | 16.7 | 16.3 | 0.0 | 0.4 | 21.0 | 20.2 | 0.0 | 0.8 |
| **Total financial assets subject to enforceable master netting agreements** | **121.8** | **101.7** | **0.0** | **20.1** | **131.5** | **112.0** | **0.1** | **19.4** |
| **Financial liabilities subject to enforceable master netting agreements (CHF billion)** | | | | | | | | |
| Derivatives | 24.9 | 9.6 | 0.0 | 15.3 | 25.6 | 9.9 | 0.0 | 15.7 |
| Securities sold under repurchase agreements | 50.4 | 50.4 | 0.0 | 0.0 | 59.7 | 59.7 | 0.0 | 0.0 |
| Securities lending transactions | 9.3 | 9.1 | 0.0 | 0.2 | 6.6 | 6.2 | 0.0 | 0.4 |
| Obligation to return securities received as collateral, at fair value | 17.3 | 16.5 | 0.0 | 0.8 | 18.5 | 17.5 | 0.0 | 1.0 |
| **Total financial liabilities subject to enforceable master netting agreements** | **101.9** | **85.6** | **0.0** | **16.3** | **110.4** | **93.3** | **0.0** | **17.1** |

[1] The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of CDS and credit insurance contracts. Therefore the net exposure presented in the table above is not representative for the Group's counterparty exposure.

## 21 Tax

The income tax expense of CHF 307 million recorded in 2Q14 reflected the impact of the geographical mix of results, the recognition of additional Swiss deferred tax assets relating to timing differences following certain changes in Swiss GAAP and the re-assessment of UK deferred tax assets resulting in a reduction of deferred tax assets on net operating losses.

The presentation of income tax expense and deferred tax assets and liabilities is in accordance with ASC Topic 740 – Income Taxes – guidance to interim reporting.

The quarterly income tax expense includes the impact of the continuous re-assessment of the estimated annual effective tax rate as well as the impact of items that need to be recorded in the specific interim period in which they occur.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of June 30, 2014, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 6.6 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 55 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2010; Brazil – 2009; Japan – 2009; the UK – 2006; the US – 2006; and the Netherlands – 2005.

### Effective tax rate

| in | **2Q14** | 1Q14 | 2Q13 | **6M14** | 6M13 |
|---|---|---|---|---|---|
| **Effective tax rate (%)** | **(88.7)** | 31.2 | 28.7 | **60.8** | 27.6 |

### Tax expense reconciliation

| in | **2Q14** |
|---|---|
| **CHF million** | |
| **Income tax expense/(benefit) computed at the Swiss statutory tax rate of 22%** | **(76)** |
| Increase/(decrease) in income taxes resulting from | |
| Foreign tax rate differential | 228 |
| Other non-deductible expenses | 386 |
| Changes in deferred tax valuation allowance | 505 |

| Income taxable to noncontrolling interests | (10) |
| Change in recognition of outside basis difference | (733) |
| Other | 12 |
| **Income tax expense** | **307** |

#### Foreign tax rate differential

2Q14 included a foreign tax expense of CHF 228 million in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US.

#### Other non-deductible expenses

2Q14 included the impact of CHF 328 million relating to the non-deductible amount of the litigation settlement charge, non-deductible interest expenses of CHF 40 million, non-deductible bank levy costs and other non-deductible expenses of CHF 18 million.

#### Changes in deferred tax valuation allowance

2Q14 included the impact of the increase of valuation allowances of CHF 105 million mainly in respect of three of the Group's operating entities, two in Europe and one in Asia, related to estimated current year earnings. Additionally, it also included an increase in valuation allowance for previously recognized deferred tax assets in respect of a Group operating entity in the UK of CHF 400 million.

#### Lower taxed income

2Q14 included a CHF 5 million income tax benefit related to non-taxable life insurance income.

#### Change in recognition of outside basis difference

2Q14 included a CHF 733 million income tax benefit related to the enactment of a Swiss GAAP change impacting the expected reversal of the outside basis differences relating to Swiss subsidiary investments.

### Other

2Q14 included a tax charge of CHF 7 million relating to non-recoverable foreign taxes, a tax charge of CHF 6 million relating to non-deductible foreign exchange losses partially offset by a tax benefit of CHF 4 million relating to the net decrease of tax contingency accruals.

### Net deferred tax assets

| end of | 2Q14 | 1Q14 |
|---|---|---|
| **Net deferred tax assets (CHF million)** | | |
| Deferred tax assets | 5,557 | 5,683 |
| of which net operating losses | 758 | 1,436 |
| of which deductible temporary differences | 4,799 | 4,247 |
| Deferred tax liabilities | (423) | (427) |
| **Net deferred tax assets** | **5,134** | **5,256** |

## 22 Employee deferred compensation

The Group's current and previous deferred compensation plans include share awards, performance share awards, Contingent Capital Awards, Capital Opportunity Facility awards, Plus Bond awards, Partner Asset Facilities awards, Adjustable Performance Plan awards, Restricted Cash Awards, Scaled Incentive Share Units (SISUs), Incentive Share Units (ISUs) and other cash awards.

‣ Refer to "Note 28 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

The following tables show the expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 2Q14 and prior periods and the associated remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized deferred compensation expense was based on the fair value of each award on the date of grant and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

### Deferred compensation expense

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Deferred compensation expense (CHF million)** | | | | | |
| Share awards | 227 | 250 | 203 | 477 | 457 |
| Performance share awards | 156 | 172 | 126 | 328 | 330 |
| Contingent Capital Awards | 79 | 96 | – | 175 | – |
| Capital Opportunity Facility awards | 4 | 1 | – | 5 | – |
| Plus Bond awards [1] | 7 | 10 | 6 | 17 | 16 |
| 2011 Partner Asset Facility awards [2] | (1) | 11 | (23) | 10 | (30) |
| Adjustable Performance Plan share awards [3] | (3) | 1 | 16 | (2) | 21 |
| Adjustable Performance Plan cash awards [3] | (11) | (2) | 2 | (13) | (1) |
| Restricted Cash Awards | 24 | 23 | 37 | 47 | 91 |
| Scaled Incentive Share Units [3] | (3) | 0 | 17 | (3) | 24 |
| Incentive Share Units [4] | 0 | 0 | 0 | 0 | (2) |
| 2008 Partner Asset Facility awards [2] | 61 | 22 | 11 | 83 | 53 |
| Other cash awards | 98 | 128 | 120 | 226 | 237 |
| Discontinued operations | (6) | (3) | (5) | (9) | (6) |
| **Total deferred compensation expense** | **632** | **709** | **510** | **1,341** | **1,190** |

[1] Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.
[2] Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.
[3] Includes forfeitures and downward adjustments according to the plan terms and conditions.
[4] Includes forfeitures.

## Additional information

| Other cash awards | 220 |
| **Estimated unrecognized deferred compensation expense** | **2,333** |
| **Weighted-average requisite service period (years)** | |
| Aggregate remaining weighted-average requisite service period | 1.2 |

### 2Q14 activity

In June 2014, the Group granted to certain employees 2.7 million in share awards with a fair value of CHF 66 million for the 2014 performance year. The share awards entitle the holder to receive one Group share for each award granted, subject to the award terms, and vest equally on each of the three years anniversaries of the grant date.

## Share-based award activity

[1] Represents additional units earned in 1Q14 as the original Adjustable Performance Plan awards met performance criteria in accordance with the terms and conditions of the awards.

## 23 Pension and other post-retirement benefits

The Group previously disclosed that it expected to contribute CHF 529 million to the Swiss and international defined benefit plans and other post-retirement defined benefit plans in 2014. As of the end of 2Q14, CHF 259 million of contributions had been made.

### Components of total benefit costs

| in | **2Q14** | 1Q14 | 2Q13 | **6M14** | 6M13 |
|---|---|---|---|---|---|
| **Total benefit costs (CHF million)** | | | | | |

## 24 Derivatives and hedging activities

▸ Refer to "Note 31 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

▸ Refer to "Note 27 – Financial instruments" for further information.

### Fair value of derivative instruments

[1] Included in trading revenues.
[2] Included in other revenues.

As of the end of 2Q14, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was five years.

The net gain associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months is CHF 15 million.

## Net investment hedges

| in | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|

Represents gains/(losses) on effective portion.
[1] Included in other revenues.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

▸ Refer to “Note 8 – Trading revenues” for gains and losses on trading activities by product type.

### Disclosures relating to contingent credit risk

Certain of the Group’s derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group’s current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

### Contingent credit risk

| | | | | **2Q14** | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|
| end of | Bilateral counterparties | Special purpose entities | Accelerated terminations | **Total** | Bilateral counterparties | Special purpose entities | Accelerated terminations | **Total** |
| **Contingent credit risk (CHF billion)** | | | | | | | | |

| Additional collateral required in a two-notch downgrade event | 2.0 | 0.8 | 0.1 | **2.9** | 2.3 | 1.1 | 0.0 | **3.4** |

### Credit derivatives

▸ Refer to “Note 31 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on credit derivatives.

#### Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other derivative instruments were excluded as they do not fall within the scope of US GAAP rules. TRS of CHF 9.9 billion and CHF 7.4 billion as of the end of 2Q14 and 4Q13, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

#### Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

#### Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

#### Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

#### Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

| Multi-name instruments | 19.2 | 208.2 | 56.7 | 284.1 |
| **Total instruments** | **110.4** | **489.6** | **98.7** | **698.7** |

## 25 Guarantees and commitments

### Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, securities lending indemnifications, derivatives and other guarantees.

▸ Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Guarantees and commitments in the Credit Suisse Annual Report 2013 for a detailed description of guarantees.

### Guarantees

| end of | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Carrying value | Collateral received |
|---|---|---|---|---|---|---|
| **2Q14 (CHF million)** | | | | | | |
| Credit guarantees and similar instruments | 2,692 | 1,469 | 4,161 | 3,969 | 11 | 2,214 |
| Performance guarantees and similar instruments | 5,026 | 2,429 | 7,455 | 6,603 | 63 | 3,073 |
| Securities lending indemnifications | 11,968 | 0 | 11,968 | 11,968 | 0 | 11,968 |
| Derivatives [2] | 21,973 | 9,010 | 30,983 | 30,983 | 664 | – [3] |
| Other guarantees | 3,303 | 1,241 | 4,544 | 4,533 | 39 | 2,460 |
| **Total guarantees** | **44,962** | **14,149** | **59,111** | **58,056** | **777** | **19,715** |
| **4Q13 (CHF million)** | | | | | | |
| Credit guarantees and similar instruments | 2,688 | 1,526 | 4,214 | 4,066 | 14 | 2,333 |
| Performance guarantees and similar instruments | 4,910 | 3,136 | 8,046 | 7,125 | 107 | 3,312 |
| Securities lending indemnifications | 11,479 | 0 | 11,479 | 11,479 | 0 | 11,479 |
| Derivatives [2] | 18,247 | 13,403 | 31,650 | 31,650 | 715 | – [3] |
| Other guarantees | 4,003 | 1,212 | 5,215 | 5,191 | 3 | 2,631 |
| **Total guarantees** | **41,327** | **19,277** | **60,604** | **59,511** | **839** | **19,755** |

[1] Total net amount is computed as the gross amount less any participations.
[2] Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.
[3] Collateral for derivatives accounted for as guarantees is not significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2013 to June 30, 2014 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees. For the period July 1, 2014 to June 30, 2015, the Group's share in this deposit insurance guarantee program based on FINMA's estimate will be unchanged at CHF 0.6 billion.

### Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises (GSEs) Fannie Mae and Freddie Mac; institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

With respect to its outstanding repurchase claims, the Group is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to June 30, 2014 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims in 2Q14, 1Q14 and 2Q13, including realized losses from the repurchase of residential mortgage loans sold.

### Residential mortgage loans sold

| January 1, 2004 to June 30, 2014 (USD billion) | |
|---|---|
| Government-sponsored enterprises | 8.2 |
| Private investors [1] | 24.0 |
| Non-agency securitizations | 134.5 [2] |
| **Total residential mortgage loans sold** | **166.7** |

[1] Primarily banks.
[2] Of the total residential mortgage loans sold to non-agency securitizations USD 25.3 billion were outstanding as of the end of 2Q14. The difference of the total balance of mortgage loans sold and the outstanding balance as of the end of 2Q14 is attributable to borrower payments of USD 90.1 billion and losses of USD 19.1 billion due to loan defaults.

### Residential mortgage loans sold – outstanding repurchase claims

| | 2Q14 | | | | 1Q14 | | | |
|---|---|---|---|---|---|---|---|---|

1 Settled at a repurchase price of USD 6 million.
2 Settled at USD 66 million and USD 25 million in 6M14 and 6M13, respectively.
3 Refer to "Note 29 – Litigation" for repurchase claims that are in arbitration or litigation.

## Provisions for outstanding repurchase claims

| | 2Q14 | 1Q14 | 2Q13 | 6M14 | 6M13 |
|---|---|---|---|---|---|
| **Provisions for outstanding repurchase claims (USD million) [1]** | | | | | |
| **Balance at beginning of period** | **136** | **146** | **59** | **146** | **55** |
| Increase/(decrease) in provisions, net | (17) | (3) | 62 | (20) | 74 |
| Realized losses [2] | (59) [3] | (7) [4] | (23) | (66) [3] | (31) |
| **Balance at end of period** | **60** [5] | **136** [6] | **98** [5] | **60** [5] | **98** [5] |

1 Excludes provisions for repurchase claims related to residential mortgage loans sold that are in arbitration or litigation. Refer to "Note 29 – Litigation" for further information.
2 Includes indemnifications paid to resolve loan repurchase claims.
3 Primarily related to private investors.
4 Primarily related to non-agency securitizations.
5 Primarily related to government-sponsored enterprises.
6 Primarily related to government-sponsored enterprises and private investors.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

▸ Refer to "Note 29 – Litigation" for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Repurchase claims relating to residential mortgage loans sold may increase in the future based on the large number of defaults in residential mortgages, including those sold or securitized by the Group.

### Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the "Guarantees" table.

▸ Refer to "Disposal-related contingencies and other indemnifications" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Guarantees and commitments in the Credit Suisse Annual Report 2013 for a description of these guarantees.

### Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

▸ Refer to "Other commitments" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Guarantees and commitments in the Credit Suisse Annual Report 2013 for a description of these commitments.

### Other commitments

| | | | | | 2Q14 | | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|---|---|
| end of | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Collateral received | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Collateral received |
| **Other commitments (CHF million)** | | | | | | | | | | |
| Irrevocable commitments under documentary credits | 4,616 | 28 | 4,644 | 4,487 | 2,725 | 5,484 | 28 | 5,512 | 5,452 | 3,381 |
| Irrevocable loan commitments [2] | 38,081 | 70,604 | 108,685 | 104,802 | 52,452 | 27,250 | 69,740 | 96,990 | 92,732 | 47,996 |
| Forward reverse repurchase agreements | 28,969 | 0 | 28,969 | 28,969 | 28,969 | 26,893 | 0 | 26,893 | 26,893 | 26,893 |

[1] Total net amount is computed as the gross amount less any participations.
[2] Irrevocable loan commitments do not include a total gross amount of CHF 95,482 million and CHF 90,254 million of unused credit limits as of the end of 2Q14 and 4Q13, respectively, which were revocable at the Group's sole discretion upon notice to the client.

## 26 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

### TRANSFERS OF FINANCIAL ASSETS

#### Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 6M14 and 6M13 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

### Securitizations

| in | **6M14** | 6M13 |
|---|---|---|
| **Gains and cash flows (CHF million)** | | |
| **CMBS** | | |
| Net gain [1] | 3 | 1 |
| Proceeds from transfer of assets | 1,581 | 3,631 |
| Cash received on interests that continue to be held | 53 | 32 |
| **RMBS** | | |
| Net gain [1] | 14 | 2 |
| Proceeds from transfer of assets | 10,842 | 14,257 |
| Purchases of previously transferred financial assets or its underlying collateral | (4) | (8) |
| Servicing fees | 1 | 2 |
| Cash received on interests that continue to be held | 206 | 275 |
| **Other asset-backed financings** | | |
| Net gain [1] | 15 | 7 |
| Proceeds from transfer of assets | 964 | 553 |
| Purchases of previously transferred financial assets or its underlying collateral [2] | 0 | (65) |
| Cash received on interests that continue to be held | 4 | 329 |

[1] Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

[2] Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

### Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

▸ Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2013 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 2Q14 and 4Q13, regardless of when the transfer of assets occurred.

### Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | **2Q14** | 4Q13 |
|---|---|---|
| **CHF million** | | |
| **CMBS** | | |
| Principal amount outstanding | 36,855 | 37,308 |
| Total assets of SPE | 47,837 | 48,715 |
| **RMBS** | | |
| Principal amount outstanding | 45,774 | 45,571 |
| Total assets of SPE | 47,591 | 48,741 |
| **Other asset-backed financings** | | |
| Principal amount outstanding | 23,632 | 27,854 |
| Total assets of SPE | 23,632 | 27,854 |

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

### Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

## Key economic assumptions at the time of transfer

▸ Refer to "Note 27 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | 6M14 | | 6M13 | |
|---|---|---|---|---|
| at time of transfer, in | CMBS | RMBS | CMBS | RMBS |
| **CHF million, except where indicated** | | | | |
| Fair value of beneficial interests | 566 | 1,865 | 158 | 1,963 |
| of which level 2 | 501 | 1,720 | 141 | 1,922 |
| of which level 3 | 65 | 145 | 17 | 41 |
| Weighted-average life, in years | 3.6 | 4.6 | 8.9 | 7.0 |
| Prepayment speed assumption (rate per annum), in % [1] | – [2] | 1.5–23.0 | – [2] | 6.3–31.0 |
| Cash flow discount rate (rate per annum), in % [3] | 1.0–11.0 | 2.0–17.0 | 1.6–8.2 | 0.0–45.9 |
| Expected credit losses (rate per annum), in % | 1.0–2.0 | 2.6–14.0 | 0.0–7.5 | 0.0–45.8 |

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

[1] Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

[2] To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

[3] The rate was based on the weighted-average yield on the beneficial interests.

## Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 2Q14 and 4Q13.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| | 2Q14 | | | 4Q13 | | |
|---|---|---|---|---|---|---|
| | CMBS [1] | RMBS | Other asset-backed financing activities [2] | CMBS [1] | RMBS | Other asset-backed financing activities [2] |
| **CHF million, except where indicated** | | | | | | |
| Fair value of beneficial interests | 1,297 | 2,761 | 204 | 1,132 | 2,354 | 284 |
| of which non-investment grade | 8 | 350 | 157 | 26 | 359 | 204 |
| Weighted-average life, in years | 5.4 | 8.5 | 4.7 | 6.5 | 8.6 | 3.7 |
| Prepayment speed assumption (rate per annum), in % [3] | – | 1.3–35.0 | – | – | 1.0–23.5 | – |
| Impact on fair value from 10% adverse change | – | (31.0) | – | – | (26.6) | – |
| Impact on fair value from 20% adverse change | – | (61.0) | – | – | (48.6) | – |
| Cash flow discount rate (rate per annum), in % [4] | 1.4–24.4 | 1.8–39.6 | 0.2–21.2 | 1.1–37.1 | 1.7–22.4 | 1.0–23.1 |
| Impact on fair value from 10% adverse change | (20.7) | (57.3) | (2.8) | (25.5) | (65.0) | (2.4) |
| Impact on fair value from 20% adverse change | (40.6) | (111.5) | (5.5) | (50.0) | (124.9) | (4.9) |
| Expected credit losses (rate per annum), in % | 0.9–23.6 | 1.3–38.4 | 1.1–9.7 | 0.2–36.6 | 0.1–17.3 | 0.7–21.0 |
| Impact on fair value from 10% adverse change | (9.8) | (34.3) | (0.9) | (10.9) | (42.2) | (0.4) |
| Impact on fair value from 20% adverse change | (19.6) | (67.3) | (1.7) | (21.5) | (79.6) | (0.7) |

[1] To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

[2] CDOs within this category are generally structured to be protected from prepayment risk.

[3] Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

[4] The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

### Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 2Q14 and 4Q13.

▸ Refer to “Note 28 – Assets pledged and collateral” for further information.

#### Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

| Trading assets | 165 | 216 |
| Other assets | 162 | 157 |
| Liability to SPE, included in Other liabilities | (327) | (373) |

## VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation.

▸ Refer to “Variable interest entities” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2013 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

### Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

### Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine’s entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit’s outstanding CP was approximately 53 days and 19 days as of 2Q14 and 4Q13, respectively. As of 2Q14 and 4Q13, Alpine had the highest short-term ratings from Moody’s and Dominion Bond Rating Service and was rated A-1 by Standard & Poor’s and F-1 by Fitch. The majority of Alpine’s purchased assets were highly rated loans or receivables in the consumer sector, including residential, commercial and time-share mortgages, auto and equipment loans or leases, advance financing receivables and student loans. As of 2Q14 and 4Q13, those assets had an average rating of AA, based on the lowest of each asset’s external or internal rating, and an average maturity of 2.4 years and 2.1 years as of 2Q14 and 4Q13, respectively.

### Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

### Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 2Q14 and 4Q13.

**Non-consolidated VIEs**

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory, certain single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

▸ Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2013 for further information on non-consolidated VIEs.

## 27 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes)
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

### CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

▸ Refer to "Note 34 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on the Group's concentrations of credit risk.

## FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

### Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

### Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 6M14, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers were primarily in exchange traded derivatives as they moved closer to maturity and pricing inputs became more observable. Transfers out of level 1 to level 2 were primarily from trading assets. The transfers were primarily in equity as suitable closing prices were unobtainable as of the end of 6M14.

### Transfers between level 1 and level 2

| Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date | (528) | 74 | **(454)** | (1,079) | 103 | **(976)** |

[1] Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

### Transfers in and out of level 3

Transfers into level 3 assets during 6M14 were CHF 2,819 million, primarily from loans held-for-sale and trading assets. The transfers were primarily in the corporate credit and alternative investment businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 6M14 were CHF 4,283 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the corporate credit, alternative investment, emerging markets and prime services businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 2Q14 were CHF 1,188 million, primarily from trading assets and loans held-for-sale. The transfers were primarily in the corporate credit business due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2Q14 were CHF 1,928 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the corporate credit, alternative investment and emerging markets businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

### Qualitative disclosures of valuation techniques

#### Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Product Control and Risk Management create, review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office, Product Control, Risk Management, and Financial Accounting to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The results of these meetings are aggregated for presentation to the Valuation and Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever

possible, observable market data which may include executed transactions, dealer quotes, or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

Product Control utilizes independent pricing service data as part of their review process. Independent pricing service data is analyzed to ensure that it is representative of fair value including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates, or other inputs. In addition, there may be uncertainty about a valuation, which results from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The Group performs a sensitivity analysis of its significant level 3 financial instruments. This sensitivity analysis estimates a fair value range by changing the related significant unobservable inputs value. This sensitivity analysis is an internal mechanism to monitor the impact of reasonable alternative inputs or prices for level 3 financial instruments. Where a model-based technique is used to determine the fair value of the level 3 financial instrument, an alternative input value is utilized to derive an estimated fair value range. Where a price-based technique is used to determine the fair value of the level 3 financial instruments, Front Office professional judgment is used to estimate a fair value range.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables "Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

### Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. Significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

### Debt securities

#### Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price, buyback probability, correlation and credit spread. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

### CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

## Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple, discount rate and capitalization rate.

## Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, than the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

Our valuation of derivatives does not include an adjustment for the cost of funding uncollateralized OTC derivatives due to a lack of clear observability in the marketplace.

### Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility, volatility skew, prepayment rate, credit spread, basis spread, mean reversion and gap risk.

### Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

### Equity and index-related derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include correlation, volatility, skew and buyback probability.

Generally, the interrelationship between the volatility and correlation is positively correlated.

### Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are

valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread, correlation, funding spread and price. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

### Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

### Other investments

#### Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published net asset values (NAVs). Most of these investments are classified as level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAV in the near term. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not current with observed market movements, it is probable that these investments will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. Unobservable inputs may include credit spread, contingent probability and EBITDA multiple. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

#### Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

### Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a CDS pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available.

Accrual based Private Banking & Wealth Management loans, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

### Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

### Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcatable and non-bifurcatable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility, credit spread and price.

Generally, the interrelationships between volatility, skew, correlation, gap risk and credit spreads inputs are positively correlated.

### Other liabilities

#### Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

### Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

### Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of buyback probability, EBITDA multiple, market implied life expectancy (for life finance instruments), correlation, price, volatility, volatility skew, recovery rate, funding spread and contingent probability, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of market implied life expectancy (for life settlement and premium finance instruments), capitalization rate, discount rate, prepayment rate and credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, in general, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input gap risk would increase the fair value. An increase in the significant unobservable inputs basis spread, mean reversion and skew would decrease the fair value.

### Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

### Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

### Quantitative information about level 3 assets at fair value

| end of 2Q14 | Fair value | Valuation technique | Unobservable input | Minimum value | Maximum value | Weighted average [1] |

[1] Cash instruments are generally presented on a weighted average basis, while certain derivative instruments either contain a combination of weighted averages and arithmetic means of the related inputs or are presented on an arithmetic mean basis.
[2] Management's best estimate of the speed at which interest rates will revert to the long-term average.
[3] Estimate of the probability of structured notes being put back to the Group at the option of the investor over the remaining life of the financial instruments.
[4] Risk of unexpected large declines in the underlying values occuring between collateral settlement dates.

#### Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above result in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates collateral with a greater risk of default.

Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

Volatility and skew

Volatility and skew are impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility rates may vary significantly between different underlying currencies and expiration dates on the options. Similarly, equity derivatives' volatility may vary greatly depending upon the underlying reference name on the derivative.

Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of each insured.

**Fair value measurements of investments in certain entities that calculate NAV per share**

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which are generally up to ten years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

## Fair value, unfunded commitments and term of redemption conditions

| | 2Q14 | | | | 4Q13 | | | |
|---|---|---|---|---|---|---|---|---|
| end of | Non-redeemable | Redeemable | Total fair value | Unfunded commit-ments | Non-redeemable | Redeemable | Total fair value | Unfunded commit-ments |
| **Fair value and unfunded commitments (CHF million)** | | | | | | | | |

| **Total fair value** | **1,973** [5] | **2,387** [6] | **4,360** | **343** [7] | **4,043** [5] | **3,458** [6] | **7,501** | **863** [7] |

[1] 35% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 29% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 26% is redeemable on an annual basis with a notice period primarily of more than 60 days, and 11% is redeemable on a quarterly basis with a notice period primarily of more than 45 days.
[2] 55% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 19% is redeemable on an annual basis with a notice period primarily of more than 60 days, 17% is redeemable on a monthly basis with a notice period primarily of less than 30 days, and 9% is redeemable on a quarterly basis with a notice period primarily of more than 45 days.
[3] 84% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, and 14% is redeemable on an annual basis with a notice period of more than 60 days.
[4] 45% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 33% is redeemable on demand with a notice period primarily of less than 30 days, and 21% is redeemable on an annual basis with a notice period of more than 60 days.
[5] Includes CHF 641 million and CHF 1,819 million attributable to noncontrolling interests in 2Q14 and 4Q13, respectively.
[6] Includes CHF 116 million and CHF 107 million attributable to noncontrolling interests in 2Q14 and 4Q13, respectively.
[7] Includes CHF 175 million and CHF 405 million attributable to noncontrolling interests in 2Q14 and 4Q13, respectively.

### Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

### Nonrecurring fair value changes

| end of | 2Q14 | 4Q13 |
|---|---|---|
| **Assets held-for-sale recorded at fair value on a nonrecurring basis (CHF billion)** | | |
| **Assets held-for-sale recorded at fair value on a nonrecurring basis** | **0.2** | **0.3** |
| of which level 3 | 0.2 | 0.3 |

## FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in Investment Banking and Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

▸ Refer to "Note 34 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on the Group's election of the fair value option for certain of its financial statement captions.

## Difference between the aggregate fair value and the aggregate unpaid principal balances on loans and financial instruments

| | | | **2Q14** | | | 4Q13 |
|---|---|---|---|---|---|---|
| end of | Aggregate fair value | Aggregate unpaid principal | Difference | Aggregate fair value | Aggregate unpaid principal | Difference |
| **Loans (CHF million)** | | | | | | |
| Non-interest-earning loans | 1,039 | 3,211 | (2,172) | 956 | 3,262 | (2,306) |
| **Financial instruments (CHF million)** | | | | | | |
| Interest-bearing deposits with banks | 309 | 306 | 3 | 311 | 307 | 4 |
| Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions | 86,586 | 86,304 | 282 | 96,587 | 96,217 | 370 |
| Loans | 19,897 | 20,010 | (113) | 19,457 | 19,653 | (196) |
| Other assets [1] | 21,539 | 27,671 | (6,132) | 20,749 | 25,756 | (5,007) |
| Due to banks and customer deposits | (713) | (689) | (24) | (690) | (680) | (10) |

| Other liabilities | (1,205) | (2,631) | 1,426 | (1,780) | (3,285) | 1,505 |

[1] Primarily loans held-for-sale.

## Gains and losses on financial instruments

| | **6M14** | 6M13 |
|---|---|---|
| in | Net gains/ (losses) | Net gains/ (losses) |
| **Financial instruments (CHF million)** | | |
| Interest-bearing deposits with banks | 0 [1] | 4 [1] |
| of which related to credit risk | (1) | (2) |
| Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions | 472 [1] | 532 [1] |
| Other investments | 202 [3] | (34) [2] |
| of which related to credit risk | 3 | 0 |
| Loans | 531 [1] | 224 [1] |
| of which related to credit risk | 70 | (107) |
| Other assets | 952 [1] | 1,128 [1] |
| of which related to credit risk | 351 | 300 |
| Due to banks and customer deposits | (26) [2] | 13 [2] |
| of which related to credit risk | (8) | (1) |
| Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions | (38) [1] | 40 [2] |
| Short-term borrowings | (46) [2] | 6 [2] |
| Long-term debt | (2,162) [2] | 800 [2] |
| of which related to credit risk [4] | (47) | 10 |
| Other liabilities | 45 [3] | 239 [2] |
| of which related to credit risk | (39) | 51 |

[1] Primarily recognized in net interest income.
[2] Primarily recognized in trading revenues.
[3] Primarily recognized in other revenues.
[4] Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF (121) million and zero in 6M14, respectively, and CHF (20) million and CHF 38 million in 6M13, respectively.

## FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE

The following table provides the carrying value and fair value of financial instruments which are not carried at fair value in the consolidated balance sheet. The disclosure excludes all non-financial instruments such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations.

### Carrying value and fair value of financial instruments not carried at fair value

| | Carrying value | | | | Fair value |
|---|---|---|---|---|---|
| end of | | Level 1 | Level 2 | Level 3 | Total |
| **2Q14 (CHF million)** | | | | | |
| **Financial assets** | | | | | |
| Central banks funds sold, securities purchased under resale agreements and securities borrowing transactions | 79,158 | 0 | 78,610 | 548 | 79,158 |

| Other financial liabilities [2] | 96,611 | 1,129 | 94,414 | 1,085 | 96,628 |

1 Primarily includes cash and due from banks, interest-bearing deposits with banks, brokerage receivables, loans held-for-sale, cash collateral on derivative instruments, interest and fee receivables and non-marketable equity securities.
2 Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

## 28 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

### Assets pledged

| end of | **2Q14** | 4Q13 |
|---|---|---|
| **Assets pledged (CHF million)** | | |
| Total assets pledged or assigned as collateral | 146,633 | 142,952 |
| of which encumbered | 93,046 | 92,300 |

### Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

**Collateral**

| of which sold or repledged | 288,640 | 267,896 |

## 29 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 38 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013* and updated in subsequent quarterly reports (including those discussed below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 38 referenced above and updated in quarterly reports (including below) for which the Group believes an estimate is possible is zero to CHF 1.0 billion.

In 2Q14, the Group recorded net litigation provisions of CHF 1,807 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

**Research-related litigation**

This case was brought against Credit Suisse Securities (USA) LLC (CSS LLC) on behalf of a class of purchasers of common shares of the former AOL Time Warner Inc. (AOL) who have alleged that CSS LLC's equity research coverage of AOL between January 2001 and July 2002 was false and misleading. On January 13, 2012, the US District Court for the District of Massachusetts granted summary judgment in favor of the defendants upon its determination to preclude a plaintiff expert witness. The plaintiffs appealed the summary judgment decision. On May 14, 2014, the circuit court affirmed the grant of summary judgment. The plaintiffs subsequently moved for rehearing and rehearing en banc.

**Mortgage-related matters**

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

Individual investor actions

On May 20, 2014, Commerzbank AG London Branch filed a complaint against CSS LLC and certain of its affiliates and other financial institutions in the Supreme Court for the State of New York, New York County (SCNY), in which claims against CSS LLC and its affiliates relate to approximately USD 121 million of the RMBS at issue (approximately 6% of the USD 1.9 billion at issue against all defendants in the operative pleading), reducing the RMBS at issue for CSS LLC and its affiliates as stated in the summons filed on December 26, 2013 by approximately USD 27 million. On May 21, 2014, following a settlement, the Illinois state court presiding in the action brought by the Federal Home Loan Bank of Chicago dismissed with prejudice all claims against CSS LLC in the last remaining action filed by the Federal Home Loan Bank of Chicago against CSS LLC, relating to approximately USD 38 million of RMBS at issue against CSS LLC. On June 3, 2014, the SCNY dismissed with prejudice certain claims in the action against CSS LLC and its affiliates brought by Deutsche Zentral-Genossenschaftsbank AG, New York Branch, reducing the RMBS at issue for CSS LLC and its affiliates from approximately USD 138 million to approximately USD 111 million. On July 3, 2014, following a settlement, the Indiana state court presiding in the action brought by the Federal Home Loan Bank of Indianapolis dismissed with prejudice all claims against CSS LLC, relating to approximately USD 224 million of RMBS at issue against CSS LLC.

Monoline insurer disputes

On July 14, 2014, the SCNY ruled from the bench following oral argument and granted CSS LLC's motion to dismiss all claims in the action filed by CIFG Assurance North America, Inc. (CIFG) without prejudice relating to financial guaranty insurance issued by CIFG on a credit default swap guaranteeing payment on approximately USD 396 million of notes of a collateralized debt obligation.

**Tax and securities law matters**

Since 2011, Credit Suisse had been responding to subpoenas and other requests for information from the United States Department of Justice (DOJ), the US Securities and Exchange Commission (SEC) and other authorities involving historical Private Banking services provided on a cross-border basis to US persons. US authorities were investigating possible violations of US tax and securities laws. In particular, the DOJ was investigating whether US clients violated their US tax obligations and whether Credit Suisse and certain of its employees assisted such clients. The SEC investigated whether certain of our relationship managers triggered obligations for Credit Suisse or the relationship managers in Switzerland to register with the SEC as a broker-dealer or investment advisor. A limited number of current or former employees have been indicted and two former employees have pleaded guilty (in one case, as to conduct while employed at other financial institutions that did not involve Credit Suisse and in the other case as to conduct while employed at a former Credit Suisse subsidiary prior to 2006 and other financial institutions after 2006). Credit Suisse received a grand jury target letter from the DOJ in July 2011. We understand that certain US authorities are also investigating other Swiss and non-US financial institutions.

On February 21, 2014, Credit Suisse AG reached a settlement with the SEC that resolved the SEC's investigation regarding registration as an investment advisor and broker-dealer. In a settled administrative and cease-and-desist proceeding, the SEC charged Credit Suisse AG with violating Section 15(a) of the US Securities Exchange Act of 1934 (Exchange Act) and Section 203(a) of the US Investment Advisers Act of 1940 (Advisers Act). Specifically, the SEC's Order found that from at least 2002 through its exit from the US cross-border securities business which Credit Suisse AG began in 2008, Credit Suisse AG, through actions of certain of its relationship managers, violated the federal securities laws by providing certain cross-border brokerage and investment advisory services to US clients at a time when Credit Suisse AG was not registered with the SEC as a broker-dealer or investment advisor. As part of the settlement of the investigation, Credit Suisse AG agreed, among other things, to cease-and-desist from committing or causing any future violations of Section 15(a) of the Exchange

Act or Section 203(a) of the Advisers Act and to pay approximately USD 196 million, inclusive of disgorgement of approximately USD 82 million, prejudgment interest of approximately USD 64 million, and a civil money penalty in the amount of USD 50 million. Credit Suisse AG also agreed to the appointment of an independent consultant who will review its cross-border compliance policies with respect to the US securities laws and will verify that Credit Suisse AG has exited the US cross-border business.

On May 19, 2014, Credit Suisse AG entered into a settlement regarding all outstanding US cross-border matters, including agreements with the DOJ, the New York State Department of Financial Services (DFS) and the Board of Governors of the US Federal Reserve System (Fed). As part of the settlement, Credit Suisse AG entered a guilty plea to one count of conspiracy to assist US customers in presenting false income tax returns to the US Internal Revenue Service (IRS) in violation of Title 18, US Code section 371, in connection with the former Swiss-based cross border Private Banking business. In total, Credit Suisse AG agreed to pay USD 2,815 million comprised of the following components: (a) USD 2,000 million for the DOJ, including USD 666.5 million in restitution to the IRS and USD 1,333.5 million as a fine (including USD 196 million for the SEC as described in the preceding paragraph); (b) USD 715 million for the DFS; and (c) USD 100 million for the Fed. In prior quarters, Credit Suisse had taken litigation provisions totaling CHF 892 million related to this matter. As a result, the pre-tax impact of the final settlement in the second quarter 2014 was CHF 1,618 million and the after-tax impact was CHF 1,598 million. The amount due to the DOJ, including the part thereof allocated to the IRS, is expected to be paid following the sentencing hearing for Credit Suisse AG. The penalties due to the SEC, Fed and DFS were paid in May 2014. In addition to such payments, Credit Suisse AG agreed, among other things, to engage an independent corporate monitor reporting to the DFS (a separate position from the independent consultant agreed to in the settlement with the SEC), provide ongoing reports to various agencies and terminate the employment of certain individuals at Credit Suisse AG associated with the improper conduct.

**Net new assets-related matters**

On February 26, 2014, the United States Senate Permanent Subcommittee on Investigations issued a report that included a discussion of Credit Suisse's determinations about and disclosures of net new assets and, as previously disclosed, Credit Suisse is conducting a review of this topic. The SEC is also conducting an investigation. The disclosure of net new assets is required by banks operating in Switzerland pursuant to Guidelines on Accounting Standards issued by the FINMA.

**Alternative trading systems**

Credit Suisse is responding to inquiries from various governmental and regulatory authorities concerning the operation of its alternative trading systems, and is cooperating with those requests. Credit Suisse Group AG is also among more than thirty defendants named in putative class action complaints filed in the US District Court for the Southern District of New York since April 2014, alleging violations of US securities laws related to high-frequency trading.

## 30 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

In 4Q13, as part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing Intermediate Holding Companies in the US for non-US banks, several existing legal entities were re-parented as subsidiaries of Credit Suisse (USA), Inc. In the tables below, prior periods have been restated to conform to the current presentation to reflect the impact of these transactions.

**Cautionary statement regarding forward-looking information**

This report contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in "Risk factors" in I – Information on the company in our Annual Report 2013.

Report of Independent Registered Public Accounting Firm to the Board of Directors of

**Credit Suisse AG, Zurich**

We have reviewed the accompanying condensed consolidated balance sheet of Credit Suisse AG and subsidiaries (the "Bank") as of June 30, 2014 and the related condensed consolidated statements of operations, changes in equity, comprehensive income and cash flows for the six-month periods ended June 30, 2014 and 2013. These condensed consolidated financial statements are the responsibility of the Bank's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Bank as of December 31, 2013, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows for the year then ended (not presented herein); and in our report dated April 3, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2013, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

**Basis of presentation**

The accompanying unaudited condensed consolidated financial statements of Credit Suisse AG (the Bank) are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2013, included in the Credit Suisse Group AG & Credit Suisse AG Annual Report 2013 (Credit Suisse Annual Report 2013).

‣ Refer to "Note 1 – Summary of significant accounting policies" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for a description of the Bank's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP but not required for interim reporting purposes has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions, which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2 Recently issued accounting standards

‣ Refer to "Note 2 – Recently issued accounting standards" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for a complete description of recently adopted accounting standards.

‣ Refer to "Note 2 – Recently issued accounting standards" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q14 for the most recently adopted accounting standards and standards to be adopted in future periods.

The impact on the Bank's and Group's financial condition, results of operations or cash flows was or is expected to be identical.

## 3 Business developments

▸ Refer to "Note 4 – Discontinued operations" for information on business divestitures in 6M14.

In April 2014, the Bank entered into an agreement with the current head of Credit Suisse Hedging-Griffo Asset Management pursuant to which he will be the controlling shareholder of a new firm, Verde Asset Management, and the Bank will be a minority shareholder. The transaction is subject to customary closing conditions and the approval of the change of management to Verde Asset Management by shareholders of the relevant funds managed by Credit Suisse Hedging-Griffo. The transaction is expected to close by year-end 2014.

In July 2014, the Bank entered into an agreement to sell Private Banking & Wealth Management's local affluent and upper affluent business in Italy to Banca Generali S.p.A. The transaction also includes approximately 60 agents of Credit Suisse (Italy) S.p.A., with over EUR 2.0 billion of assets under management. The transaction is expected to close by November 2014, subject to customary closing conditions, including related to regulatory requirements and labor agreements.

In July 2014, the Bank announced that with respect to the global macro products business, it decided to exit its small commodities trading business. The Bank will also re-focus its foreign exchange business towards a combination of electronic trading and voice offering for larger and more complex trades and will further simplify its rates product offering to focus primarily on satisfying client liquidity needs in cash products and derivatives.

## 4 Discontinued operations

In December 2013, the Bank announced the sale of its domestic private banking business booked in Germany (German private banking business) to Bethmann Bank AG, a subsidiary of ABN AMRO. This transaction is subject to customary closing conditions and is expected to close in the course of 2014. As of the end of 6M14, the German private banking business had total assets and liabilities of CHF 979 million and CHF 742 million, respectively, that were held-for-sale. Bethmann Bank AG and ABN AMRO are companies unrelated to the Group.

In January 2014, the Bank completed the sale of Customized Fund Investment Group (CFIG), its private equity fund of funds and co-investment business, to Grosvenor Capital Management and recognized a pre-tax gain on disposal of CHF 91 million in 6M14 net of allocated goodwill of CHF 23 million. As of the end of 2013, CFIG had total assets of CHF 31 million that were held-for-sale. The Group continues to hold investments in, and have unfunded commitments to, investment funds managed by CFIG. Grosvenor Capital Management is a company unrelated to the Group.

In March 2014, the Bank completed the spin-off of DLJ Merchant Banking Partners, the Group's mid-market leveraged buyout business, for no consideration to aPriori Capital Partners L.P., an independent advisory firm established and controlled by members of the business' management. The transaction was completed with no gain or loss from disposal and insignificant impact on net revenues, operating expenses and net income/(loss) from discontinued operations for 6M14 and prior periods have not been restated. The Group will retain certain carried interest rights. aPriori Capital Partners L.P. is a company unrelated to the Group.

▸ Refer to "Note 4 – Discontinued operations" in III – Consolidated financial statements – unaudited Credit Suisse Financial Report 2Q14 for further information.

## 5 Segment information

### Overview

For purpose of presentation of reportable segments, the Bank has included accounts of affiliate entities wholly owned by the same parent which are managed together with the operating segments of the Bank. These affiliate entities include certain bank and trust affiliates, primarily managed by Private Banking & Wealth Management. Income from continuing operations before taxes of these non-consolidated affiliate entities included in the segment presentation for 6M14 and 6M13 were CHF 129 million and CHF 121 million, respectively. For the same periods, net revenues of these non-consolidated affiliate entities included in the segment presentation were CHF 322 million and CHF 328 million, respectively. Total assets of these non-consolidated affiliate entities included in the segment presentation as of June 30, 2014 and December 31, 2013 were CHF 25.6 billion and CHF 25.4 billion, respectively.

▸ Refer to "Note 5 – Segment information" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q14 for further information.

### Net revenues and income before taxes

| in | 6M14 | 6M13 |
|---|---|---|
| **Net revenues (CHF million)** | | |
| Private Banking & Wealth Management | 6,286 | 6,697 |
| Investment Banking | 6,758 | 7,345 |
| Adjustments [1, 2] | (13) | (255) |
| **Net revenues** | **13,031** | **13,787** |
| **Income/(loss) before taxes (CHF million)** | | |
| Private Banking & Wealth Management | 263 | 1,798 |
| Investment Banking | 1,579 | 2,054 |
| Adjustments [1, 3] | (733) | (510) |
| **Income before taxes** | **1,109** | **3,342** |

[1] Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice versa, and certain expenses that were not allocated to the segments.
[2] Includes noncontrolling interest-related revenues of CHF 397 million and CHF 229 million in 6M14 and 6M13, respectively, from the consolidation of certain private equity funds and other entities in which the Bank does not have a significant economic interest in such revenues.
[3] Includes noncontrolling interest income of CHF 374 million and CHF 210 million in 6M14 and 6M13, respectively, from the consolidation of certain private equity funds and other entities in which the Bank does not have a significant economic interest in such income.

### Total assets

| end of | 6M14 | 2013 |
|---|---|---|
| **Total assets (CHF million)** | | |
| Private Banking & Wealth Management | 322,669 | 316,491 |
| Investment Banking | 525,101 | 519,712 |
| Adjustments [1] | 24,886 | 18,209 |
| **Total assets** | **872,656** | **854,412** |

[1] Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice versa, and certain expenses that were not allocated to the segments.

## 6 Net interest income

| in | 6M14 | 6M13 |
|---|---|---|
| **Net interest income (CHF million)** | | |
| Loans | 2,191 | 2,136 |
| Investment securities | 14 | 16 |
| Trading assets | 5,566 | 6,130 |
| Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions | 1,103 | 1,376 |
| Other | 1,006 | 1,113 |
| Interest and dividend income | 9,880 | 10,771 |
| Deposits | (479) | (507) |
| Short-term borrowings | (52) | (33) |
| Trading liabilities | (2,387) | (3,098) |
| Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions | (523) | (733) |
| Long-term debt | (1,716) | (2,003) |
| Other | (144) | (121) |
| Interest expense | (5,301) | (6,495) |
| **Net interest income** | **4,579** | **4,276** |

## 7 Commissions and fees

| in | 6M14 | 6M13 |
|---|---|---|
| **Commissions and fees (CHF million)** | | |
| Lending business | 867 | 910 |
| Investment and portfolio management | 1,776 | 1,861 |
| Other securities business | 50 | 51 |
| Fiduciary business | 1,826 | 1,912 |

| Other services | 885 | 818 |
| **Commissions and fees** | **6,523** | **6,687** |

## 8 Trading revenues

| in | 6M14 | 6M13 |
|---|---|---|
| **Trading revenues (CHF million)** | | |
| Interest rate products | 4,120 | 595 |
| Foreign exchange products | (2,352) | 897 |
| Equity/index-related products | (488) | 479 |
| Credit products | (810) | (44) |
| Commodity, emission and energy products | 46 | 191 |
| Other products | 235 | 46 |
| **Total** | **751** | **2,164** |

Represents revenues on a product basis which are not representative of business results within segments, as segment results utilize financial instruments across various product types.

## 9 Other revenues

| in | 6M14 | 6M13 |
|---|---|---|
| **Other revenues (CHF million)** | | |
| Noncontrolling interests without significant economic interest | 388 | 249 |
| Loans held-for-sale | 0 | (3) |
| Long-lived assets held-for-sale | 25 | (22) |
| Equity method investments | 110 | 60 |
| Other investments | 201 | 102 |
| Other | 454 | 274 |
| **Other revenues** | **1,178** | **660** |

## 10 Provision for credit losses

| in | 6M14 | 6M13 |
|---|---|---|
| **Provision for credit losses (CHF million)** | | |
| Provision for loan losses | 22 | 32 |
| Provision for lending-related and other exposures | 1 | 5 |
| **Provision for credit losses** | **23** | **37** |

## 11 Compensation and benefits

| in | 6M14 | 6M13 |
|---|---|---|
| **Compensation and benefits (CHF million)** | | |
| Salaries and variable compensation | 5,082 | 4,925 |
| Social security | 461 | 443 |
| Other [1] | 454 | 475 |
| **Compensation and benefits** [2] | **5,997** | **5,843** |

[1] Includes pension and other post-retirement expense of CHF 316 million and CHF 319 million in 6M14 and 6M13, respectively.
[2] Includes severance and other compensation expense relating to headcount reductions of CHF 86 million and CHF 144 million as of 6M14 and 6M13, respectively.

## 12 General and administrative expenses

| in | 6M14 | 6M13 |
|---|---|---|
| **General and administrative expenses (CHF million)** | | |
| Occupancy expenses | 569 | 561 |
| IT, machinery, etc. | 682 | 759 |
| Provisions and losses | 1,921 | 443 |
| Travel and entertainment | 165 | 176 |
| Professional services | 1,053 | 883 |
| Amortization and impairment of other intangible assets | 10 | 13 |
| Other | 762 | 809 |
| **General and administrative expenses** | **5,162** | **3,644** |

## 13 Trading assets and liabilities

| end of | 6M14 | 2013 |
|---|---|---|
| **Trading assets (CHF million)** | | |
| Debt securities | 105,080 | 110,115 |
| Equity securities [1] | 88,341 | 76,835 |
| Derivative instruments [2] | 30,943 | 31,787 |
| Other | 11,272 | 10,999 |
| **Trading assets** | **235,636** | **229,736** |
| **Trading liabilities (CHF million)** | | |
| Short positions | 40,617 | 40,162 |
| Derivative instruments [2] | 34,508 | 36,650 |
| **Trading liabilities** | **75,125** | **76,812** |

[1] Including convertible bonds.
[2] Amounts shown net of cash collateral receivables and payables.

### Cash collateral on derivative instruments

| end of | 6M14 | 2013 |
|---|---|---|
| **Cash collateral – netted (CHF million)** [1] | | |
| Cash collateral paid | 25,208 | 23,929 |

| | Less than 12 months | | 12 months or more | | Total | |
|---|---|---|---|---|---|---|
| end of | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses |
| **2013 (CHF million)** | | | | | | |
| Debt securities issued by foreign governments | 89 | 1 | 0 | 0 | 89 | 1 |
| **Debt securities available-for-sale** | **89** | **1** | **0** | **0** | **89** | **1** |

There were no unrealized losses on investment securities in 6M14. No significant impairment was recorded as the Bank does not intend to sell the investments, nor is it more likely than not that the Bank will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

[1] The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

## 20 Tax

The effective tax rate of 72.3% in 6M14 mainly reflected the impact of the geographical mix of results, an income tax expense of CHF 151 million from a change in the New York state tax laws enacted in 6M14, the recognition of additional Swiss deferred tax assets relating to timing differences following certain changes in Swiss GAAP and the re-assessment of UK deferred tax assets resulting in a reduction of deferred tax assets on net operating losses. It also reflected that the majority of the litigation settlement charge of CHF 1,618 million was non-deductible. Overall, net deferred tax assets decreased CHF 621 million to CHF 5,478 million as of the end of 6M14 compared to 2013.

The presentation of income tax expense and deferred tax assets and liabilities is in accordance with Accounting Standards Codification Topic 740 – Income Taxes guidance to interim reporting.

The quarterly income tax expense includes the impact of the continuous re-assessment of the estimated annual effective tax rate as well as the impact of items that need to be recorded in the specific interim period in which they occur.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of June 30, 2014, the Bank had accumulated undistributed earnings from foreign subsidiaries of CHF 6.2 billion which are considered indefinitely reinvested. The Bank would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Bank is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 57 million in unrecognized tax benefits within 12 months of the reporting date.

The Bank remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2010; Brazil – 2009; Japan – 2009; the UK – 2006; the US – 2006; and the Netherlands – 2005.

| Other | 23 |
| **Income tax expense** | **802** |

### Foreign tax rate differential

6M14 included a foreign tax expense of CHF 366 million in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US.

### Changes in tax law and rates

6M14 included a tax expense of CHF 151 million related to the change in New York state tax laws.

### Other non-deductible expenses

6M14 included the impact of CHF 328 million relating to the non-deductible amount of the litigation settlement charge, non-deductible interest expenses of CHF 79 million, non-deductible bank levy costs and other non-deductible compensation expenses of CHF 32 million.

### Changes in deferred tax valuation allowance

6M14 included the impact of the increase of valuation allowances of CHF 113 million mainly in respect of three of the Bank's operating entities, two in Europe and one in Asia, related to estimated current year earnings. Additionally, it also included an increase in valuation allowance for previously recognized deferred tax assets in respect of a Bank operating entity in the UK of CHF 400 million.

### Lower taxed income

6M14 included a CHF 22 million income tax benefit related to non-taxable life insurance income and a tax benefit of CHF 12 million from non-taxable dividends.

### Change in recognition of outside basis difference

6M14 included a CHF 733 million income tax benefit related to the enactment of a Swiss GAAP change impacting the expected reversal of the outside basis differences relating to Swiss subsidiary investments.

### Other

6M14 included a tax charge of CHF 15 million relating to non-recoverable foreign taxes and a tax charge of CHF 5 million relating to the increase of tax contingency accruals.

### Net deferred tax assets

| end of | 6M14 | 2013 |
|---|---|---|
| **Net deferred tax assets (CHF million)** | | |
| Deferred tax assets | 5,539 | 6,179 |
| of which net operating losses | 758 | 1,380 |
| of which deductible temporary differences | 4,781 | 4,799 |
| Deferred tax liabilities | (61) | (80) |
| **Net deferred tax assets** | **5,478** | **6,099** |

## 21 Employee deferred compensation

▸ Refer to "Note 22 – Employee deferred compensation" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q14 and "Note 27 – Employee deferred compensation" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for further information.

### Deferred compensation expense

| in | 6M14 | 6M13 |
|---|---|---|
| **Deferred compensation expense (CHF million)** | | |
| Share awards | 476 | 453 |
| Performance share awards | 328 | 326 |
| Contingent Capital Awards | 174 | – |
| Capital Opportunity Facility awards | 5 | – |
| Plus Bond awards [1] | 17 | 16 |
| 2011 Partner Asset Facility awards [2] | 10 | (30) |
| Adjustable Performance Plan share awards [3] | (2) | 21 |
| Adjustable Performance Plan cash awards [3] | (13) | (1) |

| **Weighted-average requisite service period (years)** | |
| Aggregate remaining weighted-average requisite service period | 1.2 |

### 6M14 activity

In 6M14, the Bank granted share awards, performance share awards and Contingent Capital Awards as part of the 2013 variable compensation. Expense recognition for these awards began in 6M14 and will continue over the remaining service or vesting period of each respective award.

### Share awards

In 6M14, the Bank granted 34.9 million shares at a weighted-average share price of CHF 27.84. Each share award granted entitles the holder of the award to receive one Group share, does not contain a leverage component or a multiplier effect and is subject to service conditions as it vests over three years, such that the share award vests equally on each of the three anniversaries of the grant date. Included in the share awards granted in 6M14 are 2.7 million share awards with a fair value of CHF 66 million granted to certain employees in June 2014 for the 2014 performance year.

### Performance share awards

In 6M14, the Bank granted 24.0 million performance shares at a weighted-average share price of CHF 28.13. Each performance share award granted entitles the holder of the award to receive one Group share. The performance share award also vests over three years such that the performance share award vests equally on each of the three anniversaries of the grant date. Unlike the share award, however, the outstanding performance share award is subject to a negative adjustment in the event of a divisional loss or a negative return on equity of the Group.

### Contingent Capital Awards

In 6M14, the Bank awarded Contingent Capital Awards with a total value of CHF 391 million that will be expensed over a three-year period from the grant date.

### Share-based award activity

| Number of awards (in millions) | Share awards | Performance share awards | Adjustable Performance Plan share awards | SISU awards | ISU awards |

[1] Represents additional units earned in 6M14 as the original Adjustable Performance Plan awards met performance criteria in accordance with the terms and conditions of the awards.

## 22 Pension and other post-retirement benefits

▸ Refer to "Note 23 – Pension and other post-retirement benefits" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q14 and "Note 29 – Pension and other post-retirement benefits" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for further information.

The Bank expects to contribute CHF 137 million to the international single-employer defined benefit pension plans and other post-retirement defined benefit plans in 2014. As of June 30, 2014, CHF 24 million of contributions had been made.

### Components of total benefit costs

| in | **6M14** | 6M13 |
|---|---|---|
| **Total benefit costs (CHF million)** | | |
| Service costs on benefit obligation | 11 | 14 |
| Interest costs on benefit obligation | 71 | 65 |
| Expected return on plan assets | (88) | (81) |
| Amortization of recognized actuarial losses | 31 | 44 |
| **Total benefit costs** | **25** | **42** |

## 23 Derivatives and hedging activities

▸ Refer to "Note 24 – Derivatives and hedging activities" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q14 and to "Note 30 – Derivatives and hedging activities" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Bank.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Bank elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

▸ Refer to "Note 26 – Financial instruments" for further information.

### Fair value of derivative instruments

| Net gains on the ineffective portion [1] | (1) | 0 |

[1] Included in trading revenues.
[2] Included in other revenues.

As of the end of 6M14, the maximum length of time over which the Bank hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was five years.

The net loss associated with cash flow hedges expected to be reclassified from accumulated other comprehensive income (AOCI) within the next 12 months was CHF 16 million.

## Net investment hedges

| in | 6M14 | 6M13 |
|---|---|---|
| **Gains/(losses) recognized in AOCI on derivatives (CHF million)** | | |
| Foreign exchange products | 220 | (291) |
| Total | **220** | **(291)** |

The Bank includes all derivative instruments not included in hedge accounting relationships in its trading activities.

‣ Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

### Disclosures relating to contingent credit risk

The following table provides the Bank's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and special purpose entities (SPEs) that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

## Contingent credit risk

| | | | | 6M14 | | | | 2013 |
|---|---|---|---|---|---|---|---|---|
| end of | Bilateral counterparties | Special purpose entities | Accelerated terminations | **Total** | Bilateral counterparties | Special purpose entities | Accelerated terminations | **Total** |
| **Contingent credit risk (CHF billion)** | | | | | | | | |
| Current net exposure | 11.9 | 0.9 | 0.2 | **13.0** | 11.7 | 1.1 | 0.1 | **12.9** |
| Collateral posted | 11.0 | 0.9 | – | **11.9** | 10.6 | 1.2 | – | **11.8** |
| Additional collateral required in a one-notch downgrade event | 0.6 | 0.6 | 0.0 | **1.2** | 0.6 | 0.8 | 0.0 | **1.4** |
| Additional collateral required in a two-notch downgrade event | 2.0 | 0.8 | 0.1 | **2.9** | 2.3 | 1.1 | 0.0 | **3.4** |

[1] Additional collateral required in a two-notch downgrade event has been corrected.

## Credit derivatives

‣ Refer to "Note 30 – Derivatives and hedging activities" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for further information on credit derivatives.

### Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the "Fair value of derivative instruments" tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other derivative instruments were excluded as they do not fall within the scope of US GAAP rules. Total return swaps (TRS) of CHF 9.9 billion and CHF 7.4 billion as of the end of 6M14 and 2013, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

## Credit protection sold/purchased

1 Represents credit protection purchased with identical underlyings and recoveries.
2 Based on internal ratings of BBB and above.
3 Credit protection instruments have been corrected to reclassify certain single-name instruments to multi-name instruments.
4 Includes the Clock Finance transaction.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

### Credit derivatives

| end of | 6M14 | 2013 |
|---|---|---|
| **Credit derivatives (CHF billion)** | | |
| Credit protection sold | 632.3 | 698.7 |
| Credit protection purchased | 603.2 | 663.9 |
| Other protection purchased | 103.7 | 109.0 |
| Other instruments [1] | 17.2 | 11.7 |
| **Total credit derivatives** | **1,356.4** | **1,483.3** |

1 Consists of certain cash collateralized debt obligations, total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

### Maturity of credit protection sold

| end of | Maturity less than 1 year | Maturity between 1 to 5 years | Maturity greater than 5 years | Total |
|---|---|---|---|---|
| **6M14 (CHF billion)** | | | | |
| Single-name instruments | 82.7 | 258.2 | 46.3 | 387.2 |
| Multi-name instruments | 31.5 | 153.6 | 60.0 | 245.1 |
| **Total instruments** | **114.2** | **411.8** | **106.3** | **632.3** |
| **2013 (CHF billion)** | | | | |
| Single-name instruments | 91.2 | 281.4 | 42.0 | 414.6 |
| Multi-name instruments | 19.2 | 208.2 | 56.7 | 284.1 |
| **Total instruments** | **110.4** | **489.6** | **98.7** | **698.7** |

## 24 Guarantees and commitments

▸ Refer to "Note 25 – Guarantees and commitments" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q14 and to "Note 31 – Guarantees and commitments" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for further information.

### Guarantees

| end of | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Carrying value | Collateral received |
|---|---|---|---|---|---|---|
| **6M14 (CHF million)** | | | | | | |
| Credit guarantees and similar instruments | 2,684 | 1,461 | 4,145 | 3,954 | 11 | 2,211 |

| Securities lending indemnifications | 11,968 | 0 | 11,968 | 11,968 | 0 | 11,968 |
| Derivatives [2] | 21,972 | 9,010 | 30,982 | 30,982 | 664 | – [3] |
| Other guarantees | 3,195 | 1,224 | 4,419 | 4,407 | 38 | 2,428 |
| **Total guarantees** | **44,752** | **14,030** | **58,782** | **57,727** | **773** | **19,641** |
| **2013 (CHF million)** | | | | | | |
| Credit guarantees and similar instruments [4] | 2,682 | 1,526 | 4,208 | 4,060 | 14 | 2,330 |
| Performance guarantees and similar instruments [4] | 4,819 | 3,049 | 7,868 | 6,946 | 103 | 3,277 |
| Securities lending indemnifications | 11,479 | 0 | 11,479 | 11,479 | 0 | 11,479 |
| Derivatives [2] | 18,247 | 13,403 | 31,650 | 31,650 | 715 | – [3] |
| Other guarantees | 3,894 | 1,197 | 5,091 | 5,068 | 3 | 2,606 |
| **Total guarantees** | **41,121** | **19,175** | **60,296** | **59,203** | **835** | **19,692** |

[1] Total net amount is computed as the gross amount less any participations.
[2] Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Bank had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.
[3] Collateral for derivatives accounted for as guarantees is not considered significant.
[4] Prior period has been corrected.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by Swiss Financial Market Supervisory Authority FINMA (FINMA) or by compulsory liquidation of another deposit taking bank, the Bank's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Bank's banking subsidiaries in Switzerland, the Bank's share in the deposit insurance guarantee program for the period July 1, 2013 to June 30, 2014 was CHF 0.5 billion. These deposit insurance guarantees were reflected in other guarantees. For the period July 1, 2014 to June 30, 2015, the Bank's share in this deposit insurance guarantee program based on FINMA's estimate will be unchanged at CHF 0.5 billion.

#### Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Bank has provided certain representations and warranties relating to the loans sold.

With respect to its outstanding repurchase claims, the Bank is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to June 30, 2014 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims and provisions for outstanding repurchase claims in 6M14 and 6M13, including realized losses from the repurchase of residential mortgage loans sold.

## Residential mortgage loans sold

| Residential mortgage loans sold from January 1, 2004 to June 30, 2014 (USD billion) | |
|---|---|
| Government-sponsored enterprises | 8.2 |
| Private investors [1] | 24.0 |
| Non-agency securitizations | 134.5 [2] |
| **Total** | **166.7** |

[1] Primarily banks.
[2] The outstanding balance of residential mortgage loans as of June 30, 2014 was USD 25.3 billion. The difference of the total balance of mortgage loans sold and the outstanding balance as of June 30, 2014 is attributable to borrower payments of USD 90.1 billion and losses of USD 19.1 billion due to loan defaults.

## Residential mortgage loans sold – outstanding repurchase claims

| **Other commitments (CHF million)** | | | | | | | | | | |
| Irrevocable commitments under documentary credits | 4,605 | 28 | 4,633 | 4,476 | 2,725 | 5,478 | 28 | 5,506 | 5,446 | 3,380 |
| Irrevocable loan commitments | 37,941 | 70,511 | 108,452 [2] | 104,569 | 52,451 | 27,154 | 69,661 | 96,815 [2] | 92,557 | 47,995 |
| Forward reverse repurchase agreements | 28,969 | – | 28,969 | 28,969 | 28,969 | 26,893 | – | 26,893 | 26,893 | 26,893 |
| Other commitments | 3,925 | 1,305 | 5,230 | 5,230 | 2,679 | 2,436 | 1,409 | 3,845 | 3,845 | 351 |
| **Total other commitments** | **75,440** | **71,844** | **147,284** | **143,244** | **86,824** | **61,961** | **71,098** | **133,059** | **128,741** | **78,619** |

1 Total net amount is computed as the gross amount less any participations.
2 Irrevocable loan commitments do not include a total gross amount of CHF 92,257 million and CHF 87,161 million of unused credit limits as of the end of 6M14 and 2013, respectively, which were revocable at the Bank's sole discretion upon notice to the client. The prior period has been adjusted to the current presentation.

## 25 Transfers of financial assets and variable interest entities

‣ Refer to "Note 26 – Transfers of financial assets and variable interest entities in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial report 2Q14 and "Note 32 – Transfers of financial assets and variable interest entities in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2013 for further information.

### TRANSFERS OF FINANCIAL ASSETS

#### Securitizations

The following table provides the gains or losses and proceeds from the transfer of assets relating to 6M14 and 6M13 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with cash flows between the Bank and the SPEs used in any securitizations in which the Bank still has continuing involvement, regardless of when the securitization occurred.

#### Securitizations

| in | 6M14 | 6M13 |
|---|---|---|
| **Gains and cash flows (CHF million)** | | |
| **CMBS** | | |
| Net gain [1] | 3 | 1 |
| Proceeds from transfer of assets | 1,581 | 3,631 |
| Servicing fees | 0 | 0 |
| Cash received on interests that continue to be held | 53 | 32 |
| **RMBS** | | |
| Net gain/(loss) [1] | 14 | 2 |
| Proceeds from transfer of assets | 10,842 | 14,257 |
| Purchases of previously transferred financial assets or its underlying collateral | (4) | (8) |
| Servicing fees | 1 | 2 |
| Cash received on interests that continue to be held | 206 | 275 |
| **Other asset-backed financings** | | |
| Net gain [1] | 15 | 7 |
| Proceeds from transfer of assets | 964 | 553 |
| Purchases of previously transferred financial assets or its underlying collateral [2] | 0 | (65) |
| Cash received on interests that continue to be held | 4 | 329 |

[1] Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.
[2] Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

#### Continuing involvement in transferred financial assets

The following table provides the outstanding principal balance of assets to which the Bank continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of June 30, 2014 and December 31, 2013, regardless of when the transfer of assets occurred.

#### Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 6M14 | 2013 |
|---|---|---|
| **CHF million** | | |
| **CMBS** | | |
| Principal amount outstanding | 36,855 | 37,308 |
| Total assets of SPE | 47,837 | 48,715 |
| **RMBS** | | |
| Principal amount outstanding | 45,774 | 45,571 |
| Total assets of SPE | 47,591 | 48,741 |
| **Other asset-backed financings** | | |
| Principal amount outstanding | 23,632 | 27,854 |
| Total assets of SPE | 23,632 | 27,854 |

Principal amount outstanding relates to assets transferred from the Bank and does not include principle amounts for assets transferred from third parties.

#### Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Bank may utilize to hedge the inherent risks.

## Key economic assumptions at the time of transfer

▸ Refer to "Note 27 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | | **6M14** | | 6M13 |
|---|---|---|---|---|
| at time of transfer, in | CMBS | RMBS | CMBS | RMBS |
| **CHF million, except where indicated** | | | | |
| Fair value of beneficial interests | 566 | 1,865 | 158 | 1,963 |
| of which level 2 | 501 | 1,720 | 141 | 1,922 |
| of which level 3 | 65 | 145 | 17 | 41 |
| Weighted-average life, in years | 3.6 | 4.6 | 8.9 | 7.0 |
| Prepayment speed assumption (rate per annum), in % [1] | – [2] | 1.5–23.0 | – [2] | 6.3–31.0 |
| Cash flow discount rate (rate per annum), in % [3] | 1.0–11.0 | 2.0–17.0 | 1.6–8.2 | 0.0–45.9 |
| Expected credit losses (rate per annum), in % | 1.0–2.0 | 2.6–14.0 | 0.0–7.5 | 0.0–45.8 |

Transfers of assets in which the Bank does not have beneficial interests are not included in this table.

[1] Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

[2] To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

[3] The rate was based on the weighted-average yield on the beneficial interests.

### Key economic assumptions as of the reporting date

The following tables provide the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of June 30, 2013 and December 31, 2012.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| | 6M14 | | | 2013 | | |
|---|---|---|---|---|---|---|
| end of | CMBS [1] | RMBS | Other asset-backed financing activities [2] | CMBS [1] | RMBS | Other asset-backed financing activities [2] |
| **CHF million, except where indicated** | | | | | | |
| Fair value of beneficial interests | 1,297 | 2,761 | 204 | 1,132 | 2,354 | 284 |
| of which non-investment grade | 8 | 350 | 157 | 26 | 359 | 204 |
| Weighted-average life, in years | 5.4 | 8.5 | 4.7 | 6.5 | 8.6 | 3.7 |
| Prepayment speed assumption (rate per annum), in % [3] | – | 1.3–35.0 | – | – | 1.0–23.5 | – |
| Impact on fair value from 10% adverse change | – | (31.0) | – | – | (26.6) | – |
| Impact on fair value from 20% adverse change | – | (61.0) | – | – | (48.6) | – |
| Cash flow discount rate (rate per annum), in % [4] | 1.4–24.4 | 1.8–39.6 | 0.2–21.2 | 1.1–37.1 | 1.7–22.4 | 1.0–23.1 |
| Impact on fair value from 10% adverse change | (20.7) | (57.3) | (2.8) | (25.5) | (65.0) | (2.4) |
| Impact on fair value from 20% adverse change | (40.6) | (111.5) | (5.5) | (50.0) | (124.9) | (4.9) |
| Expected credit losses (rate per annum), in % | 0.9–23.6 | 1.3–38.4 | 1.1–9.7 | 0.2–36.6 | 0.1–17.3 | 0.7–21.0 |
| Impact on fair value from 10% adverse change | (9.8) | (34.3) | (0.9) | (10.9) | (42.2) | (0.4) |
| Impact on fair value from 20% adverse change | (19.6) | (67.3) | (1.7) | (21.5) | (79.6) | (0.7) |

1 To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.
2 CDOs within this category are generally structured to be protected from prepayment risk.
3 Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.
4 The rate was based on the weighted-average yield on the beneficial interests.

### Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of June 30, 2014 and December 31, 2013.

▸ Refer to "Note 27 – Assets pledged and collateral" for information on assets pledged or assigned.

### Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

| end of | 6M14 | 2013 |
|---|---|---|

### Non-consolidated VIEs

Non-consolidated VIE assets are related to the non-consolidated VIEs with which the Bank has variable interests. These amounts represent the assets of the entities themselves and are typically unrelated to the exposures the Bank has with the entity and thus are not amounts that are considered for risk management purposes.

### Non-consolidated VIEs

[1] Cash instruments are generally presented on a weighted average basis, while certain derivative instruments either contain a combination of weighted averages and arithmetic means of the related inputs or are presented on an arithmetic mean basis.
[2] Management's best estimate of the speed at which interest rates will revert to the long-term average.
[3] Estimate of the probability of structured notes being put back to the Bank at the option of the investor over the remaining life of the financial instruments.
[4] Risk of unexpected large declines in the underlying values between collateral settlement dates.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

**Note:** Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

# Introduction

This report filed on Form 6-K contains certain information about Credit Suisse AG (Bank) relating to its results as of and for the three and six months ended June 30, 2014. On July 22, 2014, Credit Suisse Group AG (Group) announced its results for such three and six month period. A copy of the related Earnings Release is attached as an exhibit to this Form 6-K.

This Form 6-K (including the exhibit hereto) is hereby (i) incorporated by reference into the Registration Statement on Form F-3 (file no. 333-180300) and (ii) shall be deemed to be "filed" for purposes of the Securities Exchange Act of 1934, as amended except, in the case of both (i) and (ii), the information on page 3 of the Earnings Release.

The 2Q14 Credit Suisse Financial Report as of and for the three and six months ended June 30, 2014 will be published on or about July 31, 2014.

Credit Suisse AG is a Swiss bank and joint stock corporation established under Swiss law, and is a wholly-owned subsidiary of the Group. The Bank's registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to "CHF" are to Swiss francs.

# Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Private Banking & Wealth Management and Investment Banking segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the two segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking & Wealth Management. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

## Differences between the Group and the Bank businesses

| Entity | Principal business activity |
|---|---|
| Neue Aargauer Bank | Banking (in the Swiss canton of Aargau) |
| BANK-now | Private credit and car leasing (in Switzerland) |
| Financing vehicles of the Group | Special purpose vehicles for various funding activities of the Group, including for purposes of raising consolidated capital |

# Earnings Release

## Credit Suisse 2Q14 results: Core pre-tax income of CHF 1,767 million for strategic businesses and return on equity of 13%; reported Core pre-tax loss of CHF 370 million, reflecting the previously announced CHF 1,618 million charge relating to the final settlement of all outstanding US cross-border matters

## Credit Suisse 6M14 results: Core pre-tax income of CHF 3,707 million for strategic businesses and return on equity of 13%; reported Core pre-tax income of CHF 1,030 million

## Look-through CET1 ratio of 9.5% as of the end of 2Q14; on track to exceed 10% by year-end 2014

## Resilient 2Q14 performance of Private Banking & Wealth Management's strategic businesses with strong net new assets of CHF 11.8 billion

## 2Q14 Investment Banking results reflect strong origination activity, continued strong performance in credit and securitized products and improved capital efficiency

**Private Banking & Wealth Management strategic performance reflecting lower revenues but continued efficiency gains:**

- 2Q14 resilient profitability in strategic businesses with pre-tax income of CHF 882 million, down 13% from a very strong 2Q13, and a return on capital of 28%
- 2Q14 total reported pre-tax loss of CHF 749 million, including the previously announced CHF 1,618 million charge relating to the final settlement of all outstanding US cross-border matters
- Further increased cost efficiency of strategic businesses in 6M14 with cost/income ratio of 68%, improved from 71% in 6M13
- Increased Wealth Management Clients net margin to 28 basis points for 6M14, supported by significant progress on cost reduction
- Wealth Management Clients 2Q14 gross margin at 99 basis points, down five basis points compared to 1Q14, reflecting an increase in assets under management, a change in client mix, lower fee-based revenues and slightly lower net interest income
- Strong 2Q14 net new assets from strategic businesses of CHF 11.8 billion with annualized growth rate of 4%, notwithstanding continued outflows of CHF 2.9 billion from Western European cross-border business due to substantial progress on regularization of asset base; total net new assets of CHF 10.1 billion with total Western European cross-border outflows of CHF 4.1 billion

**Investment Banking performance reflecting stability of diversified strategic franchise:**

- Strategic businesses with pre-tax income of CHF 1,034 million and return on capital of 18%; strong performance from fixed income yield franchises and underwriting businesses, partly offset by less favorable trading conditions for equity sales and trading and continued weakness in global macro products
- Total reported pre-tax income of CHF 752 million with strong performance in key businesses and acceleration in the wind-down of the non-strategic unit
- Strong 6M14 return on capital in Investment Banking, with 20% from strategic businesses and solid 13% in total reported results
- Restructuring of macro business, including exit from commodities trading, to further enhance capital and operating efficiencies targeting approximately USD 200 million in expense savings, USD 8 billion in risk-weighted asset reduction and USD 25 billion in leverage exposure reduction by the end-state

**Resilient capital base and leverage ratio as of the end of 2Q14, notwithstanding the settlement of the US cross-border matter:**

- Look-through BIS CET1 ratio of 9.5%, progress in executing capital measures expected to fully mitigate impact of litigation settlement and on track to exceed 10% CET1 ratio by year-end, including continued accrual of cash dividend for 2014; Look-through Swiss total capital ratio at 15.3%
- Leverage exposure at CHF 1,156 billion; Phase-in Swiss leverage ratio of 4.8%; Look-through Swiss leverage ratio of 3.7% within reach of the 2019 requirement of 4%

**On track to reach cost reduction targets:**

- Delivered CHF 3.4 billion of adjusted annualized savings compared to the annualized expense run rate for 6M11; maintaining momentum towards target of over CHF 4.5 billion by end-2015

**Wind-down of non-strategic units and progress in resolving legacy litigation issues:**

- Wind-down ahead of schedule with Swiss leverage exposure reduction of USD 3 billion and risk-weighted asset reduction of USD 6 billion in the Investment Banking non-strategic unit
- Significant progress in resolving key legacy litigation issues in 2014 to date

July 22, 2014 **Credit Suisse Group reports 2Q14 and 6M14 results**

Brady W. Dougan, Chief Executive Officer, said: "Our reported results for the second quarter and the first half of 2014 were impacted by the resolution of our most significant legacy litigation issue. During the quarter, we continued to see good momentum with clients, while at the same time making further progress in winding-down our non-strategic units. Our strategic results were solid, demonstrating the resilience of our business model, notwithstanding subdued client trading activity in certain areas which impacted both Private Banking & Wealth Management and Investment Banking."

He continued: "With the final settlement of all outstanding US cross-border matters as announced in May, we brought to a close the most significant and longstanding litigation issue for Credit Suisse. I want to reiterate that we deeply regret the past misconduct that led to this settlement and that we take full responsibility for it. The continued trust and support of our clients helped us mitigate the impact of the settlement on our business. We are executing our capital measures and are on track to improve our Look-through CET 1 ratio to above 10% by the end of the year. This includes the continued accrual for a cash dividend for 2014. Once we reach 10%, and as we continue to accrete capital towards our 11% long-term target, we intend to return approximately half of our earnings to shareholders through our annual distributions."

Commenting on Private Banking & Wealth Management, he said: "We generated strong net new assets of CHF 11.8 billion in the second quarter from our strategic businesses, driven by growth in Asia Pacific and Switzerland – two of our key markets. This strong growth more than offset outflows from our Western European cross border business, where we are taking proactive steps to regularize our asset base. This is part of the secular transformation of the cross border wealth management business. During the quarter, we further improved the efficiency of our strategic businesses with lower operating expenses, which helped us mitigate the impact of the subdued transaction activity and the continued low interest rate environment on our results."

Commenting on Investment Banking, he said: "Investment Banking delivered solid results for the second quarter of 2014, reflecting strong origination activity, continued momentum in our yield franchises and improved capital efficiency compared to the first quarter. The restructuring of our macro business, including the exit from commodities trading, is expected to drive further capital, leverage and expense reductions. Our strategic businesses reported a return on capital of 18% for the second quarter and 20% for the first half of 2014, demonstrating the stability of our diversified strategic franchise."

## Core Results summary

For additional information on financial information presented in this Earnings Release, including references to return on equity and return on capital, refer to the tabular disclosures in the Appendix and other explanatory disclosures regarding capital and leverage metrics in the section titled "Important information" on page 18.

Core Results do not include noncontrolling interests without significant economic interests.

**Net loss attributable to shareholders** was CHF 700 million in 2Q14.

**Loss before taxes** of CHF 370 million in 2Q14 compared to income before taxes of CHF 1,540 million in 2Q13, reflecting a 30% increase in total operating expenses, primarily driven by the CHF 1,618 million charge relating to the final settlement of all outstanding US cross-border matters. In strategic businesses, pre-tax income of CHF 1,767 million decreased 15% compared to 2Q13, and in non-strategic businesses the pre-tax loss was CHF 2,137 million.

**Net revenues** of CHF 6,433 million decreased 6% compared to 2Q13. In the strategic businesses, net revenues declined 7% to CHF 6,324 million compared to 2Q13, with lower revenues in Private Banking & Wealth Management and Investment Banking. In the non-strategic businesses, net revenues increased 211% to CHF 109 million compared to 2Q13.

**Provision for credit losses** of CHF 18 million in 2Q14, reflected net provisions in Private Banking & Wealth Management, partially offset by a release of provisions in Investment Banking.

**Total operating expenses** of CHF 6,785 million were up 30% compared to 2Q13, primarily reflecting 84% higher general and administrative expenses. In strategic businesses, total operating expenses of CHF 4,532 million decreased 3% compared to 2Q13, mainly reflecting an 18% decrease in commission expenses and a 5% decline in general and administrative expenses. In non-strategic businesses total operating expenses of CHF 2,253 million increased 307% compared to 2Q13, reflecting the litigation settlement charge of CHF 1,618 million recognized in the non-strategic results of the Private Banking & Wealth Management division. Business realignment costs in 2Q14 were CHF 153 million.

**Income tax expense** of CHF 307 million recorded in 2Q14 reflected the impact of the geographical mix of results, the recognition of additional Swiss deferred tax assets relating to timing differences following certain changes in Swiss GAAP and the re-assessment of UK deferred tax assets resulting in a reduction of deferred tax assets on net operating losses. Overall, net deferred tax assets decreased CHF 122 million to CHF 5,134 million as of the end of 2Q14 compared to 1Q14. Deferred tax assets on net operating losses decreased CHF 678 million to CHF 758 million during 2Q14. The Core Results effective tax rate was (83.0)% in 2Q14, compared to 38.8% in 1Q14. The effective tax rate reflects that the majority of the litigation settlement charge was non-deductible. Excluding this impact, the Core Results effective tax rate for 2Q14 would have been 26.2%.

**Significant litigation matter in 2Q14.** In May 2014, Credit Suisse entered into a comprehensive and final settlement regarding all outstanding US cross-border matters, including agreements with the US Department of Justice, the New York State Department of Financial Services, the Board of Governors of the US Federal Reserve System and, as previously announced, the US Securities and Exchange Commission (SEC). The final settlement amount was USD 2,815 million (CHF 2,510 million). In prior quarters, Credit Suisse had taken litigation provisions totaling CHF 892 million related to this matter. As a result, a pre-tax litigation settlement charge of CHF 1,618 million was recognized in 2Q14 in the non-strategic results of the Private Banking & Wealth Management division. The settlement included a guilty plea entered into by the Group's Swiss banking entity, Credit Suisse AG.

**Other litigation matters.** The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for certain proceedings for which the Group believes an estimate is possible decreased from a range of zero to CHF 2.4 billion at the end of 1Q14 to a range of zero to CHF 1.0 billion at the end 2Q14.

**Diluted loss per share from continuing operations** was CHF 0.45 for 2Q14 compared to diluted earnings per share of CHF 0.53 in 2Q13 and of CHF 0.47 in 1Q14.

**Capital and leverage.** As of the end of 2Q14, Credit Suisse reported a Look-through BIS common equity tier 1 (CET1) ratio of 9.5%, compared to 10.0% as of the end of 1Q14. As of the end of 2Q14, the Look-through Swiss total capital ratio was 15.3%, compared to 15.0% as of the end of 1Q14.

The BIS CET1 ratio as of the end of 2Q14 was 13.8%, compared to 14.3% as of the end of 1Q14, reflecting a decrease in CET1 capital. Basel III risk-weighted assets for the Group were stable at CHF 285.4 billion as of the end of 2Q14, reflecting a decrease in credit risk related to credit valuation adjustments (CVA) and market risk largely offset by increases in credit risk (excluding CVA) and operational risk and an increase resulting from foreign exchange translation.

As of the end of 2Q14, Credit Suisse's Swiss leverage exposure amounted to CHF 1,156 billion, compared to an updated long-term target of approximately CHF 1,000 billion. The Look-through Swiss leverage ratio was 3.7%, compared to the 4% requirement for 2019.

**Benefits of the integrated bank.** In 2Q14, Credit Suisse generated CHF 1.0 billion of collaboration revenues from the integrated bank. This corresponds to 15.4% of Core net revenues in 2Q14.

## Private Banking & Wealth Management

In 2Q14, Private Banking & Wealth Management reported a loss before taxes of CHF 749 million and net revenues of CHF 3,046 million. In its strategic businesses, Private Banking & Wealth Management reported income before taxes of CHF 882 million and net revenues of CHF 2,932 million. Compared to 2Q13, income before taxes in strategic businesses decreased 13%, mainly driven by lower transaction- and performance-based revenues and lower net interest income, partially offset by lower operating expenses. Net revenues were slightly lower compared to 1Q14 mainly due to lower transaction- and performance-based revenues and lower other revenues. In its non-strategic businesses, Private Banking & Wealth Management reported a loss before taxes of CHF 1,631 million, driven by the litigation settlement charge of CHF 1,618 million relating to the final settlement of all outstanding US cross-border matters. In 2Q14, assets under management for the division were CHF 1,329.7 billion and the division attracted net new assets of CHF 10.1 billion.

In 2Q14, the strategic businesses for Private Banking & Wealth Management reported income before taxes of CHF 882 million and net revenues of CHF 2,932 million.

Compared to 2Q13, net revenues decreased 9% primarily reflecting lower transaction- and performance-based revenues and decreased net interest income. The decrease in transaction- and performance-based revenues reflected lower revenues across most major revenue categories, primarily from foreign exchange client business, carried interest on realized private equity gains and semi-annual performance fees from Hedging-Griffo. In a low interest rate environment, net interest income decreased due to significantly lower deposit margins on stable average deposit volumes and slightly lower loan margins on higher average loan volumes. Slightly lower recurring commissions and fees reflected decreased investment product management fees, partially offset by higher discretionary mandate management fees and slightly higher asset management fees.

Compared to 1Q14, net revenues decreased 3%, primarily reflecting lower transaction- and performance-based revenues and lower other revenues. The decrease in transaction- and performance-based revenues reflected lower brokerage and product issuing fees, lower performance fees and carried interest, lower placement and transaction fees and lower foreign exchange client business, partially offset by higher equity participations income. Lower other revenues mainly reflected a fair value decrease on Clock Finance, a credit securitization transaction. Stable net interest income reflected lower deposit margins on stable average deposit volumes and stable loan margins on slightly higher average loan volumes. Stable recurring commissions and fees mainly reflected lower banking services fees and lower investment product management fees, largely offset by slightly higher asset management fees and slightly higher discretionary mandate management fees.

Provision for credit losses was CHF 30 million, compared to CHF 19 million in 2Q13 and CHF 17 million in 1Q14.

Total operating expenses were lower compared to 2Q13 and stable compared to 1Q14. Compared to 2Q13, compensation and benefits decreased 7%, mainly reflecting lower salary expenses, driven by lower headcount, and general and administrative expenses decreased 7%, primarily reflecting the results of the ongoing efficiency measures and lower expense provisions. Compared to 1Q14, compensation and benefits decreased 3% due to lower discretionary performance-related compensation. Slightly higher general and administrative expenses primarily reflected higher travel and entertainment expenses and slightly higher professional services fees.

The cost/income ratio for strategic results was 69% in 2Q14, up one percentage point compared to 2Q13 and 1Q14.

The *Wealth Management Clients* business in 2Q14 reported pre-tax income of CHF 569 million and net revenues of CHF 2,017 million. Net revenues decreased 10% compared to 2Q13, with lower transaction- and performance-based revenues, lower net interest income and slightly lower recurring commissions and fees. Transaction- and performance-based revenues decreased, mainly reflecting lower market activity adversely impacting foreign exchange client business and brokerage and product issuing fees, as well as lower equity participations income, due to an increased dividend in 2Q13 related to an ownership interest in SIX Group AG, and lower performance fees from Hedging-Griffo. Lower net interest income reflected the low interest rate environment, significantly lower deposit margins on stable average deposit volumes and lower loan margins on higher average loan volumes and lower levels of deposits eligible as stable funding. Recurring commissions and fees decreased slightly, driven by lower investment product management fees and slightly lower investment account and services fees, partially offset by higher discretionary mandate management fees and slightly higher banking services fees.

Compared to 1Q14, net revenues decreased 3%, driven by lower transaction- and performance-based revenues and slightly lower net interest income. Transaction- and performance-based revenues decreased, mainly driven by lower brokerage and product issuing fees and lower placement and transaction fees, partially offset by higher equity participations income. Slightly lower net interest income reflected lower deposit margins on stable average deposit volumes and lower loan margins on slightly higher loan volumes. Recurring commissions and fees were stable with lower investment product management fees and lower banking services fees, reflecting lower account statement fees, offset by increases across other categories.

In 2Q14, the gross margin was 99 basis points, 13 basis points lower compared to 2Q13, mainly reflecting lower transaction- and performance-based revenues, a continued adverse interest rate environment and a 2.5% increase in average assets under management. Compared to 1Q14, the gross margin was down five basis points, driven by a 2.7% increase in average assets under management, a change in client mix, lower fee-based revenues and slightly lower net interest income.

Wealth Management Clients net margin was 28 basis points in 2Q14, three basis points lower compared to 2Q13, reflecting lower transaction- and performance-based revenues and lower net interest income, partially offset by lower operating expenses. Compared to 1Q14, the net margin was one basis point lower, driven by slightly lower income before taxes.

The *Corporate & Institutional Clients* business reported pre-tax income of CHF 211 million in 2Q14 and net revenues of CHF 475 million. Net revenues decreased 7% compared to 2Q13, mainly driven by decreased other revenues, lower net interest income and lower transaction- and performance-based revenues. Lower other revenues reflected a fair value decrease on the Clock Finance transaction. The decrease in net interest income reflected the low interest rate environment, significantly lower deposit margins on higher average deposit volumes and lower levels of deposits eligible as stable funding, partially offset by slightly higher loan margins on higher average loan volumes. The decrease in transaction- and performance-based revenues reflected lower sales and trading revenues, lower brokerage and product issuing fees and slightly lower foreign exchange client business. Slightly lower recurring commissions and fees reflected lower investment product management fees and lower banking services fees, partially offset by higher discretionary mandate management fees.

Compared to 1Q14, net revenues decreased 3%, with lower other revenues and lower recurring commissions and fees, partially offset by higher net interest income. Lower other revenues reflected a fair value decrease on the Clock Finance transaction. The decrease in recurring commissions and fees primarily reflected lower banking services fees. The increase in net interest income reflected higher loan margins on slightly higher average loan volumes, partially offset by lower deposit margins on stable average deposit volumes. Stable transaction- and performance-based revenues reflected higher equity participations income, offset by slightly lower foreign exchange client business.

The *Asset Management* business reported pre-tax income of CHF 102 million in 2Q14, with net revenues of CHF 440 million. Net revenues decreased 9% compared to 2Q13, with fee-based revenues decreasing 8%, reflecting lower carried interest on realized private equity gains and the absence of performance fees from Hedging-Griffo due to year-to-date returns performing below their respective high-water marks, partially offset by higher placement fees and slightly higher asset management fees due to higher average assets under management. Net revenues declined 5% compared to 1Q14, with slightly lower fee-based revenues reflecting lower carried interest on realized private equity gains and lower real estate transaction fees, partially offset by slightly higher asset management fees and higher placement fees.

The fee-based margin was 46 basis points in 2Q14, compared to 53 basis points in 2Q13 and 49 basis points in 1Q14. The movements reflected both the lower fee-based revenues and the higher average assets under management, which increased 5.8% and 3.5% compared to 2Q13 and 1Q14, respectively.

## Non-strategic results

*The non-strategic results for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to the small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to US cross-border matters, the impact of restructuring of the German onshore operations, other smaller non-strategic positions formerly in the Corporate & Institutional Clients business and the run-off and active reduction of selected products.*

In 2Q14, the non-strategic businesses reported a loss before taxes of CHF 1,631 million, reflecting the litigation settlement charge of CHF 1,618 million relating to the final settlement of all outstanding US cross-border matters. In 1Q14, Private Banking & Wealth Management's non-strategic businesses reported income before taxes of CHF 47 million, including an equity participation gain of CHF 91 million from the sale in January 2014 of Customized Fund Investment Group, a private equity fund of funds and co-investment business.

## Assets under management – Private Banking & Wealth Management

**Assets under management** of CHF 1,329.7 billion increased CHF 37.2 billion compared to the end of 1Q14, driven mainly by positive market movements, net new assets and favorable foreign exchange-related movements.

**Net new assets:** Private Banking & Wealth Management recorded net new assets of CHF 10.1 billion in 2Q14. In the strategic portfolio, Wealth Management Clients contributed net new assets of CHF 7.4 billion in 2Q14 with continued strong inflows from emerging markets, particularly in Asia Pacific, and Switzerland, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 0.6 billion in 2Q14. Asset Management reported net new assets of CHF 4.1 billion in 2Q14, driven by inflows in traditional products, with substantial contributions from index strategies, and inflows from hedge funds and credit products. In the non-strategic portfolio, net asset outflows of CHF 1.7 billion reflected the exit of certain businesses.

## Investment Banking

In 2Q14, Investment Banking reported income before taxes of CHF 752 million and net revenues of CHF 3,342 million. Investment Banking delivered solid results, driven by the strength of the diversified strategic franchise and an accelerated wind-down of risk-weighted assets and leverage exposure in the non-strategic unit. In strategic businesses, net revenues declined 6% compared to 2Q13, primarily driven by less favorable trading conditions in equity sales and trading businesses and continued weakness in global macro products, particularly in foreign exchange and commodities. Compared to 1Q14, net revenues declined 5% in strategic businesses as less favorable trading conditions in certain fixed income businesses and equity sales and trading offset strong results in underwriting and advisory. In 2Q14, Investment Banking accelerated the wind-down of the non-strategic unit, reducing Swiss leverage exposure by USD 3 billion, or 4%, and Basel III risk-weighted assets by USD 6 billion, or 32%, compared to 1Q14.

With respect to the global macro products business, Credit Suisse decided to exit its small commodities trading business and the results during the wind-down period will be reflected in the non-strategic unit beginning in 3Q14. Credit Suisse will also re-focus its foreign exchange business towards a combination of electronic trading and voice offering for larger and more complex trades and will further simplify its rates product offering to focus primarily on satisfying client liquidity needs in cash products and derivatives.

## Strategic results

In 2Q14, the strategic businesses reported income before taxes of CHF 1,034 million and net revenues of CHF 3,395 million. Compared to 2Q13, results were impacted by the weakening of the average rate of the US dollar against the Swiss franc, which negatively impacted revenues and favorably impacted expenses. Fixed income sales and trading revenues were higher compared to 2Q13, reflecting continued investor demand for yield products, but were partially offset by challenging trading conditions in global macro products. Revenues decreased compared to 1Q14, as lower global credit products and securitized products results, following a seasonally stronger 1Q14 for these businesses, more than offset a rebound in emerging markets revenues. Equities sales and trading results declined from strong 2Q13 levels, driven by less favorable trading conditions, specifically a low volatility and low volume environment, resulting in reduced client activity. Revenues were lower than 1Q14, primarily driven by weak client activity in our equity derivatives business. Underwriting and advisory results were higher compared to 2Q13 and 1Q14, reflecting significantly higher equity underwriting revenues, as origination remained robust.

**Fixed income sales and trading** Fixed income results reflected continued investor demand for yield products, specifically credit and securitized products in a low rate environment. 2Q13 performance was adversely impacted by a significant decline in trading activity due to rising rates and widening credit spreads from the US Federal Reserve's announcement to reduce its bond buying program. Emerging markets revenues improved substantially, primarily driven by strong financing activity. Results also reflected higher revenues from corporate lending. Securitized products revenues increased, driven by higher revenues in agency securities and mortgage servicing and consistent performance in asset finance. Global credit products had a solid performance, as strong origination activity led to higher secondary trading in investment grade and leveraged finance franchises. Global macro products had significantly lower revenues, as a low volatility environment resulted in subdued client activity, particularly in foreign exchange and commodities businesses. Rates revenues were lower, driven by declines in Japan and the US. Revenues decreased compared to 1Q14, as lower global credit products and securitized products results, following a seasonally stronger 1Q14 for these businesses, more than offset a rebound in emerging markets revenues.

**Equities sales and trading** Equity sales and trading revenues declined, driven by less favorable trading conditions specifically a low volatility and low volume environment, resulting in reduced client activity. Equity sales and trading revenues decreased compared to 2Q13, due to substantially lower revenues from systematic market making, reflecting significantly less favorable trading conditions compared to 2Q13 which included the positive impact of quantitative easing in Japan. Derivatives revenues were lower, as a significant decline in volatility resulted in weaker client activity, particularly in the US flow businesses, and 2Q13 results benefitted from strong performance in Asia and the US. Cash equities revenues declined significantly as reduced commission revenues, reflecting lower global market volumes, more than offset market share gains in the US. Prime services results were solid, reflecting continued market leadership, increased activity in Europe and growth in client clearing services. Compared to 1Q14, revenues declined primarily driven by weak client activity in our equity derivatives business.

**Underwriting and advisory** results were higher compared to 2Q13 and 1Q14, reflecting significantly higher equity underwriting revenues, as origination remained robust.

| Cost/income ratio | 69.7 | 68.5 | 67.5 | – | – | 69.1 | 64.4 | – |

**Total operating expenses** of CHF 2,366 million decreased 3% in Swiss francs compared 2Q13. In US dollars operating expenses increased 4%, driven by higher deferred compensation expense, as new award accruals more than offset roll-offs from prior year awards. Investment Banking strategic businesses also had higher discretionary compensation expense reflecting a change in the variable compensation accrual methodology. The increases were partially offset by lower general and administrative expenses, driven by lower technology costs and lower UK bank levy expenses. Compared to 1Q14, total operating expenses decreased 3% in Swiss francs, reflecting lower deferred compensation expense from prior-year awards and lower discretionary compensation expense. Additionally, we had lower general and administrative expenses reflecting lower technology costs and lower UK bank levy expenses.

**Capital metrics** As of the end of 2Q14, Investment Banking strategic businesses reported Basel III risk-weighted assets of USD 168 billion, up USD 2 billion from 1Q14. Swiss leverage exposure in strategic businesses of USD 781 billion, reflected an increase of USD 5 billion from 1Q14.

## Non-strategic results

*Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily non-exchange-cleared instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.*

### Investment Banking – non-strategic results

| Risk-weighted assets – Basel III | 11,536 | 16,436 | 19,159 | (30) | (40) | 11,536 | 19,159 | (40) |

In 2Q14, Investment Banking accelerated the wind-down of the non-strategic unit, reducing Swiss leverage exposure by USD 3 billion and Basel III risk-weighted assets by USD 6 billion compared to 1Q14. The non-strategic businesses reported a loss before taxes of CHF 282 million and net revenue losses of CHF 53 million. Performance reflected portfolio net valuation gains and improved funding costs from proactive management of both legacy debt instruments and trading assets. Total operating expenses increased compared to both 2Q13 and 1Q14, driven by higher litigation provisions, primarily in connection with mortgage related matters.

As of the end of 2Q14, the Investment Banking non-strategic unit reported Basel III risk-weighted assets of USD 13 billion, down USD 7 billion, or 35%, from 2Q13. Additionally, the Investment Banking non-strategic unit reduced its Basel III risk-weighted assets by USD 6 billion or 32% from 1Q14. This compares to a risk-weighted assets target of USD 6 billion by year-end 2015. The non-strategic unit reported Swiss leverage exposure of USD 72 billion, a reduction of USD 21 billion, or 23%, from 2Q13 and a reduction of USD 3 billion, or 4%, from 1Q14. This compares to a target of USD 24 billion in Swiss leverage exposure by year-end 2015.

## Corporate Center

*Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.*

The Corporate Center recorded a loss before taxes of CHF 373 million in 2Q14, including business realignment costs of CHF 136 million and IT architecture simplification expenses of CHF 81 million. 2Q14 results also included fair value losses on own debt of CHF 29 million, fair value gains on stand-alone derivatives of CHF 15 million and debit valuation adjustment gains on certain structured notes liabilities of CHF 4 million, resulting in overall fair value losses on own credit spreads of CHF 10 million in 2Q14. This compares to a loss before taxes of CHF 131 million in 2Q13 and a loss before taxes of CHF 439 million in 1Q14.

## Balance sheet, shareholders' equity and regulatory capital

### Balance sheet

As of the end of 2Q14, total assets of CHF 891.6 billion increased 2% compared to 1Q14, reflecting an increase in operating activities and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets increased CHF 10.3 billion.

### Total shareholders' equity

Credit Suisse's total shareholders' equity decreased to CHF 40.9 billion as of the end of 2Q14 compared to CHF 43.2 billion as of the end of 1Q14. Total shareholders' equity was negatively impacted by dividend payments, transactions relating to the settlement of share-based compensation awards and the net loss. These movements were partially offset by the increases to the share-based compensation obligation and the impact of foreign exchange-related movements on cumulative translation adjustments. As of the end of 2Q14, Credit Suisse had 1,607.2 million shares issued.

### BIS regulatory capital and ratios – Basel III

The CET1 ratio was 13.8% as of the end of 2Q14, compared to 14.3% as of the end of 1Q14, reflecting a decrease in CET1 capital. Credit Suisse's tier 1 ratio was 16.0% as of the end of 2Q14, compared to 15.6% as of the end of 1Q14. The total capital ratio increased to 19.5% as of the end of 2Q14 compared to 19.1% as of the end of 1Q14.

CET1 capital was CHF 39.5 billion as of the end of 2Q14 compared to CHF 40.9 billion as of the end of 1Q14, mainly reflecting the net loss and the net effect of share-based compensation. CET1 capital was also impacted by a quarterly dividend accrual.

Additional tier 1 capital increased to CHF 6.1 billion, mainly due to the issuance of USD 2.5 billion 6.25% tier 1 capital notes in June 2014. Tier 2 capital increased slightly to CHF 10.1 billion as of the end of 2Q14.

Total eligible capital was CHF 55.6 billion as of the end of 2Q14 compared to CHF 54.6 billion as of the end of 1Q14, reflecting the increase in additional tier 1 capital, partially offset by the decrease in CET1 capital.

As of the end of 2Q14, the Look-through CET1 ratio was 9.5% compared to an expected year-end ratio of over 10.0% and a long-term target of 11.0%.

#### Capital ratios – Basel III

| | Phase-in | | | Look-through | | |
|---|---|---|---|---|---|---|
| end of | **2Q14** | 1Q14 | 4Q13 | **2Q14** | 1Q14 | 4Q13 |
| **BIS capital ratios (%)** | | | | | | |
| CET1 ratio | 13.8 | 14.3 | 15.7 | 9.5 | 10.0 | 10.0 |
| Tier 1 ratio | 16.0 | 15.6 | 16.8 | 13.1 | 12.8 | 12.8 |
| Total capital ratio | 19.5 | 19.1 | 20.6 | 15.4 | 15.1 | 15.1 |

### Swiss regulatory capital and ratios

As of the end of 2Q14, Swiss CET1 capital and Swiss total capital ratios were 13.7% and 19.4%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.75% and 10.18%, respectively.

On a look-through basis, Swiss CET1 capital was CHF 26.2 billion and the Swiss CET1 ratio was 9.4% as of the end of 2Q14. Swiss total eligible capital was CHF 42.9 billion and the Swiss total capital ratio was 15.3% as of the end of 2Q14, each on a look-through basis.

### Swiss leverage ratio

As of the end of 2Q14, the Swiss leverage ratio was 4.8% and total average exposure was CHF 1,159.2 billion. As of the end of 2Q14, Swiss total exposure was CHF 1,156 billion compared to Credit Suisse's long-term target of approximately CHF 1,000 billion. The Look-through Swiss leverage ratio was 3.7% as of the end of 2Q14, compared to the 4.0% requirement for 2019.

#### Swiss leverage ratio

## Important information

The Group has not finalized its 2Q14 Financial Report and the Group's independent registered public accounting firm has not completed its review of the condensed consolidated financial statements (unaudited) for the period. Accordingly, the financial information contained in this Earnings Release is subject to completion of quarter-end procedures, which may result in changes to that information. Certain reclassifications have been made to prior periods to conform to the current presentation.

For purposes of this Earnings Release, unless the context otherwise requires, the terms "Credit Suisse" and "the Group" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and these terms are used to refer to both when the subject is the same or substantially similar. The term "the Bank" is used when referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Information referenced in this Earnings Release, whether via website links or otherwise, is not incorporated into this Earnings Release.

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. The related disclosures are in accordance with Credit Suisse's current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of Credit Suisse's assumptions or estimates could result in different numbers from those shown herein.

References to phase-in and look-through included herein refer to Basel III requirements. Phase-in reflects that for the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions) and for the years 2013 – 2022, there will be a phase out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the full phase out of certain capital instruments.

Unless otherwise noted, leverage ratio, leverage exposure and total capital amounts included herein are based on the current FINMA framework. The Swiss leverage ratio is calculated as Swiss total eligible capital, divided by a three-month average leverage exposure, which consists of balance sheet assets, off-balance sheet exposures, which consist of guarantees and commitments, and regulatory adjustments, which include cash collateral netting reversals and derivative add-ons.

Following a revision to the Swiss Liquidity Ordinance in June 2014 implementing Basel III Liquidity Coverage Ratio (LCR) rules, beginning in 2Q14, the majority of a portfolio of high-quality liquid assets previously recorded in the Corporate Center and managed by our Treasury function have been allocated to the business divisions. This allows for a more efficient management of their business activities from an overall Group perspective with respect to LCR and Swiss leverage requirements arising from the portfolio of assets. Prior periods have been restated for the related impact on assets and Swiss leverage exposures.

Return on equity for strategic results is calculated by dividing annualized strategic net income by average strategic shareholders' equity (derived by deducting 10% of non-strategic risk-weighted assets from reported shareholders' equity). Return on capital is calculated using income after tax and capital allocated based on the average of 10% of average risk-weighted assets and 2.4% of average leverage exposure.

Adjusted cost run-rates are non-GAAP financial measures. All expense reduction metrics against 6M11 annualized total expenses are measured at constant foreign exchange rates and exclude realignment and other significant expense items and variable compensation expenses. For further information regarding these measures, see the 2Q14 Results Presentation Slides.

The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions which is discussed above relates only to those proceedings for which the Group believes an estimate is possible and which are discussed in Note 38 to the Consolidated Financial Statements in the Group's Annual Report on Form 20-F and updated in its quarterly reports (including the 2Q14 Financial Report that is scheduled to be released on July 31). It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. For additional details, see Note 38 to the Consolidated Financial Statements in the Group's Annual Report on Form 20-F and the litigation note in each of its quarterly Financial Reports.

Investors and others should note that we announce material information (including quarterly earnings releases and financial reports) to the investing public using press releases, SEC and Swiss ad hoc filings, our investor relations website and public conference calls and webcasts. We intend to also use our investor relations Twitter account @creditsuisse (https://twitter.com/creditsuisse) to excerpt key messages from our public disclosures, including earnings releases. We may retweet such messages through certain of our regional Twitter accounts, including @csschweiz (https://twitter.com/csschweiz) and @csapac (https://twitter.com/csapac). Investors and others should take care to consider such abbreviated messages in the context of the disclosures from which they are excerpted. The information we post on these Twitter accounts is not a part of this Earnings Release.

In various tables, use of "–" indicates not meaningful or not applicable.

| Number of employees | 45,100 | 45,600 | 46,300 | (1) | (3) | 45,100 | 46,300 | (3) |

[1] Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

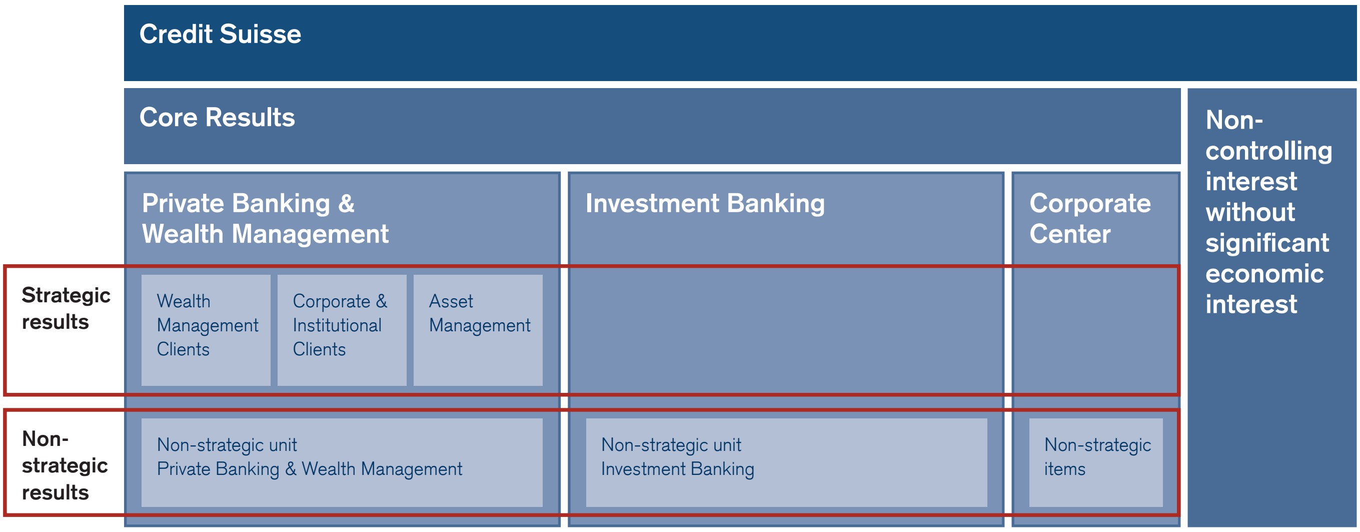
## Credit Suisse reporting structure



Credit Suisse results include revenues and expenses from the consolidation of certain private equity funds and other entities in which we have noncontrolling interests without significant economic interest (SEI) in such revenues and expenses. Core Results include the results of our two segments and the Corporate Center and discontinued operations, but do not include noncontrolling interests without SEI.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation.

[1] Net revenues divided by average assets under management.

[2] Income before taxes divided by average assets under management.

[1] Business realignment costs relating to divisional realignment costs are prospectively presented in the relevant divisional non-strategic results beginning in 4Q13.
[2] Represents legacy funding costs associated with non-Basel III compliant debt instruments.
[3] Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of ETF, secondary private equity and CFIG businesses and the announced sale of domestic private banking business booked in Germany.

## Impact from movements in own credit spreads

Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

| in | **2Q14** | 1Q14 | 2Q13 | **6M14** | 6M13 |

1 Distributions to owners in funds include the return of original capital invested and any related dividends.
2 Transactions with and without ownership changes related to fund activity are all displayed under "not changing ownership".
3 Includes a net tax benefit of CHF 10 million from the excess fair value of shares delivered over recognized compensation expense.
4 The Group had purchased certain call options on its own shares to economically hedge share-based compensation awards. In accordance with US GAAP, these call options were designated as equity instruments and, as such, were initially recognized in shareholders' equity at their fair values and not subsequently remeasured.
5 Paid out of reserves from capital contributions.
6 Includes a net tax charge of CHF (38) million from the excess recognized compensation expense over fair value of shares delivered.

[1] Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.
[2] Reflects changes in the fair value of the PAF2 units which were reflected in the net results of the Group until the awards were finally settled. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.
[3] Reflects weighted-average shares outstanding on PAF2 units. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.
[4] Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 8.8 million, 9.1 million, 12.1 million, 8.9 million and 12.9 million for 2Q14, 1Q14, 2Q13, 6M14 and 6M13, respectively.
[5] Due to the net loss in 2Q14, 1.3 million weighted-average share options and warrants outstanding and 12.2 million weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

**Cautionary statement regarding forward-looking information**

This press release contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of continuing deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our objectives, including improved performance, reduced risks, lower costs, and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalizations or confiscations in countries where we conduct operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries where we conduct operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in "Risk Factors" in I – Information on the company in our Annual Report 2013.

**Media Release**

# Credit Suisse announces a comprehensive and final settlement regarding all outstanding U.S. cross-border matters, including agreements with the U.S. Department of Justice, the New York State Department of Financial Services, the Board of Governors of the U.S. Federal Reserve System and, as previously announced, the U.S. Securities and Exchange Commission

**Credit Suisse agrees to pay USD 2,815 million (CHF 2,510 million); these settlements, net of existing provisions, will result in an after-tax charge of CHF 1,598 million to be booked in the second quarter of 2014**

**Credit Suisse's Look-through Basel III CET1 ratio would have been 9.3% at the end of 1Q14 had this charge been applied at that time; Credit Suisse expects to exceed 10% by end-2014**

**The settlement includes a guilty plea entered into by Credit Suisse's Swiss banking entity, Credit Suisse AG**

**The resolution of this matter was coordinated with its lead global regulators, and Credit Suisse expects no impact on its licenses, nor any material impact on its operational or business capabilities**

Zurich, May 19, 2014 **Credit Suisse today announced a comprehensive and final settlement regarding all outstanding matters relating to the former cross-border private banking business with U.S. clients.**

Brady Dougan, CEO of Credit Suisse, said: “We deeply regret the past misconduct that led to this settlement. The US cross-border matter represented the most significant and longstanding regulatory and litigation issue for Credit Suisse. Having this matter fully resolved is an important step forward for us. We have seen no material impact on our business resulting from the heightened public attention on this issue in the past several weeks. We want to thank our clients and employees for their support as we continued to work through this matter and brought it to a conclusion. We can now focus on the future and give our full attention to executing our strategy.”

On financial impact, capital position and dividend policy, he added: “The settlement will reduce our second quarter net income by CHF 1,598 million. If the charge arising from the settlement had been applied at the end of the first quarter 2014, our Look-through Basel III CET1 ratio would have been 9.3%, rather than 10.0%. We intend to reduce our risk-weighted assets to at or below the level of end 2013 as well as take other capital actions, including the sale of surplus real estate and other non-core assets. These measures alone should be sufficient to return our Look-through Basel III CET1 ratio to 10% by year-end 2014. Furthermore, once this 10% CET1 ratio has been achieved and while continuing to accrete capital towards our 11% long-term target, we intend to return approximately half our earnings to shareholders through our annual distributions.”

The final settlement announced today, totaling USD 2,815 million (CHF 2,510 million), is comprised of the following components:

- USD 2,000 million for the U.S. Department of Justice (including USD 196 million for the U.S. Securities and Exchange Commission as previously announced in February 2014). One third is allocated to the U.S. Internal Revenue Service.
- USD 715 million for the New York State Department of Financial Services
- USD 100 million for the Board of Governors of the Federal Reserve System

In prior quarters, Credit Suisse had taken litigation provisions totaling CHF 892 million related to this matter. As a result, the pre-tax impact of the final settlement in the second quarter 2014 will be CHF 1,618 million and the after-tax impact will be CHF 1,598 million.

Credit Suisse AG entered a guilty plea to one count of conspiracy to assist U.S. customers in presenting false income tax returns to the U.S. Internal Revenue Service in violation of Title 18, U.S. Code section 371 in connection with the former Swiss-based cross border private banking business.

## DEAR SHAREHOLDERS

For the first quarter of 2014, we generated Core pre-tax income of CHF 1,940 million in our strategic businesses and achieved a strong return on equity of 14% – well within reach of our 15% through-the-cycle target. This strong performance was driven by significantly improved profitability in Private Banking & Wealth Management, solid returns in Investment Banking and continued effective cost and capital management. Reported Core pre-tax income for the first quarter was CHF 1,400 million and the reported return on equity was 8%. We saw continued momentum with clients across many of our key businesses in the first quarter, including the highest net asset inflows in our strategic businesses since the first quarter of 2011 and a meaningful increase in the share of assets under management from ultra-high-net-worth clients.

### Progress in our two divisions

We substantially improved the profitability of our strategic businesses in Private Banking & Wealth Management, delivering pre-tax income of CHF 965 million for the quarter, a 28% increase compared to the prior-year quarter. The Wealth Management Clients business improved its net margin to 29 basis points from 23 basis points in the prior-year quarter. In line with our strategy, we also increased the share of assets under management from ultra-high-net-worth clients in this business to 46%, compared to 43% in the same period of last year. Corporate & Institutional Clients continued to make a strong contribution to the division's overall performance, and Asset Management more than doubled its pre-tax income compared to the first quarter of 2013 as a result of its more focused approach. In Private Banking & Wealth Management, we recorded net new assets of CHF 16.0 billion from strategic businesses in the quarter and total net new assets of CHF 13.7 billion. These inflows reflect our strength in key emerging markets within Asia Pacific, which grew at a 17% annualized rate, Latin America and the Middle East, our strong position in our Swiss home market, and significant inflows in alternative investments and index products within our Asset Management business.

In Investment Banking, we delivered solid returns despite more challenging market conditions during the quarter, demonstrating the strength of our diversified franchise. Investment Banking's strategic businesses reported pre-tax income of CHF 1,124 million and a return on capital of 21%. We delivered a strong performance in securitized products, credit and underwriting and advisory, as well as solid results in equities. At the same time, the first quarter seasonal contribution from our rates business and certain emerging markets businesses was significantly lower compared to prior years, as the industry adapts to structural changes in the rates business combined with challenging market conditions in certain emerging markets. We further expanded our strong market share position in equities and saw good momentum with clients in our underwriting and advisory franchises.

**Progress in executing strategy to support cash returns to shareholders**

In terms of our strategic focus, we continued to optimize resource allocation in order to grow our high-returning businesses, particularly in Private Banking & Wealth Management. At the same time, we made progress in winding down positions in our non-strategic units.

In Private Banking & Wealth Management, we plan to continue to build on our growth momentum in emerging markets and expand our lending initiatives targeting ultra-high-net-worth clients. We intend to complete the repositioning of our activities in certain less profitable markets where we have an onshore presence and we will work to further improve the net margin in our Wealth Management Clients business. Additionally, we plan to further enhance our integrated offering, both within the Private Banking & Wealth Management division and in close collaboration with the Investment Banking division.

In Investment Banking, we will continue to focus on our market-leading and high-returning businesses, including our top-three equities franchise, a strong and profitable underwriting and advisory business and a fixed income franchise focused on high-returning yield businesses. As part of this focus, we are transitioning our rates business to become a more client-focused and capital-light franchise, as announced in October 2013.

We maintained our resilient leverage and capital positions and are on track to meet our long-term targets, notwithstanding methodology changes that led to an increase in risk-weighted assets in the quarter. As of quarter-end, we reported a Look-through Basel III CET1 ratio of 10.0% and a Look-through Swiss leverage ratio of 3.7%. We also further increased the efficiency of our operations during the first quarter. Since the second quarter of 2011 when we first announced our cost measures, we have reduced the Group's cost base by CHF 3.4 billion on an annualized, adjusted basis.

In the first quarter of 2014, we continued to work toward resolving legacy litigation matters. In March 2014, we announced an agreement with the Federal Housing Finance Agency (FHFA), effectively resolving the largest mortgage-related legal dispute between Credit Suisse and investors dating back to the financial crisis. Moreover, we are continuing our efforts to resolve legal cases related to our former cross-border private banking business with US clients. In February 2014, we reached a settlement with the US Securities and Exchange Commission (SEC) on the US cross-border matter. The United States Department of Justice's investigation into the US tax matter remains outstanding and, while we are working hard to bring this to a close, the timing and outcome remain uncertain.

Given our progress in executing our strategy, combined with the strong performance of our strategic businesses in the first quarter of 2014, our intention remains to deliver cash returns to our shareholders at or above 2013 levels.

We would like to thank our shareholders and clients for the trust they have placed in Credit Suisse and, in particular, our employees for their contribution to the success of our business.

Sincerely

Urs Rohner Brady W. Dougan

May 2014

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. The related disclosures are in accordance with the current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of Credit Suisse's assumptions or estimates could result in different numbers from those shown herein.

Unless otherwise noted, leverage ratio, leverage exposure and total capital amounts included herein are based on the current FINMA framework. The Swiss leverage ratio is calculated as Swiss total eligible capital, divided by a three-month average leverage exposure, which consists of balance sheet assets, off-balance sheet exposures, which consist of guarantees and commitments, and regulatory adjustments, which include cash collateral netting reversals and derivative add-ons.

All expense reduction metrics against 6M11 annualized total expenses are measured at constant foreign exchange rates and exclude realignment and other significant expense items and variable compensation expenses. For further information regarding these measures, see the 1Q14 Results Presentation Slides.

Refer to "Results overview" in II – Operating and financial review – Core Results in our Annual Report 2013 for further information on Core Results.

# Financial Report 1Q14

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of "–" indicates not meaningful or not applicable.

# Credit Suisse at a glance

**Credit Suisse**

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients, to ultra-high-net-worth and high-net worth individuals worldwide, as well as affluent and retail clients in Switzerland. Founded in 1856, today we have a global reach with operations in over 50 countries and 45,600 employees from approximately 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture growth opportunities around the world. We serve our clients through our two divisions, which cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

**Private Banking & Wealth Management**

Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. Our Wealth Management Clients business serves ultra-high-net-worth and high-net-worth individuals around the globe, as well as affluent and retail clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across diverse asset classes and investment styles, serving governments, institutions, corporations and individuals worldwide.

**Investment Banking**

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including pension funds and hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with Private Banking & Wealth Management to provide clients with customized financial solutions.

# Credit Suisse results

# Operating environment

Global economic activity was mixed in 1Q14. Major equity markets ended the quarter almost unchanged, volatility increased slightly driven by geopolitical concerns and government benchmark bond yields decreased. The performance of the US dollar against most major currencies was mixed in 1Q14.

## ECONOMIC ENVIRONMENT

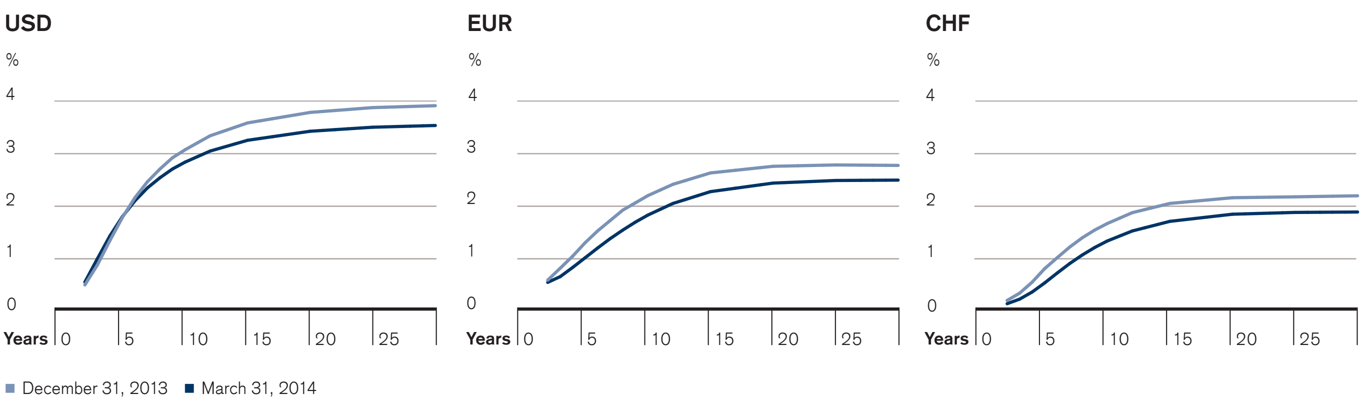
The global economic environment showed some signs of softening in 1Q14, driven mainly by the US and China. The moderation in US economic growth appeared to be largely due to the negative effects of adverse weather conditions in January and February. Leading indicators in the US showed signs of an economic recovery in March, but employment growth and manufacturing production remained below the average of the preceding quarter. Chinese economic data was weaker than expected early in the quarter and leading indicators in China for March disappointed hopes of an economic rebound. The Chinese government announced stimulus measures aiming to achieve the official gross domestic product annual growth rate target of 7.5% for 2014. Eurozone economic data on the other hand, showed further improvement and leading indicators in Europe indicate that economic activity was rising again in France, which has lagged other large eurozone economies in recent months.

The US Federal Reserve (Fed) decided, at its meeting in March, to reduce the pace of its monthly asset purchases to USD 55 billion effective as of April 2014. In addition, it adjusted its forward guidance by linking the federal funds rate to a broad set of indicators instead of just the unemployment rate. The European Central Bank (ECB) left its main refinancing rate unchanged, but indicated that it would act if the medium-term outlook for inflation worsened. Responding to depreciation pressure on their currencies, the central banks of Turkey and Russia raised their policy rates substantially.

Major equity markets ended the quarter almost unchanged. Geopolitical concerns and a perceived crisis in emerging markets weighed on equities. Among developed markets, Japan performed the worst after a robust performance in 2013. Emerging markets continued to lag developed markets. Reflecting the risk averse climate in 1Q14, defensive sectors outperformed cyclical sectors, while utilities and healthcare sectors outperformed the market generally. The overall equity markets traded with slightly higher volatility for most of the quarter, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), while risk appetite, as measured by the Credit Suisse equity risk appetite index, declined. The Credit Suisse Hedge Fund Index increased 0.9% in 1Q14.

## Yield curves

Yield curves ended the quarter lower, mainly driven by increased geopolitical risks.



**Source:** Datastream, Credit Suisse

## Equity markets

Major equity markets ended the quarter almost unchanged. Volatility was moderately higher. Bank stocks outperformed global equity markets.

**Source:** Datastream, Credit Suisse

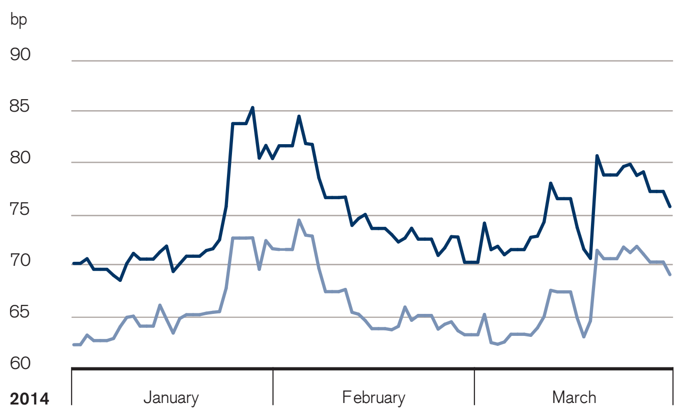
Geopolitical turmoil in Ukraine and concerns about Chinese economic growth significantly weighed on risk appetite, resulting in a decrease in 10-year benchmark bond yields in 1Q14 (refer to the charts "Yield curves"). In contrast, US dollar and British pound 2-year benchmark bond yields finished the first quarter slightly higher, reflecting expectations of further reductions in monetary stimulus activity. With a search for yield continuing, credit markets posted a good performance in 1Q14. Credit spreads tightened the most in the European high yield segment (refer to the chart "Credit spreads"). While emerging market sovereign spread performance was mixed, emerging market hard currency bonds recorded positive total returns in 1Q14.

US dollar performance in 1Q14 against most major currencies was mixed. The euro and British pound depreciated against the US dollar in January. However, continued softer US economic data, likely impacted by adverse weather conditions, weakened the US dollar in February and March. The Canadian dollar weakened as the Bank of Canada left open the possibility to cut interest rates. On the other hand, the Australian and New Zealand dollars appreciated as the Australian central bank became more restrictive and the New Zealand central bank began increasing interest rates. The euro was slightly weaker against the Swiss franc because of market expectations that the ECB could ease its monetary policy. In emerging markets, the People's Bank of China widened the daily trading range for the renminbi and allowed the currency to depreciate versus the US dollar.

Commodity markets had a good start into the year. The major commodity indices gained more than 4% during 1Q14, mainly driven by precious metals and agricultural markets. There were gold purchases due to increased geopolitical risks and, in agriculture, prices for soy, wheat and corn gained strongly due to adverse weather conditions in North America and Latin America. Prices for industrial metals and energy products had smaller increases. Both sectors benefited to some extent from the economic recovery in developed markets, but lagged other sectors due to the still weak growth momentum in emerging markets during 1Q14.

## Credit spreads

Credit spreads widened slightly compared to the end of the previous quarter.



■ European CDS (iTraxx) ■ North American CDS (CDX) bp: basis points

### SECTOR ENVIRONMENT

After strongly outperforming the broader market in the beginning of the quarter, European bank stocks increased 2% in 1Q14, slightly better than global equity markets as measured by the MSCI World index. North American bank stocks increased 5% (refer to the charts "Equity Markets").

In private banking, clients maintained a cautious investment stance, with cash deposits remaining high despite the low interest rates. The low interest rate environment continued to adversely impact earnings. Although the Swiss National Bank (SNB) reiterated concerns about the build-up of imbalances in mortgage and real estate markets in Switzerland, Swiss mortgage rates remained at low levels. Overall the wealth management sector continued to adapt to further industry-specific regulatory changes.

For investment banking, global equity trading volumes increased compared to both 4Q13 and 1Q13, driven by higher volumes across European and US cash equities. Global announced mergers and acquisitions (M&A) volumes increased compared to 4Q13 and 1Q13. Global completed M&A volumes decreased compared to 4Q13 and was slightly lower versus 1Q13. Global equity underwriting volumes decreased versus 4Q13 but increased compared to 1Q13. Global debt underwriting volumes increased compared to 4Q13 and decreased versus 1Q13. US fixed income volumes decreased compared to 4Q13 with lower mortgage-backed volumes. Compared to 1Q13, weaker treasuries, federal agency and mortgage-backed volumes were partially offset by higher volumes of corporates.

# Credit Suisse

In 1Q14, we recorded net income attributable to shareholders of CHF 859 million. Diluted earnings per share from continuing operations were CHF 0.47 and return on equity attributable to shareholders was 8.0%.

As of the end of 1Q14, our Basel III CET1 ratio was 14.3% and 10.0% on a look-through basis. Our risk-weighted assets increased 4% compared to 4Q13 to CHF 286.0 billion.

[1] Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

### INFORMATION AND DEVELOPMENTS

#### Format of presentation and changes in reporting

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

As of January 1, 2013, the Basel Committee on Banking Supervision (BCBS) Basel III framework was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report.

References to Swiss leverage exposure refer to the aggregate of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments, including cash collateral netting reversals and derivative add-ons.

▸ Refer to “Swiss leverage ratio” in II – Treasury, risk, balance sheet and off-balance sheet – Capital management – Swiss capital metrics for further information.

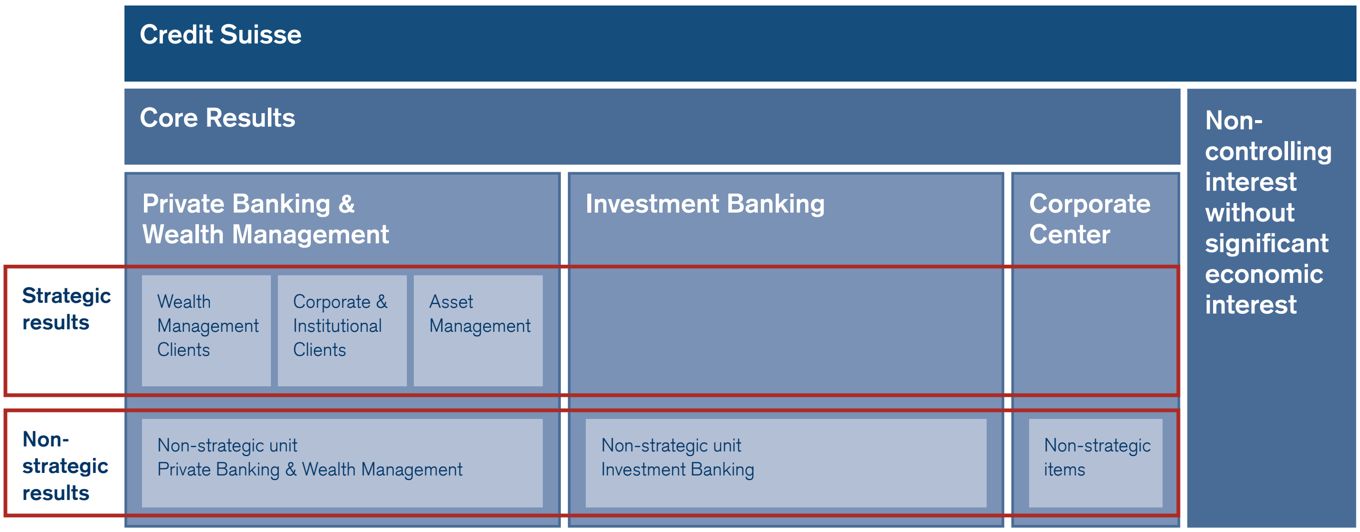
In 4Q13, we created non-strategic units within our Private Banking & Wealth Management and Investment Banking divisions and separated non-strategic items in Corporate Center. Certain reclassifications have been made to prior periods to conform to the current presentation.

▸ Refer to “Introduction of non-strategic units” in II – Operating and financial review – Credit Suisse – Information and developments in the Credit Suisse Annual Report 2013 for further information.

#### Discontinued operations

The Private Banking & Wealth Management division completed the sale of our Customized Fund Investment Group (CFIG) business in January 2014, and in 4Q13 announced the sale of our domestic private banking business booked in Germany to ABN AMRO, which is expected to close in the course of 2014. These transactions qualify for discontinued operations treatment under US generally accepted principles (US GAAP), and revenues and expenses of these businesses and the relevant gains on disposal are classified as discontinued operations in the Group’s consolidated statements of operations. In the Private Banking & Wealth Management segment, the gains and expenses related to the business disposals are included in the segment’s non-strategic results. The reclassification of the revenues and expenses from the segment results to discontinued operations for reporting at the Group level is effected through the Corporate Center.

## Credit Suisse reporting structure



Credit Suisse results include revenues and expenses from the consolidation of certain private equity funds and other entities in which we have noncontrolling interests without significant economic interest (SEI) in such revenues and expenses. Core Results include the results of our two segments and the Corporate Center and discontinued operations, but do not include noncontrolling interests without SEI.

**Fair valuations**

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

▸ Refer to “Note 1 – Summary of significant accounting policies” and “Note 27 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 1Q14, 47% and 32% of our total assets and total liabilities, respectively, were measured at fair value.

While the majority of our level 3 assets are recorded in Investment Banking, some are recorded in Private Banking & Wealth Management’s Asset Management business, specifically certain private equity investments. Total assets at fair value recorded as level 3 decreased by CHF 1.7 billion during 1Q14, primarily due to a decrease in other investments, partially offset by an increase in loans. The decrease in other investments primarily reflected net sales partially offset by realized and unrealized gains. The increase in loans primarily reflected net issuances.

Our level 3 assets, excluding assets attributable to noncontrolling interests and assets of consolidated variable interest entities (VIEs) that are not risk-weighted assets under the Basel framework, were CHF 30.0 billion, compared to CHF 29.8 billion as of the end of 4Q13. As of the end of 1Q14, these assets comprised 4% of total assets and 8% of total assets measured at fair value, both adjusted on the same basis, unchanged from 4Q13.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition, however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

**Regulatory developments and proposals**

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

▸ Refer to “Regulation and supervision” in I – Information on the company in the Credit Suisse Annual Report 2013 for further information.

# Core Results

In 1Q14, we recorded net income attributable to shareholders of CHF 859 million. Net revenues were CHF 6,469 million and total operating expenses were CHF 5,035 million.

In our strategic businesses, we reported income from continuing operations before taxes of CHF 1,940 million and in our non-strategic businesses we reported a loss from continuing operations before taxes of CHF 540 million in 1Q14.

### RESULTS OVERVIEW

**Core Results net revenues** of CHF 6,469 million decreased 8% compared to 1Q13.

In our strategic businesses, net revenues of CHF 6,553 million decreased 7% compared to 1Q13, with a decrease in Investment Banking and stable net revenues in Private Banking & Wealth Management. The decrease in Investment Banking was driven by weakness in rates and emerging markets, partially offset by strong performance in credit, securitized products and underwriting and advisory and solid equities results. Stable net revenues in Private Banking & Wealth Management reflected higher transaction- and performance based revenues and higher recurring commissions and fees, offset by lower net interest income and lower other revenues.

In our non-strategic businesses, we reported net revenue losses of CHF 84 million in 1Q14, compared to net revenues of zero in 1Q13. In Investment Banking we reported net revenue losses of CHF 147 million in 1Q14, compared to net revenue losses of CHF 72 million in 1Q13 as 1Q13 results reflected a gain of CHF 77 million from a sale in our real estate portfolio. A decrease in Private Banking & Wealth Management primarily reflected lower recurring commissions and fees due to the sale of non-strategic businesses during the course of 2013 and lower transaction- and performance-based revenues. Improved results in Corporate Center were primarily due to a cumulative translation adjustment loss of CHF 80 million from the sale of JO Hambro Investment Management (JO Hambro) in 1Q13 and a gain on sale of real estate of CHF 34 million in 1Q14.

▸ Refer to "Private Banking & Wealth Management", "Investment Banking" and "Corporate Center" for further information.

**Provision for credit losses** of CHF 34 million in 1Q14 primarily reflected net provisions of CHF 33 million in Private Banking & Wealth Management.

**Total operating expenses** of CHF 5,035 million were down 3% compared to 1Q13, primarily reflecting 21% lower commission expenses and 2% lower general and administrative expenses. In strategic businesses, total operating expenses of CHF 4,595 million decreased 4% compared to 1Q13, mainly reflecting a 7% decrease in general and administrative expenses. In non-strategic businesses, total operating expenses of CHF 440 million increased 11% compared to 1Q13, primarily reflecting a 32% increase in general and administrative expenses.

**Income tax expense** of CHF 543 million recorded in 1Q14 reflected the impact of the geographical mix of results and the impact of a New York state tax law change which resulted in a decrease of related deferred tax assets of CHF 151 million. Overall, net deferred tax assets decreased CHF 535 million to CHF 5,256 million as of the end of 1Q14 compared to 4Q13. Deferred tax assets on net operating losses increased by CHF 56 million to CHF 1,436 million during 1Q14. The Core Results effective tax rate was 38.8% in 1Q14, compared to 11.9% in 4Q13. Excluding the impact resulting from the New York state tax law change, the Core Results effective tax rate for 1Q14 was 28.0%.

▸ Refer to "Note 21 – Tax" in III – Condensed consolidated financial statements – unaudited for further information.

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Wealth Management Clients and Corporate & Institutional Clients, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Asset Management, results are allocated based on the location of the investment advisors and sales teams. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled.

### Cost savings and strategy implementation

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve our cost structure. We target cost savings of CHF 3.8 billion by the end of 2014 and more than CHF 4.5 billion by the end of 2015. These targets are measured against our annualized 6M11 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

The majority of the expected future savings is expected to be realized from shared infrastructure and support services across the Group, mainly through the consolidation of fragmented and duplicate functions globally and the continued consolidation of IT applications and functions.

We have also targeted further savings within our two operating divisions. Within Private Banking & Wealth Management, we expect to deliver cost benefits from the creation of the integrated Private Banking & Wealth Management division, exiting a number of small non-strategic markets, repositioning select non-profitable onshore operations, rationalization of front office and support functions, including simplification of our operating platform, streamlining of the offshore affluent and Swiss client coverage model and from announced divestitures. Within Investment Banking, we expect to deliver cost benefits from the restructuring of our rates business, the initiatives already completed in 2012, from continuing to review and realize efficiencies across business lines and geographic regions and from continuing to refine our business mix and align resources with highest returning opportunities. We expect to incur approximately CHF 1.2 billion of costs associated with these measures during the remainder of 2014 and 2015.

We incurred CHF 62 million of business realignment costs and CHF 61 million of IT architecture simplification expenses associated with these measures in 1Q14.

▸ Refer to "Cost savings and strategy implementation" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2013 for further information.

### Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component.

The variable component reflects the performance-based variable compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

▸ Refer to "Compensation and benefits" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2013 for further information.

### Personnel

Headcount at the end of 1Q14 was 45,600, down 400 from 4Q13 and down 1,300 from 1Q13. The decrease in 1Q14 reflected headcount reductions in Investment Banking and Private Banking & Wealth Management resulting from our cost efficiency initiatives, partly offset by contractor employee conversion. The changes in the segment headcount include a reallocation of 400 Shared Services employees from Investment Banking to Private Banking & Wealth Management in 1Q14. Prior periods have not been restated.

## Number of employees by division

| end of | **1Q14** | 4Q13 | 1Q13 |
|---|---|---|---|
| **Number of employees by division (full-time equivalents)** | | | |
| Private Banking & Wealth Management | 26,100 | 26,000 | 27,000 |
| Investment Banking | 19,200 | 19,700 | 19,600 |
| Corporate Center | 300 | 300 | 300 |
| **Number of employees** | **45,600** | **46,000** | **46,900** |

### Key performance indicators

Our key performance indicators (KPIs) for the Group and for our Private Banking & Wealth Management and Investment Banking divisions reflect our strategic plan, the regulatory environment and the market cycle. Our stated KPIs are measured on the basis of reported results.

We believe the execution of our strategic initiatives including the run-off of non-strategic operations, will enable us achieve our targets over a three to five year period across market cycles.

▸ Refer to "Key performance indicators" in Private Banking & Wealth Management and Investment Banking results for further information on divisional KPIs.

#### Collaboration revenues

Collaboration revenues are calculated as the percentage of the Group's net revenues represented by the aggregate collaboration revenues arising when more than one of the Group's divisions participate in a transaction. Within the Private Banking & Wealth Management division, collaboration revenues include revenues arising from cross-selling and client referral activities between the Wealth Management Clients and Corporate & Institutional Clients businesses on the one hand and the Asset Management and the securities trading and sales businesses on the other hand.

▸ Refer to "Key performance indicators" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2013 for further information on key performance indicators including collaboration revenues.

## Key performance indicators

Our KPIs are targets to be achieved over a three to five year period across market cycles. As such, year to date results may be more meaningful than individual quarterly results. Our KPIs are assessed annually as part of our normal planning process and may be revised to reflect our strategic plan, the regulatory environment and market and industry trends.

1 Source: Bloomberg. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value at the beginning of the period.
2 The peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase, Société Générale and UBS. The total shareholder return of this peer group is calculated as a simple, unweighted average of the return reported by Bloomberg for each of the members of the peer group.
3 Updated in 1Q14 from a previous target of a Look-through Swiss Core Capital ratio above 10%.

# Private Banking & Wealth Management

In 1Q14, we reported income before taxes of CHF 1,012 million and net revenues of CHF 3,240 million.

In our strategic businesses, we reported income before taxes of CHF 965 million and net revenues of CHF 3,031 million. Net revenues were lower compared to 4Q13 mainly due to seasonally higher fourth-quarter transaction- and performance-based revenues and lower net interest income. Compared to 1Q13, income before taxes increased 28%, driven by lower operating expenses.

In our non-strategic businesses, we reported income before taxes of CHF 47 million. In 4Q13, we reported losses before taxes of CHF 624 million, reflecting substantial litigation provisions in connection with the US tax matter.

In 1Q14, assets under management for the division were CHF 1,292.5 billion and we attracted net new assets of CHF 13.7 billion.

# Strategic results

### OVERVIEW

Our strategic results comprise businesses from Wealth Management Clients, Corporate & Institutional Clients and Asset Management.

### 1Q14 results

In 1Q14, our strategic businesses reported income before taxes of CHF 965 million and net revenues of CHF 3,031 million.

Net revenues were 7% lower compared to 4Q13 largely driven by significant seasonal performance fees in Asset Management in 4Q13. Compared to 1Q13, net revenues were stable with higher transaction- and performance-based revenues and slightly higher recurring commissions and fees, offset by lower net interest income and lower other revenues. Provision for credit losses was CHF 17 million on a net loan portfolio of CHF 217.6 billion. Total operating expenses were lower compared to both 4Q13 and 1Q13.

[1] Calculated using income after tax denominated in CHF; assumes tax rate of 30% in 1Q14 and 4Q13, 25% in 1Q13 and capital allocated on average of 10% of average risk-weighted assets and 2.4% of average leverage exposure.
[2] Includes the impact from external methodology changes in operational risk of CHF 2.2 billion.
[3] Includes the impact of an operational risk add-on of CHF 1.6 billion.

### RESULTS DETAIL

The following provides a comparison of our 1Q14 strategic results versus 1Q13 (YoY) and versus 4Q13 (QoQ).

#### Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

**YoY: Stable at CHF 3,031 million**

Net revenues were stable as higher transaction- and performance-based revenues and slightly higher recurring commissions and fees were offset by lower net interest income and lower other revenues. Transaction- and performance-based revenues were higher with higher carried interest on realized private equity gains and higher corporate advisory fees, partially offset by lower sales and trading income and lower foreign exchange client business. Slightly higher recurring commissions and fees reflected higher investment account and services fees, higher discretionary mandate management fees and higher banking services fees, partially offset by lower investment product management fees. In a low interest rate environment, net interest income was lower due to significantly lower deposit margins and stable loan margins on higher average deposit and loan volumes. Lower other revenues reflected lower investment-related gains.

**QoQ: Down 7% from CHF 3,260 million to CHF 3,031 million**

Lower net revenues primarily reflected significantly lower transaction- and performance-based revenues and lower net interest income, partially offset by higher other revenues. Significantly lower transaction- and performance-based revenues reflected seasonally higher performance fees in Asset Management in 4Q13, partially offset by higher brokerage and product issuing fees and higher sales and trading income in 1Q14. Lower net interest income reflected lower deposit margins on stable average deposit volumes and slightly higher loan margins on slightly higher average loan volumes. Higher other revenues mainly reflected an impairment related to Asset Management Finance LLC (AMF) in 4Q13. Stable recurring commissions and fees mainly reflected lower asset management fees and lower investment product management fees, offset by higher banking services fees and higher discretionary mandate management fees.

### Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

**YoY: Down 26% from CHF 23 million to CHF 17 million**

Provision for credit losses decreased CHF 6 million. Wealth Management Clients recorded net provisions of CHF 16 million and Corporate & Institutional Clients recorded net provisions of CHF 1 million in 1Q14.

**QoQ: Down 37% from CHF 27 million to CHF 17 million**

Provision for credit losses was lower in Wealth Management Clients and lower in Corporate & Institutional Clients. In 4Q13, Wealth Management Clients recorded net provisions of CHF 18 million while Corporate & Institutional Clients recorded net provisions of CHF 9 million.

### Operating expenses

#### Compensation and benefits

**YoY: Down 6% from CHF 1,307 million to CHF 1,225 million**

Lower compensation and benefits mainly reflected lower salary expenses, mostly as a result of the lower headcount.

**QoQ: Stable at CHF 1,225 million**

Slightly lower discretionary performance-related compensation and lower salary expenses were offset by slightly higher deferred compensation.

#### General and administrative expenses

**YoY: Down 10% from CHF 736 million to CHF 660 million**

Lower general and administrative expenses primarily reflected lower expense provisions and lower occupancy fees.

**QoQ: Down 12% from CHF 750 million to CHF 660 million**

Lower general and administrative expenses primarily reflected lower professional services fees, lower expense provisions and lower advertising and marketing costs.

### Business developments

In April 2014, we entered into an agreement with the current head of Credit Suisse Hedging-Griffo Asset Management pursuant to which he will be the controlling shareholder of a new firm, Verde Asset Management, and we will be a minority shareholder. The new structure for this relationship follows a model adopted by our Asset Management business designed to strengthen its platform in Brazil. The transaction is subject to customary closing conditions and the approval of the change of management to Verde Asset Management by shareholders of the relevant funds managed by Credit Suisse Hedging-Griffo. The transaction is expected to close by year-end 2014.

## WEALTH MANAGEMENT CLIENTS

### Net revenues

#### Net interest income

**YoY: Down 5% from CHF 746 million to CHF 706 million**

Lower net interest income reflected the low interest environment, significantly lower deposit margins on slightly higher average deposit volumes and stable loan margins on higher average loan volumes and lower levels of deposits eligible as stable funding.

**QoQ: Down 7% from CHF 760 million to CHF 706 million**

Lower net interest income reflected lower deposit margins and slightly higher loan margins on stable average deposit and loan volumes.

#### Recurring commissions and fees

**YoY: Up 2% from CHF 717 million to CHF 730 million**

Recurring commissions and fees were slightly higher with higher investment account and services fees and higher discretionary mandate management fees, partially offset by lower investment product management fees, including lower retrocession revenues.

**QoQ: Down 2% from CHF 742 million to CHF 730 million**

Recurring commissions and fees were slightly lower with lower investment product management fees, partially offset by higher discretionary mandate management fees.

#### Transaction- and performance-based revenues

**YoY: Up 2% from CHF 624 million to CHF 638 million**

Transaction- and performance-based revenues increased slightly reflecting higher corporate advisory fees and higher placement and transaction fees, partially offset by lower foreign exchange client business.

**QoQ: Up 15% from CHF 554 million to CHF 638 million**

The increase in transaction- and performance-based revenues was driven by higher brokerage and product issuing fees and higher sales and trading revenues, partially offset by lower performance fees.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation.

1 Net revenues divided by average assets under management.

2 Income before taxes divided by average assets under management.

### Gross margin

Our gross margin was 104 basis points in 1Q14, three basis points lower compared to 1Q13, mainly reflecting a continued adverse interest rate environment. Compared to 4Q13, our gross margin was stable, with higher transaction- and performance-based revenues offset by lower net interest income.

### Net margin

Our net margin was 29 basis points in 1Q14, six basis points higher compared to 1Q13 and 4Q13, reflecting a lower expense base.

## CORPORATE & INSTITUTIONAL CLIENTS

### Net revenues

#### Net interest income

**YoY: Down 6% from CHF 273 million to CHF 257 million**

The decrease reflected significantly lower deposit margins on higher average deposit volumes, partially offset by higher loan margins on higher average loan volumes.

**QoQ: Down 8% from CHF 278 million to CHF 257 million**

The decrease reflected lower deposit margins on higher average deposit volumes and slightly higher loan margins on slightly higher average loan volumes.

#### Recurring commissions and fees

**YoY: Up 10% from CHF 111 million to CHF 122 million**

The increase in recurring commissions and fees primarily reflected higher banking services fees.

**QoQ: Up 13% from CHF 108 million to CHF 122 million**

The increase primarily reflected higher banking services fees, partially offset by lower investment account and services fees.

#### Transaction- and performance-based revenues

**YoY: Down 3% from CHF 121 million to CHF 117 million**

Slightly lower transaction- and performance-based revenues reflected lower sales and trading income and lower brokerage and product issuing fees, partially offset by higher foreign exchange client business.

**QoQ: Up 15% from CHF 102 million to CHF 117 million**

Higher transaction- and performance-based revenues reflected higher sales and trading revenues, higher brokerage and product issuing fees and higher corporate advisory fees.

# ASSET MANAGEMENT

## Net revenues

### Fee-based revenues

**YoY: Up 13% from CHF 387 million to CHF 438 million**

The increase reflected higher carried interest on realized private equity gains and higher asset management fees, partially offset by lower private equity placement fees. The higher asset management fees reflected higher average assets under management in alternative products.

**QoQ: Down 43% from CHF 769 million to CHF 438 million**

The decrease primarily reflected lower performance fees and carried interest and private equity placement fees. The decrease in performance fees primarily reflected annual performance fees from single manager hedge funds and semi-annual fees from Hedging-Griffo in 4Q13 and lower carried interest from realized private equity gains in 1Q14.

### Investment-related gains/(losses)

**YoY: Down 42% from CHF 33 million to CHF 19 million**

1Q13 results reflected higher gains in hedge fund investments and the real estate sector.

**QoQ: Stable at CHF 19 million**

4Q13 and 1Q14 results primarily reflected gains in hedge fund investments.

### Equity participations and other gains/(losses)

**QoQ: Up from CHF (68) million to zero**

In 4Q13, we recognized an impairment of CHF 68 million related to AMF.

# Non-strategic results

## OVERVIEW

Our non-strategic businesses for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

### 1Q14 results

In 1Q14, our non-strategic businesses reported income before taxes of CHF 47 million, including an equity participation gain of CHF 91 million from the sale in January 2014 of CFIG, our private equity fund of funds and co-investment business. In 4Q13, our non-strategic businesses reported a loss before taxes of CHF 624 million, reflecting litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014.

## RESULTS DETAIL

The following provides a comparison of our 1Q14 non-strategic results versus 1Q13 (YoY) and versus 4Q13 (QoQ).

### Net revenues

**YoY: Down 23% from CHF 270 million to CHF 209 million**

The decrease in net revenues primarily reflected lower recurring commissions and fees due to the sale of non-strategic businesses during the course of 2013 and lower transaction- and performance-based revenues. Investment-related gains were also lower, partially offset by the equity participations gain of CHF 91 million from the sale of CFIG in January 2014.

**QoQ: Up 24% from CHF 169 million to CHF 209 million**

The increase mainly reflected the gain from the sale of CFIG in 1Q14, partially offset by lower recurring commissions and fees and lower transaction- and performance-based revenues from the sale of non-strategic businesses.

### Operating expenses

**YoY: Up 4% from CHF 140 million to CHF 146 million**

Higher operating expenses reflected severance expenses related to a business sale that we expect to complete in the course of 2014, partially offset by lower expenses resulting from the sale of businesses during 2013.

**QoQ: Down 81% from CHF 776 million to CHF 146 million**

Lower operating expenses reflected the litigation provisions of CHF 600 million in connection with the US tax matter, costs related to the sale of former Asset Management businesses and a goodwill impairment of CHF 12 million resulting from the creation of the non-strategic reporting unit, all in 4Q13.

### Business developments

On January 2, 2014, we completed the sale of CFIG to Grosvenor Capital Management.

In March 2014, we completed the spin-off of DLJ Merchant Banking Partners, our mid-market leveraged buyout business, for no consideration to aPriori Capital Partners L.P., an independent advisory firm established and controlled by members of the business' management.

# Assets under management

In 1Q14, assets under management of CHF 1,292.5 billion increased CHF 10.1 billion compared to the end of 4Q13, as positive market movements and net new assets were partially offset by structural effects, mostly arising from disposals of businesses in the non-strategic unit, and adverse foreign exchange-related movements.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 10.6 billion in 1Q14 with continued strong inflows from emerging markets, particularly in Asia Pacific, and Switzerland, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 0.4 billion in 1Q14. Asset Management reported net new assets of CHF 6.9 billion in 1Q14, driven by inflows in credit products and traditional products, with substantial contribution from index strategies, and partially offset by net asset outflows in fixed income products.

Assets under management in our non-strategic portfolio decreased to CHF 25.9 billion from CHF 44.4 billion in 4Q13 mainly as a result of the sale of CFIG.

[1] Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and non-strategic businesses.

# Investment Banking

In 1Q14, Investment Banking reported income before taxes of CHF 827 million and net revenues of CHF 3,416 million. Investment Banking delivered solid results amid a challenging market environment. In our strategic businesses, net revenues declined 11% compared to 1Q13 as strong performance in our credit, securitized products and underwriting and advisory and solid equities results were offset by significantly reduced first quarter seasonal contribution from rates and certain emerging markets than experienced in previous years. Compared to 4Q13, our strategic businesses delivered significantly improved revenues, reflecting seasonally stronger trading volumes and client activity in our fixed income and equities businesses which more than offset lower results in our underwriting and advisory franchises. In 1Q14, we made progress in winding-down the non-strategic unit, including reducing leverage exposure, risk-weighted assets and funding costs.

# Strategic results

### OVERVIEW

In 1Q14, our strategic businesses reported income before taxes of CHF 1,124 million and net revenues of CHF 3,563 million.

Fixed income sales and trading revenues declined significantly from 1Q13, driven by substantially reduced client activity and challenging trading conditions in our global macro products and emerging markets businesses. Revenues increased significantly compared to 4Q13 due to a seasonal increase in client activity, resulting in higher revenues across most of our fixed income businesses.

Equities sales and trading revenues were solid, albeit lower than 1Q13, reflecting lower cash equities and systematic market making revenues, partially offset by higher derivatives revenues. Revenues increased compared to 4Q13, reflecting higher results in derivatives and prime services.

Underwriting and advisory results were higher compared to 1Q13, driven by market share gains. Revenues decreased compared to 4Q13, driven by lower equity underwriting and advisory results reflecting lower industry activity.

Results in 1Q14 were impacted by the weakening of the average rate of the US dollar against the Swiss franc, which negatively impacted revenues and favorably impacted expenses. Compared to 1Q13, revenues decreased 11% and total operating expenses decreased 2% in Swiss francs while revenues declined 8% and total operating expenses increased 3% in US dollars. Compared to 4Q13, revenues were up 27% and total operating expenses were up 5% in Swiss francs while revenues increased 29% and total operating expenses increased 6% in US dollars.

As of the end of 1Q14, we reported risk-weighted assets under Basel III of USD 167 billion, up USD 11 billion from 4Q13, reflecting increases of USD 6 billion from external methodology changes (externally prescribed regulatory changes) and USD 5 billion from internal methodology changes and model and parameter updates. Additionally, we reported Swiss leverage exposure in our strategic businesses of USD 742 billion, reflecting a modest increase from 4Q13 due to seasonal market activity in equities and increased commitments in credit.

[1] Calculated using income after tax denominated in USD; assumes tax rate of 30% in 1Q14 and 4Q13, 25% in 1Q13 and capital allocated based on average of 10% of average risk-weighted assets and 2.4% of average leverage exposure.

The following provides a comparison of our strategic 1Q14 results versus 1Q13 (YoY) and versus 4Q13 (QoQ).

### Net revenues

#### Debt underwriting

**YoY: Up 2% from CHF 461 million to CHF 468 million**

The increase was primarily due to strong results in leveraged finance as high yield market share gains more than offset lower global high yield industry-wide issuance volumes. Results reflected weak structured lending performance in emerging markets as origination activity was adversely impacted by widening credit spreads. We also had lower investment grade revenues.

**QoQ: Down 3% from CHF 483 million to CHF 468 million**

The increase was driven by higher revenues from leveraged finance reflecting market share gains and increased high yield industry volumes. The increase was partially offset by lower investment grade revenues and lower structured lending results in emerging markets.

#### Equity underwriting

**YoY: Up 17% from CHF 157 million to CHF 183 million**

The increase reflected significantly higher revenues from IPOs driven by substantially higher industry volumes and higher market share in Europe Middle East and Africa (EMEA) and Asia Pacific. We also had higher results from follow-on offerings reflecting market share gains in the Americas. Additionally, we had improved convertibles results driven by higher market share which more than offset lower industry-wide issuance activity.

**QoQ: Down 33% from CHF 274 million to CHF 183 million**

The declines in revenues primarily reflected strong performance in 4Q13. Revenues from initial public offerings (IPOs) were substantially lower, as stable market share was more than offset by significantly lower industry volumes. Additionally, we had significantly weaker results from follow-on offerings and lower convertibles revenues as higher market share was more than offset by substantially lower industry volumes for both products.

### Advisory and other fees

**YoY: Up 24% from CHF 145 million to CHF 180 million**
Revenues increased primarily due to higher M&A fees driven by strong performance in the Americas, as significantly higher completed M&A volumes and an increase in the Americas M&A fee pool more than offset decreased completed M&A market share in the region.
**QoQ: Down 7% from CHF 194 million to CHF 180 million**
The decrease was driven by seasonally lower M&A fees as market share gains were more than offset by lower global industry-wide completed M&A volumes.

### Fixed income sales and trading

**YoY: Down 21% from CHF 2,028 million to CHF 1,609 million**
Fixed income revenues declined significantly driven by reduced first quarter seasonal contribution from rates and certain emerging markets, resulting in difficult trading conditions during the quarter. Substantially weaker results in global macro products reflected lower revenues across rates, foreign exchange and commodities. Foreign exchange revenues declined, driven by challenging market conditions in emerging markets and following strong results in 1Q13 due to quantitative easing in Japan. Rates revenues were negatively impacted by a regulatory-driven shift in the market structure towards electronic trading and clearing and uncertainty regarding market direction leading to muted client activity. We also had significantly lower revenues from emerging markets compared to a strong 1Q13 result due to weaker trading performance in Latin America and EMEA while Asia remained strong. Corporate lending revenues also declined. The decreases were partially offset by strong results in securitized products driven by higher client activity in non-agency securities and mortgage servicing and market share gains in asset finance. We also had higher global credit products revenues reflecting our market-leading leveraged finance franchise.
**QoQ: Up 99% from CHF 808 million to CHF 1,609 million**
Revenues increased significantly as a seasonal increase in client activity resulted in higher results across most of our fixed income businesses. We had substantially higher revenues in global credit products, primarily driven by strong leveraged finance results and higher investment grade performance, both reflecting strong secondary trading activity. We also had significantly higher securitized products revenues driven by increased client trading activity in non-agency and agency securities. In addition, global macro products revenues improved significantly, primarily driven by higher rates results. Emerging markets revenues also increased, driven by higher origination activity reflecting more favorable market conditions, and improved trading revenues in Asia.

### Equity sales and trading

**YoY: Down 8% from CHF 1,316 million to CHF 1,207 million**
The decrease was primarily due to lower cash equities and systematic market making. The decrease in cash equities revenues reflected unfavorable trading conditions in Latin America partially offset by commission growth in the US and Europe. Systematic market making decreased due to less favorable trading conditions compared to 1Q13, which included the positive impact of quantitative easing in Japan. The revenue declines were partially offset by higher derivatives revenue reflecting increased client flows across products and regions. Prime services revenues also increased reflecting continued market leadership, growth in client balances and increased client activity in Europe.
**QoQ: Up 13% from CHF 1,070 million to CHF 1,207 million**
The increase was due to significantly stronger derivatives results driven by seasonally higher market volumes. We had higher results in prime services reflecting higher client balances and improved performance in convertibles. Cash equities revenues were down as strong client activity in most regions was more than offset by difficult trading conditions in Latin America.

## Operating expenses

### Compensation and benefits

**YoY: Up 2% from CHF 1,459 million to CHF 1,495 million**
Compensation and benefits expense increased slightly as lower salaries, reflecting lower headcount, were offset by higher deferred compensation expense from prior year awards and higher discretionary compensation expense.
**QoQ: Up 12% from CHF 1,335 million to CHF 1,495 million**
The increase was primarily due to higher deferred compensation expense from prior year awards and higher discretionary compensation expense.

### General and administrative expenses

**YoY: Down 5% from CHF 776 million to CHF 735 million**
The decrease was primarily driven by lower technology costs and lower litigation provisions.
**QoQ: Down 7% from CHF 790 million to CHF 735 million**
The increase was primarily driven by lower technology costs and other professional fees.

# Non-strategic results

## OVERVIEW

Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily non-exchange-cleared instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

In 1Q14, we continued to make progress on the wind-down strategy in the non-strategic unit. We reported a loss before taxes of CHF 297 million and net revenue losses of CHF 147 million. We had higher net revenue losses, as 1Q13 results reflected a gain of CHF 77 million from a sale in our real estate portfolio. Performance also reflected improved funding costs from portfolio management of both our legacy debt instruments and trading assets. Total operating expenses decreased compared to 1Q13 and 4Q13, driven by substantially lower litigation provisions.

As of the end of 1Q14, we reported risk-weighted assets under Basel III of USD 19 billion, down USD 1 billion from 4Q13, with decreases of USD 3 billion from business reductions partially offset by increases of USD 2 billion from external methodology changes. This compares to our risk-weighted assets target of USD 6 billion by year-end 2015. Additionally, we reported Swiss leverage exposure of USD 79 billion, a reduction of USD 8 billion, or 9% from 4Q13. This compares to our target of USD 24 billion in Swiss leverage exposure by year-end 2015.

| Risk-weighted assets – Basel III | 16,436 | 17,549 | 19,176 | (6) | (14) |
| Risk-weighted assets – Basel III (USD) | 18,607 | 19,721 | 20,250 | (6) | (8) |
| Total assets | 25,407 | 27,283 | 32,563 | (7) | (22) |
| Swiss leverage exposure | 70,051 | 77,700 | 92,581 | (10) | (24) |

The following provides a comparison of our non-strategic 1Q14 results versus 1Q13 (YoY) and versus 4Q13 (QoQ).

### Net revenues

**YoY: Down 104% from CHF (72) million to CHF (147) million**

Net revenue losses in our fixed income wind-down portfolio increased as 1Q13 results included a gain of CHF 77 million from a sale in our real estate finance legacy portfolio. We also incurred higher net revenue losses in our legacy rates business reflecting valuation gains in 1Q13. Increased net revenue losses were partially offset by significantly lower funding costs reflecting portfolio management of both our legacy debt instruments and trading assets. At the end of the quarter, risk-weighted assets under Basel III totaled USD 19 billion, down USD 1 billion from 1Q13.

**QoQ: Down 16% from CHF (127) million to CHF (147) million**

Results reflected increased net revenue losses as 4Q13 revenues included significant valuation gains. Increased net revenue losses were partially offset by significantly lower funding costs, reflecting portfolio management of both our legacy debt instruments and trading assets. At the end of the quarter, risk-weighted assets under Basel III totaled USD 19 billion, down USD 1 billion from 4Q13.

### Total operating expenses

**YoY: Down 14% from CHF 174 million to CHF 150 million**

The decrease was driven by lower litigation provisions.

**QoQ: Down 83% from CHF 905 million to CHF 150 million**

The decrease was driven by substantially lower litigation provisions as 4Q13 included mortgage-related matters of CHF 806 million.

# Corporate Center

In 1Q14, we recorded a loss before taxes of CHF 439 million, primarily reflecting fair value losses from movements in own credit spreads, business realignment costs and IT architecture simplification expenses. These negative impacts were partially offset by gains from the sale of real estate.

## RESULTS OVERVIEW

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Corporate Center separately presents non-strategic items, which management does not consider representative of our core performance. Such items include the valuation impacts from movements in credit spreads on our own liabilities carried at fair value, certain business realignment costs, IT architecture simplification expenses, certain litigation provisions, business wind-down costs and impairments not included in the divisional non-strategic units and legacy funding costs associated with non-Basel III compliant debt instruments not included in the results of the Investment Banking non-strategic unit.

In **1Q14**, losses before taxes of CHF 439 million increased 17% compared to 1Q13, mainly reflecting IT architecture simplification expenses of CHF 61 million in 1Q14, higher fair value losses from movements in own credit spreads of CHF 120 million in 1Q14 compared to CHF 80 million in 1Q13, as well as higher reclassifications to discontinued operations of CHF 56 million in 1Q14 compared to CHF 17 million in 1Q13. Fair value losses of CHF 92 million on own long-term vanilla debt reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. The higher losses in 1Q14 results were partly offset by a cumulative translation adjustment loss of CHF 80 million from the sale of JO Hambro in 1Q13, gains on sale of real estate of CHF 34 million in 1Q14 and lower realignment costs of CHF 62 million in 1Q14 compared to CHF 92 million in 1Q13.

1 Business realignment costs relating to divisional realignment costs are prospectively presented in the relevant divisional non-strategic results beginning in 4Q13.
2 Represents legacy funding costs associated with non-Basel III compliant debt instruments.
3 Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of ETF, secondary private equity and CFIG businesses and the announced sale of domestic private banking business booked in Germany.

## Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

# Assets under management

We had net asset inflows from continuing operations of CHF 14.7 billion during 1Q14 and assets under management from continuing operations of CHF 1,281.1 billion as of the end of 1Q14.

### Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic business are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

Assets under management from continuing operations of CHF 1,281.1 billion increased CHF 27.7 billion or 2.2% compared to the end of 4Q13, as positive market movements and net new assets were partially offset by structural effects, mostly arising from disposals of businesses in the non-strategic unit, and adverse foreign exchange-related movements. Compared to the end of 1Q13, assets under management from continuing operations were CHF 22.5 billion higher, reflecting positive market movements and net new assets of CHF 36.4 billion, partially offset primarily by adverse foreign exchange-related movements.

[1] Excludes our portion of assets under management from our former investment in Aberdeen.
[2] Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic businesses.

### Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

### Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management. Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

We recorded net new assets from continuing operations of CHF 14.7 billion in 1Q14.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 10.6 billion in 1Q14 with continued strong inflows from emerging markets, particularly in Asia Pacific, and Switzerland, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 0.4 billion in 1Q14. Asset Management reported net new assets of CHF 6.9 billion in 1Q14, driven by inflows in credit products and traditional products, with substantial contribution from index strategies, and partially offset by net asset outflows in fixed income products. In our non-strategic portfolio, net asset outflows of CHF 2.3 billion reflected our exit of certain businesses, of which CHF 1.0 billion were classified as discontinued operations.

# II

# Treasury, risk, balance sheet and off-balance sheet

# Liquidity and funding management

During 1Q14, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

### Overview

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Our internal liquidity risk management framework is subject to review and monitoring by the Swiss Financial Market Supervisory Authority FINMA (FINMA), other regulators and rating agencies.

▸ Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2013 for further information on liquidity and funding management.

### Liquidity risk management framework

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

In December 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR).

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of the stock of high-quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and should always be at least 100%.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as the primary tool to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. We estimate that our NSFR under the current FINMA framework was in excess of 100% as of the end of 1Q14. Our estimate is based on the definitions and methodologies outlined in the aforementioned BCBS Basel III international framework for liquidity risk measurement, standards and monitoring issued in December 2010, the previously noted Liquidity Ordinance implementing the Basel III liquidity requirements into Swiss law, and other guidance and requirements of FINMA. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions which may not be consistent with those of other financial institutions. The NSFR is based on regulatory metrics, the disclosure of which is not yet required, and, as such, it represents a non-GAAP financial measure.

In January 2014, the BCBS issued final LCR rules and disclosure requirements that are to be implemented as part of banks' regular disclosures after January 1, 2015. The BCBS also proposed revisions to the NSFR, which are expected to become the minimum standard by the previously announced date of January 1, 2018.

In November 2012, the Swiss Federal Council adopted a liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making. The Liquidity Ordinance entered into force on January 1, 2013. It requires appropriate management and monitoring of liquidity risks, and applies to all banks, but is tiered according to the type, complexity and degree of risk of a bank's activities. It also contains supplementary quantitative and qualitative requirements for systemically relevant banks, including us, which are generally consistent with existing FINMA liquidity requirements. In January 2014, the Swiss Federal Council and FINMA proposed revisions to the Liquidity Ordinance to reflect the final Basel III LCR rules. Under the proposal, systemically relevant banks like us will be subject to an initial minimum LCR requirement of 100% beginning in 2015.

Our revised liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

## Liquidity pool

| March 31, 2013 | Swiss franc | US dollar | Euro | Other currencies | Total |
|---|---|---|---|---|---|
| **Liquidity pool by currencies (CHF billion)** | | | | | |
| Cash held at central banks | 27.6 | 22.0 | 1.6 | 0.7 | 51.9 |
| Government bonds | 2.8 | 32.3 | 9.0 | 14.9 | 59.0 [1] |
| Fixed income securities | 1.1 | 9.6 | 1.5 | 5.1 | 17.3 |
| Liquid equity securities | - | 9.7 | - | 8.8 | 18.5 |
| **Total liquidy pool (based on internal model)** | **31.5** | **73.6** | **12.1** | **29.5** | **146.7** |

[1] Includes reverse repurchases of government bonds of CHF 18.6 billion.

### Funding sources and uses

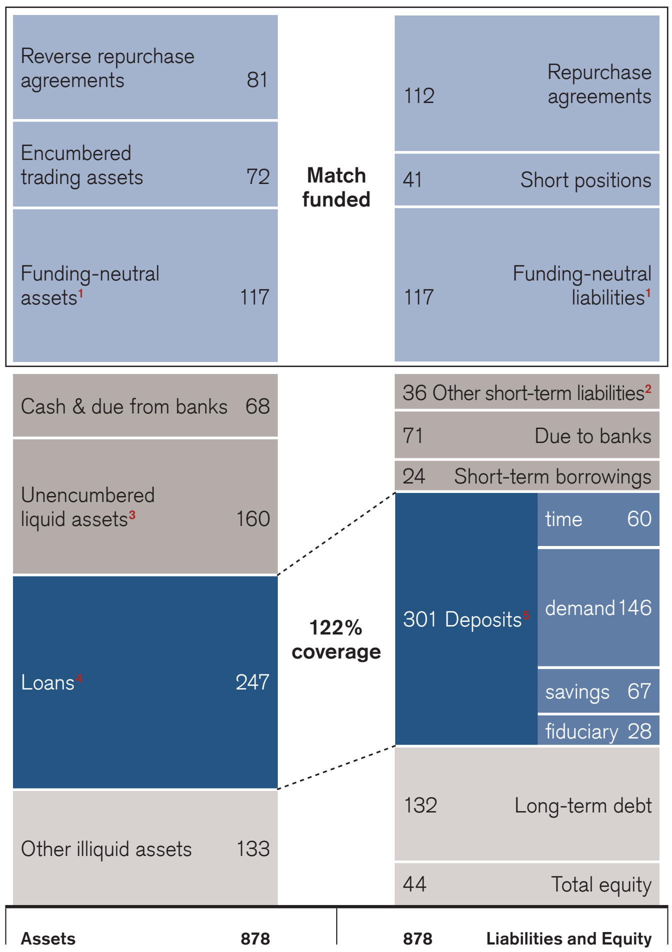
We fund our balance sheet primarily through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency, tenor, geography and maturity, and whether they are secured or unsecured. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

These assets include our liquidity pool, which as of the end of 1Q14 based on our internal model was CHF 147 billion, net of a stress test level haircut. The liquidity pool consisted of CHF 52 billion of cash held at major central banks, primarily the SNB, Fed, and the ECB, CHF 59 billion of securities issued by governments and government agencies, primarily of the US, France and Britain and CHF 36 billion of other highly liquid assets including equity securities that form part of major indices. As of March 31, 2014, our internal model included the application of a stress test level average haircut equal to approximately 55% of the market value of non-cash positions in the liquidity pool. The haircut reflects our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

### Balance sheet funding structure

as of March 31, 2014 (CHF billion)



[1] Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.
[2] Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.
[3] Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.
[4] Excludes loans with banks.
[5] Excludes due to banks and certificates of deposit.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 22% as of the end of 1Q14 and 4Q13, reflecting a slight increase in loans and a slight increase in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as a haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 301 billion as of the end of 1Q14 compared to CHF 297 billion as of the end of 4Q13, reflecting a stable customer deposit base in Private Banking & Wealth Management. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

▸ Refer to the chart "Balance sheet funding structure" and "Balance sheet and off-balance sheet" for further information.

### Debt issuances and redemptions

Our long-term debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

The table below provides information on long-term debt issuances, maturities and redemptions in 1Q14, excluding structured notes.

## Debt issuances and redemptions

| in 1Q14 | Senior | Sub-ordinated | Long-term debt |
|---|---|---|---|
| **Long-term debt (CHF billion, notional value)** | | | |
| **Issuances** | **5.2** | **–** | **5.2** |
| of which unsecured | 1.6 | – | 1.6 |
| of which secured [1] | 3.6 | – | 3.6 |
| **Maturities / Redemptions** | **5.1** | **1.3** | **6.4** |
| of which unsecured | 4.1 | 1.3 | 5.4 |
| of which secured [1] | 1.0 | – | 1.0 |

Excludes structured notes.
[1] Includes covered bonds.

As of the end of 1Q14, we had outstanding long-term debt of CHF 132 billion, which included senior and subordinated instruments. We had CHF 38.4 billion and CHF 16.9 billion of structured notes and covered bonds outstanding, respectively, as of the end of 1Q14 compared to CHF 34.8 billion and CHF 14.3 billion, respectively, as of 4Q13.

▸ Refer to "Capital issuances and redemptions" in Capital management for information on issuances of capital notes, all of which constitute subordinated debt instruments.

As of the end of 1Q14, the weighted average maturity of long-term debt was 6.5 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Short-term borrowings increased 20% to CHF 24.2 billion as of the end of 1Q14 compared to CHF 20.2 billion in 4Q13.

### Credit ratings

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 1.1 billion, CHF 3.0 billion and CHF 4.3 billion, respectively, as of the end of 1Q14, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

As of the end of 1Q14, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

▸ Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Liquidity and funding management in the Credit Suisse Annual Report 2013 for further information.

# Capital management

As of the end of 1Q14, our CET1 ratio was 14.3% under Basel III and 10.0% on a look-through basis. Our RWA under Basel III were CHF 286.0 billion and our Swiss leverage ratio was 4.8%.

## REGULATORY CAPITAL FRAMEWORK

### Overview

Effective January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements). Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business.

References to phase-in and look-through included herein refer to Basel III capital requirements. Phase-in reflects that, for the years 2014 – 2018, there will be a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

▸ Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet and "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2013 for further information.

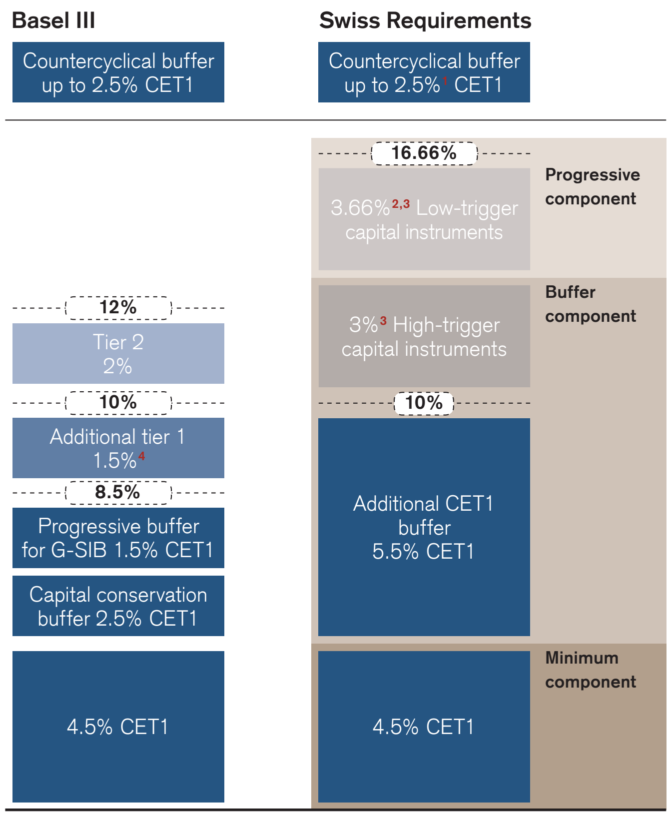
### Capital structure under Basel III

The BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

▸ Refer to the table "Basel III phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum common equity tier 1 (CET1) requirement is 4.5% of risk-weighted assets (RWA). In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress.

### Capital frameworks for Credit Suisse



1 As of September 30, 2013, banks are required to hold CET1 capital in the amount of 1% of RWA pertaining to mortgage loans that finance residential property in Switzerland.
2 The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA.
3 Counts towards Basel III minimum requirements as tier 1 or tier 2 capital depending on the quality of the underlying instruments.
4 Additional tier 1 instruments must provide for principal loss absorption through a conversion into common equity or write-down feature. The trigger for such a conversion or write-down must include a CET1 ratio of at least 5.125%.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified us as a G-SIB and requires us to maintain a 1.5% progressive buffer.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital. To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125%.

### Basel III phase-in requirements for Credit Suisse

| Effective January 1, for the applicable year | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |
|---|---|---|---|---|---|---|
| **Capital ratios** | | | | | | |
| CET1 | 4.0% [1] | 4.5% | 4.5% | 4.5% | 4.5% | 4.5% |
| Capital conservation buffer | | | 0.625% [1] | 1.250% [1] | 1.875% [1] | 2.5% |
| Progressive buffer for G-SIB | | | 0.375% [1] | 0.750% [1] | 1.125% [1] | 1.5% |
| **Total CET1** | **4.0%** | **4.5%** | **5.5%** | **6.5%** | **7.5%** | **8.5%** |
| Additional tier 1 | 1.5% | 1.5% | 1.5% | 1.5% | 1.5% | 1.5% |
| **Total tier 1** | **5.5%** | **6.0%** | **7.0%** | **8.0%** | **9.0%** | **10.0%** |
| Tier 2 | 2.5% [1] | 2.0% | 2.0% | 2.0% | 2.0% | 2.0% |
| **Total capital** | **8.0%** | **8.0%** | **9.0%** | **10.0%** | **11.0%** | **12.0%** |
| Phase-in deductions from CET1 [2] | 20.0% [1] | 40.0% [1] | 60.0% [1] | 80.0% [1] | 100.0% | 100.0% |
| Capital instruments subject to phase-out | Phased out over a 10-year horizon beginning 2013 through 2022 | | | | | |

[1] Indicates phase-in period.
[2] Includes goodwill, other intangible assets, certain deferred tax assets and participations in financial institutions.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1 or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through January 1, 2019.

Capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out.

#### Swiss Requirements

The legislation implementing the Basel III framework in Switzerland in respect of capital requirements for systemically relevant banks goes beyond Basel III's minimum standards, including requiring us, as a systemically relevant bank, to have the following minimum, buffer and progressive components.

‣ Refer to "Swiss Requirements" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2013 for further information.

‣ Refer to the chart "Swiss capital and leverage ratio phase-in requirements for Credit Suisse" for Swiss capital requirements and applicable effective dates during the phase-in period.

The minimum requirement of CET1 capital is 4.5% of RWA.

The buffer requirement is 8.5% and can be met with additional CET1 capital of 5.5% of RWA and a maximum of 3% of high-trigger capital instruments. High-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below 7%.

The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business. For 2014, FINMA set our progressive component requirement at 3.66%. The progressive component requirement may be met with CET1 capital or low-trigger capital instruments. In order to qualify, low-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below a specified percentage, the lowest of which may be 5%. In addition, until the end of 2017, the progressive component requirement may also be met with high-trigger capital instruments. Both high and low-trigger capital instruments must comply with the Basel III minimum requirements for tier 2 capital (including subordination, point-of-non-viability loss absorption and minimum maturity).

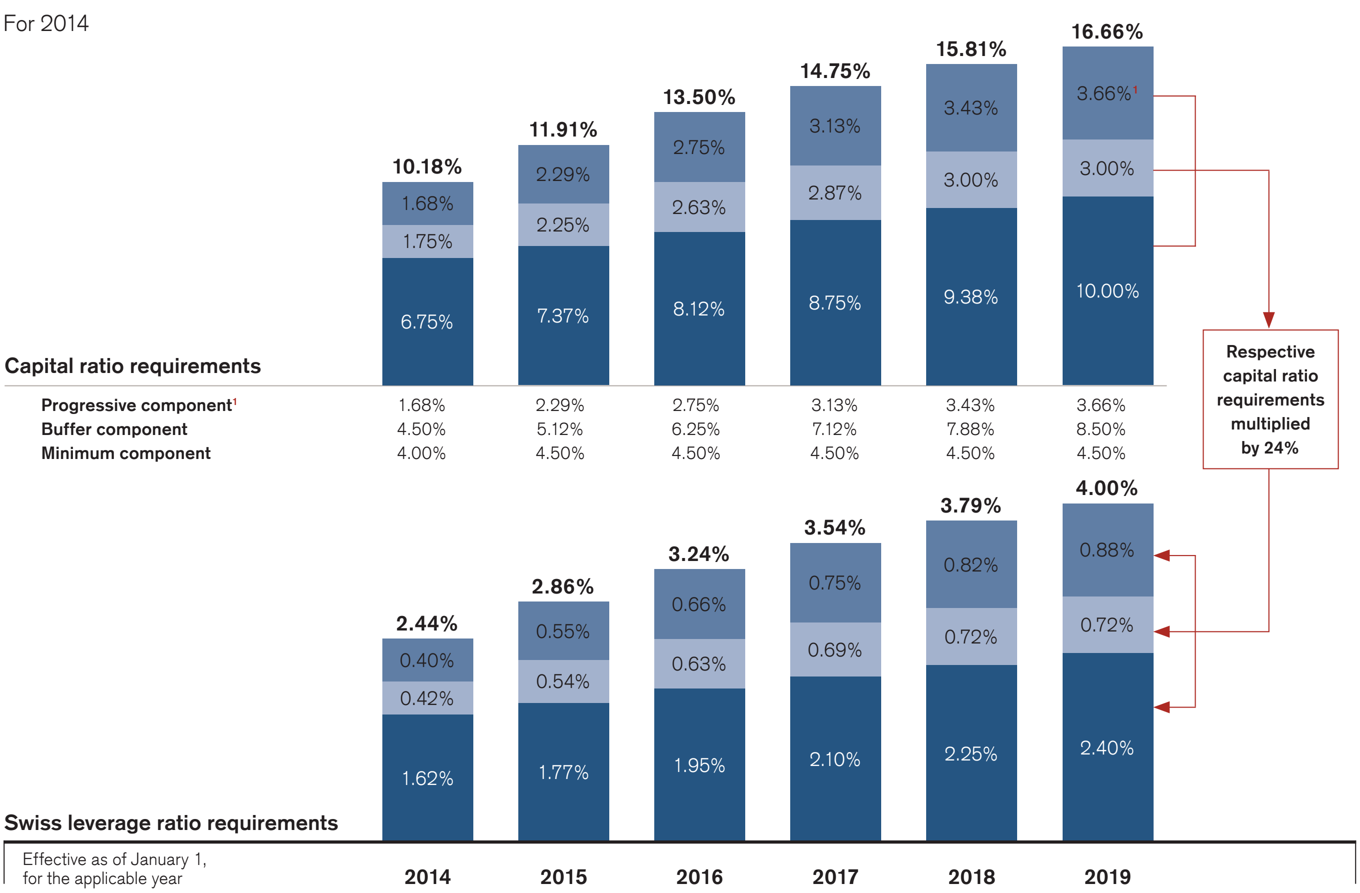
Similar to Basel III, the Swiss Requirements include a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth. Effective January 1, 2013, FINMA introduced increased capital charges for mortgages that finance certain residential property in Switzerland. In February 2013, the countercyclical capital buffer was activated and it requires banks to hold CET1 capital in the amount of 1% of their RWA pertaining to such mortgages (mortgage multiplier). These increased capital charges, which are applied for both Bank for International Settlements (BIS) and FINMA purposes, will be phased in by January 1, 2019. As of the end of 1Q14, our countercyclical buffer was CHF 151 million, which is equivalent to an additional requirement of 0.05% of CET1 capital. In January 2014, upon the request of SNB, the Swiss Federal Council further increased the countercyclical buffer from 1% to 2%, effective June 30, 2014.

In December 2013, FINMA issued a decree specifying capital adequacy requirements for the Bank, on a stand-alone basis (Bank parent company), and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions (FINMA Decree).

Beginning in 1Q14, we adjusted the presentation of our Swiss capital metrics and terminology and we now refer to Swiss Core Capital as Swiss CET1 capital and Swiss Total Capital as Swiss total eligible capital. Swiss Total Capital previously reflected the tier 1 participation securities, which were fully redeemed in 1Q14. Swiss CET1 capital consists of BIS CET1 capital and certain other Swiss adjustments. Swiss total eligible capital consists of Swiss CET1 capital, high-trigger capital instruments, low-trigger capital instruments and additional tier 1 instruments and tier 2 instruments subject to phase-out and phase-in deductions from CET1.

We must also comply with a leverage ratio applicable to Swiss systemically relevant banks (Swiss leverage ratio). This leverage ratio must be at least 24% of each of the respective minimum, buffer and progressive component requirements. Since the ratio is defined by reference to capital requirements subject to phase-in arrangements, the ratio will also be phased in.

## Swiss capital and leverage ratio phase-in requirements for Credit Suisse



■ Swiss CET1 capital ■ High-trigger capital instruments ■ Low-trigger capital instruments

Excludes countercyclical buffer required as of September 30, 2013.

[1] The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA.

### Risk measurement models

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge (IRC), stressed Value-at-Risk (VaR), risks not in VaR, comprehensive risk measure framework and advanced credit valuation adjustment (CVA).

FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period. In 1Q14, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

▸ Refer to “Risk measurement models” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2013 for further information.

▸ Refer to “Market risk” in Risk management for further information on Credit Suisse’s risk measurement models and backtesting exceptions.

## REGULATORY DEVELOPMENTS AND PROPOSALS

In January 2014, the BCBS published the framework and disclosure requirements for the Basel III leverage ratio. The required Basel III leverage ratio, which seeks to measure tier 1 capital against exposure, is expected to be at least 3%. Although the effective date of the Basel III leverage ratio is not until 2018, banks will be required to disclose the ratio on a consolidated basis beginning in 2015, subject to implementation by national regulators.

In accordance with BCBS’s G-SIB loss absorbency requirements and FINMA’s capital adequacy disclosure requirements, banks with a balance sheet exceeding EUR 200 billion must publish annually 12 financial indicators, such as size and complexity. Depending on these financial indicators, the FSB will set the progressive buffer for G-SIBs. The reporting requirement became effective December 31, 2013 and disclosures must be made by April 30, 2014.

In March 2014, the BCBS published a final standard on the treatment of counterparty credit risk associated with derivative transactions. The new requirement will replace the current exposure method and the existing standardized method and will become effective on January 1, 2017.

From January 1, 2014, the Capital Requirement Directive (CRD) IV package of legislation (comprising a directive and a regulation) will replace the current CRD directive with new measures implementing Basel III and other requirements. As part of the transition to CRD IV, the UK’s Prudential Regulation Authority has reviewed the permissions of UK financial institutions, including those of our subsidiaries, to use their current internal modeling for capital calculation purposes as well as new models required for CRD IV compliance. The majority of the models for our subsidiaries were approved and certain models will require updates in line with latest BCBS guidance and regulatory feedback on modeling techniques.

In July 2013, the Fed, Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency released final capital rules that overhaul the existing US bank regulatory capital rules and implement the Basel III framework and certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The final rules are largely consistent with the Basel III framework published by the BCBS, although they diverge in several important respects due to requirements of the Dodd-Frank Act and do not address other, more recent aspects of the Basel III framework. In February 2014, the Fed adopted a rule under the Dodd-Frank Act that creates a new framework for regulation of the US operations of foreign banking organizations. The rule requires Credit Suisse to create a single US intermediate holding company (IHC) to hold all of its US subsidiaries; this will not apply to Credit Suisse AG’s New York branch (New York Branch). The IHC will be subject to local risk-based capital and leverage requirements. In addition, both the IHC itself and the combined US operations of Credit Suisse (including the IHC and the New York Branch) will be subject to other new prudential requirements. The new framework’s prudential requirements generally become effective in July 2016.

### FINMA Decree

The SNB has previously designated the Group as a financial group of systemic importance under applicable Swiss law. Following that designation, in December 2013 the FINMA Decree was issued. In addition to the capital adequacy requirements described above, it also specified liquidity, risk diversification and disclosure requirements for the Bank parent company.

The FINMA Decree became effective on February 2, 2014 and requires the Group to fully comply with the special requirements for systemically important banks set out in the Capital Adequacy Ordinance. To facilitate the application of these requirements within the Group and to allow Credit Suisse to continue its central treasury policy, the FINMA Decree also references forms of relief granted by FINMA within its stated authority that is designed to prevent the application of requirements at the Bank parent company level from effectively increasing the regulatory capital requirements applicable to the Group, notwithstanding all reasonable efforts by the Group to avoid such a situation. FINMA also requires certain capital disclosures at the Bank parent company level as of the end of March 31, 2014, which can be found on our website. In addition, the FINMA Decree requires the disclosure of the following forms of relief:

- **New approach to standalone capital requirements**: Withdrawal of the previously granted form of relief for funding that the Bank parent company provides to Group subsidiaries. The new approach results in an increase in RWA at the Bank parent company level.
- **Reduction of regulatory capital requirement:** Risk-weighted capital requirement reduced to 14% from a current 16.66%, of which at least 10% must be held in the form of CET1 capital. This measure is a form of relief at the Bank parent company level in comparison with the minimum requirements set out by FINMA at the Group level.
- **Equal treatment of direct and indirect investments**: Direct and indirect investments in Group subsidiaries that are

active in the financial sector and are held by the Bank parent company are treated equally. Directly and indirectly held investments in Group subsidiaries up to a bank-specific threshold set by FINMA are risk-weighted at 200%. Amounts above the threshold are deducted 50% from CET1 capital and 50% from total eligible capital. The deduction approach is similar to the treatment of capital instruments under Basel III and continues the previously applicable treatment under Swiss regulations. This measure may have the effect of changing RWA and/or total eligible capital. Depending on the calibration of the threshold, investments in Group subsidiaries require total eligible capital in a range between 28% (if all investments are risk-weighted) and 100% (if all investments are deducted from total eligible capital).

Overall, withdrawal of previous forms of relief, the introduction of stricter requirements and the provision of new forms of relief avoids a situation in which requirements at the Bank parent company would effectively dictate requirements at the Group level and, as such, effectively lead to higher capital ratios at the Bank parent company level.

## CAPITAL ISSUANCES AND REDEMPTIONS

In March 2014, pursuant to a tender offer, we repurchased USD 1.4 billion of outstanding 7.875% perpetual series B subordinated tier 1 participation securities. We subsequently exercised a regulatory call of the USD 99 million of such securities that had not been tendered, with the result that no such securities remain outstanding. Prior to the announcement of the tender offer and as advised by FINMA, these tier 1 participation securities formed part of Swiss CET1 capital under the Swiss Requirements, whereas under Basel III, these instruments were included in additional tier 1 instruments subject to phase-out. These transactions were approved by FINMA.

In January 2014, Contingent Capital Awards (CCA) were granted to certain employees as part of their 2013 deferred variable compensation. In March 2014, employees holding 2011 Partner Asset Facility (PAF2) awards, which were restructured, reallocated a portion of their PAF2 holdings to CCA. Both of these events added CHF 0.5 billion to regulatory capital in 1Q14. CCA qualify as additional tier 1 and high-trigger capital instruments for regulatory capital purposes.

▸ Refer to "Note 28 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Annual Report 2013 for further information on CCA.

### Higher Trigger Capital Amount

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert or be written down prior to the write down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion or write down is referred to as the Higher Trigger Capital Amount.

With respect to the USD 2.5 billion 6.5% tier 2 capital notes due in August 2023 and the EUR 1.25 billion 5.75% tier 2 capital notes due in September 2025, the Higher Trigger Capital Amount was CHF 10.5 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 3.8%, both as of the end of 1Q14. With respect to the USD 2.25 billion 7.5% tier 1 capital notes and the CHF 290 million 6.0% tier 1 capital notes, the Higher Trigger Capital Amount was CHF 8.2 billion and the Higher Trigger Capital Ratio was 2.9%, both as of the end of 1Q14. CCA are expected to increase both of these Higher Trigger Capital Amounts over time.

▸ Refer to "Capital issuances and redemptions" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2013 for further information on Higher Trigger Capital Amount.

▸ Refer to the table "BIS statistics – Basel III – Group" for further information on the BIS statistics used to calculate such measures.

## BIS CAPITAL METRICS

### Regulatory capital and ratios

Our CET1 ratio was 14.3% as of the end of 1Q14, compared to 15.7% as of the end of 4Q13, due to an increase in RWA and a decrease in CET1 capital. Our tier 1 ratio was 15.6% as of the end of 1Q14, compared to 16.8% as of the end of 4Q13. Our total capital ratio decreased to 19.1% as of the end of 1Q14 compared to 20.6% as of the end of 4Q13.

CET1 capital was CHF 40.9 billion as of the end of 1Q14 compared to CHF 43.0 billion as of the end of 4Q13, mainly reflecting the 20% phase-in of regulatory deductions from CET1 including goodwill, other intangible assets, certain deferred tax assets and a 20% decrease in the adjustment for the accounting treatment of pension plans, pursuant to phase-in requirements. CET1 capital was also impacted by a quarterly dividend accrual and a negative foreign exchange translation impact, partially offset by net income and the impact of share-based compensation.

Additional tier 1 capital increased to CHF 3.7 billion, mainly due to the issuance of CHF 0.5 billion CCA and the 20% decrease in phase-in deductions, including goodwill, other intangible assets and other capital deductions, partially offset by the redemption of the tier 1 participation securities in March 2014. Tier 2 capital decreased slightly to CHF 10.0 billion as of the end of 1Q14.

Total eligible capital was CHF 54.6 billion as of the end of 1Q14 compared to CHF 56.3 billion as of the end of 4Q13, reflecting the decrease in CET1 capital, partially offset by the increase in additional tier 1 capital.

We reported a look-through CET1 ratio of 10.0% as of the end of 1Q14, compared to an updated long-term target of 11.0%. As of the end of 1Q14, the look-through total capital ratio was 15.1%, unchanged from the end of 4Q13.

[1] Reflects the effect of share-based compensation, a dividend accrual and a change in other regulatory adjustments.

### Other regulatory disclosures

In connection with the implementation of Basel III, additional regulatory disclosures are required. Additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base of the Group, subsidiary regulatory reporting, reconciliation requirements, Pillar 3 disclosures and additional capital disclosures for the Bank parent company can be found on our website.

‣ Refer to https://www.credit-suisse.com/investors/en/regulatory_disclosures/index.jsp for additional information.

### Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as market, credit, operational and non-counterparty risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in credit risk RWA. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty-risk RWA primarily reflect the capital requirements for our premises and equipment. It is not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA.

[1] Represents changes in portfolio size.
[2] Represents changes in average risk weighting across credit risk classes.
[3] Represents movements arising from updates to models and recalibrations of parameters.
[4] Represents internal changes impacting how exposures are treated.
[5] Represents externally prescribed regulatory changes impacting how exposures are treated.

RWA increased 4%, from CHF 273.8 billion as of the end of 4Q13 to CHF 286.0 billion as of the end of 1Q14, reflecting an increase in credit risk and operational risk, partially offset by a decrease in market risk and a decrease resulting from foreign exchange translation.

The increase in **credit risk (excluding CVA)** was primarily driven by methodology changes that affected both Investment Banking and Private Banking & Wealth Management. Within Investment Banking, externally driven methodology changes resulted from an increase in the risk weighting of private equity positions, while internally driven changes primarily resulted from the recalibration of derivative add-ons and the loss of netting for central clearing counterparty default funds. Externally driven methodology changes within Private Banking & Wealth Management resulted from an increase to the risk weighting of private equity positions, particularly within Asset Management, and an increase resulting from the mortgage multiplier relating to the financing of certain residential property in Switzerland. Overall, the movements in risk levels resulted in a marginal decrease in RWA. Investment Banking movements in risk levels were due to increases in lending and secured financing offset by decreases in securitization portfolio exposures. Private Banking & Wealth Management movements in risk levels were due to decreases in Asset Management fund positions offset by increases in Wealth Management Clients and Corporate & Institutional Clients lending.

**Credit risk related to CVA risk** increased during the period driven by internally driven methodology changes and increases related to movements in risk levels within Investment Banking. Internally driven methodology changes were due to changes in the hedging of CVA risk and the modeling of derivative exposures. The increases related to movements in risk levels were due to increases in exposures and hedged positions.

The decrease in **market risk** was primarily driven by decreases related to movements in risk levels partially offset by increases due to externally driven methodology changes mainly resulting from the regulatory requirement to hold capital against short trading book securitization positions starting on January 1, 2014. The movements in risk levels were driven by a decrease in trading book securitization exposures following increased protection on low-rated tranched portfolios, including protection provided by the Capital Opportunity Facility (COF), a component of our employee deferred compensation plan. Additionally, stressed VaR was lower driven by decreases in exposures across foreign exchange products, equities and emerging markets. The decrease resulting from changes in model and parameters was primarily due to an update in the stressed spread parameters.

The increase in **operational risk** resulted from the implementation of a revised advanced management approach (AMA) model, a FINMA imposed cap applied to benefits derived from insurance protection and an update to the litigation add-on component following an increase in the aggregate range of reasonably possible litigation losses not covered by existing provisions.

## SWISS CAPITAL METRICS

### Swiss regulatory capital and ratios

▸ Refer to "Swiss Requirements" for further information on Swiss regulatory requirements.

As of the end of 1Q14, our Swiss CET1 capital and Swiss total capital ratios were 14.2% and 19.0%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.75% and 10.18%, respectively.

On a look-through basis, our Swiss CET1 capital was CHF 27.7 billion and our Swiss CET1 ratio was 9.9% as of the end of 1Q14. Our Swiss total eligible capital was CHF 42.0 billion and our Swiss total capital ratio was 15.0% as of the end of 1Q14, each on a look-through basis.

[1] The Swiss capital requirements are based on a percentage of RWA.

### Swiss leverage ratio

The Swiss leverage ratio is calculated as Swiss total eligible capital, divided by a three-month average exposure, which consists of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments, including cash collateral netting reversals and derivative add-ons. As of the end of 1Q14, our Swiss leverage ratio was 4.8% and the total average exposure was CHF 1,137.6 billion. As of the end of 1Q14, our total exposure was CHF 1,140 billion, compared to our updated long-term target of approximately CHF 1,000 billion.

The Group's look-through Swiss leverage ratio was 3.7% as of the end of 1Q14, compared to the 4.0% requirement for 2019 taking into account FINMA's reduction of our progressive component requirement beginning in 2014.

### Total shareholders' equity

Our total shareholders' equity increased to CHF 43.2 billion as of the end of 1Q14 compared to CHF 42.2 billion as of the end of 4Q13. Total shareholders' equity was impacted by net income, the effect of share-based compensation and the purchase of subsidiary shares from non-controlling interests, relating to the redemption of tier 1 participation securities. These increases were partially offset by the impact of foreign exchange-related movements on cumulative translation adjustments and treasury shares purchases and sales.

▸ Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

## Capital

| **Tangible book value per share** [1] | **22.08** | **21.34** | 3 |

[1] Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

# Risk management

In 1Q14, overall position risk decreased 5%, utilized economic capital decreased 2%, average risk management VaR in US dollars increased 5% and gross impaired loans were stable at CHF 1.5 billion.

## ECONOMIC CAPITAL AND POSITION RISK

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is our core Group-wide risk management tool for measuring and reporting all quantifiable risks. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating).

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of methodology changes, prior-period balances are restated in order to show meaningful trends.

In 1Q14, we made an enhancement to the position risk dataset for risk management purposes. For real estate & structured assets, the dataset now includes funding risk for off-balance sheet residential mortgage-backed securities (RMBS) conduit positions. For fixed income trading, we have enhanced the scope for default risk for the traded credit spread portfolio to include credit default swaps (CDS). The net impact of these dataset changes on position risk for the Group as of the end of 4Q13 was a decrease of CHF 343 million, or 2.8%, reflecting net short positions in the portfolio.

For utilized economic capital used for capital management purposes, the decrease from the above dataset changes on position risk was partially offset by an increase resulting from the implementation of a revised internal AMA model to calculate the regulatory capital requirement for operational risk. The net impact of the dataset and methodology changes on utilized economic capital for the Group as of the end of 4Q13 was a decrease of CHF 308 million, or 1.0%.

‣ Refer to “Economic capital and position risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information on economic capital and position risk.

‣ Refer to “Operational risk” for further information on the revised AMA model to calculate the regulatory capital requirement for operational risk.

### Key position risk trends

Position risk for risk management purposes as of the end of 1Q14 decreased 5% compared to the end of 4Q13. Excluding the US dollar translation impact, position risk decreased 4%, mainly due to lower credit spread, foreign exchange and interest rate exposures in fixed income trading and decreased exposures in Eastern Europe in emerging markets country event risk. A decrease in equity trading & investments was mainly due to lower cash equities and liquid hedge fund exposures. These decreases were partially offset by increases from new loan commitments and counterparty risk in Investment Banking in international lending & counterparty exposures.

## Position risk

Prior-period balances have been restated for methodology changes in order to show meaningful trends.
[1] This category comprises fixed income trading, foreign exchange and commodity exposures.
[2] This category comprises commercial and residential real estate (including RMBS and CMBS), asset-backed securities exposure, real estate acquired at auction and real estate fund investments.
[3] Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Compared to the end of 1Q13, position risk for risk management purposes decreased 2%. Excluding the US dollar translation impact, position risk increased 4%, mainly due to new loan commitments and increased counterparty risk in Investment Banking in international lending & counterparty exposures. These increases were partially offset by reduced credit spread and interest rate exposures in fixed income trading, decreased exposures in Latin America in emerging markets country event risk and reduced private equity exposures in equity trading & investments.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

## Economic capital

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

[1] Includes primarily high-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to Look-through CET1 capital to enable comparison between economic capital utilization and economic capital resources under the Basel III framework.

[2] Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain methodology changes planned for 2014.

[3] Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital.

[4] Includes a diversification benefit of CHF 19 million, CHF 19 million and CHF 19 million as of the end of 1Q14, 4Q13 and 1Q13, respectively.

[5] Includes a diversification benefit of CHF 18 million, CHF 19 million and CHF 19 million as of the end of 1Q14, 4Q13 and 1Q13, respectively.

**Utilized economic capital trends**

In 1Q14, our utilized economic capital decreased 2%, mainly due to lower position risk primarily in Investment Banking, partially offset by higher operational risk across the business divisions.

For Private Banking & Wealth Management, utilized economic capital was stable, as higher operational risk was offset by a reduction in other risks.

For Investment Banking, utilized economic capital decreased 2%, mainly due to decreased position risk in fixed income trading and emerging markets country event risk, largely offset by higher position risk in international lending & counterparty exposures, higher operational risk and higher risks relating to equity options captured as a model add-on in other risks.

For Corporate Center, utilized economic capital decreased 2%, mainly due to a decrease in foreign exchange risk between utilized economic capital and economic capital resources.

## MARKET RISK

**Trading portfolios**

We primarily assume market risk through the trading activities in Investment Banking. Private Banking & Wealth Management also engages in trading activities, but to a much lesser extent. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products (some of which are customized transactions using combinations of derivatives and executed to meet specific client or proprietary needs). As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations. Risks associated with the embedded derivative elements of our structured products are actively monitored and managed on a portfolio basis as part of our overall trading portfolio and are reflected in our VaR measures.

Trading risks are measured using VaR along with a number of other risk measurement tools. VaR measures the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon at a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no abrupt changes in market conditions. We use risk management VaR for internal risk management purposes and regulatory VaR for regulatory capital purposes. For risk management VaR, we use a one-day holding period and a 98% confidence level. This means there is a 1-in-50 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. For regulatory VaR, we present one-day, 99% VaR, which is a ten-day VaR adjusted to a one-day holding period. Our VaR methodology is the same for both VaR measures, except for the confidence levels and holding periods. Other tools, including stress testing, are more appropriate for modeling the impact from severe market conditions.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 1Q14, we updated our VaR models to better capture the volatility skew risk for equity derivatives. The cumulative impact of this update on the average 1Q14 risk management VaR was immaterial and prior periods have not been restated.

For regulatory capital purposes, we operate under the Basel III market risk framework which includes an IRC, stressed VaR and, since January 1, 2013, consideration of the impact of changes in a counterparty's credit spreads (also known as CVA).

▸ Refer to “Market risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information.

In order to show the aggregate market risk in our trading books, the chart entitled “Daily risk management VaR” shows the trading-related market risk on a consolidated basis.

We measure VaR in US dollars, as substantially all market risk relates to Investment Banking.

Average risk management VaR increased 5% to USD 46 million from 4Q13, driven by increases in foreign exchange and equity exposures and higher market volatility, partially offset by increased portfolio diversification benefit and reduced credit spread exposures. Compared to 1Q13, average risk management VaR increased 7% due to an increase in equity exposures and reduced portfolio diversification benefit, partially offset by reduced interest rate and credit spread exposures.

Period-end risk management VaR decreased 8% to USD 47 million from 4Q13, reflecting mainly lower equity exposures, partially offset by increased market volatility. Compared to 1Q13, period-end risk management VaR increased 21%, mainly reflecting increased foreign exchange exposures and reduced portfolio diversification benefit.

## One-day, 98% risk management VaR and one-day, 99% regulatory VaR (CHF)

| | | | | | | | Risk management VaR (98%) | Regulatory VaR (99%) |
|---|---|---|---|---|---|---|---|---|
| in / end of | Interest rate | Credit spread | Foreign exchange | Commodity | Equity | Diversi-fication benefit | **Total** | **Total** |
| **1Q14 (CHF million)** | | | | | | | | |
| Average | 13 | 31 | 10 | 3 | 19 | (35) | 41 | 35 |
| Minimum | 9 | 29 | 5 | 1 | 14 | – [1] | 36 | 26 |
| Maximum | 17 | 33 | 17 | 4 | 24 | – [1] | 46 | 45 |
| End of period | 14 | 31 | 9 | 2 | 15 | (29) | 42 | 34 |
| **4Q13 (CHF million)** | | | | | | | | |
| Average | 12 | 34 | 8 | 2 | 17 | (33) | 40 | 32 |
| Minimum | 8 | 32 | 3 | 1 | 13 | – [1] | 33 | 22 |
| Maximum | 16 | 37 | 15 | 3 | 24 | – [1] | 45 | 44 |
| End of period | 10 | 32 | 6 | 3 | 24 | (30) | 45 | 31 |
| **1Q13 (CHF million)** | | | | | | | | |
| Average | 23 | 38 | 11 | 2 | 17 | (51) | 40 | 48 |
| Minimum | 17 | 33 | 6 | 1 | 12 | – [1] | 34 | 32 |
| Maximum | 45 | 41 | 24 | 3 | 36 | – [1] | 55 | 77 |
| End of period | 17 | 37 | 8 | 3 | 15 | (43) | 37 | 32 |

Excludes risks associated with counterparty and own credit exposures.
[1] As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

## One-day, 98% risk management VaR and one-day, 99% regulatory VaR (USD)

| | | | | | | | Risk management VaR (98%) | Regulatory VaR (99%) |
|---|---|---|---|---|---|---|---|---|
| in / end of | Interest rate | Credit spread | Foreign exchange | Commodity | Equity | Diversi-fication benefit | **Total** | **Total** |
| **1Q14 (USD million)** | | | | | | | | |
| Average | 14 | 35 | 12 | 3 | 21 | (39) | 46 | 40 |
| Minimum | 10 | 33 | 6 | 1 | 15 | – [1] | 41 | 28 |
| Maximum | 19 | 37 | 19 | 5 | 27 | – [1] | 52 | 51 |

| **4Q13 (USD million)** | | | | | | | | |
| Average | 13 | 37 | 9 | 2 | 18 | (35) | 44 | 35 |
| Minimum | 9 | 35 | 3 | 1 | 15 | – [1] | 37 | 24 |
| Maximum | 17 | 41 | 17 | 4 | 27 | – [1] | 51 | 49 |
| End of period | 11 | 36 | 7 | 3 | 27 | (33) | 51 | 35 |
| **1Q13 (USD million)** | | | | | | | | |
| Average | 25 | 40 | 12 | 2 | 18 | (54) | 43 | 51 |
| Minimum | 18 | 36 | 6 | 1 | 13 | – [1] | 36 | 34 |
| Maximum | 49 | 44 | 25 | 3 | 38 | – [1] | 58 | 83 |
| End of period | 18 | 40 | 8 | 3 | 16 | (46) | 39 | 34 |

Excludes risks associated with counterparty and own credit exposures.
[1] As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

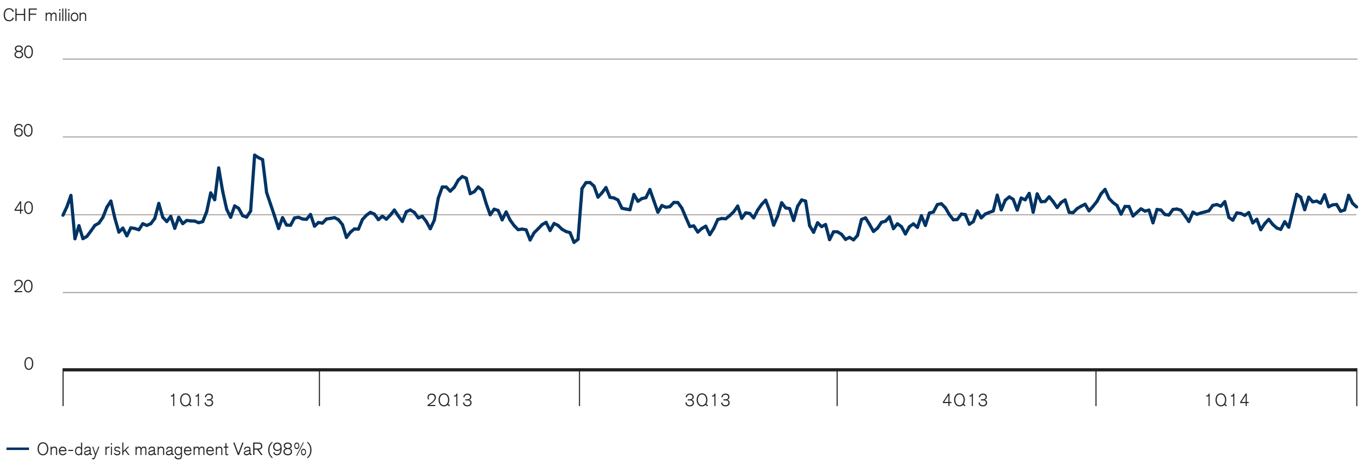
Various techniques are used to assess the accuracy of the regulatory VaR model used for trading portfolios, including backtesting. We conduct such backtesting using actual daily trading revenues. Actual daily trading revenues are compared with a regulatory 99% VaR calculated using a one-day holding period. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. We had no such backtesting exceptions in 1Q14 and in the 12-month-period through 1Q14. Since there were fewer than five backtesting exceptions in the rolling 12-month period through 1Q14, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR exception over four in the prior rolling 12-month period calculated using a subset of actual daily trading revenues.

▸ Refer to "Risk measurement models" in Capital management – Regulatory capital framework for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

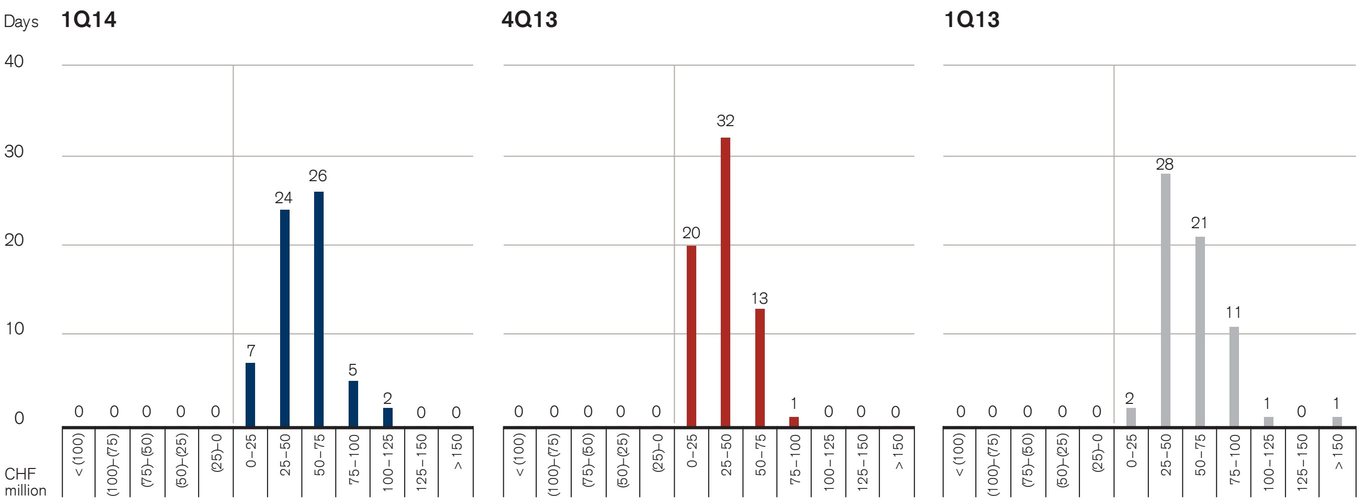
The histogram entitled "Actual daily trading revenues" compares the actual daily trading revenues for 1Q14 with those for 4Q13 and 1Q13. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 1Q14 and 4Q13, we had no trading loss days.

## Daily risk management VaR



Excludes risks associated with counterparty and own credit exposures.

## Actual daily trading revenues



Excludes Neue Aargauer Bank.
Trading revenues do not include valuation adjustments associated with counterparty and own credit exposures.

### Banking portfolios

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking & Wealth Management and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking & Wealth Management to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and certain other areas of the Group running interest rate risk positions actively manage the positions within approved limits. This risk is monitored on a daily basis.

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have amounted to a valuation increase of CHF 6.9 million as of the end of 1Q14, compared to a valuation increase of CHF 8.5 million as of the end of 4Q13.

## CREDIT RISK

Credit risk is the possibility of a loss being incurred by us as the result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a customer default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, or the restructuring of the debtor company. A change in the credit quality of a counterparty has an impact on the valuation of assets eligible for fair value measurement, with valuation changes recorded in the consolidated statements of operations.

### Sources of credit risk

The majority of our credit risk is concentrated in the Wealth Management Clients and Corporate & Institutional Clients businesses within the Private Banking & Wealth Management division and in the Investment Banking division. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions.

Our regular review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment. We regularly review the appropriateness of allowances for credit losses. Changes in the credit quality of counterparties of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance.

▸ Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information on credit risk.

▸ Refer to "Note 27 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information on counterparty credit risk.

### Credit risk overview

The following table represents credit risk from loans, irrevocable loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable securities or credit hedges. Irrevocable loan commitments include irrevocable credit facilities for Investment Banking and Private Banking & Wealth Management, but do not include unused credit limits which can be revoked at our sole discretion upon notice to the client.

## Credit risk

| | | | end of | | % change |

[1] Includes Corporate Center, in addition to Private Banking & Wealth Management and Investment Banking.
[2] Prior period has been corrected to reclassify certain counterparty exposures from real estate and commercial and industrial loans to loans to financial institutions and from governments and public institutions to commercial and industrial loans, respectively.
[3] Includes loans secured by financial collateral and mortgages. The value of financial collateral and mortgages, considered up to the amount of the related loans, was CHF 70,566 million, CHF 67,522 million and CHF 65,929 million as of the end of 1Q14, 4Q13 and 1Q13, respectively.
[4] Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value.
[5] Excludes loans carried at fair value.

## Loan exposure

Compared to the end of 4Q13, gross loans increased CHF 3.6 billion to CHF 251.6 billion. In Private Banking & Wealth Management, gross loans were CHF 221.8 billion, up CHF 5.3 billion from 4Q13, reflecting increased lending driven by loans collateralized by securities and commercial and industrial loans. Gross loans in Investment Banking decreased CHF 1.7 billion to CHF 29.8 billion, primarily from decreases in loans to financial institutions, partially offset by higher commercial and industrial loans.

Gross impaired loans were stable at CHF 1.5 billion. In Private Banking & Wealth Management, gross impaired loans slightly increased CHF 37 million to CHF 1.3 billion, primarily due to higher potential problem and non-performing loans. In Investment Banking, gross impaired loans decreased CHF 28 million to CHF 224 million, driven by a loan repayment and a write-off of a non-performing loan.

We recorded a net provision for credit losses of CHF 34 million in 1Q14, compared to CHF 53 million in 4Q13, with a net provision of CHF 33 million in Private Banking & Wealth Management. Investment Banking did not require a provision for credit losses in 1Q14.

Compared to the end of 1Q13, gross loans increased 1%. An increase in Private Banking & Wealth Management of 4% was primarily due to an increase in loans collateralized by securities, higher residential mortgages and higher loans to the real estate sector, partially offset by the US dollar translation impact and a decrease in consumer finance. In Investment Banking, a decrease of 19% was related to lower loans to financial institutions and the US dollar translation impact, partially offset by higher commercial and industrial loans and increased loans to the real estate sector. Gross impaired loans decreased 16% driven by decreases in potential problem loans and total non-performing and non-interest-earning loans across the Group.

## Selected European credit risk exposures

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion. We believe this external rating is a useful measure in determining the financial ability of countries to meet their financial obligations, including giving an indication of vulnerability to adverse business, financial and economic conditions.

### Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses on our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G-7 and non-G-7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

### Presentation of selected European credit risk exposures

The basis for the presentation of the country exposure is our internal risk domicile view. The risk domicile view is based on the domicile of the legal counterparty, i.e., it may include exposure to a legal entity domiciled in the reported country where its parent is located outside of the country.

The credit risk exposure in the table and the related description of developments is presented on a risk-based view before deduction of any related allowance for loan losses. We present our credit risk exposure and related risk mitigation for the following distinct categories:

- *Gross credit risk exposure* includes the principal amount of loans drawn, letters of credit issued and undrawn portions of committed facilities, the positive replacement value (PRV) of derivative instruments after consideration of legally enforceable netting agreements, the notional value of investments in money market funds and the market values of securities financing transactions and the debt cash trading portfolio (short-term securities) netted at issuer level.
- *Risk mitigation* includes CDS and other hedges, at their net notional amount, guarantees, insurance and collateral (primarily cash, securities and, to a lesser extent, real estate, mainly for Private Banking & Wealth Management exposure to corporates & other). Collateral values applied for the calculation of the net exposure are determined in accordance with our risk management policies and reflect applicable margining considerations.
- *Net credit risk exposure* represents gross credit risk exposure net of risk mitigation.
- *Inventory* represents the long inventory positions in trading and non-trading physical debt and synthetic positions, each at market value, all netted at issuer level. Physical debt is non-derivative debt positions (e.g., bonds), and synthetic positions are created through OTC contracts (e.g., CDS purchased and/or sold and total return swaps (TRS)).

## Selected European credit risk exposures

[1] Includes other hedges (derivative instruments), guarantees, insurance and collateral.
[2] Represents long inventory positions netted at issuer level.
[3] Substantially all of which results from CDS; represents long positions net of short positions.

CDS presented in the risk mitigation column are purchased as a direct hedge to our OTC exposure and the risk mitigation impact is considered to be the notional amount of the contract for risk purposes, with the mark-to-market fair value of CDS risk-managed against the protection provider. Net notional amounts of CDS reflect the notional amount of CDS protection purchased less the notional amount of CDS protection sold and are based on the origin of the CDS reference credit, rather than that of the CDS counterparty. CDS included in the inventory column represent contracts recorded in our trading books that are hedging the credit risk of the instruments included in the inventory column and are disclosed on the same basis as the value of the fixed income instrument they are hedging.

We do not have any tranched CDS positions on these European countries and only an insignificant amount of indexed credit derivatives is included in inventory.

The credit risk of CDS contracts themselves, i.e., the risk that the CDS counterparty will not perform in the event of a default, is managed separately from the credit risk of the reference credit. To mitigate such credit risk, all CDS contracts are collateralized and executed with counterparties with whom we have an enforceable International Swaps and Derivatives Association (ISDA) master agreement that provides for daily margining.

### Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Croatia, Cyprus, Greece, Ireland, Italy, Portugal and Spain as of the end of 1Q14 was EUR 5.1 billion, up from EUR 4.3 billion as of the end of 4Q13. Our net exposure to these sovereigns was EUR 1.4 billion, up from EUR 0.8 billion compared to the end of 4Q13. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 1Q14 included net exposure to financial institutions of EUR 2.2 billion and to corporates and other counterparties of EUR 1.5 billion, compared to EUR 2.3 billion and EUR 1.9 billion, respectively, as of the end of 4Q13. A significant majority of the purchased credit protection is transacted with banks outside of the disclosed countries. For credit protection purchased from banks in the disclosed countries, such credit risk is reflected in the gross and net exposure to each respective country.

### Sovereign debt rating developments

In 1Q14, the long-term sovereign debt ratings of the countries listed in the table were affected as follows: Standard & Poor's lowered Croatia's rating to BB from BB+ and Moody's increased Ireland's rating to Baa3 from Ba1 and Spain's rating to Baa2 from Baa3. The rating changes did not have a significant impact on the Group's financial position, result of operations, liquidity or capital resources.

## OPERATIONAL RISK

Effective January 1, 2014, we have implemented a revised FINMA-approved internal AMA model to calculate the regulatory capital requirement for operational risk. The AMA capital calculation includes all litigation-related provisions and also an add-on component relating to the aggregate range of the reasonably possible litigation losses that are disclosed in our financial statements but are not covered by existing provisions.

▸ Refer to "Operational risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2013 for further information on the revised AMA model used for regulatory capital calculation.

The increase in the capital required for operational risk primarily reflected the implementation of the revised AMA model, including a limitation set by FINMA of the capital benefit for insurance-based risk transfer to 5% of the total AMA capital charge, and an increase in the aggregate range of reasonably possible litigation losses.

# Balance sheet and off-balance sheet

Total assets were CHF 878.1 billion, total liabilities were CHF 833.8 billion and total equity was CHF 44.3 billion. Both total assets and total liabilities were stable for the quarter. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

## Balance sheet summary

## BALANCE SHEET

Total assets were CHF 878.1 billion as of the end of 1Q14, stable from the end of 4Q13, reflecting an increase from operating activities, offset by the foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets increased CHF 9.7 billion.

Compared to the end of 4Q13, trading assets increased CHF 7.7 billion, or 3%, due to increases in equity and debt securities, partially offset by a decrease in derivative instruments. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions increased CHF 2.9 billion, or 2%, primarily due to higher customer and bank cash collateral, partially offset by lower reverse repurchase transactions. Net loans were stable at CHF 250.7 billion, primarily reflecting increased loans collateralized by securities in Private Banking & Wealth Management and increased commercial and industrial loans in Private Banking & Wealth Management and Investment Banking, offset by decreased loans to financial institutions in Investment Banking. Cash and due from banks decreased CHF 2.7 billion, or 4%, driven by decreases in central bank holdings. Brokerage receivables decreased CHF 2.7 billion, or 5%, mainly driven by decreases in margin lending and futures margin, partially offset by increases in open trades. All other assets decreased CHF 3.4 billion, or 3%, including decreases of CHF 2.5 billion in other investments, CHF 0.8 billion in assets of discontinued operations held-for-sale and CHF 0.7 billion in other assets, partially offset by an increase of CHF 0.3 billion in investment securities.

Total liabilities were CHF 833.8 billion as of the end of 1Q14, stable from the end of 4Q13, driven by an increase from operating activities, offset by the foreign exchange translation impact. Excluding the foreign exchange translation impact, total liabilities decreased CHF 11.9 billion.

Compared to the end of 4Q13, customer deposits increased CHF 15.4 billion, or 5%, primarily driven by increases in certificates of deposits and investment accounts. Long-term debt increased CHF 2.4 billion, or 2%, primarily reflecting issuances of senior debt, partially offset by maturing of senior debt and non-recourse liabilities from consolidated VIEs. Due to banks increased CHF 1.1 billion, or 5%, mainly driven by increases of deposits with central banks. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions decreased CHF 5.4 billion, or 6%, reflecting a decrease in repurchase agreements. Trading liabilities decreased CHF 3.6 billion, or 5%, reflecting a decrease in derivative instruments, partially offset by an increase in short positions. Brokerage payables decreased CHF 2.9 billion, or 4%, primarily due to lower client activity. All other liabilities were stable at CHF 96.8 billion with an increase of CHF 4.0 billion in short-term borrowings and a decrease of CHF 2.7 billion in other liabilities.

▸ Refer to “Funding sources and uses” in Liquidity and funding management and “Capital management” for further information, including our funding of the balance sheet and the leverage ratio.

## OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

▸ Refer to “Liquidity and funding management” in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2013 and “Note 25 – Guarantees and commitments” and “Note 29 – Litigation” in III – Condensed consolidated financial statements – unaudited for further information.

Report of Independent Registered Public Accounting Firm to the Board of Directors of

**Credit Suisse Group AG, Zurich**

We have reviewed the accompanying condensed consolidated balance sheets of Credit Suisse Group AG and subsidiaries (the "Group") as of March 31, 2014 and 2013 and the related condensed consolidated statements of operations, changes in equity, comprehensive income, and cash flows for the three-month periods ended March 31, 2014 and 2013. These condensed consolidated financial statements are the responsibility of the Group's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Group as of December 31, 2013, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows for the year then ended (not presented herein); and in our report dated April 3, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2013, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

### Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2013 included in the Credit Suisse Annual Report 2013.

▸ Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for a description of the Group's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 4Q13 consolidated statements of operations and comprehensive income, the 1Q13 consolidated balance sheets and the 4Q13 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2 Recently issued accounting standards

### Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

▸ Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for a description of accounting standards adopted in 2013.

#### ASC Topic 210 – Balance Sheet

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, "Disclosures about Offsetting Assets and Liabilities" (ASU 2011-11), an update to Accounting Standards Codification (ASC) Topic 210 – Balance Sheet. The amendments in ASU 2011-11 require an entity to prepare additional disclosures about offsetting and related arrangements. In January 2013, the FASB issued ASU 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities" (ASU 2013-01), an update to ASC Topic 210 – Balance Sheet. ASU 2013-01 clarifies the scope of ASU 2011-11. The adoption of ASU 2011-11 and ASU 2013-01 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

▸ Refer to "Note 20 – Offsetting of financial assets and financial liabilities" for further information.

#### ASC Topic 220 – Comprehensive Income

In January 2013, the FASB issued ASU 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" (ASU 2013-02), an update to ASC Topic 220 – Comprehensive Income. The amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. The adoption of ASU 2013-02 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

▸ Refer to "Note 19 – Accumulated other comprehensive income and additional share information" for further information.

#### ASC Topic 830 – Foreign Currency Matters

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity" (ASU 2013-05), an update to ASC Topic 830 – Foreign Currency Matters. The amendments provide guidance for the treatment of the cumulative translation adjustment when an entity ceases to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity. ASU 2013-05 is effective prospectively for interim and annual reporting periods beginning after December 15, 2013 with early adoption permitted. The Group elected to early adopt ASU 2013-05 on January 1, 2013 which did not have a material impact on the Group's financial position, results of operations or cash flows.

#### ASC Topic 946 – Financial Services – Investment Companies

In June 2013, the FASB issued ASU 2013-08, "Amendments to the Scope, Measurement, and Disclosure Requirements" (ASU 2013-08) an update to Topic 946 – Financial Services – Investment Companies. The amendments change the approach to the investment company assessment in Topic 946, clarify the characteristics of an investment company and provide comprehensive guidance for assessing whether an entity is an investment company. The adoption of ASU 2013-08 on January 1, 2014 did not have a material impact on the Group's financial position, results of operations or cash flows.

### Standards to be adopted in future periods

**ASC Topic 205 – Presentation of Financial Statements**
**ASC Topic 360 – Property, Plant, and Equipment**

In April 2014, the FASB issued ASU 2014-08, "Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity" (ASU 2014-08), an update to Topic 205 – Presentation of Financial Statements and Topic 360 – Property, Plant, and Equipment. The amendments change the requirements for reporting discontinued operations and require additional disclosures about discontinued operations. ASU 2014-08 is effective for interim and annual reporting periods beginning after December 15, 2014 with early adoption permitted. The Group will evaluate the impact of adoption of ASU 2014-08 on the Group's financial position, results of operations and cash flows when any future discontinued operations or disposals are identified.

## 3 Business developments

### Business developments

‣ Refer to "Note 4 – Discontinued operations" for information on business divestitures in 1Q14.

In April 2014, the Group entered into an agreement with the current head of Credit Suisse Hedging-Griffo Asset Management pursuant to which he will be the controlling shareholder of a new firm, Verde Asset Management, and the Group will be a minority shareholder. The transaction is subject to customary closing conditions and the approval of the change of management to Verde Asset Management by shareholders of the relevant funds managed by Credit Suisse Hedging-Griffo. The transaction is expected to close by year-end 2014.

## 4 Discontinued operations

In December 2013, the Group announced the sale of its domestic private banking business booked in Germany (German private banking business) to ABN AMRO. This transaction is subject to customary closing conditions and is expected to close in the course of 2014. As of the end of 1Q14, the German private banking business had total assets and liabilities of CHF 749 million and CHF 781 million, respectively, that were held-for-sale. ABN AMRO is a company unrelated to the Group.

In January 2014, the Group completed the sale of CFIG, its private equity fund of funds and co-investment business, to Grosvenor Capital Management and recognized a pre-tax gain on disposal of CHF 91 million in 1Q14 net of allocated goodwill of CHF 23 million. As of the end of 4Q13, CFIG had total assets of CHF 31 million that were held-for-sale. The Group will continue to hold investments in, and have unfunded commitments to, investment funds managed by CFIG. Grosvenor Capital Management is a company unrelated to the Group.

In March 2014, the Group completed the spin-off of DLJ Merchant Banking Partners, the Group's mid-market leveraged buyout business, for no consideration to aPriori Capital Partners L.P., an independent advisory firm established and controlled by members of the business' management. The transaction was completed with no gain or loss from disposal and insignificant impact on net revenues, operating expenses and net income/(loss) from discontinued operations for 1Q14 and prior periods have not been restated. The Group will retain certain carried interest rights. aPriori Capital Partners L.P. is a company unrelated to the Group.

‣ Refer to "Note 4 – Discontinued operations" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

### Assets held-for-sale

| end of | **1Q14** | 4Q13 |
|---|---|---|
| **German private banking business (CHF million)** | | |
| Deposits | 740 | 1,118 |
| Other liabilities | 41 | 22 |
| **Total liabilities held-for-sale** | **781** | **1,140** |
| **Group (CHF million)** | | |
| **Total liabilities held-for-sale** | **781** | **1,140** |

For the operations discontinued in 2013 and 1Q14, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center.

The results of operations of the businesses sold have been reflected in income/(loss) from discontinued operations in the consolidated statements of operations for the relevant periods presented. The assets and liabilities of discontinued operations for which the sale has not yet been completed are presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, and prior periods are not reclassified.

## 5 Segment information

### Overview

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of two segments: Private Banking & Wealth Management and Investment Banking. The two segments are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT. Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses. For the operations discontinued, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center.

▸ Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on segment information, revenue sharing and cost allocation, funding and taxes.

### Net revenues and income before taxes

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|

| Long-term debt | (927) | (895) | (1,044) |
| Other | (60) | (62) | (55) |
| Interest expense | (2,267) | (2,326) | (3,016) |
| **Net interest income** | **2,178** | **1,747** | **1,806** |

## 7 Commissions and fees

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Commissions and fees (CHF million)** | | | |
| Lending business | 434 | 460 | 441 |
| Investment and portfolio management | 934 | 1,119 | 904 |
| Other securities business | 23 | 25 | 28 |
| Fiduciary business | 957 | 1,144 | 932 |
| Underwriting | 460 | 446 | 419 |
| Brokerage | 973 | 860 | 1,045 |
| Underwriting and brokerage | 1,433 | 1,306 | 1,464 |
| Other services | 451 | 515 | 411 |
| **Commissions and fees** | **3,275** | **3,425** | **3,248** |

## 8 Trading revenues

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Trading revenues (CHF million)** | | | |
| Interest rate products | 1,250 | (2) | 1,697 |
| Foreign exchange products | (1,014) | 298 | 384 |
| Equity/index-related products | 176 | 534 | (82) |
| Credit products | 40 | (538) | (360) |
| Commodity, emission and energy products | 63 | 71 | 43 |
| Other products | 123 | (68) | 133 |
| **Trading revenues** | **638** | **295** | **1,815** |

Represents revenues on a product basis which are not representative of business results within segments, as segment results utilize financial instruments across various product types.

▸ Refer to "Note 8 – Trading revenues" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on trading revenues and managing trading risks.

## 9 Other revenues

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Other revenues (CHF million)** | | | |
| Noncontrolling interests without SEI | 358 | 211 | 64 |
| Loans held-for-sale | 1 | (1) | (5) |
| Long-lived assets held-for-sale | 28 | 45 | (15) |
| Equity method investments | 61 | 147 | 36 |
| Other investments | 110 | 144 | 57 |
| Other | 180 | 126 | 83 |
| **Other revenues** | **738** | **672** | **220** |

## 10 Provision for credit losses

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Provision for credit losses (CHF million)** | | | |
| Provision for loan losses | 30 | 54 | 20 |
| Provision for lending-related and other exposures | 4 | (1) | 2 |
| **Provision for credit losses** | **34** | **53** | **22** |

## 11 Compensation and benefits

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Compensation and benefits (CHF million)** | | | |
| Salaries and variable compensation | 2,653 | 2,422 | 2,582 |
| Social security | 188 | 175 | 222 |
| Other [1] | 152 | 210 | 187 |
| **Compensation and benefits [2]** | **2,993** | **2,807** | **2,991** |

[1] Includes pension and other post-retirement expense of CHF 84 million, CHF 134 million and CHF 110 million in 1Q14, 4Q13 and 1Q13, respectively.
[2] Includes severance and other compensation expense relating to headcount reductions of CHF 24 million, CHF 52 million and CHF 67 million as of 1Q14, 4Q13 and 1Q13, respectively.

## 12 General and administrative expenses

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **General and administrative expenses (CHF million)** | | | |
| Occupancy expenses | 273 | 327 | 288 |
| IT, machinery, etc. | 341 | 390 | 384 |
| Provisions and losses | 111 | 1,483 | 170 |
| Travel and entertainment | 81 | 92 | 89 |
| Professional services | 526 | 577 | 447 |
| Goodwill impairment | 0 | 12 | 0 |

| **Basic earnings/(loss) per share available for common shares (CHF)** | | | |
| Basic earnings/(loss) per share from continuing operations | 0.47 | (0.37) | 0.76 |
| Basic earnings/(loss) per share from discontinued operations | 0.01 | 0.00 | 0.00 |
| **Basic earnings/(loss) per share available for common shares** | **0.48** | **(0.37)** | **0.76** |
| **Diluted earnings/(loss) per share available for common shares (CHF)** | | | |
| Diluted earnings/(loss) per share from continuing operations | 0.47 | (0.37) | 0.75 |
| Diluted earnings/(loss) per share from discontinued operations | 0.01 | 0.00 | 0.00 |
| **Diluted earnings/(loss) per share available for common shares** | **0.48** | **(0.37)** | **0.75** |

Prior periods have been adjusted to reflect the increase in the number of shares outstanding that arose from the 2Q13 stock dividend, as required under US GAAP.

1 Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.

2 Reflects changes in the fair value of the PAF2 units which are reflected in the net results of the Group until the awards are finally settled. Fair value of the PAF2 units which are reflected in the net results of the Group are not adjusted for 4Q13, as the effect would be antidilutive. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.

3 Reflects weighted-average shares outstanding on PAF2 units. Weighted-average shares on PAF2 units for 4Q13 were excluded from the diluted earnings per share calculation, as the effect would be antidilutive. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.

4 Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 9.1 million, 36.0 million and 13.7 million for 1Q14, 4Q13 and 1Q13, respectively.

5 Due to the net loss in 4Q13, 1.7 million weighted-average share options and warrants outstanding and 0.8 million weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

## 14 Trading assets and liabilities

| end of | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Trading assets (CHF million)** | | | |
| Debt securities | 112,678 | 110,116 | 132,709 |
| Equity securities [1] | 83,044 | 76,695 | 85,087 |
| Derivative instruments [2] | 30,538 | 31,603 | 33,312 |
| Other | 10,809 | 10,999 | 13,093 |
| **Trading assets** | **237,069** | **229,413** | **264,201** |
| **Trading liabilities (CHF million)** | | | |
| Short positions | 40,647 | 40,161 | 52,348 |
| Derivative instruments [2] | 32,382 | 36,474 | 39,142 |
| **Trading liabilities** | **73,029** | **76,635** | **91,490** |

[1] Including convertible bonds.
[2] Amounts shown net of cash collateral receivables and payables.

### Cash collateral on derivative instruments

| end of | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Cash collateral – netted (CHF million)** [1] | | | |
| Cash collateral paid | 24,735 | 23,870 | 35,137 |
| Cash collateral received | 19,425 | 20,500 | 31,626 |
| **Cash collateral – not netted (CHF million)** [2] | | | |
| Cash collateral paid | 7,058 | 8,359 | 12,030 |
| Cash collateral received | 11,984 | 11,663 | 13,399 |

[1] Recorded as cash collateral netting on derivative instruments in Note 20 – Offsetting of financial assets and financial liabilities.
[2] Recorded as cash collateral on derivative instruments in Note 17 – Other assets and other liabilities.

## 15 Investment securities

| end of | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Investment securities (CHF million)** | | | |
| Securities available-for-sale | 3,320 | 2,987 | 3,428 |
| **Total investment securities** | **3,320** | **2,987** | **3,428** |

### Investment securities by type

| | | | | 1Q14 | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|
| end of | Amortized cost | Gross unrealized gains | Gross unrealized losses | **Fair value** | Amortized cost | Gross unrealized gains | Gross unrealized losses | **Fair value** |
| **Investment securities by type (CHF million)** | | | | | | | | |
| Debt securities issued by Swiss federal, cantonal or local governmental entities | 372 | 19 | 1 | 390 | 389 | 15 | 2 | 402 |
| Debt securities issued by foreign governments | 1,762 | 42 | 0 | 1,804 | 1,350 | 39 | 1 | 1,388 |
| Corporate debt securities | 569 | 15 | 0 | 584 | 590 | 16 | 0 | 606 |
| Collateralized debt obligations | 426 | 14 | 0 | 440 | 480 | 11 | 1 | 490 |
| Debt securities available-for-sale | 3,129 | 90 | 1 | 3,218 | 2,809 | 81 | 4 | 2,886 |
| Banks, trust and insurance companies | 74 | 20 | 0 | 94 | 74 | 18 | 0 | 92 |
| Industry and all other | 8 | 0 | 0 | 8 | 9 | 0 | 0 | 9 |
| Equity securities available-for-sale | 82 | 20 | 0 | 102 | 83 | 18 | 0 | 101 |
| **Securities available-for-sale** | **3,211** | **110** | **1** | **3,320** | **2,892** | **99** | **4** | **2,987** |

### Gross unrealized losses on investment securities and the related fair value

| | Less than 12 months | | 12 months or more | | **Total** | |
|---|---|---|---|---|---|---|
| end of | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses |
| **1Q14 (CHF million)** | | | | | | |
| Debt securities issued by Swiss federal, cantonal or local governmental entities | 0 | 0 | 26 | 1 | 26 | 1 |
| **Debt securities available-for-sale** | **0** | **0** | **26** | **1** | **26** | **1** |
| **4Q13 (CHF million)** | | | | | | |
| Debt securities issued by foreign governments | 168 | 2 | 0 | 0 | 168 | 2 |
| Corporate debt securities | 109 | 1 | 0 | 0 | 109 | 1 |
| Collateralized debt obligation | 10 | 1 | 0 | 0 | 10 | 1 |
| **Debt securities available-for-sale** | **287** | **4** | **0** | **0** | **287** | **4** |

Management determined that the unrealized losses on debt securities are primarily attributable to general market interest rate, credit spread or exchange rate movements. No significant impairment charges were recorded as the Group does not intend to sell the investments, nor is it more likely than not that the Group will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

### Proceeds from sales, realized gains and realized losses from available-for-sale securities

| | | 1Q14 | | 1Q13 |
|---|---|---|---|---|

| Due after 10 years | 79 | 80 | 1.34 |
| **Total debt securities** | **3,129** | **3,218** | **2.18** |

## 16 Loans, allowance for loan losses and credit quality

Loans are divided in two portfolio segments, "consumer" and "corporate & institutional". Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

The determination of the loan classes is primarily driven by the customer segmentation in the two business divisions, Private Banking & Wealth Management and Investment Banking, both of which are engaged in credit activities.

The Group assigns both counterparty and transaction ratings to its credit exposures. The counterparty rating reflects the probability of default of the counterparty. The transaction rating reflects the expected loss, considering collateral, on a given transaction if the counterparty defaults. Credit risk is assessed and monitored on the single obligor and single obligation level as well as on the credit portfolio level as represented by the classes of loans. Credit limits are used to manage counterparty credit risk.

▸ Refer to "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on loans, allowance for loan losses, credit quality and impaired loans.

### Loans

| end of | 1Q14 | 4Q13 | 1Q13 |

[1] Includes drawdowns under purchased loan commitments.
[2] Includes loans previously reclassified to held-for-sale that were not sold and were reclassified back to loans held-to-maturity.
[3] All loans held at amortized cost which are sold are reclassified to loans held-for-sale on or prior to the date of the sale.

**Credit quality of loans held at amortized cost**

Management monitors the credit quality of loans through its credit risk management processes, which are structured to assess, quantify, measure, monitor and manage risk on a consistent basis. This process requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Management evaluates many factors when assessing the credit quality of loans. These factors include the volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic factors. For the purpose of credit quality disclosures, the Group uses internal risk ratings as credit quality indicators.

The Group employs a set of credit ratings for the purpose of internally rating counterparties. Credit ratings are intended to reflect the risk of default of each obligor or counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

▸ Refer to "Credit quality of loans held at amortized cost" in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality in the Credit Suisse Annual Report 2013 for further information on internal ratings and the scope of the credit quality disclosures.

[1] Includes the value of collateral up to the amount of the outstanding related loans. For mortgages, collateral values are generally values at the time of granting the loan.

#### Value of collateral

In Private Banking & Wealth Management, all collateral values for loans are regularly reviewed according to our risk management policies and directives, with maximum review periods determined by market liquidity, market transparency and appraisal costs. For example, traded securities are revalued on a daily basis and property values are appraised over a period of more than one year considering the characteristics of the borrower, current developments in the relevant real estate market and the current level of credit exposure to the borrower. If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be appraised more frequently. Management judgment is applied in assessing whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macro-economic research. For impaired loans, the fair value of collateral is determined within 90 days of the date the impairment was identified and thereafter regularly revalued by Group credit risk management within the impairment review process.

In Investment Banking, few loans are collateral dependent. The collateral values for these loans are appraised on at least an annual basis, or when a loan-relevant event occurs.

[1] At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 661,049,598 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.
[2] At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 661,049,598 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.
[3] At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 752,676,931 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 732,326,910 of these shares were reserved for capital instruments (including MACCS).

## 20 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:
- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

### Derivatives

The Group transacts bilateral OTC derivatives mainly under ISDA Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcatable hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

[1] Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

**Reverse repurchase and repurchase agreements and securities lending and borrowing transactions**

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, substantially all of the collateral received that may be sold or repledged was sold or repledged as of March 31, 2014 and December 31, 2013. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

**Offsetting of securities purchased under resale agreements and securities borrowing transactions**

| | | | 1Q14 | | | 4Q13 |
|---|---|---|---|---|---|---|
| end of | Gross | Offsetting | Net | Gross | Offsetting | Net |
| **Securities purchased under resale agreements and securities borrowing transactions (CHF billion)** | | | | | | |
| Securities purchased under resale agreements | 115.7 | (36.9) | 78.8 | 112.0 | (25.1) | 86.9 |

| **Total** | **201.2** | **(38.3)** | **162.9** [2] | **186.8** | **(26.8)** | **160.0** [2] |

[1] Represents securities purchased under resale agreements and securities borrowing transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.
[2] CHF 88,081 million and CHF 96,587 million of the total net amount as of the end of 1Q14 and 4Q13, respectively, are reported at fair value.

The following table presents the gross amount of securities sold under repurchase agreements and securities lending transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities sold under repurchase agreements and securities lending transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

## Offsetting of securities sold under repurchase agreements and securities lending transactions

| | | | 1Q14 | | | 4Q13 |
|---|---|---|---|---|---|---|
| end of | Gross | Offsetting | Net | Gross | Offsetting | Net |
| **Securities sold under repurchase agreements and securities lending transactions (CHF billion)** | | | | | | |
| Securities sold under repurchase agreements | 90.5 | (38.3) | 52.2 | 86.5 | (26.8) | 59.7 |
| Securities lending transactions | 9.7 | 0.0 | 9.7 | 6.6 | 0.0 | 6.6 |
| Obligation to return securities received as collateral, at fair value | 17.0 | 0.0 | 17.0 | 18.5 | 0.0 | 18.5 |
| **Total subject to enforceable master netting agreements** | **117.2** | **(38.3)** | **78.9** | **111.6** | **(26.8)** | **84.8** |
| **Total not subject to enforceable master netting agreements** [1] | **32.8** | **–** | **32.8** | **32.0** | **–** | **32.0** |
| **Total** | **150.0** | **(38.3)** | **111.7** | **143.6** | **(26.8)** | **116.8** |
| of which securities sold under repurchase agreements and securities lending transactions | 127.0 | (38.3) | 88.7 [2] | 120.8 | (26.8) | 94.0 [2] |
| of which obligation to return securities received as collateral, at fair value | 23.0 | 0.0 | 23.0 | 22.8 | 0.0 | 22.8 |

1 Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.
2 CHF 70,824 million and CHF 76,104 million of the total net amount as of the end of 1Q14 and 4Q13, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

## Amounts not offset in the consolidated balance sheets

| | | | | 1Q14 | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|
| end of | Net | Financial instruments [1] | Cash collateral received/ pledged [1] | **Net exposure** | Net | Financial instruments [1] | Cash collateral received/ pledged [1] | **Net exposure** |
| **Financial assets subject to enforceable master netting agreements (CHF billion)** | | | | | | | | |
| Derivatives | 22.6 | 4.7 | 0.0 | 17.9 | 23.6 | 4.9 | 0.1 | 18.6 |
| Securities purchased under resale agreements | 78.8 | 78.8 | 0.0 | 0.0 | 86.9 | 86.9 | 0.0 | 0.0 |

| **Total financial assets subject to enforceable master netting agreements** | **127.4** | **108.9** | **0.0** | **18.5** | **131.5** | **112.0** | **0.1** | **19.4** |
| **Financial liabilities subject to enforceable master netting agreements (CHF billion)** | | | | | | | | |
| Derivatives | 22.4 | 9.2 | 0.0 | 13.2 | 25.6 | 9.9 | 0.0 | 15.7 |
| Securities sold under repurchase agreements | 52.2 | 52.2 | 0.0 | 0.0 | 59.7 | 59.7 | 0.0 | 0.0 |
| Securities lending transactions | 9.7 | 8.3 | 0.0 | 1.4 | 6.6 | 6.2 | 0.0 | 0.4 |
| Obligation to return securities received as collateral, at fair value | 17.0 | 16.5 | 0.0 | 0.5 | 18.5 | 17.5 | 0.0 | 1.0 |
| **Total financial liabilities subject to enforceable master netting agreements** | **101.3** | **86.2** | **0.0** | **15.1** | **110.4** | **93.3** | **0.0** | **17.1** |

1 The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of CDS and credit insurance contracts. Therefore the net exposure presented in the table above is not representative for the Group's counterparty exposure.

## 21 Tax

The income tax expense of CHF 543 million recorded in 1Q14 included the impact of the geographical mix of results and an income tax expense of CHF 151 million from a change in the New York state tax laws enacted in 1Q14 which resulted in a decrease of related deferred tax assets.

The presentation of net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities is in accordance with ASC Topic 740 – Income Taxes guidance to interim reporting. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of March 31, 2014, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 6.4 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 72 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2010; Brazil – 2008; Japan – 2008; the UK – 2006; the US – 2006; and the Netherlands – 2005.

### Foreign tax rate differential

1Q14 included a foreign tax expense of CHF 118 million in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US.

### Changes in tax law and rates

1Q14 included a tax expense of CHF 151 million related to the change in New York state tax laws.

### Other non-deductible expenses

1Q14 included non-deductible interest expenses of CHF 39 million, non-deductible bank levy costs and other non-deductible expenses of CHF 18 million.

### Changes in deferred tax valuation allowance

1Q14 included the impact of the increase of valuation allowances of CHF 12 million in respect of three of the Group's operating entities, two in Europe and one in Asia, partially offset by the release of valuation allowances in respect of two of the Group's operating entities in Europe of CHF 6 million. All impacts are related to estimated current year earnings.

### Lower taxed income

1Q14 included a CHF 17 million income tax benefit related to non-taxable life insurance income, and a tax benefit of CHF 12 million from non-taxable dividends.

### Other

1Q14 included a tax expense of CHF 9 million relating to the increase of tax contingency accruals.

### Net deferred tax assets

| end of | 1Q14 | 4Q13 |

| of which deductible temporary differences | 4,247 | 4,805 |
| Deferred tax liabilities | (427) | (394) |
| **Net deferred tax assets** | **5,256** | **5,791** |

## 22 Employee deferred compensation

The Group's current and previous deferred compensation plans include share awards, performance share awards, CCA, COF awards, Plus Bond awards, Partner Asset Facilities awards, Adjustable Performance Plan awards, Restricted Cash Awards, Scaled Incentive Share Units (SISUs), Incentive Share Units (ISUs) and other cash awards.

▸ Refer to "Note 28 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

The following tables show the expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 1Q14 and prior periods and the associated remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized deferred compensation expense was based on the fair value of each award on the date of grant and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

### Deferred compensation expense

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Deferred compensation expense (CHF million)** | | | |
| Share awards | 250 | 174 | 254 |
| Performance share awards | 172 | 122 | 204 |
| Contingent Capital Awards | 96 | – | – |
| Capital Opportunity Facility awards | 1 | – | – |
| Plus Bond awards [1] | 10 | 11 | 10 |
| 2011 Partner Asset Facility awards [2] | 11 | 57 | (7) |
| Adjustable Performance Plan share awards | 1 | 4 | 5 |
| Adjustable Performance Plan cash awards [3] | (2) | (2) | (3) |
| Restricted Cash Awards | 23 | 28 | 54 |
| Scaled Incentive Share Units | 0 | 9 | 7 |
| Incentive Share Units [3] | 0 | (1) | (2) |
| 2008 Partner Asset Facility awards [2] | 22 | 13 | 42 |
| Other cash awards | 128 | 100 | 117 |
| Discontinued operations | (3) | (4) | (1) |
| **Total deferred compensation expense** | **709** | **511** | **680** |

[1] Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.
[2] Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.
[3] Includes forfeitures.

### Additional information

| Adjustable Performance Plan cash awards | 9 |
| Restricted Cash Awards | 107 |
| Other cash awards | 243 |
| **Estimated unrecognized deferred compensation expense** | **2,776** |
| **Weighted-average requisite service period (years)** | |
| Aggregate remaining weighted-average requisite service period | 1.3 |

### 1Q14 activity

In 1Q14, the Group granted share awards, performance share awards and CCA as part of the 2013 variable compensation. Expense recognition for these awards began in 1Q14 and will continue over the remaining service or vesting period of each respective award.

### Share awards

In 1Q14, the Group granted 32.0 million share awards at a weighted average share price of CHF 28.11. Each share award granted entitles the holder of the award to receive one Group share, does not contain a leverage component or a multiplier effect and is subject to service conditions as it vests over three years, such that the share awards vest equally on each of the three anniversaries of the grant date. Share awards granted after January 1, 2014 do not include the right to receive dividend equivalents during the vesting period.

### Performance share awards

In 1Q14, the Group granted 24.3 million performance share awards at a weighted average share price of CHF 28.13. Each performance share award granted entitles the holder of the award to receive one Group share. Performance share awards also vest over three years, such that the share awards vest equally on each of the three anniversaries of the grant date. Unlike share awards, however, the outstanding performance share awards are subject to a negative adjustment in the event of a divisional loss or a negative return on equity of the Group. Performance share awards granted after January 1, 2014 do not include the right to receive dividend equivalents during the vesting period.

### Contingent Capital Awards

In 1Q14, managing directors and directors were granted a new form of award, CCA. The Group awarded CHF 391 million of CCA, which will vest on the third anniversary of the grant date and will be expensed over the vesting period.

### Scaled Incentive Share Units

In 1Q14, SISU leverage units granted in 2010 were settled. In accordance with the terms of the plan, the SISU leverage units did not have a value at settlement.

### 2011 Partner Asset Facility

In 1Q14, the Group restructured the PAF2 awards. PAF2 awards were linked to a portfolio of the Group's credit exposures, providing risk offset and capital relief. Due to regulatory changes, this capital relief would no longer be available. As a result of the restructuring, PAF2 holders were required to reallocate the exposure of their awards from the pool of counterparty credit risks in the original PAF2 structure to one of the following options, or a combination thereof: i) COF: participants elected for their award to be referenced to a COF. The COF is a seven-year facility that is linked to the performance of a portfolio of risk-transfer and capital mitigation transactions to be entered into with the Group chosen by a COF management team. The value of the COF awards will be reduced if there are losses from the COF portfolio, up to the full amount of the award. Participants who elected the COF will receive semi-annual US dollar cash distributions of 6.5% per annum until settlement in cash in 2021, and such semi-annual distributions will reduce the cash settlement amount payable in 2021; and ii) CCA: participants elected to receive CCA, with similar terms to the instruments granted as part of the 2013 compensation awards. The principal differences between the two forms of CCA are that these CCA are expected to settle approximately one year earlier and provide semi-annual cash payments of interest equivalents at slightly lower rates. Settlement is expected to occur in February 2016, subject to regulatory approvals.

In March 2014, 5,084 employees converted their PAF2 holdings of CHF 684 million into CCA (CHF 516 million) and COF (CHF 168 million).

#### Amendment to share plans

The terms of all past and future share-based awards granted to the Executive Board were amended in 2014 to enable election of settlement in cash or shares. The amendments permit Executive Board members to elect once a year, at a predefined date in advance of settlement, to receive their vested share-based awards in the form of shares, cash or 50% in the form of shares and 50% in cash, in each case based on the Group share price at the time of settlement. An election to receive cash is subject to reversal if the Group share price falls by more than 25% between election and settlement. The timing and pricing of settlement will be the same as under the previous award plan and as under the plans of the non-Executive Board population. This change does not affect deferred share-based awards to non-Executive Board members, which will continue to be settled in the form of Group shares.

### Share-based award activity

| Number of awards (in millions) | Share awards | Performance share awards | Adjustable Performance Plan share awards | SISU awards | ISU awards |
|---|---|---|---|---|---|
| | | | | | 1Q14 |
| **Share-based award activities** | | | | | |
| **Balance at beginning of period** | **72.9** | **41.4** | **14.5** | **4.7** | **1.2** |
| Granted | 32.0 | 24.3 | 0.8 [1] | 0.0 | 0.0 |
| Settled | (1.0) | 0.0 | 0.0 | 0.0 | 0.0 |
| Forfeited | (0.3) | 0.0 | 0.0 | 0.0 | (0.2) |
| **Balance at end of period** | **103.6** | **65.7** | **15.3** | **4.7** | **1.0** |
| of which vested | 30.4 | 17.7 | 8.3 | 4.7 | 0.1 |
| of which unvested | 73.2 | 48.0 | 7.0 | 0.0 | 0.9 |

[1] Represents additional units earned in 1Q14 as the original Adjustable Performance Plan awards met performance criteria in accordance with the terms and conditions of the awards.

## 23 Pension and other post-retirement benefits

The Group previously disclosed that it expected to contribute CHF 529 million to the Swiss and international defined benefit plans and other post-retirement defined benefit plans in 2014. As of the end of 1Q14, CHF 147 million of contributions had been made.

### Components of total benefit costs

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Total benefit costs (CHF million)** | | | |
| Service costs on benefit obligation | 69 | 90 | 94 |
| Interest costs on benefit obligation | 120 | 108 | 109 |
| Expected return on plan assets | (181) | (184) | (184) |
| Amortization of recognized prior service cost/(credit) | (22) | (23) | (23) |
| Amortization of recognized actuarial losses | 50 | 90 | 86 |
| **Net periodic benefit costs** | **36** | **81** | **82** |
| Settlement losses/(gains) | 0 | 39 | 0 |
| Curtailment losses/(gains) | (3) | 4 | (11) |
| Special termination benefits | 3 | 3 | 8 |
| **Total benefit costs** | **36** | **127** | **79** |

## 24 Derivatives and hedging activities

▸ Refer to "Note 31 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

▸ Refer to "Note 27 – Financial instruments" for further information.

### Fair value of derivative instruments

| | | | Trading | | | Hedging [1] |

The notional amount, PRV and NRV (trading and hedging) was CHF 52,435.7 billion, CHF 578.6 billion and CHF 584.7 billion, respectively, as of December 31, 2013.
[1] Relates to derivative contracts that qualify for hedge accounting under US GAAP.
[2] Primarily credit default swaps.
[3] Primarily precious metals, commodity, energy and emission products.

## Netting of derivative instruments

▸ Refer to "Derivatives" in Note 20 – Offsetting of financial assets and financial liabilities for further information of the netting of derivative instruments.

## Fair value hedges

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Gains/(losses) recognized in income on derivatives (CHF million)** | | | |
| Interest rate products | (290) | 59 | 88 |
| Foreign exchange products | 0 | (1) | (2) |
| **Total** | **(290)** | **58** | **86** |
| **Gains/(losses) recognized in income on hedged items (CHF million)** | | | |
| Interest rate products | 300 | (55) | (86) |
| Foreign exchange products | 0 | 1 | 2 |
| **Total** | **300** | **(54)** | **(84)** |
| **Details of fair value hedges (CHF million)** | | | |
| Net gains on the ineffective portion | 10 | 4 | 2 |

Represents gains/(losses) recognized in trading revenues.

## Cash flow hedges

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Gains/(losses) recognized in AOCI on derivatives (CHF million)** | | | |
| Interest rate products | 14 | 9 | 5 |
| Foreign exchange products | 9 | 6 | (3) |
| **Total** | **23** | **15** | **2** |
| **Gains/(losses) reclassified from AOCI into income (CHF million)** | | | |
| Interest rate products [1] | 4 | 2 | 1 |
| Foreign exchange products [2] | (1) | 0 | (1) |
| **Total** | **3** | **2** | **0** |

[1] Included in trading revenues.
[2] Included in other revenues.

As of the end of 1Q14, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was three years.

The net gain associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months was CHF 10 million.

## Net investment hedges

| in | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Gains/(losses) recognized in AOCI on derivatives (CHF million)** | | | |
| Foreign exchange products | 59 | 198 | (551) |
| **Total** | **59** | **198** | **(551)** |

Represents gains/(losses) on effective portion.
[1] Included in other revenues.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

▸ Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

### Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

### Contingent credit risk

| | | | | 1Q14 | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|
| end of | Bilateral counterparties | Special purpose entities | Accelerated terminations | **Total** | Bilateral counterparties | Special purpose entities | Accelerated terminations | **Total** |

| Current net exposure | 11.7 | 1.1 | 0.2 | **13.0** | 11.7 | 1.1 | 0.1 | **12.9** |
| Collateral posted | 10.7 | 1.1 | – | **11.8** | 10.6 | 1.2 | – | **11.8** |
| Additional collateral required in a one-notch downgrade event | 0.5 | 0.6 | 0.0 | **1.1** | 0.6 | 0.8 | 0.0 | **1.4** |
| Additional collateral required in a two-notch downgrade event | 2.1 | 0.9 | 0.0 | **3.0** | 2.3 | 1.1 | 0.0 | **3.4** |

### Credit derivatives

▸ Refer to "Note 31 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on credit derivatives.

#### Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the "Fair value of derivative instruments" tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other derivative instruments were excluded as they do not fall within the scope of US GAAP rules. TRS of CHF 9.4 billion and CHF 7.4 billion as of the end of 1Q14 and 4Q13, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

#### Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

#### Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

#### Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

#### Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

| of which non-sovereign | (568.8) | 546.6 | (22.2) | 106.4 | 13.0 | (599.8) | 568.0 | (31.8) | 99.0 | 12.9 |

1 Represents credit protection purchased with identical underlyings and recoveries.
2 Based on internal ratings of BBB and above.
3 Includes the Clock Finance transaction.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

### Credit derivatives

| end of | 1Q14 | 4Q13 |
|---|---|---|
| **Credit derivatives (CHF billion)** | | |
| Credit protection sold | 657.4 | 698.7 |
| Credit protection purchased | 632.4 | 663.9 |
| Other protection purchased | 115.8 | 109.0 |
| Other instruments [1] | 15.6 | 11.7 |
| **Total credit derivatives** | **1,421.2** | **1,483.3** |

1 Consists of certain cash collateralized debt obligations, total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

### Maturity of credit protection sold

| end of | Maturity less than 1 year | Maturity between 1 to 5 years | Maturity greater than 5 years | Total |
|---|---|---|---|---|
| **1Q14 (CHF billion)** | | | | |
| Single-name instruments | 82.5 | 267.4 | 42.0 | 391.9 |
| Multi-name instruments | 17.0 | 201.2 | 47.3 | 265.5 |
| **Total instruments** | **99.5** | **468.6** | **89.3** | **657.4** |
| **4Q13 (CHF billion)** | | | | |
| Single-name instruments | 91.2 | 281.4 | 42.0 | 414.6 |
| Multi-name instruments | 19.2 | 208.2 | 56.7 | 284.1 |
| **Total instruments** | **110.4** | **489.6** | **98.7** | **698.7** |

## 25 Guarantees and commitments

### Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, securities lending indemnifications, derivatives and other guarantees.

‣ Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Guarantees and commitments in the Credit Suisse Annual Report 2013 for a detailed description of guarantees.

### Guarantees

| end of | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Carrying value | Collateral received |
|---|---|---|---|---|---|---|
| **1Q14 (CHF million)** | | | | | | |
| Credit guarantees and similar instruments | 2,776 | 1,510 | 4,286 | 4,205 | 16 | 2,377 |
| Performance guarantees and similar instruments | 4,667 | 3,198 | 7,865 | 7,101 | 74 | 3,455 |
| Securities lending indemnifications | 11,922 | 0 | 11,922 | 11,922 | 0 | 11,922 |
| Derivatives [2] | 19,278 | 11,390 | 30,668 | 30,668 | 800 | – [3] |
| Other guarantees | 3,393 | 1,186 | 4,579 | 4,567 | 36 | 2,457 |
| **Total guarantees** | **42,036** | **17,284** | **59,320** | **58,463** | **926** | **20,211** |
| **4Q13 (CHF million)** | | | | | | |
| Credit guarantees and similar instruments [4] | 2,688 | 1,526 | 4,214 | 4,066 | 14 | 2,333 |
| Performance guarantees and similar instruments [4] | 4,910 | 3,136 | 8,046 | 7,125 | 107 | 3,312 |
| Securities lending indemnifications | 11,479 | 0 | 11,479 | 11,479 | 0 | 11,479 |
| Derivatives [2] | 18,247 | 13,403 | 31,650 | 31,650 | 715 | – [3] |
| Other guarantees | 4,003 | 1,212 | 5,215 | 5,191 | 3 | 2,631 |
| **Total guarantees** | **41,327** | **19,277** | **60,604** | **59,511** | **839** | **19,755** |

[1] Total net amount is computed as the gross amount less any participations.
[2] Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.
[3] Collateral for derivatives accounted for as guarantees is not significant.
[4] Prior period has been corrected.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2013 to June 30, 2014 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees.

### Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac (GSEs); institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

With respect to its outstanding repurchase claims, the Group is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to March 31, 2014 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims in 1Q14, 4Q13 and 1Q13, including realized losses from the repurchase of residential mortgage loans sold.

### Residential mortgage loans sold

| January 1, 2004 to March 31, 2014 (USD billion) | |
|---|---|
| Government-sponsored enterprises | 8.2 |
| Private investors [1] | 23.7 |
| Non-agency securitizations | 134.1 [2] |
| **Total residential mortgage loans sold** | **166.0** |

[1] Primarily banks.
[2] Of the total residential mortgage loans sold to non-agency securitizations USD 25.7 billion were outstanding as of the end of 1Q14. The difference of the total balance of mortgage loans sold and the outstanding balance as of the end of 1Q14 is attributable to borrower payments of USD 89.5 billion and losses of USD 18.9 billion due to loan defaults.

### Residential mortgage loans sold – outstanding repurchase claims

| | 1Q14 | | | | 4Q13 | | | |
|---|---|---|---|---|---|---|---|---|
| | Government-sponsored enterprises | Private investors | Non-agency securitizations | Total | Government-sponsored enterprises | Private investors | Non-agency securitizations | Total |
| **Outstanding repurchase claims (USD million)** | | | | | | | | |

| New claims | 6 | 1 | 6 | 13 | 21 | 2 | 541 | 564 |
| Claims settled through repurchases | 0 | 0 | 0 | 0 [1] | 0 | (1) | 0 | (1) [1] |
| Other settlements | (3) | (1) | (5) | (9) [2] | (5) | 0 | 0 | (5) [2] |
| Total claims settled | (3) | (1) | (5) | (9) | (5) | (1) | 0 | (6) |
| Claims rescinded | (11) | 0 | 0 | (11) | (5) | 0 | 0 | (5) |
| Transfers to/from arbitration and litigation, net [3] | 0 | (2) | (1) | (3) | 0 | 0 | (530) | (530) |
| **Balance at end of period** | **69** | **418** | **83** | **570** | **77** | **420** | **83** | **580** |

| | 1Q13 | | | |
|---|---|---|---|---|
| | Government-sponsored enterprises | Private investors | Non-agency securitizations | Total |
| **Outstanding repurchase claims (USD million)** | | | | |
| **Balance at beginning of period** | **67** | **464** | **1,395** | **1,926** |
| New claims | 12 | 22 | 340 | 374 |
| Claims settled through repurchases | (3) | 0 | 0 | (3) [1] |
| Other settlements | (3) | 0 | (3) | (6) [2] |
| Total claims settled | (6) | 0 | (3) | (9) |
| Claims rescinded | (6) | (4) | 0 | (10) |
| Transfers to/from arbitration and litigation, net [3] | 0 | 0 | (334) | (334) |
| **Balance at end of period** | **67** | **482** | **1,398** | **1,947** |

[1] Settled at a repurchase price of USD 0 million, USD 0 million and USD 3 million in 1Q14, 4Q13 and 1Q13, respectively.
[2] Settled at USD 7 million, USD 3 million and USD 5 million in 1Q14, 4Q13 and 1Q13, respectively.
[3] Refer to "Note 29 – Litigation" for repurchase claims that are in arbitration or litigation.

### Provisions for outstanding repurchase claims

| | 1Q14 | 4Q13 | 1Q13 |
|---|---|---|---|
| **Provisions for outstanding repurchase claims (USD million)** [1] | | | |
| **Balance at beginning of period** | **146** | **88** | **55** |
| Increase/(decrease) in provisions, net | (3) | 61 | 12 |
| Realized losses [2] | (7) [3] | (3) [4] | (8) [5] |
| **Balance at end of period** | **136** [6] | **146** [6] | **59** [4] |

[1] Excludes provisions for repurchase claims related to residential mortgage loans sold that are in arbitration or litigation. Refer to "Note 29 – Litigation" for further information.
[2] Includes indemnifications paid to resolve loan repurchase claims.
[3] Primarily related to non-agency securitizations.
[4] Primarily related to government-sponsored enterprises.
[5] Primarily related to government-sponsored enterprises and non-agency securitizations.
[6] Primarily related to government-sponsored enterprises and private investors.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

▸ Refer to "Note 29 – Litigation" for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Repurchase claims relating to residential mortgage loans sold may increase in the future based on the large number of defaults in residential mortgages, including those sold or securitized by the Group.

### Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the "Guarantees" table.

▸ Refer to "Disposal-related contingencies and other indemnifications" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Guarantees and commitments in the Credit Suisse Annual Report 2013 for a description of these guarantees.

### Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

▸ Refer to "Other commitments" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Guarantees and commitments in the Credit Suisse Annual Report 2013 for a description of these commitments.

### Other commitments

| | | | | | **1Q14** | | | | | 4Q13 |
|---|---|---|---|---|---|---|---|---|---|---|
| end of | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Collateral received | Maturity less than 1 year | Maturity greater than 1 year | **Total gross amount** | Total net amount [1] | Collateral received |
| **Other commitments (CHF million)** | | | | | | | | | | |
| Irrevocable commitments under documentary credits | 5,062 | 28 | 5,090 | 4,991 | 3,156 | 5,484 | 28 | 5,512 | 5,452 | 3,381 |
| Irrevocable loan commitments [2] | 32,964 | 70,368 | 103,332 | 99,781 | 54,013 | 27,250 | 69,740 | 96,990 | 92,732 | 47,996 |
| Forward reverse repurchase agreements | 32,377 | 0 | 32,377 | 32,377 | 32,377 | 26,893 | 0 | 26,893 | 26,893 | 26,893 |
| Other commitments | 2,269 | 1,221 | 3,490 | 3,490 | 410 | 2,481 | 1,410 | 3,891 | 3,891 | 350 |
| **Total other commitments** | **72,672** | **71,617** | **144,289** | **140,639** | **89,956** | **62,108** | **71,178** | **133,286** | **128,968** | **78,620** |

[1] Total net amount is computed as the gross amount less any participations.
[2] Irrevocable loan commitments do not include a total gross amount of CHF 91,854 million and CHF 90,254 million of unused credit limits as of the end of 1Q14 and 4Q13, respectively, which were revocable at the Group's sole discretion upon notice to the client.

## 26 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

### TRANSFERS OF FINANCIAL ASSETS

#### Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 1Q14 and 1Q13 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

### Securitizations

| in | 1Q14 | 1Q13 |
|---|---|---|
| **Gains and cash flows (CHF million)** | | |
| **CMBS** | | |
| Net gain [1] | 1 | 4 |
| Proceeds from transfer of assets | 673 | 1,359 |
| Cash received on interests that continue to be held | 30 | 11 |
| **RMBS** | | |
| Net gain [1] | 8 | 3 |
| Proceeds from transfer of assets | 5,220 | 8,062 |
| Purchases of previously transferred financial assets or its underlying collateral | (4) | (3) |
| Servicing fees | 0 | 1 |
| Cash received on interests that continue to be held | 88 | 136 |
| **Other asset-backed financings** | | |
| Net gain [1] | 15 | 5 |
| Proceeds from transfer of assets | 943 | 140 |
| Purchases of previously transferred financial assets or its underlying collateral [2] | 0 | (32) |
| Cash received on interests that continue to be held | 2 | 222 |

1 Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.
2 Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

### Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

▸ Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2013 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 1Q14 and 4Q13, regardless of when the transfer of assets occurred.

### Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 1Q14 | 4Q13 |
|---|---|---|
| **CHF million** | | |
| **CMBS** | | |
| Principal amount outstanding | 38,774 | 37,308 |
| Total assets of SPE | 49,371 | 48,715 |
| **RMBS** | | |
| Principal amount outstanding | 40,719 | 45,571 |
| Total assets of SPE | 43,764 | 48,741 |
| **Other asset-backed financings** | | |
| Principal amount outstanding | 26,368 | 27,854 |
| Total assets of SPE | 26,368 | 27,854 |

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

### Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

## Key economic assumptions at the time of transfer

▸ Refer to "Note 27 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | | 1Q14 | | 4Q13 |
|---|---|---|---|---|
| at time of transfer | CMBS | RMBS | CMBS | RMBS |
| **CHF million, except where indicated** | | | | |
| Fair value of beneficial interests | 369 | 643 | 633 | 2,993 |
| of which level 2 | 369 | 565 | 476 | 2,879 |
| of which level 3 | 0 | 78 | 156 | 114 |
| Weighted-average life, in years | 3.5 | 4.6 | 7.3 | 7.7 |
| Prepayment speed assumption (rate per annum), in % [1] | – [2] | 6.0–23.0 | – [2] | 2.0–31.0 |
| Cash flow discount rate (rate per annum), in % [3] | 1.0–6.0 | 3.0–15.0 | 1.6–11.6 | 0.0–45.9 |
| Expected credit losses (rate per annum), in % | 1.0–2.0 | 3.0–14.0 | 0.0–7.5 | 0.0–45.8 |

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

[1] Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

[2] To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

[3] The rate was based on the weighted-average yield on the beneficial interests.

## Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 1Q14 and 4Q13.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| | | | 1Q14 | | | 4Q13 |
|---|---|---|---|---|---|---|
| | CMBS [1] | RMBS | Other asset-backed financing activities [2] | CMBS [1] | RMBS | Other asset-backed financing activities [2] |
| **CHF million, except where indicated** | | | | | | |
| Fair value of beneficial interests | 1,677 | 2,370 | 245 | 1,132 | 2,354 | 284 |
| of which non-investment grade | 44 | 412 | 173 | 26 | 359 | 204 |
| Weighted-average life, in years | 5.2 | 8.0 | 4.5 | 6.5 | 8.6 | 3.7 |

[1] To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

[2] CDOs within this category are generally structured to be protected from prepayment risk.

[3] Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

[4] The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

### Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 1Q14 and 4Q13.

▸ Refer to "Note 28 – Assets pledged and collateral" for further information.

## VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation.

▸ Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2013 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

### Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

### Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 50 days and 19 days as of 1Q14 and 4Q13, respectively. As of 1Q14 and 4Q13, Alpine had the highest short-term ratings from Moody's and Dominion Bond Rating Service and was rated A-1 by Standard & Poor's and F-1 by Fitch. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including residential mortgages, financial services, auto and equipment loans or leases and advance financing receivables. As of 1Q14 and 4Q13, those assets had an average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 1.9 years and 2.1 years as of 1Q14 and 4Q13, respectively.

### Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

### Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 1Q14 and 4Q13.

### Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory, certain single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

▸ Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2013 for further information on non-consolidated VIEs.

## 27 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes)
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

### CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

▸ Refer to "Note 34 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on the Group's concentrations of credit risk.

## FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

### Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

[1] Derivative contracts are reported on a gross basis by level. The impact of netting represents legally enforceable master netting agreements.

### Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 1Q14, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers were primarily in debt and equity as pricing inputs became more observable. Transfers out of level 1 to level 2 were primarily from trading assets. The transfers were primarily in equity as suitable closing prices were unobtainable as of the end of 1Q14.

### Transfers between level 1 and level 2

| | **1Q14** | | 1Q13 | |
|---|---|---|---|---|

**Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)**

| | | | 1Q14 | | | 1Q13 |
|---|---|---|---|---|---|---|
| in | Trading revenues | Other revenues | **Total revenues** | Trading revenues | Other revenues | **Total revenues** |
| **Gains and losses on assets and liabilities (CHF million)** | | | | | | |
| Net realized/unrealized gains/(losses) included in net revenues | 334 | 230 | **564** [1] | (175) | 41 | **(134)** [1] |
| Whereof: | | | | | | |
| Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date | (234) | 23 | **(211)** | (648) | 92 | **(556)** |

[1] Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

**Transfers in and out of level 3**

Transfers into level 3 assets during 1Q14 were CHF 1,631 million, primarily from loans held-for-sale and trading assets. The transfers were primarily in the corporate credit and alternative investment businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 1Q14 were CHF 2,355 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the corporate credit and prime services businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

**Qualitative disclosures of valuation techniques**

Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Product Control and Risk Management create, review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office, Product Control, Risk Management, and Financial Accounting to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The results of these meetings are aggregated for presentation to the Valuation and Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever possible, observable market data which may include executed transactions, dealer quotes, or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

Product Control utilizes independent pricing service data as part of their review process. Independent pricing service data is analyzed to ensure that it is representative of fair value including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates, or other inputs. In addition, there may be uncertainty about a valuation, which results from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The Group performs a sensitivity analysis of its significant level 3 financial instruments. This sensitivity analysis estimates a fair value range by changing the related significant unobservable inputs value. This sensitivity analysis is an internal mechanism to monitor the impact of reasonable alternative inputs or prices for level 3 financial instruments. Where a model-based technique is used to determine the fair value of the level 3 financial instrument, an alternative input value is utilized to derive an estimated fair value range. Where a price-based technique is used to determine the fair value of the level 3 financial instruments, Front Office professional judgment is used to estimate a fair value range.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables "Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

### Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. Significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

### Debt securities

#### Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price, buyback probability, correlation and credit spread. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

#### CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

### Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple, discount rate and capitalization rate.

### Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, than the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

Our valuation of derivatives does not include an adjustment for the cost of funding uncollateralized OTC derivatives due to a lack of clear observability in the marketplace.

#### Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility, volatility skew, prepayment rate, credit spread, basis spread and mean reversion.

#### Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

#### Equity and index-related derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include correlation, volatility, skew and buyback probability.

Generally, the interrelationship between the volatility and correlation is positively correlated.

#### Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread, correlation and price. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

### Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

### Other investments

#### Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published net asset values (NAVs). Most of these investments are classified as level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAV in the near term. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not current with observed market movements, it is probable that these investments will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. Unobservable inputs may include credit spread, contingent probability and EBITDA multiple. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

#### Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

### Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a CDS pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available.

Accrual based Private Banking & Wealth Management loans, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

### Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

### Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcatable and non-bifurcatable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility and price.

Generally, the interrelationships between volatility, skew, correlation, gap risk and credit spreads inputs are positively correlated.

### Other liabilities

#### Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

### Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

### Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of buyback probability, EBITDA multiple, market implied life expectancy (for life finance instruments), correlation, price, volatility, volatility skew, funding spread and contingent probability, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of market implied life expectancy (for life settlement and premium finance instruments), capitalization rate, discount rate, prepayment rate, recovery rate and credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input gap risk would increase the fair value. An increase in the significant unobservable inputs basis spread, mean reversion and skew would decrease the fair value.

### Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

## Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

## Quantitative information about level 3 assets at fair value

| end of 1Q14 | Fair value | Valuation technique | Unobservable input | Minimum value | Maximum value | Weighted average [1] |
|---|---|---|---|---|---|---|
| CHF million, except where indicated | | | | | | |
| Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions | 69 | Discounted cash flow | Funding spread, in bp | 350 | 350 | 350 |
| Debt | 4,679 | | | | | |

[1] Cash instruments are generally presented on a weighted average basis, while certain derivative instruments either contain a combination of weighted averages and arithmetic means of the related inputs or are presented on an arithmetic mean basis.
[2] Management's best estimate of the speed at which interest rates will revert to the long-term average.
[3] Estimate of the probability of structured notes being put back to the Group at the option of the investor over the remaining life of the financial instruments.
[4] Risk of unexpected large declines in the underlying values occuring between collateral settlement dates.

### Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above result in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

#### Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

### Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates collateral with a greater risk of default.

### Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

### Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

### Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

### Volatility and skew

Volatility and skew are impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility rates may vary significantly between different underlying currencies and expiration dates on the options. Similarly, equity derivatives' volatility may vary greatly depending upon the underlying reference name on the derivative.

### Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of each insured.

## Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which are generally up to ten years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

## Fair value, unfunded commitments and term of redemption conditions

| | 1Q14 | | | | 4Q13 | | | |
|---|---|---|---|---|---|---|---|---|
| end of | Non-redeemable | Redeemable | Total fair value | Unfunded commit-ments | Non-redeemable | Redeemable | Total fair value | Unfunded commit-ments |

| Equity method investments | 388 | 34 | 422 | 0 | 349 | 0 | 349 | 0 |
| Total funds held in other investments | 2,001 | 207 | 2,208 | 337 | 4,014 | 361 | 4,375 | 863 |
| **Total fair value** | **2,038** [5] | **2,400** [6] | **4,438** | **337** [7] | **4,043** [5] | **3,458** [6] | **7,501** | **863** [7] |

[1] 34% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 30% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 24% is redeemable on an annual basis with a notice period primarily of more than 60 days, and 12% is redeemable on a quarterly basis with a notice period primarily of more than 45 days.

[2] 55% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 19% is redeemable on an annual basis with a notice period primarily of more than 60 days, 17% is redeemable on a monthly basis with a notice period primarily of less than 30 days, and 9% is redeemable on a quarterly basis with a notice period primarily of more than 45 days.

[3] 83% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, and 14% is redeemable on an annual basis with a notice period of more than 60 days.

[4] 45% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 33% is redeemable on demand with a notice period primarily of less than 30 days, and 21% is redeemable on an annual basis with a notice period of more than 60 days.

[5] Includes CHF 686 million and CHF 1,819 million attributable to noncontrolling interests in 1Q14 and 4Q13, respectively.

[6] Includes CHF 116 million and CHF 107 million attributable to noncontrolling interests in 1Q14 and 4Q13, respectively.

[7] Includes CHF 152 million and CHF 405 million attributable to noncontrolling interests in 1Q14 and 4Q13, respectively.

### Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

#### Nonrecurring fair value changes

| end of | 1Q14 | 4Q13 |
| --- | --- | --- |
| **Assets held-for-sale recorded at fair value on a nonrecurring basis (CHF billion)** | | |
| **Assets held-for-sale recorded at fair value on a nonrecurring basis** | **0.2** | **0.3** |
| of which level 3 | 0.2 | 0.3 |

## FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in Investment Banking and Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

▸ Refer to "Note 34 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013 for further information on the Group's election of the fair value option for certain of its financial statement captions.

#### Difference between the aggregate fair value and the aggregate unpaid principal balances on loans and financial instruments

[1] Primarily recognized in net interest income.
[2] Primarily recognized in trading revenues.
[3] Primarily recognized in other revenues.
[4] Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF (92) million and CHF 27 million in 1Q14, respectively, and CHF (37) million and CHF (29) million in 1Q13, respectively.

## FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE

The following table provides the carrying value and fair value of financial instruments which are not carried at fair value in the consolidated balance sheet. The disclosure excludes all non-financial instruments such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations.

### Carrying value and fair value of financial instruments not carried at fair value

[1] Primarily includes cash and due from banks, interest-bearing deposits with banks, brokerage receivables, loans held-for-sale, cash collateral on derivative instruments, interest and fee receivables and non-marketable equity securities.

[2] Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

## 28 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

### Assets pledged

| end of | 1Q14 | 4Q13 |
|---|---|---|
| **Assets pledged (CHF million)** | | |
| Total assets pledged or assigned as collateral | 145,494 | 142,952 |
| of which encumbered | 91,784 | 92,300 |

### Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

### Collateral

| end of | 1Q14 | 4Q13 |
|---|---|---|
| **Collateral (CHF million)** | | |
| Fair value of collateral received with the right to sell or repledge | 387,020 | 359,517 |
| of which sold or repledged | 293,730 | 267,896 |

## 29 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 38 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2013* and updated in subsequent quarterly reports (including those discussed below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 38 referenced above and updated in quarterly reports (including below) for which the Group believes an estimate is possible is zero to CHF 2.4 billion.

In 1Q14, the Group recorded net litigation provisions of CHF 107 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

**Mortgage-related matters**

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

#### Individual investor actions

On April 3, 2014, CMFG Life Insurance Company and affiliated entities filed an action against Credit Suisse Securities (USA) LLC (CSS LLC) in the US District Court for the Western District of Wisconsin relating to approximately USD 70 million of RMBS. On April 3, 2014, Texas County and District Retirement System filed an action against CSS LLC and other financial institutions in Texas state court relating to an unstated amount of RMBS at issue. On April 11, 2014, following a settlement, the Minnesota state court presiding in the action brought by Minnesota Life Insurance Company and affiliated entities against CSS LLC and its affiliates entered an order of dismissal, discontinuing all claims against CSS LLC and its affiliates, relating to approximately USD 43 million of RMBS. On April 14, 2014, Allstate Insurance Company and CSS LLC and its affiliates filed a partial stipulation of dismissal with the Supreme Court for the State of New York, New York County to discontinue certain claims against CSS LLC and its affiliates, reducing the RMBS at issue for CSS LLC and its affiliates from approximately USD 187 million to approximately USD 169 million. On April 29, 2014, the Federal Housing Finance Agency (FHFA) entered into an agreement with First Horizon National Corporation and its affiliates and employees to settle all claims in the last remaining action filed by the FHFA against CSS LLC, relating to approximately USD 230 million of RMBS at issue against CSS LLC.

## 30 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

In 4Q13, as part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing Intermediate Holding Companies in the US for non-US banks, several existing legal entities were re-parented as subsidiaries of Credit Suisse (USA), Inc. In the tables below, prior periods have been restated to conform to the current presentation to reflect the impact of these transactions.

## Condensed consolidating statements of operations

**Cautionary statement regarding forward-looking information**

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in "Risk factors" in I – Information on the company in our Annual Report 2013.

Paradeplatz 8, CH 8001 Zurich, Switzerland
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒ Form 40-F ☐

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

**Note:** Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

**Note:** Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

# Introduction

This report filed on Form 6-K contains certain information about Credit Suisse AG (Bank) relating to its results as of and for the three months ended March 31, 2014. On April 16, 2014, Credit Suisse Group AG (Group) announced its results for such three month period. A copy of the related Earnings Release is attached as an exhibit to this Form 6-K.

This Form 6-K (including the exhibit hereto) is hereby (i) incorporated by reference into the Registration Statement on Form F-3 (file no. 333-180300) and (ii) shall be deemed to be "filed" for purposes of the Securities Exchange Act of 1934, as amended except, in the case of both (i) and (ii), the information on page 2 of the Earnings Release.

The 1Q14 Credit Suisse Financial Report as of and for the three months ended March 31, 2014 will be published on or about May 2, 2014.

Credit Suisse AG is a Swiss bank and joint stock corporation established under Swiss law, and is a wholly-owned subsidiary of the Group. The Bank's registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to "CHF" are to Swiss francs.

# Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Private Banking & Wealth Management and Investment Banking segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the two segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking & Wealth Management. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

## Differences between the Group and the Bank businesses

| Entity | Principal business activity |
|---|---|
| Neue Aargauer Bank | Banking (in the Swiss canton of Aargau) |
| BANK-now | Private credit and car leasing (in Switzerland) |
| Financing vehicles of the Group | Special purpose vehicles for various funding activities of the Group, including for purposes of raising consolidated capital |

# Earnings Release

## Credit Suisse 1Q14 Core pre-tax income of CHF 1,940 million for strategic businesses; reported Core pre-tax income of CHF 1,400 million

## Return on equity of 14% for strategic businesses; reported return on equity of 8%

## Strong performance in Private Banking & Wealth Management with increased pre-tax income of CHF 1,012 million; lower expenses and substantial asset inflows with strategic net new assets of CHF 16 billion and total net new assets of CHF 13.7 billion

## Solid returns in Investment Banking with pre-tax income of CHF 827 million; strong performance in key businesses

**Improved profitability in Private Banking & Wealth Management:**
- Total reported pre-tax income of CHF 1,012 million; good profitability in strategic businesses with pre-tax income of CHF 965 million, up 28% compared to 1Q13, and a return on capital of 33%
- Significantly increased cost efficiency, with improved cost/income ratio of 68% compared to 72% in 1Q13
- Improved Wealth Management Clients net margin to 29 basis points from 23 basis points in 4Q13
- Strong net new assets from strategic businesses of CHF 16.0 billion and total net new assets of CHF 13.7 billion in Private Banking & Wealth Management, with continued strong inflows in Wealth Management Clients from Asia Pacific and Switzerland, and in Asset Management in alternative investments and index strategies

**Solid returns in Investment Banking:**
- Total reported pre-tax income of CHF 827 million amid challenging market conditions
- Strategic businesses with pre-tax income of CHF 1,124 million; strategic return on capital of 21%
- Strong performance in key businesses including securitized products, credit, underwriting and advisory and solid equities results, offset by significantly reduced first quarter seasonal contribution from rates and certain emerging markets than experienced in previous years

**Resilient capital base and leverage ratio:**
- Look-through Basel III CET1 ratio at 10.0% as of the end of 1Q14; Look-through Basel III total capital ratio at 15.1% as of end of 1Q14; strong capital position notwithstanding impact of progress in resolving litigation matters in 4Q13 and external methodology uplifts to risk-weighted assets of CHF 13.5 billion in 1Q14
- Leverage exposure at CHF 1,140 billion as of end of 1Q14; phase-in Swiss leverage ratio of 4.8% as of the end of 1Q14; Look-through Swiss leverage ratio of 3.7% as of end of 1Q14, within reach of the 2019 requirement of 4%

**Continued progress toward cost reduction targets:**
- Delivered CHF 3.4 billion of adjusted annualized savings; maintaining momentum towards target of over CHF 4.5 billion by end 2015

**On track to achieve targeted run-off of non-strategic units:**
- Leverage reduction of CHF 11 billion and risk-weighted asset reduction of CHF 4 billion for the non-strategic portfolio, excluding adjustments for methodology changes
- Progress in resolving key legacy litigation issues in 2014 to date; continued focus on resolving the US tax matter with the United States Department of Justice

April 16, 2014 **Credit Suisse Group reports 1Q14 results.**

Brady W. Dougan, Chief Executive Officer, said**:** "For the first quarter, we achieved a return on equity of 14% in our strategic businesses, well within reach of our 15% through-the-cycle target. This strong performance was driven by significantly improved profitability in Private Banking & Wealth Management, solid returns in Investment Banking and continued effective cost and capital management. We saw continued momentum with clients across many of our key businesses, including the highest net asset inflows in our strategic businesses since the first quarter of 2011 and a meaningful increase in the share of assets under management from ultra-high-net-worth clients."

Commenting on Private Banking & Wealth Management, he said: "We substantially improved the profitability of our strategic businesses in the quarter, with an increase in pre-tax income of 28% compared to the prior-year quarter. The Wealth Management Clients business increased its net margin to 29 basis points from 23 basis points in the prior-year quarter and increased the share of assets under management from ultra-high-net-worth clients to 46% in the first quarter from 43% a year ago. Corporate & Institutional Clients continued to make a strong contribution to the division's overall performance, and Asset Management more than doubled its pre-tax income compared to the first quarter of 2013 as a result of its more focused approach. In Private Banking & Wealth Management, we recorded net new assets from strategic businesses of CHF 16.0 billion in the quarter. These inflows reflect our strength in key emerging markets within Asia Pacific, which grew at a 17% annualized rate, Latin America and the Middle East, our strong position in our Swiss home market as well as significant inflows in alternative investments and index strategies within our Asset Management business."

Commenting on Investment Banking, he said: "Our Investment Banking results demonstrate the strength of our diversified franchise, with our strategic businesses reporting a return on capital of 21%. We saw strong performance in securitized products, credit and underwriting and advisory, as well as solid results in equities. At the same time, the first quarter seasonal contribution from our rates and certain emerging markets businesses was significantly lower compared to prior years. We further expanded our strong market share position in equities and saw good momentum with clients in our underwriting and advisory franchises."

Commenting on strategic progress, he added: "We continued to optimize resource allocation to grow our high-returning businesses, particularly in Private Banking & Wealth Management, and made progress in winding down positions in our non-strategic units. At the same time, we maintained resilient leverage and capital positions and remain on track to meet our long-term targets, notwithstanding methodology changes which increased risk-weighted assets in the quarter. We also made good progress toward resolving legacy litigation matters and on increasing the efficiency of our operations. Given all of these positive developments and progress in our strategy execution, our intention remains to deliver cash returns to our shareholders at or above 2013 levels."

## Core Results summary

For additional information on financial information presented in this Earnings Release, including references to return on equity and return on capital, refer to the tabular disclosures in the Appendix and other explanatory disclosures regarding capital and leverage metrics in the section titled "Important information" on page 16.

Core Results do not include noncontrolling interests without significant economic interests.

**Net income attributable to shareholders** was CHF 859 million in 1Q14.

**Income before taxes** of CHF 1,400 million decreased 22% compared to 1Q13, reflecting an 8% decrease in net revenues, partially offset by a 3% decrease in total operating expenses. In strategic businesses, pre-tax income of CHF 1,940 million decreased 12% compared to 1Q13, and in non-strategic businesses pre-tax losses of CHF 540 million increased 34%.

**Net revenues** of CHF 6,469 million decreased 8% compared to 1Q13. In the strategic businesses, net revenues declined 7% to CHF 6,553 million compared to 1Q13, with stable revenues in Private Banking & Wealth Management and lower revenues in Investment Banking. In the non-strategic businesses, negative net revenues were CHF 84 million in 1Q14 compared to no revenues in 1Q13.

**Provision for credit losses** of CHF 34 million in 1Q14, primarily reflected net provisions in Private Banking & Wealth Management.

**Total operating expenses** of CHF 5,035 million were down 3% compared to 1Q13, primarily reflecting lower commission expenses and 2% lower general and administrative expenses. In strategic businesses, total operating expenses of CHF 4,595 million decreased 4% compared to 1Q13, mainly reflecting a 7% decline in general and administrative expenses. In non-strategic businesses total operating expenses of CHF 440 million increased 11% compared to 1Q13, primarily reflecting a 32% increase in general and administrative expenses. In 1Q14, Credit Suisse recorded net litigation provisions of CHF 107 million. Business realignment costs recognized in the Corporate Center in 1Q14 were CHF 62 million.

**Income tax expense** of CHF 543 million recorded in 1Q14 reflected the impact of the geographical mix of results and the impact of a New York state tax law change of CHF 151 million. Overall, net deferred tax assets decreased CHF 535 million to CHF 5,256 million as of the end of 1Q14 compared to 4Q13. Deferred tax assets on net operating losses increased CHF 56 million to CHF 1,436 million during 1Q14. The Core Results effective tax rate was 38.8% in 1Q14, compared to 11.9% in 4Q13. Excluding the impact of the New York state tax law change, the Core Results effective tax rate for 1Q14 was 28.0%.

**Diluted earnings per share from continuing operations** were CHF 0.47 for 1Q14 compared to CHF 0.75 in 1Q13 and compared to a loss per share of CHF 0.37 in 4Q13. As of the end of 1Q14, Credit Suisse had 1,596.1 million shares issued, unchanged from the end of 4Q13.

**Capital and leverage.** As of the end of 1Q14, Credit Suisse reported a Look-through Basel III common equity tier 1 (CET1) ratio of 10.0%, unchanged compared to the end of 4Q13. As of the end of 1Q14, the Look-through Basel III total capital ratio was 15.1%, unchanged from the end of 4Q13.

The Basel III CET1 ratio as of the end of 1Q14 was 14.3%, compared to 15.7% as of the end of 4Q13, reflecting a decrease in CET1 capital and an increase in risk-weighted assets. Basel III risk-weighted assets for the Group increased 4%, from CHF 273.8 billion as of the end of 4Q13 to CHF 286.0 billion as of the end of 1Q14, reflecting increases from methodology and policy changes partially offset by business reductions.

As of the end of 1Q14, Credit Suisse's leverage exposure amounted to CHF 1,140 billion, compared to an updated long-term target of approximately CHF 1,000 billion. The Look-through Swiss leverage ratio was 3.7% as of the end of 1Q14, compared to the 4% requirement for 2019.

**Benefits of the integrated bank.** In 1Q14, Credit Suisse generated CHF 1.0 billion of collaboration revenues from the integrated bank. This corresponds to 15.9% of Core net revenues in 1Q14.

## Private Banking & Wealth Management

In 1Q14, Private Banking & Wealth Management reported income before taxes of CHF 1,012 million and net revenues of CHF 3,240 million. In its strategic businesses, Private Banking & Wealth Management reported income before taxes of CHF 965 million and net revenues of CHF 3,031 million. Net revenues were lower compared to 4Q13 mainly due to seasonally higher fourth-quarter transaction- and performance-based revenues and lower net interest income. Compared to 1Q13, income before taxes increased 28%, driven by lower operating expenses. In its non-strategic businesses, Private Banking & Wealth Management reported income before taxes of CHF 47 million, while in 4Q13, it reported losses before taxes of CHF 624 million, reflecting substantial litigation provisions in connection with the US tax matter. In 1Q14, assets under management for the division were CHF 1,292.5 billion and the division attracted net new assets of CHF 13.7 billion.

In 1Q14, the strategic businesses for Private Banking & Wealth Management reported income before taxes of CHF 965 million and net revenues of CHF 3,031 million.

Net revenues were stable compared to 1Q13 as higher transaction- and performance-based revenues and higher recurring commissions and fees were offset by lower net interest income and lower other revenues. Transaction- and performance-based revenues were higher with higher carried interest on realized private equity gains and higher corporate advisory fees, partially offset by lower sales and trading income and lower foreign exchange client business. Higher recurring commissions and fees reflected higher investment account and services fees, higher discretionary mandate management fees and higher banking services fees, partially offset by lower investment product management fees. In a low interest rate environment, net interest income was lower due to significantly lower deposit margins and slightly higher loan margins on higher average deposit and loan volumes.

Compared to 4Q13, net revenues were 7% lower, reflecting significantly lower transaction- and performance-based revenues and lower net interest income, partially offset by higher other revenues. Significantly lower transaction- and performance-based revenues reflected seasonally higher performance fees in Asset Management in 4Q13, partially offset by higher brokerage and product issuing fees and higher sales and trading income in 1Q14. Lower net interest income reflected lower deposit margins on stable average deposit volumes and slightly higher loan margins on slightly higher loan volumes. Higher other revenues mainly reflected an impairment related to Asset Management Finance LLC (AMF) in 4Q13. Stable recurring commissions and fees mainly reflected lower asset management fees and lower investment product management fees, offset by higher banking services fees and higher discretionary mandate management fees.

Provision for credit losses was CHF 17 million.

Total operating expenses were lower compared to both 1Q13 and 4Q13. Compared to 1Q13, compensation and benefits decreased 6%, mainly reflecting lower salary expenses, mostly as a result of the lower headcount, and general and administrative expenses decreased 10%, primarily reflecting lower expense provisions and lower occupancy fees. Compared to 4Q13, compensation and benefits were stable as slightly lower discretionary performance-related compensation and lower salary expenses were offset by slightly higher deferred compensation. General and administrative expenses decreased 12%, primarily reflecting lower professional fees, lower expense provisions and lower advertising and marketing costs.

The cost/income ratio for strategic results was 68% in 1Q14, down seven percentage points compared to 1Q13 and up one percentage point compared to 4Q13.

### Wealth Management Clients

| | | in / end of | | % change | |
|---|---|---|---|---|---|
| | **1Q14** | 4Q13 | 1Q13 | QoQ | YoY |
| **Strategic results (CHF million)** | | | | | |
| Net interest income | 706 | 760 | 746 | (7) | (5) |
| Recurring commissions and fees | 730 | 742 | 717 | (2) | 2 |
| Transaction- and performance-based revenues | 638 | 554 | 624 | 15 | 2 |
| **Net revenues** | **2,074** | **2,056** | **2,087** | 1 | (1) |

| **Total operating expenses** | **1,480** | **1,572** | **1,614** | (6) | (8) |
| **Income before taxes** | **578** | **466** | **454** | 24 | 27 |
| **Metrics (%)** | | | | | |
| Cost/income ratio | 71.4 | 76.5 | 77.3 | – | – |

The *Wealth Management Clients* business in 1Q14 reported pre-tax income of CHF 578 million and net revenues of CHF 2,074 million. Net revenues were stable compared to 1Q13, with lower net interest income, partially offset by slightly higher recurring commissions and fees and slightly higher transaction- and performance-based revenues. Lower net interest income reflected the low interest rate environment, significantly lower deposit margins and stable loan margins on higher average deposit and loan volumes and lower levels of deposits eligible as stable funding. Recurring commissions and fees were slightly higher with higher investment account and services fees and higher discretionary mandate management fees, partially offset by lower investment product management fees, including lower retrocession revenues. Transaction- and performance-based revenues increased slightly, reflecting higher corporate advisory fees and higher placement and transaction fees, partially offset by lower foreign exchange client business.

Compared to 4Q13, net revenues were stable, with a 15% increase in transaction- and performance-based revenues offset by a 7% decline in net interest income and a slight decrease in recurring commissions and fees. The increase in transaction- and performance-based revenues was driven by higher brokerage and product issuing fees and higher sales and trading revenues, partially offset by lower performance fees. Lower net interest income reflected lower deposit margins and slightly higher loan margins on stable average deposit and loan volumes. Recurring commissions and fees were slightly lower with lower investment product management fees, partially offset by higher discretionary mandate management fees.

In 1Q14, the gross margin was 104 basis points, three basis points lower compared to 1Q13, mainly reflecting a continued adverse interest rate environment. Compared to 4Q13, the gross margin was stable, with higher transaction- and performance-based revenues offset by lower net interest income.

Wealth Management Clients net margin was 29 basis points in 1Q14, six basis points higher compared to 1Q13 and six basis points higher compared to 4Q13, reflecting a lower expense base.

## Corporate & Institutional Clients

The *Corporate & Institutional Clients* business reported pre-tax income of CHF 246 million in 1Q14 and net revenues of CHF 492 million. Net revenues were slightly lower compared to 1Q13, mainly driven by lower net interest income as a result of the low interest rate environment, and slightly lower transaction- and performance-based revenues, partially offset by a 10% increase in recurring commissions and fees. The increase in recurring commissions and fees primarily reflected higher banking services fees.

Compared to 4Q13, net revenues were stable, with higher transaction- and performance-based revenues and higher recurring commissions and fees offset by an 8% decline in net interest income. Higher transaction- and performance-based revenues reflected higher sales and trading revenues, higher brokerage and product issuing fees and higher corporate advisory fees. The increase in recurring commissions and fees primarily reflected higher banking services fees, partially offset by lower investment account and services fees.

The *Asset Management* business reported pre-tax income of CHF 141 million in 1Q14, with net revenues of CHF 465 million. Net revenues increased 10% compared to 1Q13, with fee-based revenues increasing 13%, reflecting higher carried interest on realized private equity gains and higher asset management fees. Net revenues declined 35% compared to 4Q13, with lower fee-based revenues from seasonally lower performance fees and private equity placement fees, partially offset by an impairment of CHF 68 million relating to AMF in 4Q13.

The fee-based margin was 49 basis points in 1Q14, compared to 46 basis points in 1Q13 and 87 basis points in 4Q13, primarily reflecting the movements in fee-based revenues. Average assets under management increased 6.2% and 1.3% compared to 1Q13 and 4Q13, respectively.

## Non-strategic results

*The non-strategic results for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to the small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring of the German onshore operations, other smaller non-strategic positions formerly in the Corporate & Institutional Clients business and the run-off and active reduction of selected products.*

### Private Banking & Wealth Management – non-strategic results

| | in / end of | | | % change | |
|---|---|---|---|---|---|
| | **1Q14** | 4Q13 | 1Q13 | QoQ | YoY |
| **Non-strategic results (CHF million)** | | | | | |
| **Net revenues** | **209** | **169** | **270** | 24 | (23) |
| **Provision for credit losses** | **16** | **17** | **5** | (6) | 220 |
| **Total operating expenses** | **146** | **776** | **140** | (81) | 4 |

| **Metrics (%)** | | | | | |
| Cost/income ratio | 69.9 | 459.2 | 51.9 | – | – |

In 1Q14, the non-strategic businesses reported income before taxes of CHF 47 million, including an equity participation gain of CHF 91 million from the sale in January 2014 of Customized Fund Investment Group, the division's private equity fund of funds and co-investment business. In 4Q13, Private Banking & Wealth Management's non-strategic businesses reported a loss before taxes of CHF 624 million, reflecting litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014.

## Assets under management – Private Banking & Wealth Management

**Assets under management** of CHF 1,292.5 billion increased CHF 10.1 billion compared to the end of 4Q13, as net new assets and positive market movements were partially offset by structural effects mostly arising from disposals of businesses in the non-strategic unit, and adverse foreign exchange-related movements.

**Net new assets:** Private Banking & Wealth Management recorded net new assets of CHF 13.7 billion in 1Q14. In the strategic portfolio, Wealth Management Clients contributed net new assets of CHF 10.6 billion in 1Q14 with continued strong inflows from emerging markets, particularly in Asia Pacific, partially offset by Western European cross-border outflows. Asset Management reported net new assets of CHF 6.9 billion in 1Q14, driven by inflows in credit products and traditional products, with substantial contribution from index strategies, partially offset by net asset outflows in fixed income products. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 0.4 billion in 1Q14. In the non-strategic portfolio, net asset outflows of CHF 2.3 billion reflected the exit of certain businesses, of which CHF 1.0 billion were classified as discontinued operations.

## Investment Banking

In 1Q14, Investment Banking reported income before taxes of CHF 827 million and net revenues of CHF 3,416 million. Investment Banking delivered solid results amid a challenging market environment. In the strategic businesses, net revenues declined 11% compared to 1Q13 as strong performance in credit, securitized products and underwriting and advisory and solid equities results were offset by significantly reduced first quarter seasonal contribution from rates and certain emerging markets than experienced in previous years. Compared to 4Q13, the strategic businesses delivered significantly improved revenues, reflecting seasonally stronger trading volumes and client activity in fixed income and equities businesses which more than offset lower results in the underwriting and advisory franchises. In 1Q14, Investment Banking made progress in winding-down the non-strategic unit, including reducing leverage exposure, risk-weighted assets and funding costs.

## Strategic results

In 1Q14, the strategic businesses reported income before taxes of CHF 1,124 million and net revenues of CHF 3,563 million. Net revenues declined 11% compared to 1Q13 as strong performance in credit, securitized products and underwriting and advisory and solid equities results were offset by weakness in emerging markets and global macro products. Compared to 4Q13, the strategic businesses delivered significantly improved revenues, reflecting seasonally stronger trading volumes and client activity in the fixed income and equities businesses which more than offset lower results in the underwriting and advisory franchises.

**Fixed income sales and trading** revenues declined significantly from 1Q13 driven by substantially reduced client activity and challenging trading conditions in global macro products and emerging markets businesses, partially offset by strong results in securitized products and credit. Revenues increased significantly compared to 4Q13 due to a seasonal increase in client activity, resulting in higher revenues across most of its fixed income businesses.

**Equities sales and trading** revenues were solid, albeit lower than 1Q13, reflecting lower cash equities and systematic market making revenues, partially offset by higher derivatives revenues. Equity sales and trading revenues increased compared to 4Q13, reflecting higher results in derivatives and prime services.

**Underwriting and advisory** results were higher compared to 1Q13 driven by market share gains. Compared to 4Q13, revenues decreased driven by lower equity underwriting and advisory results reflecting lower industry activity.

**Investment Banking – strategic results**

| Return on capital | 20.9 | 8.8 | 27.5 | – | – |
| Cost/income ratio | 68.5 | 83.0 | 61.7 | – | – |

**Total operating expenses** of CHF 2,439 million decreased 2% compared to 1Q13, reflecting lower technology costs and lower litigation provisions, partially offset by seasonally higher compensation and benefits expense. Compared to 4Q13, operating expenses increased 5% reflecting higher compensation and benefits expense, partially offset by lower general and administrative expenses.

Results in 1Q14 were impacted by the weakening of the average rate of the US dollar against the Swiss franc, which negatively impacted revenues and favorably impacted expenses. Compared to 1Q13, revenues decreased 11% and total operating expenses decreased 2% in Swiss francs while revenues declined 8% and total operating expenses increased 3% in US dollars. Compared to 4Q13, revenues were up 27% and total operating expenses up 5% in Swiss francs while revenues increased 29% and total operating expenses increased 6% in US dollars.

**Capital metrics** As of the end of 1Q14, the strategic businesses in Investment Banking reported Basel III risk-weighted assets of USD 167 billion, up USD 11 billion from 4Q13, reflecting increases of USD 6 billion from external methodology changes and USD 5 billion from internal methodology changes. The leverage exposure of the strategic businesses in Investment Banking was USD 742 billion reflecting a modest increase from 4Q13 due to seasonal market activity in equities and increased commitments in credit.

## Non-strategic results

*Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily non-exchange-traded instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.*

### Investment Banking – non-strategic results

| | | in / end of | | % change | |
|---|---|---|---|---|---|
| | **1Q14** | 4Q13 | 1Q13 | QoQ | YoY |
| **Non-strategic results (CHF million)** | | | | | |
| **Net revenues** | **(147)** | **(127)** | **(72)** | 16 | 104 |
| **Provision for credit losses** | **0** | **0** | **1** | – | (100) |
| **Total operating expenses** | **150** | **905** | **174** | (83) | (14) |
| **Income/(loss) before taxes** | **(297)** | **(1,032)** | **(247)** | (71) | 20 |
| Risk-weighted assets – Basel III | 16,436 | 17,549 | 19,176 | (6) | (14) |

In 1Q14, Investment Banking continued to make progress on the wind-down strategy in its non-strategic unit. The non-strategic businesses reported a loss before taxes of CHF 297 million and net revenue losses of CHF 147 million. Investment Banking had higher net revenue losses as 1Q13 results reflected a gain of CHF 77 million from a sale in our real estate portfolio. Performance also reflected improved funding costs from portfolio management of both its legacy debt instruments and trading assets. Total operating expenses decreased compared to 1Q13 and 4Q13, driven by substantially lower litigation provisions.

As of the end of 1Q14, the Investment Banking non-strategic businesses reported Basel III risk-weighted assets of USD 19 billion were down USD 1 billion compared to 4Q13, with decreases of USD 3 billion from business reductions partially offset by increases of USD 2 billion from methodology changes. This compares to the target of USD 6 billion by end 2015. Additionally, the non-strategic businesses reported leverage exposure of USD 79 billion as of the end of 1Q14, a reduction of USD 8 billion, or 9% from 4Q13. This compares to the target of USD 24 billion in leverage exposure by year-end 2015.

## Corporate Center

*Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.*

### Corporate Center

| **Non-strategic results (CHF million)** | | | | | |
| **Net revenues** | **(146)** | **(160)** | **(198)** | (9) | (26) |
| **Provision for credit losses** | **0** | **0** | **0** | – | – |
| **Total operating expenses** | **144** | **161** | **82** | (11) | 76 |
| **Income/(loss) before taxes** | **(290)** | **(321)** | **(280)** | (10) | 4 |

The Corporate Center recorded a loss before taxes of CHF 439 million in 1Q14, including fair value losses on own debt of CHF 92 million, debit valuation adjustment losses on certain structured notes liabilities of CHF 4 million and fair value losses on stand-alone derivatives of CHF 24 million, resulting in overall fair value losses on own credit spreads of CHF 120 million in 1Q14. 1Q14 results also included business realignment costs of CHF 62 million, IT architecture simplification expenses of CHF 61 million and a gain on sale of real estate of CHF 34 million. This compares to a loss before taxes of CHF 376 million in 1Q13 and a loss before taxes of CHF 389 million in 4Q13.

## Balance sheet, shareholders' equity and regulatory capital

**Balance sheet**
As of the end of 1Q14, total assets of CHF 878.1 billion were stable compared to 4Q13, reflecting a slight increase in operating activities, partially offset by the foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets increased CHF 9.7 billion.

**Total shareholders' equity**
Credit Suisse's total shareholders' equity increased to CHF 43.2 billion as of the end of 1Q14 compared to CHF 42.2 billion as of the end of 4Q13. Total shareholders' equity was impacted by net income, the effect of share-based compensation and the purchase of subsidiary shares from non-controlling interests, relating to the redemption of tier 1 participation securities. These increases were partially offset by the impact of foreign exchange-related movements on cumulative translation adjustments and treasury shares purchases and sales.

**Capital issuances and redemptions**
In March 2014, pursuant to a tender offer, Credit Suisse repurchased USD 1.4 billion of outstanding 7.875% perpetual series B subordinated tier 1 participation securities. Credit Suisse subsequently exercised a regulatory call of the USD 99 million of such securities that had not been tendered, with the result that no such securities remain outstanding. Prior to the announcement of the tender offer and as advised by FINMA, these tier 1 participation securities formed part of Swiss CET1 capital under the Swiss Requirements, whereas under Basel III, these instruments were included in additional tier 1 instruments subject to phase out. These transactions were approved by FINMA.

In March 2014, CHF 0.5 billion of Contingent Capital Awards (CCA) were granted to certain employees as part of their 2013 deferred variable compensation. Also in March, employees holding 2011 Partner Asset Facility (PAF2) awards, which were restructured, reallocated a portion of their PAF2 holdings to CCA. CCA qualify as high-trigger regulatory capital.

**Regulatory capital and ratios – Basel III**
The CET1 ratio was 14.3% as of the end of 1Q14, compared to 15.7% as of the end of 4Q13, due to an increase in RWA and a decrease in CET1 capital. Credit Suisse' tier 1 ratio was 15.6% as of the end of 1Q14, compared to 16.8% as of the end of 4Q13. The total capital ratio decreased to 19.1% as of the end of 1Q14 compared to 20.6% as of the end of 4Q13.

CET1 capital was CHF 40.9 billion as of the end of 1Q14 compared to CHF 43.0 billion as of the end of 4Q13, mainly reflecting the 20% phase in of regulatory deductions from CET1 including goodwill and other intangible assets and certain deferred tax assets and a 20% decrease in the adjustment for the accounting treatment of pension plans, pursuant to phase-in requirements. CET1 capital was also impacted by a quarterly dividend accrual and a negative foreign exchange translation impact, partially offset by net income and the impact of share-based compensation.

Additional tier 1 capital increased to CHF 3.7 billion, mainly due to the issuance of CHF 0.5 billion CCA and the 20% decrease in phase in deductions, including goodwill and other intangible assets and other capital deductions, partially offset by the redemption of tier 1 participation securities in March 2014. Tier 2 capital decreased slightly to CHF 10.0 billion as of the end of 1Q14.

Total eligible capital was CHF 54.6 billion as of the end of 1Q14 compared to CHF 56.3 billion as of the end of 4Q13, reflecting the decrease in CET1 capital, partially offset by the increase in additional tier 1 capital.

As of the end of 1Q14, the Look-through CET1 ratio was 10.0% compared to an updated long-term target of 11.0%.

### Capital ratios and leverage ratios – Basel III

| | Phase-in | | Look-through | |
|---|---|---|---|---|
| end of | **1Q14** | 4Q13 | **1Q14** | 4Q13 |
| **BIS capital ratios (%)** | | | | |
| CET1 ratio | 14.3 | 15.7 | 10.0 | 10.0 |
| Tier 1 ratio | 15.6 | 16.8 | 12.8 | 12.8 |
| Total capital ratio | 19.1 | 20.6 | 15.1 | 15.1 |
| **Leverage ratios (%)** | | | | |
| Swiss leverage ratio | 4.8 | 5.1 | 3.7 | 3.7 |

As of the end of 1Q14, Swiss CET1 capital and Swiss total capital ratios were 14.2% and 19.0%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.75% and 10.18%, respectively.

On a look-through basis, Swiss CET1 capital was CHF 27.7 billion and the Swiss CET1 ratio was 9.9% as of the end of 1Q14. Swiss total eligible capital was CHF 42.0 billion and the Swiss total capital ratio was 15.0% as of the end of 1Q14, each on a look-through basis.

### Swiss leverage ratio

As of the end of 1Q14, the Swiss leverage ratio was 4.8% and total average exposure was CHF 1,137.6 billion. As of the end of 1Q14, total exposure was CHF 1,140 billion compared to Credit Suisse's updated long-term target of approximately CHF 1,000 billion. The Look-through Swiss leverage ratio was 3.7% as of the end of 1Q14, compared to the 4.0% requirement for 2019.

**Important information**

The Group has not finalized its 1Q14 Financial Report and the Group's independent registered public accounting firm has not completed its review of the condensed consolidated financial statements (unaudited) for the period. Accordingly, the financial information contained in this Earnings Release is subject to completion of quarter-end procedures, which may result in changes to that information.

For purposes of this Earnings Release, unless the context otherwise requires, the terms "Credit Suisse" and "the Group" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and these terms are used to refer to both when the subject is the same or substantially similar. The term "the Bank" is used when referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Information referenced in this Earnings Release, whether via website links or otherwise, are not incorporated into this Earnings Release.

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. The related disclosures are in accordance with Credit Suisse's current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of Credit Suisse's assumptions or estimates could result in different numbers from those shown herein.

References to phase-in and look-through included herein refer to Basel III requirements. Phase-in reflects that for the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions) and for the years 2013 – 2022, there will be a phase out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the full phase out of certain capital instruments.

Unless otherwise noted, leverage ratio, leverage exposure and total capital amounts included herein are based on the current FINMA framework. The Swiss leverage ratio is calculated as Swiss total eligible capital, divided by a three-month average leverage exposure, which consists of balance sheet assets, off-balance sheet exposures, which consist of guarantees and commitments, and regulatory adjustments, which include cash collateral netting reversals and derivative add-ons.

Return on equity for strategic results is calculated by dividing annualized strategic net income by average strategic shareholders' equity (derived by deducting 10% of non-strategic risk-weighted assets from reported shareholders' equity). Return on capital is calculated using income after tax and capital allocated based on the average of 10% of average risk-weighted assets and 2.4% of average leverage exposure.

All expense reduction metrics against 6M11 annualized total expenses are measured at constant foreign exchange rates and exclude realignment and other significant expense items and variable compensation expenses. For further information regarding these measures, see the 1Q14 Results Presentation Slides.

In various tables, use of "–" indicates not meaningful or not applicable.

| **Number of employees (full-time equivalents)** | | | | | |
| Number of employees | 45,600 | 46,000 | 46,900 | (1) | (3) |

[1] Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

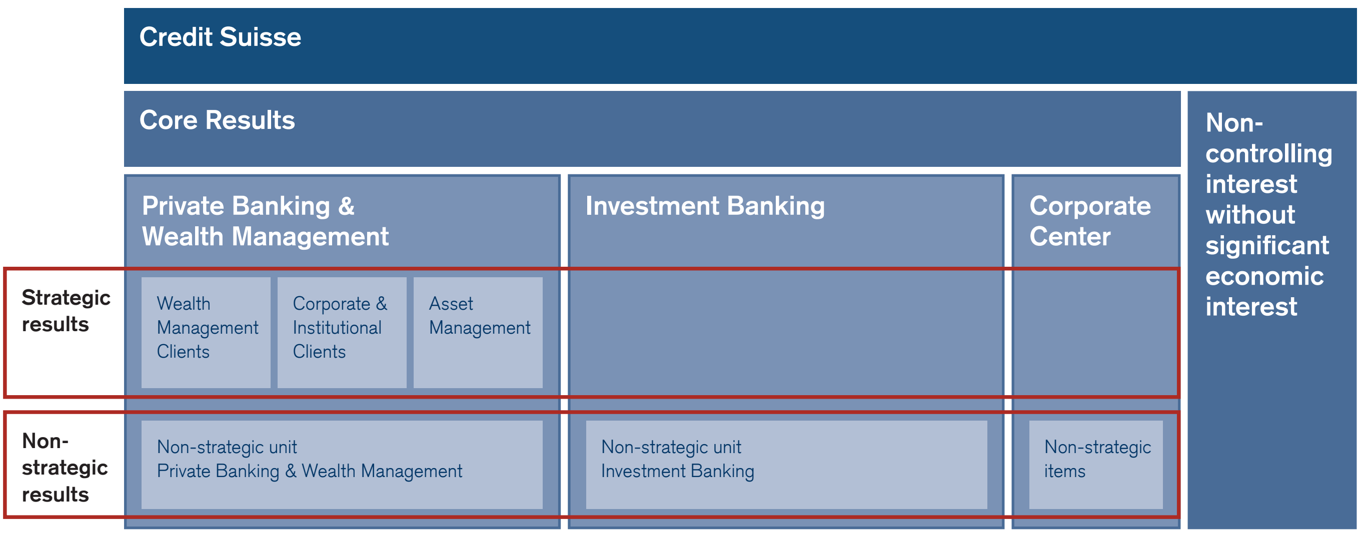
## Credit Suisse reporting structure



Credit Suisse results include revenues and expenses from the consolidation of certain private equity funds and other entities in which we have noncontrolling interests without significant economic interest (SEI) in such revenues and expenses. Core Results include the results of our two segments and the Corporate Center and discontinued operations, but do not include noncontrolling interests without SEI.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation.

[1] Net revenues divided by average assets under management.

1 Business realignment costs relating to divisional realignment costs are prospectively presented in the relevant divisional non-strategic results beginning in 4Q13.
2 Represents legacy funding costs associated with non-Basel III compliant debt instruments.
3 Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of ETF, secondary private equity and CFIG businesses and the announced sale of domestic private banking business booked in Germany.

## Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

| Diluted earnings/(loss) per share from continuing operations | 0.47 | (0.37) | 0.75 |
| Diluted earnings/(loss) per share from discontinued operations | 0.01 | 0.00 | 0.00 |
| **Diluted earnings/(loss) per share available for common shares** | **0.48** | **(0.37)** | **0.75** |

Prior periods have been adjusted to reflect the increase in the number of shares outstanding that arose from the 2Q13 stock dividend, as required under US GAAP.

1 Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.

2 Reflects changes in the fair value of the PAF2 units which are reflected in the net results of the Group until the awards are finally settled. Fair value of the PAF2 units which are reflected in the net results of the Group are not adjusted for 4Q13, as the effect would be antidilutive. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.

3 Reflects weighted-average shares outstanding on PAF2 units. Weighted-average shares on PAF2 units for 4Q13 were excluded from the diluted earnings per share calculation, as the effect would be antidilutive. In 1Q14, the Group restructured the PAF2 awards as due to regulatory changes the capital relief provided by PAF2 awards was no longer available under Basel III. The PAF2 units were converted into other capital eligible compensation instruments and will no longer be settleable in Credit Suisse Group shares.

4 Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 9.1 million, 36.0 million and 13.7 million for 1Q14, 4Q13 and 1Q13, respectively.

5 Due to the net loss in 4Q13, 1.7 million weighted-average share options and warrants outstanding and 0.8 million weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

**Cautionary statement regarding forward-looking information**

This press release contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.
- Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:
- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of continuing deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our objectives, including improved performance, reduced risks, lower costs, and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalizations or confiscations in countries where we conduct operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries where we conduct operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in "Risk Factors" in I – Information on the company in our Annual Report 2013.

Securities registered or to be registered pursuant to Section 12(g) of the Act: **None**

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: **None**

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of December 31, 2013: 1,590,936,195 shares of Credit Suisse Group AG

Indicate by check mark if the Registrants are well-known seasoned issuers, as defined in Rule 405 of the Securities Act.

Yes ☒ No ☐

If this report is an annual or transition report, indicate by check mark if the Registrants are not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes ☐ No ☒

Indicate by check mark whether the Registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrants were required to file such reports) and (2) have been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether Registrants have submitted electronically and posted on their corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (paragraph 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark whether the Registrants are large accelerated filers, accelerated filers, or non-accelerated filers. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filers ☒ Accelerated filers ☐ Non-accelerated filers ☐

Indicate by check mark which basis of accounting the Registrants have used to prepare the financial statements included in this filing:

U.S. GAAP ☒ International Financial Reporting Standards as issued by the International Accounting Standards Board ☐ Other ☐

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 ☐ Item 18 ☐

If this is an annual report, indicate by check mark whether the Registrants are shell companies (as defined in Rule 12b-2 of the Exchange Act)

Yes ☐ No ☒

## Table of contents

## Definitions

For the purposes of this Form 20-F and the attached Annual Report 2013, unless the context otherwise requires, the terms "Credit Suisse Group," "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries and the term "the Bank" means Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

The business of the Bank is substantially similar to the Group and, except where noted or the context otherwise requires, information relating to the Group is also relevant to the Bank.

Abbreviations and selected terms are explained in the List of abbreviations and the Glossary in the back of the Annual Report 2013.

## Sources

Throughout this Form 20-F and the attached Annual Report 2013, we describe the position and ranking of our various businesses in certain industry and geographic markets. The sources for such descriptions come from a variety of conventional publications generally accepted as relevant business indicators by members of the financial services industry. These sources include: Standard & Poor's, Thomson Financial, Dealogic, the Loan Pricing Corporation, Institutional Investor, Lipper, Moody's Investors Service and Fitch Ratings.

## Cautionary statement regarding forward-looking information

For Credit Suisse and the Bank, please see Cautionary statement regarding forward-looking information on the inside page of the back cover of the attached Annual Report 2013.

# Part I

## Item 1. Identity of directors, senior management and advisers.

Not required because this Form 20-F is filed as an annual report.

## Item 2. Offer statistics and expected timetable.

Not required because this Form 20-F is filed as an annual report.

## Item 3. Key information.

**A – Selected financial data.**
For Credit Suisse and the Bank, please see Appendix – Selected five-year information – Group on page A-2 and – Bank on page A-3 of the attached Annual Report 2013. In addition, please see IX – Additional information – Other information – Foreign currency translation rates on page 504 of the attached Annual Report 2013.

**B – Capitalization and indebtedness.**

**Disclosure pursuant to Section 13(r) of the Securities Exchange Act of 1934**
As stated in the Credit Suisse Annual Report 2012, in 2005 and earlier, Credit Suisse AG, through a business line operating in Switzerland, entered into export finance credit facilities involving Iranian parties, through bilateral contracts and as a member of lending syndicates. Credit Suisse AG loaned funds under these credit facilities for project finance activities in Iran that did not support or facilitate Iran's nuclear weapons proliferation efforts, its acquisition of other military items, or its support of terrorism. Our participation in these credit facilities was legal under applicable law. The Iranian parties involved in certain of these credit facilities entered into between 2001 and 2005 subsequently were designated Specially Designated Nationals or Blocked Persons pursuant to an Executive Order of the President of the United States, or fall within the US government's definition of the government of Iran (which includes government-controlled entities). Default on these credit facilities is subject to export financing insurance provided by European governmental export credit agencies.

Credit Suisse AG does not generally calculate gross revenues or net profits from individual export finance credit facilities of this type; however, Credit Suisse AG estimates that it recognized approximately CHF 0.4 million in interest income in 2013 on these credit facilities and believes that it has not earned any related net profit in 2013 and over the life of these credit facilities. While Credit Suisse AG ceased providing funds to any Iranian parties pursuant to any of these credit facilities several years ago, it has continued, where possible, to receive repayment of funds owed to it. In 2013, Credit Suisse AG received insurance payments totaling CHF 12.1 million from the Swiss governmental export credit agency and payments totaling CHF 15.6 million from financial institutions acting as agents of lending syndicates, both in partial payment under certain of these credit facilities. As of December 31, 2013, approximately CHF 4.8 million was owed to Credit Suisse AG under these credit facilities which is not covered by the European governmental export credit agency guarantees, out of a total amount of approximately CHF 103.0 million outstanding. Credit Suisse AG will continue to seek repayment of funds it is owed under these credit facilities pursuant to its contractual rights and applicable law, and will continue to cooperate with the European governmental export credit agencies.

During 2013, Credit Suisse AG processed a small number of de minimis payments related to the operation of Iranian diplomatic missions in Switzerland and to fees for ministerial government functions such as issuing passports and visas. Processing these payments is permitted under Swiss law and is performed with the consent of Swiss authorities, and Credit Suisse AG intends to continue processing such payments. Revenues and profits from these activities are not calculated but would be negligible.

Credit Suisse AG also continues to hold funds from two wire transfers to non-Iranian customers which were blocked pursuant to Swiss sanctions because Iranian government-owned entities have an interest in such transfers. Such funds are maintained in blocked accounts opened in accordance with Swiss sanctions requirements. Credit Suisse AG derives no revenues or profits from maintenance of these blocked accounts.

## Item 4A. Unresolved staff comments.

None.

## Item 5. Operating and financial review and prospects.

**A – Operating results.**
For Credit Suisse and the Bank, please see II – Operating and financial review on pages 44 to 92 of the attached Annual Report 2013. In addition, for both Credit Suisse and the Bank, please see I – Information on the company – Regulation and supervision on pages 24 to 34 of the attached Annual Report 2013 and III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Additional information – Foreign exchange exposure and interest rate management on page 114.

**B – Liquidity and capital resources.**
For Credit Suisse and the Bank, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Liquidity and funding management and – Capital management on pages 94 to 114 of the attached Annual Report 2013. In addition, for Credit Suisse, please see Note 24 – Long-term debt in V – Consolidated financial statements – Credit Suisse Group on pages 250 to 251 and Note 36 – Capital adequacy in V – Consolidated financial statements – Credit Suisse Group on page 328 of the attached Annual Report 2013 and, for the Bank, please see Note 23 – Long-term debt in VII – Consolidated financial statements – Credit Suisse (Bank) on page 404 and Note 35 – Capital adequacy in VII – Consolidated financial statements – Credit Suisse (Bank) on page 455 of the attached Annual Report 2013.

**C – Research and development, patents and licenses, etc.**
Not applicable.

**D – Trend information.**
For Credit Suisse and the Bank, please see Item 5.A of this Form 20-F. In addition, for Credit Suisse and the Bank, please see I – Information on the Company – Our businesses on pages 14 to 21 of the attached Annual Report 2013.

**E – Off-balance sheet arrangements.**
For Credit Suisse and the Bank, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and other contractual obligations on pages 141 to 144 of the attached Annual Report 2013. In addition, for Credit Suisse, please see Note 31 – Derivatives and hedging activities, Note 32 – Guarantees and commitments and Note 33 – Transfers of financial assets and variable interest entities in V – Consolidated financial statements – Credit Suisse Group on pages 281 to 300 of the attached Annual Report 2013 and, for the Bank, please see Note 30 – Derivatives and hedging activities, Note 31 – Guarantees and commitments and Note 32 – Transfers of financial assets and variable interest entities in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 423 to 435 of the attached Annual Report 2013.

**F – Tabular disclosure of contractual obligations.**
For Credit Suisse and the Bank, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and other contractual obligations – Contractual obligations and other commercial commitments on page 144 of the attached Annual Report 2013.

## Item 6. Directors, senior management and employees.

**A – Directors and senior management.**
For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Board of Directors, – Board Committees, – Biographies of the Board Members, – Executive Board and – Biographies of the Executive Board Members on pages 153 to 172 of the attached Annual Report 2013.

**B – Compensation.**
For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Compensation on pages 178 to 204 of the attached Annual Report 2013. In addition, for Credit Suisse, please see Note 11 – Compensation and benefits in V – Consolidated financial statements – Credit Suisse Group on page 234, Note 28 – Employee deferred compensation in V – Consolidated financial statements – Credit Suisse Group on pages 263 to 269 and Note 30 – Pension and other post-retirement benefits in V – Consolidated financial statements – Credit Suisse Group on pages 272 to 280, and Note 3 – Compensation to members of the Executive Board and the Board of Directors in VI – Parent company financial statements – Credit Suisse Group on pages 361 to 366 of the attached Annual Report 2013 and, for the Bank, please see Note 11 – Compensation and benefits in VII – Consolidated financial statements – Credit Suisse (Bank) on page 390, Note 27 – Employee deferred compensation in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 412 to 414 and Note 29 – Pension and other post-retirement benefits in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 416 to 422 of the attached Annual Report 2013.

**C – Board practices.**
For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance on pages 146 to 175 of the attached Annual Report 2013.

**D – Employees.**
For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Overview – Employees on page 148. In addition, for both Credit Suisse and the Bank, please see II – Operating and financial review – Core Results on pages 54 to 60 of the attached Annual Report 2013.

**E – Share ownership.**
For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Compensation on pages 178 to 204 of the attached Annual Report 2013. In addition, for Credit Suisse, please see Note 28 – Employee deferred compensation in V – Consolidated financial statements – Credit Suisse Group on pages 263 to 269, and Note 3 – Compensation to members of the Executive Board and Board of Directors in VI – Parent company financial statements – Credit Suisse Group on pages 361 to 366 of the attached Annual Report 2013. For the Bank, please see Note 27 – Employee deferred compensation in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 412 to 414 of the attached Annual Report 2013.

## Item 7. Major shareholders and related party transactions.

**A – Major shareholders.**
For Credit Suisse, please see IV – Corporate Governance and Compensation – Corporate Governance – Shareholders on pages 149 to 152 of the attached Annual Report 2013. In addition, for Credit Suisse, please see Note 3 – Business developments, significant shareholders and subsequent events in V – Consolidated financial statements – Credit Suisse Group on page 226, Note 6 – Own shares held by the company and by group companies and Note 7 – Significant shareholders in VI – Parent company financial statements – Credit Suisse Group on page 367 of the attached Annual Report 2013. Credit Suisse's major shareholders do not have different voting rights. The Bank has 4,399,665,200 shares outstanding and is a wholly-owned subsidiary of Credit Suisse. See Note 11 – Major shareholders and groups of shareholders in VIII – Parent company financial statements – Credit Suisse (Bank) on page 474 of the attached Annual Report 2013.

**B – Related party transactions.**
For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Compensation on pages 178 to 204 and – Corporate Governance – Banking relationships and related party transactions on pages 158 to 159 of the attached Annual Report 2013. In addition, for Credit Suisse, please see Note 29 – Related parties in V – Consolidated financial statements – Credit Suisse Group on pages 270 to 272 and Note 3 – Compensation to members of the Executive Board and the Board of Directors – Board of Directors loans in VI – Parent company financial statements – Credit Suisse Group on pages 361 to 366 of the attached Annual Report 2013 and, for the Bank, please see Note 28 – Related parties in VII – Consolidated financial statements – Credit Suisse (Bank) on page 415 of the attached Annual Report 2013.

**C – Interests of experts and counsel.**
Not applicable because this Form 20-F is filed as an annual report.

## Item 8. Financial information.

**A – Consolidated statements and other financial information.**
Please see Item 18 of this Form 20-F.

For a description of Credit Suisse's legal and arbitration proceedings, please see Note 38 – Litigation in V – Consolidated financial statements – Credit Suisse Group on pages 330 to 336 of the attached Annual Report 2013. For a description of the Bank's legal and arbitration proceedings, please see Note 36 – Litigation in VII – Consolidated financial statements – Credit Suisse (Bank) on page 456 of the attached Annual Report 2013.

For a description of Credit Suisse's policy on dividend distributions, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Additional information – Dividends and dividend policy on page 114 of the attached Annual Report 2013.

**B – Significant changes.**
None.

## Item 9. The offer and listing.

**A – Offer and listing details, C – Markets.**
For information regarding the price history of Credit Suisse Group shares and the stock exchanges and other regulated markets on which they are listed or traded, please see IX – Additional information – Other information – Listing details on page 503 of the attached Annual Report 2013. Shares of the Bank are not listed.

**B – Plan of distribution, D – Selling shareholders, E – Dilution, F – Expenses of the issue.**
Not required because this Form 20-F is filed as an annual report.

## Item 10. Additional information.

**A – Share capital.**
Not required because this Form 20-F is filed as an annual report.

**B – Memorandum and Articles of Association.**
For Credit Suisse, please see IV – Corporate Governance and Compensation – Corporate Governance – Overview, – Shareholders and – Board of Directors on pages 146 to 166 and – Additional information – Changes in control and defense measures on page 173 and – Liquidation on page 175 of the attached Annual Report 2013. In addition, for Credit Suisse, please see IX – Additional information – Other information – Exchange controls and – American Depositary Shares on page 499 of the attached Annual Report 2013. Shares of the Bank are not listed.

**C – Material contracts.**
Neither Credit Suisse nor the Bank has any contract that would constitute a material contract for the two years immediately preceding this Form 20-F.

**D – Exchange controls.**
For Credit Suisse and the Bank, please see IX – Additional information – Other information – Exchange controls on page 499 of the attached Annual Report 2013.

**E – Taxation.**
For Credit Suisse, please see IX – Additional information – Other information – Taxation on pages 499 to 502 of the attached Annual Report 2013. The Bank does not have any public shareholders.

**F – Dividends and paying agents.**
Not required because this Form 20-F is filed as an annual report.

**G – Statement by experts.**
Not required because this Form 20-F is filed as an annual report.

**H – Documents on display.**
Credit Suisse and the Bank file annual reports on Form 20-F and furnish or file quarterly and other reports on Form 6-K and other information with the SEC pursuant to the requirements of the Securities Exchange Act of 1934, as amended. These materials are available to the public over the Internet at the SEC's website at www.sec.gov and from the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549 (telephone 1-800-SEC-0330). SEC reports are also available for review at the offices of the New York Stock Exchange, 20 Broad Street, New York, NY 10005. Further, our reports on Form 20-F, Form 6-K and certain other materials are available on the Credit Suisse website at www.credit-suisse.com. Information contained on our website is not incorporated by reference into this Form 20-F.

In addition, Credit Suisse's parent company financial statements, together with the notes thereto, are set forth on pages 355 to 372 of the attached Annual Report 2013 and incorporated by reference herein. The Bank's parent company financial statements, together with the notes thereto, are set forth on pages 461 to 478 of the attached Annual Report 2013 and incorporated by reference herein.

**I – Subsidiary information.**
Not applicable.

## Item 11. Quantitative and qualitative disclosures about market risk.

I, Brady W. Dougan, certify that:

1. I have reviewed this annual report on Form 20-F of Credit Suisse Group AG and Credit Suisse AG;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrants as of, and for, the periods presented in this report;

4. The registrants' other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrants and we have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrants, including their consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrants' disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) disclosed in this report any change in the registrants' internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is likely to materially affect, the registrants' internal control over financial reporting; and

5. The registrants' other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrants' auditors and the audit committee of each of the registrant's board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrants' ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrants' internal control over financial reporting.

# Annual Report 2013

The **Annual Report 2013** is a detailed presentation of the Group's annual financial statements, company structure, corporate governance and compensation practices, treasury and risk management framework and a review of our operating and financial results.

**Annual Report – Cover** Relationship manager Gianluigi Pezzotta (left) from Credit Suisse's corporate clients business in Lugano believes that engaging in a personal discussion with clients at their offices is an important part of his work. He is pictured here with Umberto Zardi, President of Casale Group, in the entrance of the company's premises in Lugano. Casale Group is a global market leader in the production and modernization of nitrogenous fertilizer plants and won the Prix SVC Svizzera italiana in 2013.

The **Corporate Responsibility Report 2013** provides a detailed presentation on how the Group assumes its various responsibilities as a bank towards society and the environment.

The **Company Profile 2013** is enclosed in the Corporate Responsibility Report and a contains a summary of Credit Suisse' strategic direction, an overview of its organization and a brief description of its key businesses.
www.credit-suisse.com/responsibility.

**Corporate Responsibility Report – Cover** Credit Suisse assigns a high level of importance to the promotion of young talent. In 2013, a total of 1,370 young people received support as part of their professional training. HR Consultant Michael Seibold (center) from the Young Talents team is currently overseeing the development of 71 junior employees who are enrolled in a commercial apprenticeship or are participating in the Junior Banking Program for high school graduates. Michael Seibold is pictured here in the Uetlihof 2 office complex in Zurich together with the apprentices Maxime Seiler, Largesa Mena, Louise Brun, Denis Schnell and Fiona Bosshard (from left to right).

**Company Profile – Cover** On the campus of the Swiss Federal Institute of Technology (EPFL) in Lausanne, Credit Suisse operates a "branch of the future" where it tests new ideas and concepts in banking. The branch manager, Oliver Kratzer, and his colleagues, Yasmina Garchi and Luana Conticello, ensure that Credit Suisse is an integral part of daily campus life at EPFL.

## Credit Suisse Apps

**Investor Relations and Media**

For the purposes of this report, unless the context otherwise requires, the terms "Credit Suisse Group", "Credit Suisse", "the Group", "we", "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are referring only to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries. Abbreviations and selected terms are explained in the List of abbreviations and the Glossary in the back of this report. Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report. In various tables, use of "–" indicates not meaningful or not applicable.

Urs Rohner (left), Chairman of the Board of Directors and Brady W. Dougan, Chief Executive Officer.

# Message from the Chairman and the Chief Executive Officer

## DEAR SHAREHOLDERS, CLIENTS AND COLLEAGUES

Five years after one of the biggest crises that the banking industry has seen, the strategy and evolution of both the industry and Credit Suisse are directly linked to changing regulatory requirements as well as changing market conditions and client needs that emerged from the crisis. As we present our results for the financial year 2013 to you, we think it is important to take a step back and look at how the industry and Credit Suisse have changed since 2008 and what we believe will be some of the future trends, opportunities and challenges for the banking industry, and specifically for Credit Suisse.

**Transformation of the banking industry in response to the financial crisis**

New and evolving regulatory requirements governing capital, leverage, liquidity and resolution planning, together with the steps banks have taken to adapt to them, have been critical to creating a safer and more resilient financial system. Since the financial crisis, regulators and banks around the world have worked to substantially reduce the probability of taxpayer-funded bank bailouts in the future. While initially there were concerns that distinct and, at times, conflicting requirements of different jurisdictions and regulatory authorities would make it difficult for global banks to operate competitively, there now appears to be a trend toward regulatory convergence. Under the developing requirements, banks around the globe have begun to significantly adapt their business models by increasing capital, reducing risk and taking significant steps to increase productivity and efficiency.

Credit Suisse took early and proactive steps to adapt to the changing environment and today is a markedly different bank than it was in 2008. We actively participated in discussions with regulators and evolved our Investment Banking business model to focus on high-returning and capital-efficient businesses. We strengthened the footprint of our Private Banking & Wealth Management franchise in growth markets, while improving the productivity of its operations. We reduced our total balance sheet assets by 25% from 2008 and reduced our Basel III risk-weighted assets, calculated on a look-through basis, by 28% since the third quarter of 2011 when we first started reporting risk-weighted assets under the Basel III framework. We improved our efficiency by lowering Credit Suisse's overall expense base by CHF 3.1 billion compared to the adjusted run rate for the first half of 2011. We also further strengthened our capital base in recent years, while striving to balance the interests of our various stakeholders. We continued to allocate capital to targeted growth areas, while returning to proposing a distribution entirely in cash to our shareholders.

**Trends, growth opportunities and challenges for the industry**

Notwithstanding these far-reaching changes, we remain convinced that there are attractive opportunities for targeted growth in the financial services industry. For example, according to the Credit Suisse Global Wealth Report 2013, global wealth is expected to increase by nearly 40% over the next five years, reaching USD 334 trillion by 2018, emerging markets are expected to account for around 29% of this growth.

At Credit Suisse, we continue to see significant growth potential for our Private Banking & Wealth Management and Investment Banking businesses in Asia and Latin America, as well as in parts of the Middle East and Eastern Europe. We plan to continue to invest in our franchises in those regions, as well as in the ultra-high-net-worth individual (UHNWI) client segment, while leveraging our strong market share position in Switzerland and other mature markets. We are also convinced that our repositioned Asset Management business, which is focused toward more liquid strategies and working closely with our other businesses, will continue to generate attractive returns.

Developments in the financial services industry are also expected to be materially shaped by technological advances. New participants in the form of non-bank financial institutions have entered the market, and we believe that they have the potential to capture market share from traditional banks and challenge established institutions to redefine their value propositions – whether in lending or even in wealth management.

As a bank with a long and rich heritage, Credit Suisse is distinguished from these new competitors given our experience in managing capital and liquidity and our established and extensive network. Credit Suisse has around 2.2 million clients worldwide, who place their trust in us as their financial partner, as well as 46,000 employees who can offer clients customized expertise and advice. One of the key challenges for our bank in the near future will be to implement technological solutions that allow us to make the full capabilities of our network and resources readily available to our clients and ensure that the vast information and expertise available within the bank is delivered to them promptly and efficiently. With this in mind, we are currently developing our integrated digital private banking service, which is expected to deliver intuitive online banking functionality and improve access for our clients.

International tax compliance and resolving legacy tax issues are major concerns for the Swiss banking industry, including Credit Suisse. We believe that all Swiss banks that remain active in cross-border business must comply with foreign tax requirements. Credit Suisse has long pursued a strategy of tax compliance and continues to support measures such as the automatic information exchange which help to ensure that assets deposited in banks around the globe are properly taxed. We are convinced that this strategy – as well as the country's political and economic stability and its high quality service offering – will help Switzerland to strengthen its leading position among international financial centers in the future. Although the financial services industry has suffered a loss of trust since the crisis, with many stakeholders questioning its values and principles, banks continue to play a pivotal role in the economy and society as a whole. Over the past 50 years, we saw relative prosperity in the developed parts of the world with unprecedented growth in the wealth of the middle class, followed by an increase in wealth in emerging markets driven by globalization. In part, this prosperity was driven by the existence of a properly functioning financial system. We believe that banks, through their intermediary role, will continue to be crucial to fostering economic growth and job creation.

Credit Suisse has been serving corporate clients and financing entrepreneurs since it was founded in 1856 and it has longstanding experience in the wealth management and capital markets businesses. As an employer, purchaser and investor, Credit Suisse makes a substantial contribution to economic output and employment. In 2013, Credit Suisse purchased over CHF 6 billion of goods, services and licenses from over 28,000 suppliers around the globe.

**Credit Suisse progress and achievements in 2013**

Throughout its history, Credit Suisse has evolved its business model and organizational structure in line with changing client needs, regulation and market conditions. In 2013, we made substantial progress in executing our strategy and building on steps that we have taken since 2008. Since the start of 2013, Credit Suisse has been operating under the Basel III regulatory framework, which was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation. During the year, we once again participated in discussions about national and international regulations, and we made further significant progress in our efforts to address the "Too Big to Fail" topic.

For 2013, we delivered Core pre-tax income of CHF 3,504 million compared to CHF 1,888 million in the prior year. Net income attributable to shareholders was CHF 2,326 million and the return on equity was 6%. Our strategic businesses reported Core pre-tax income of CHF 7,132 million. The return on equity of 13% for our strategic businesses in the full-year 2013 demonstrates the strength of our core franchises within our two divisions. In addition, we showed continued cost discipline with compensation and benefits expense down 9% from 2012 for the Group and down 10% in Investment Banking.

We largely completed our capital plan announced in July 2012 and ended 2013 with a Look-through Basel III CET1 ratio of 10.0%. We further reduced leverage exposure and reported a Swiss leverage ratio of 5.1%, as well as a Look-through Swiss leverage ratio of 3.7% as of the end of 2013. Based on our preliminary assessment, the Basel Committee's revised guidelines on the calculation of the leverage ratio would increase our year-end 2013 Look-through Swiss leverage ratio to close to 4%, which would meet the Swiss requirement applicable in 2019. We completed the exchange of CHF 3.8 billion of hybrid tier 1 notes into high-trigger capital instruments, successfully issued CHF 6 billion of low-trigger capital notes, and are now just approximately CHF 3 billion away from meeting the Swiss 2019 progressive capital requirement. Furthermore, as part of our 2013 compensation structure, we introduced a similar instrument which aligns compensation incentives to the capital strength of the Group, as well as providing additional tier 1 benefits.

In November 2013, we announced our program to evolve the Group's legal entity structure, which is designed to both result in a substantially less complex and more efficient operating infrastructure in view of the new regulatory requirements and meet future requirements for global recovery and resolution planning.

Throughout 2013, we continued to manage our legacy legal issues, and we will continue to do so in a responsible manner. With regard to the ongoing investigations by regulatory authorities into whether financial institutions engaged in an effort to manipulate LIBOR and other reference rates, Credit Suisse has seen no evidence to suggest that it is likely to have any material exposure in connection with the LIBOR matter. Furthermore, we are fully cooperating with industry investigations into trading activities and the setting of benchmark rates in foreign exchange markets, which are ongoing and it is too soon to predict the final outcome. Credit Suisse also continues its efforts to resolve legacy private banking cross-border US legal issues. In February 2014, Credit Suisse announced that it reached a settlement with the US Securities and Exchange Commission (SEC) and agreed to pay USD 196 million for violations of US securities laws that centered on activities between 2002 and 2008. Also, in February, the US Senate's Permanent Subcommittee on Investigations held a hearing to discuss legacy tax issues in the Swiss private banking industry. Four members of Credit Suisse's Executive Board testified at the hearing and discussed the bank's efforts to establish tax compliance by US clients. The investigation by the US Department of Justice (DOJ) in this matter remains outstanding. Primarily due to an increase in the litigation provision held against this matter, we announced in April 2014 that we incurred an after-tax charge of CHF 468 million in respect of our preliminary fourth-quarter 2013 and full-year 2013 results. In March 2014, we announced that Credit Suisse reached an agreement with the Federal Housing Finance Agency (FHFA), as conservator for Fannie Mae and Freddie Mac. The agreement resolves Credit Suisse's largest mortgage-related investor litigation, settling claims related to the sale of approximately USD 16.6 billion of residential mortgage-backed securities between 2005 and 2007. Under the terms of the agreement, Credit Suisse will pay USD 885 million to resolve all claims in two pending securities lawsuits filed by the FHFA against Credit Suisse. As a result of this settlement, we incurred an after-tax charge of CHF 275 million in respect of our preliminary fourth-quarter 2013 and full-year 2013 results.

In line with our strategy of shifting resources to focus on growth in high-return businesses – particularly in Private Banking & Wealth Management – we have created non-strategic units within our two divisions and separated non-strategic items in the Corporate Center. This is expected to allow us to further reduce costs, capital and leverage exposures in non-strategic businesses, and it represents an important step toward achieving a more balanced allocation of capital between our two divisions. The progress we have made and our investors' confidence in our strategy are also reflected in our share price, which increased 20% in 2013.

**Progress in Private Banking & Wealth Management**

Our global Private Banking & Wealth Management franchise remains at the core of Credit Suisse's strategy. For 2013, Private Banking & Wealth Management reported pre-tax income of CHF 3,240 million. For its strategic businesses, reported pre-tax income for 2013 increased 7% from 2012 to CHF 3,627 million, mainly driven by the successful restructuring of Asset Management business and growth in emerging markets and in the Wealth Management Clients business.

In 2013, we improved the profitability of our strategic businesses within Private Banking & Wealth Management, also completing the integration of our former Private Banking and Asset Management divisions. With this integrated value chain, we can support our highly scalable business model in Private Banking & Wealth Management, which is suited to the new regulatory environment. The integrated Private Banking & Wealth Management division allows us to better manage the alignment of the products, advice and services that we deliver to our clients and is expected to further enhance the productivity and efficiency of our businesses. Pre-tax income of Asset Management increased 32% from 2012 to 2013, which underscores the strength of the ongoing business and its importance in profit generation within the Private Banking & Wealth Management franchise.

In the area of advisory and expertise, all 4,330 Credit Suisse relationship managers worldwide have successfully completed our mandatory certification program and we are focused on ensuring that their skills are continually updated and deployed to maximum effect. In a further step that reflects our commitment to delivering high-quality investment advice and research insights, we established the Investment Strategy & Research Group in 2013. This group brings together all of Credit Suisse's investment specialists into a single unit seeking to produce better investment advice and results for our clients in terms of both discretionary and advisory investment views. In 2013, we continued to reallocate resources to growth areas, with a particular focus on emerging markets businesses, our global UHNWI client franchise and on leveraging our strong market position in Switzerland. In 2013, net new assets from Wealth Management Clients were CHF 18.9 billion, with emerging markets growing at 8%, and continued strong growth in the UHNWI client segment. We also recorded CHF 15.0 billion in net new assets from Asset Management, reflecting significant inflows into higher-margin products, and we continued to see strong inflows of CHF 8.8 billion from the Corporate & Institutional Clients business. We believe these strong inflows are indicative of the trust that clients place in Credit Suisse.

In terms of global client coverage, we continued to shift resources to those businesses where we see strong potential. We announced an agreement to acquire parts of a competitor's wealth management businesses, in order to further accelerate growth momentum in our international markets and in our UHNWI client segment.

In the course of 2013, we continued to adapt our onshore client service model for Western Europe, adjusting capacity to meet client needs, efficiently managing costs across our businesses and improving our overall market position. We announced the sale of our domestic private banking business booked in Germany in December 2013, while at the same time remaining highly committed to serving the German wealth management market on a cross-border basis. As part of our efforts to focus our offshore coverage, we announced plans in 2013 to exit certain smaller markets.

We plan to remain focused on further improving the profitability of our Private Banking & Wealth Management businesses by delivering growth in emerging markets and continuing to adjust our capacity in targeted mature markets to meet client needs.

**Progress in Investment Banking**

For 2013, Investment Banking reported pre-tax income of CHF 1,719 million. Total compensation and benefit expense was 10% lower in 2013 than in 2012.

Reported pre-tax income for its strategic business for 2013 was CHF 3,853 million, a 12% increase compared to the prior year. Continued sustained market share positions across our high-returning strategic businesses, combined with a reduced cost base and lower leverage and capital usage, helped Investment Banking achieve a return on Basel III allocated capital of 19% for 2013. Since the fourth quarter of 2012, the division reduced Basel III risk-weighted assets by USD 11 billion to USD 176 billion. Business reductions of USD 27 billion in 2013 were partially offset by increases relating to methodology changes and parameter updates of CHF 10 billion and, in the fourth quarter, an operational risk-related add-on of USD 6 billion.

Our strategy of rebalancing resources toward high market share and high-return businesses has proven effective. Today, 62% of the division's overall capital is allocated to Securitized Products, Global Credit Products, the Emerging Markets Group, Prime Services and Cash Equities. These are all businesses where we have a top-three market share and generate high returns. Given the increasing focus of regulators on leverage exposures and in view of the fundamental changes in the structure of the Rates market – with a shift towards clearing and electronic trading – we announced the restructuring of our Rates business in October 2013. This step forms part of the evolution of our Investment Banking business model and is expected to provide us with a simplified and more capital-efficient business that is focused on meeting client liquidity needs.

In connection with this measure, we also announced the creation of a cross-asset Global Macro Products Group, combining our Rates, Foreign Exchange and Commodities businesses into a single platform. This approach offers clients a comprehensive approach across the macro asset classes and allows us to focus our resources on those areas and products that matter most to them. We remain fully committed to serving our Fixed Income clients and believe that this cross-asset class model will help us meet their needs more effectively.

We believe that our Investment Banking division, featuring a top-three Equities franchise, a strong and profitable Underwriting & Advisory business and a Fixed Income franchise focused on high-returning yield businesses, is well positioned to continue to serve our clients' needs and deliver strong returns and profitability in 2014.

**Creating value for our clients and shareholders**

We are confident that the continued momentum we see in our strategic businesses, combined with the successful execution of the run-off of positions and losses in our non-strategic units, will allow us to achieve our targeted return on equity of 15% through the cycle.

Given the progress we have made in implementing our capital plan and in reducing leverage and risk-weighted assets while, at the same time, improving the operational efficiency of the bank, the Board of Directors at the annual general meeting of Credit Suisse Group on May 9, 2014 will propose a cash distribution of CHF 0.70 per share to be paid out of reserves from capital contributions for the financial year 2013. This is intended to provide a basis for future progression in our dividend payments as we continue to execute our strategy and resolve legacy issues.

We are active in attractive markets and have transformed our integrated bank in recent years to further improve our profitability and returns in the evolving operating environment, while continuing to place our clients' needs first and maintaining positive market share momentum across targeted businesses. To retain the trust of our clients, shareholders and other stakeholders, we must consistently deliver on our targets – both financial and strategic. And we want to set an example in the marketplace when it comes to compliance and professional standards.

Although the banking sector has already undergone a significant transformation since the crisis began, the industry landscape is expected to continue to evolve. With our integrated Basel III-compliant business model, we are confident that we can continue to adapt to these changes while acting as a strong and reliable partner to our clients, shareholders and employees.

We would like to thank our shareholders and clients for their loyalty to Credit Suisse and for the trust they placed in us in 2013. We also wish to thank all our employees for their ongoing commitment and contribution to the success of our business.

Best regards

Urs Rohner
Chairman of the
Board of Directors

Brady W. Dougan
Chief Executive Officer

April 2014

Adjusted cost run-rate results are measured against our annualized six-month 2011 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

As of January 1, 2013, Basel III was implemented in Switzerland along with the "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown herein. Capital and ratio numbers for periods prior to 2013 are based on estimates, which are calculated as if the Basel III framework had been in place in Switzerland during such periods. For Investment Banking's strategic businesses, return on Basel III allocated capital is calculated using income after tax denominated in US dollars and assumes (i) a tax rate of 28% in 2013; and (ii) that capital is allocated at 10% of average Basel III risk-weighted assets.

Unless otherwise noted, leverage ratio, leverage exposure and total capital amounts included herein are based on the current FINMA framework. The Swiss leverage ratio is calculated as Swiss Total Capital, divided by a three-month average leverage exposure, which consists of balance sheet assets, off-balance sheet exposures, which consist of guarantees and commitments, and regulatory adjustments, which include cash collateral netting reversals and derivative add-ons.

All references to pre-tax income for Core results refer to income from continuing operations before taxes.

# Information on the company

# Credit Suisse at a glance

**Credit Suisse**

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients, to ultra-high-net-worth and high-net-worth individuals worldwide, as well as affluent and retail clients in Switzerland. Founded in 1856, today we have a global reach with operations in over 50 countries and 46,000 employees from approximately 150 different nations. Our broad footprint helps us to generate a geographically diverse stream of revenues and net new assets and allows us to capture growth opportunities around the world. We serve our clients through our two divisions, which cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

**Private Banking & Wealth Management**

Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. Our Wealth Management Clients business serves ultra-high-net-worth and high-net-worth individuals around the globe, as well as affluent and retail clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across diverse asset classes and investment styles, serving governments, institutions, corporations and individuals worldwide.

**Investment Banking**

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including pension funds and hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with Private Banking & Wealth Management to provide clients with customized financial solutions.

# Strategy

## AN INTEGRATED GLOBAL BANK

We offer our clients in Switzerland and around the world a broad range of traditional and customized banking services and products. We believe that our ability to serve clients globally with solutions tailored to their needs gives us a strong advantage in today's rapidly changing and highly competitive marketplace.

We operate as an integrated bank, combining our strengths and expertise in our two global divisions, Private Banking & Wealth Management and Investment Banking. Our divisions are supported by our Shared Services functions, which provide corporate services and business solutions while ensuring a strong compliance culture. Our global structure comprises four regions: Switzerland; Europe, Middle East and Africa (EMEA); Americas; and Asia Pacific. With our local presence and global approach, we are well positioned to respond to changing client needs and our operating environment.

## PROGRESS ON OUR STRATEGY

In 2013, we continued to make significant progress in executing our client-focused, capital-efficient strategy to meet emerging client needs and regulatory trends while delivering attractive returns to shareholders. We are progressing towards achieving specific goals to reduce our cost base and strengthen our capital position, and we have operated under the Basel III capital framework since January of 2013. We have further optimized our business footprint, continuing to shift resources to focus on growth in high-returning businesses while moving towards a more balanced capital allocation between our Investment Banking and Private Banking & Wealth Management divisions. As a result of this progress, we believe that Credit Suisse today is better positioned to perform in a challenging market environment and compete in our chosen businesses and markets around the world.

### Private Banking & Wealth Management

Our Private Banking & Wealth Management division is comprised of our Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In our Wealth Management Clients business our Swiss home market remains a key area of focus and we continued to pursue our international growth strategy, most notably in fast-growing emerging markets and in our ultra-high-net-worth individual (UHNWI) client segment, and we further optimized our market footprint while capturing growth in select profitable onshore markets. In our Corporate & Institutional Clients business in Switzerland, we offer comprehensive solutions to companies and institutional clients and we continued to build out our capabilities in international growth markets. In our Asset Management business, we continued to strengthen our focus on liquid, scalable alternative investment products, emerging markets and multi-asset class solutions, while exiting subscale, non-core or less capital-efficient businesses.

### Investment Banking

In the Investment Banking division, we remain committed to offering our key clients a spectrum of equities, fixed income, and investment banking advisory products and services. We are focused on businesses where we have a competitive advantage and where we are able to operate profitably and with an attractive return on capital in the new regulatory environment. While the industry still faces significant adjustments to new regulatory requirements, we have substantially evolved our business model to one that is fully compliant with the Basel III regulatory framework, including exiting certain non-Basel III compliant businesses. We will continue to invest in our market-leading, high-returning businesses while optimizing our risk-weighted assets and cost base to further improve returns.

### Introduction of Non-strategic units

In the fourth quarter of 2013, we created non-strategic units within our Private Banking & Wealth Management and Investment Banking divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and positions and to shift resources to focus on our strategic businesses and growth initiatives.

We decided to retain these non-strategic units within the divisions, rather than establishing a single non-strategic unit, so as to benefit from senior management's expertise and focus. The non-strategic units have separate management within each division and a clear governance structure through the establishment of a Non-Strategic Oversight Board. As a result, we expect that the establishment of these non-strategic units will drive further reductions in Swiss leverage exposure and risk-weighted assets. It is also expected to free up capital for future growth in Private Banking & Wealth Management, accelerating a move towards a more balanced capital allocation between Investment Banking and Private Banking & Wealth Management, and to allow us to return capital to our shareholders.

▸ Refer to "Format of presentation and changes in reporting" in II – Operating and financial review – Credit Suisse – Information and developments for further information on non-strategic units in Private Banking & Wealth Management and Investment Banking.

### Capital and leverage ratio

In 2013, we continued to strengthen our capital position in light of the evolving regulatory environment, which included the implementation of the Basel III framework and regulations under the Swiss "Too Big to Fail" legislation in January 2013. We issued Basel III-compliant contingent capital instruments and reduced risk-weighted assets to achieve a Basel III look-through common equity tier 1 (CET1) ratio of 10.0% as of year-end 2013, exceeding the requirement applicable in 2019. In addition, we have further optimized our balance sheet and leverage exposure, leading to an improved Swiss look-through leverage ratio of 3.7% as of year-end 2013 compared to the current 4% requirement for 2019. We continue to deploy capital in a disciplined manner based on our economic capital model, assessing our aggregated risk taking in relation to our client needs and our financial resources.

▸ Refer to “Capital management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on capital and leverage ratio trends.

**Group cost efficiencies**

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve our cost structure. We target cost savings of CHF 3.8 billion by the end of 2014 and more than CHF 4.5 billion by the end of 2015. These targets are measured against our annualized six month 2011 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

We expect to incur approximately CHF 1.4 billion of business realignment costs associated with these measures during the course of 2014 to 2015.

We continue to adjust and optimize our footprint across businesses and regions and adapt Shared Services to changing business priorities.

▸ Refer to “Cost savings and strategy implementation” in II – Operating and financial review – Core Results – Information and developments for further information.

## GROUP PRIORITIES

We expect our client-focused, capital-efficient strategy will enable us to benefit from a more constructive market environment while limiting our risk exposure in down markets. We have greater clarity on our future regulatory environment, and we are well advanced on implementation.

We target an after-tax return on equity of 15% across market cycles. To track our progress and benchmark our performance, we have defined a set of key performance indicators for growth, efficiency and performance, and capital to be achieved across market cycles.

▸ Refer to “Key performance indicators” in II – Operating and financial review – Core Results – Information and developments for further information.

Building on the momentum we have established, we aim to further focus on our most profitable client businesses, gain market share, strengthen our geographic footprint, and drive ongoing efficiency improvements. To achieve our goals, we continue to focus on the following six pillars of our strategy.

**Client focus**

We put our clients’ needs first. We aspire to be a consistent, reliable, flexible and long-term partner focused on clients with complex and multi-product needs, such as UNHWI, large and mid-sized companies, entrepreneurs, institutional clients, hedge funds and affluent clients in Switzerland. By listening attentively to their needs and offering superior solutions, we empower our clients to make better financial decisions. Against the backdrop of significant changes within our industry, we strive to consistently enable our clients to realize their goals and thrive. We continue to strengthen the coverage of our key clients by dedicated teams of senior executives who can deliver our integrated business model. We have a strong capital position and high levels of client satisfaction and brand recognition, and our strong client momentum is well recognized.

**Employees**

We continue our efforts to attract, develop and retain top talent in order to deliver outstanding financial products and services to our clients. Our candidates go through a rigorous interview process, where we not only look for technical proficiency and intellect, but for people who can thrive in and contribute to our culture. We review our talent and identify the optimal development opportunities based on individual and organizational needs. We strongly promote cross-divisional and cross-regional development, as well as lateral recruiting and mobility. Valuing different perspectives, creating an inclusive environment and showing cross-cultural sensitivity are key to Credit Suisse’s workplace culture. We train our leaders, specialists and client advisors in a wide range of subjects. We take a prudent and constructive approach to compensation, designed to reflect the performance of individuals and the firm and closely align the interests of employees with those of shareholders.

**Capital and risk management**

We believe prudent risk taking aligned with our strategic priorities is fundamental to our business, and we maintain a conservative framework to manage liquidity and capital. We continue to strengthen our capital base with a focus on additional issuances of contingent capital instruments and decreasing risk-weighted assets and leverage exposures. For the Group, our long-term goal for risk-weighted assets is approximately CHF 250 billion and a Swiss leverage exposure below CHF 1,070 billion, post run-off of exposures in our non-strategic units.

**Efficiency**

We continue to strive for top-quartile efficiency levels, while being careful not to compromise on growth or reputation. In line with the evolution of our strategy, implemented efficiency measures are generating significant cost savings while helping to build an efficiency culture. We have increased deployment under our Centers of Excellence (CoE) program to almost 15,000 roles, including contractors as well as third party affiliates and vendors working for Credit Suisse. We have established initiatives to further leverage the service capabilities and talent at our CoE sites.

Following efficiency measures implemented during 2013, we adjusted our overall cost savings targets measured against our annualized six month 2011 expense run rate to more than CHF 4.5 billion by the end of 2015, adjusted on the same basis as previously described. We have also updated our cost/income targets to achieve 65% in Private Banking & Wealth Management and 70% in Investment Banking across market cycles.

### Collaboration

We are convinced that close collaboration between our divisions and regions is essential to delivering comprehensive solutions to the complex financial needs of our clients. We have established a dedicated governance structure in order to drive, measure and manage collaboration among our businesses. We target collaboration revenues of 18% to 20% of net revenues. In 2013 collaboration revenues represented 18% of net revenues. Since the inception of our collaboration program in 2006, we have built a strong track record of delivering customized value propositions. We believe this is a significant differentiator for Credit Suisse. We have observed increasing momentum in collaboration initiatives, including tailored solutions for entrepreneurs and high-net-worth individual (HNWI) clients by Investment Banking and managed investment products developed by Private Banking & Wealth Management. As we also benefit from our programs for cross-divisional management development and lateral recruiting, collaboration revenues, including cross-selling and client referrals, have proven to be a resilient source of both revenues and assets under management.

### Corporate responsibility

We strive to assume our corporate responsibilities in every aspect of our work and we conduct our business based on our broad understanding of our role as a financial services provider, member of society and employer. Our approach also reflects our commitment to protecting the environment. To ensure that we supply the full breadth of information required by our stakeholders, we publish a Corporate Responsibility Report and additional information, which can be found at www.credit-suisse.com/responsibility.

## CODE OF CONDUCT

At Credit Suisse, we are convinced that our responsible approach to business is a decisive factor determining our long-term success. We therefore expect all our employees and members of the Board of Directors to observe the professional standards and ethical values set out in our Code of Conduct, including our commitment to complying with all applicable laws, regulations and policies in order to safeguard our reputation for integrity, fair dealing and measured risk-taking. Our Code of Conduct is available on our website at www.credit-suisse.com/code.

## INDUSTRY TRENDS AND COMPETITION

For the financial services industry, 2013 was a challenging year, with banks seeking to adapt to new regulatory requirements, changing macroeconomic conditions and evolving client needs. Global banks took significant steps to restructure businesses and decrease costs while also taking measures to increase capital and liquidity ratios. In Switzerland, developments in the cross-border wealth management business continued to be driven by a focus on finding a political basis for operating this business in the future and ongoing efforts to resolve legacy tax matters, particularly with European countries and the US.

▸ Refer to “Our businesses – Private Banking & Wealth Management” and “Our businesses – Investment Banking” for further information.

# Our businesses

## PRIVATE BANKING & WEALTH MANAGEMENT

### Business profile

Within the Private Banking & Wealth Management division, we offer comprehensive advice and a broad range of financial solutions to private, corporate and institutional clients. The strategic businesses of Private Banking & Wealth Management comprise Wealth Management Clients, Corporate & Institutional Clients and Asset Management.

Our **Wealth Management Clients** business is one of the largest in the international wealth management industry, serving over two million clients, including UHNWI and HNWI clients around the globe in addition to affluent and retail clients in Switzerland. We offer our clients a distinct value proposition, combining global reach with a structured advisory process and access to a broad range of comprehensive products and services. Our global network includes 3,770 relationship managers in 41 countries with close to 300 offices and 21 booking centers. As of the end of 2013, our Wealth Management Clients business had assets under management of CHF 790.7 billion.

Our **Corporate & Institutional Clients** business offers expert advice and high-quality services to a wide range of clients, serving the needs of over 100,000 corporations and institutions, mainly in Switzerland, including large corporate clients, small and medium size enterprises (SME), institutional clients, financial institutions, shipping companies and commodity traders. Around 1,600 employees, including 560 relationship managers, serve our clients out of 52 locations. While the Swiss home market remains our main focus, we also continue to build out our capabilities in international growth markets with dedicated teams in Luxembourg, Singapore and Hong Kong. As of the end of 2013, our Corporate & Institutional Clients business reported CHF 353.3 billion of client assets and CHF 62.4 billion of net loans.

Our **Asset Management** business offers investment solutions and services globally to a wide range of clients, including pension funds, governments, foundations and endowments, corporations and individuals. We invest across a broad range of asset classes with a focus on alternative investment strategies, emerging markets, asset allocation and traditional investment strategies. Our investment professionals deliver access to best-in-class products and holistic client solutions. Our Asset Management business had CHF 352.3 billion of assets under management as of the end of 2013.

We have established a **non-strategic unit** in Private Banking & Wealth Management to include positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products. The non-strategic unit allows management to focus on ongoing businesses and growth initiatives and further accelerates the reduction of capital and costs currently tied up in non-strategic businesses.

### Key data – Private Banking & Wealth Management

| | | | in / end of |
|---|---|---|---|
| | **2013** | 2012 | 2011 |
| **Key data** | | | |
| Net revenues (CHF million) | 13,442 | 13,474 | 13,397 |
| Income before taxes (CHF million) | 3,240 | 3,775 | 2,961 |
| Assets under management (CHF billion) | 1,282.4 | 1,250.8 | 1,185.2 |
| Number of employees | 26,000 | 27,300 | 28,100 |

### Industry trends and competition

We believe the **wealth management** industry continues to have positive growth prospects. Assets of UHNWI and HNWI globally are projected to grow approximately 7% annually over the next five years. Although wealth creation continues to be at higher growth rates in emerging markets compared to mature markets, the difference in growth compared to mature markets is expected to be less significant than in recent years. Nevertheless, the higher growth rates in emerging markets, especially in Asia Pacific, fueled by entrepreneurial activity and comparatively strong economic development, are expected to keep adding weight to these regions. With around two-thirds of the world's global wealth still located in the US, Japan and Western Europe, the mature markets continue to be of crucial importance for global wealth managers.

Structurally, the industry continues to undergo significant change. Regulatory requirements for investment advisory services continue to increase, including in the areas of suitability and appropriateness of advice, client information and documentation. Further, new and proposed laws and international treaties are leading to increased regulation of cross-border banking. We believe Credit Suisse is well advanced in adapting to this new environment as we have and are continuing to dedicate significant resources to ensure our business is compliant with regulatory standards.

We believe the market for **corporate and institutional banking** services continues to offer attractive business opportunities in Switzerland and internationally. However, the competition among financial institutions is intense and the low-interest rate environment as well as negative impacts from the continued weakness of the US dollar versus the Swiss franc remains challenging, resulting in continuous pressure on margins.

The **asset management** industry overall has returned to growth, with the largest managers continuing to capture the majority of asset flows. Within the asset management industry, allocations to alternative investments and solution-orientated investments have continued to increase due to projected low returns from fixed-income products and shifting investor preferences. Within alternatives, the hedge fund industry experienced expansion with increased asset flows in 2013, bringing assets under management to record highs. Private equity fundraising rebounded, raising the largest amount of capital since the global financial crisis in 2008 led by fundraising for investment in developed economies. The regulatory environment continued to evolve in 2013 and is expected to continue to trend toward simpler, more regulated fund structures in conjunction with investors seeking better transparency and risk management.

For the wealth and asset management industry in general, revenue levels remain under pressure due to continued low interest rates as well as clients choosing a more conservative asset mix and reducing their overall investment activity in the face of macroeconomic uncertainty, including specific events such as expected changes in US monetary policy and continued focus on the European sovereign debt crisis. Competition and cost pressure in the banking industry remain intense and the industry is affected by new capital and leverage requirements, forcing many competitors to continue to review their business strategies and operating models. Attracting and retaining the best talent continues to be a key factor for success. As a result of these structural industry trends, we expect industry consolidation and restructuring to continue.

We believe Switzerland is well positioned to continue as an attractive financial center in this changing marketplace, offering clients a politically stable and economically diversified investment environment combined with a long-standing heritage in wealth and asset management services. For Swiss institutions, the Swiss franc remains strong historically, even given the actions by the Swiss National Bank (SNB) to maintain a minimum exchange rate against the euro. This strength can adversely affect operating performance for Swiss institutions as revenues are based on assets under management that are often denominated in currencies that have weakened against the Swiss franc but a substantial portion of the related expenses are incurred in Swiss francs.

**Strategy**

Following the decision in late 2012 to integrate our former Private Banking and Asset Management divisions into a single, new Private Banking & Wealth Management division, we retained the operating and reporting structure along the lines of our strategic businesses (i) Wealth Management Clients, (ii) Corporate & Institutional Clients and (iii) Asset Management. The integration of the formerly separate divisions allowed us to implement a more efficient, cost effective operating model that better serves our clients. In particular, our investment views have been further aligned and tailored locally, leading to a simpler product shelf and streamlined delivery. In addition, we have regionalized and focused our product offering to shorten our response time to product needs and improve time-to-market. Finally, we have transitioned our sales & trading capabilities from Investment Banking into Private Banking & Wealth Management, to become more efficient and offer more effective buy-side execution.

We expect to make additional progress by continuing our long-term strategy focused on:

- Advice at the core
- Global growth
- Productivity management
- Regulatory compliance
- Integrated bank
- Best people

**Advice at the core:** We strive for our clients to benefit from our value-adding services in terms of advice and performance. Our advisory value proposition is a vital part of our wealth management strategy to provide our clients with specific advice around their asset allocation and asset-liability management needs. Our globally consistent advisory process, which is at the center of our wealth management advice, allows us to define an investment strategy in line with each individual client's risk profile and to deliver tailor-made and comprehensive financial solutions to our clients. To ensure the highest standards in our product offerings, our selection of internal and third-party solutions is based on comprehensive due diligence with regard to the suitability of products and advice. In line with industry trends, we continue to adapt our offering by launching a suite of inducement-free mandates and are planning to introduce a pricing model that more directly links our fee schedules to the level of service and advice provided to our clients.

**Global growth:** We saw a further expansion of our footprint in emerging markets in the last year with strong net new asset growth of 8%. To further capture the superior growth opportunities of these regions, we are planning to realign the expense base away from non-strategic and mature markets towards faster growing emerging markets. Our Swiss home market remains a key area of focus where we plan to leverage our strong market position and cross-segment collaboration to further increase scale. In mature markets outside Switzerland, we make selective investments to strengthen our profitable onshore franchises.

**Productivity management:** Key to achieving our productivity enhancements are the efficiency management programs that we announced and began implementing in November 2011 and further expanded with the creation of the combined division in November 2012. We are targeting CHF 950 million of direct expense savings as part of Credit Suisse's firm-wide cost savings target of CHF 4.5 billion by the end of 2015. The savings are mainly expected to come from the wind-down of non-strategic businesses, the streamlining of the Swiss client coverage model, the rationalization of support functions and increasing automation, and savings from efficiency measures in our Western European and US onshore locations.

**Regulatory compliance:** We are dedicated to strict compliance with national and international regulations and we proactively develop and implement new business standards to address changes in the regulatory environment.

**Integrated bank**: The value proposition of our integrated bank remains a key strength in our client offerings. Close collaboration with the Investment Banking division enables us to offer additional customized and innovative solutions to our clients, especially to UHNWI clients, our fastest growing client segment. We strive to further strengthen our market share by continuing to build out our specific UHNWI product offerings, including the expansion of secured lending.

**Best people:** Attracting, developing and retaining the industry's top talent continues to be a vital cornerstone of our strategy. Therefore, while reducing the overall headcount in 2013 in accordance with our efficiency targets, we continued to hire experienced senior relationship managers, who accounted for 63% of our relationship manager hires. We also continued and added to our extensive training and certification programs through which we enhance our existing talent pool.

### Wealth Management Clients

In 2013, we continued to make significant progress towards our goal of becoming the leading private bank for UHNWI and HNWI clients globally while efficiently growing our affluent and retail business in our Swiss home market.

In our home market in **Switzerland**, our clients range from the retail segment up to UHNWI. They benefit from a broad service offering and widespread local presence. Our nation-wide branch network with over 200 locations allows us to stay in close contact with our clients and to identify new business opportunities across client segments. To further enhance efficiencies and improve productivity we have delayered our service model and implemented two focused business areas: First, a dedicated coverage team for UHNWI and External Asset Managers to meet the complex and demanding needs of these clients, which often resemble those of institutional clients. Second, a more effective coverage organization for our clients in Switzerland, ensuring high client proximity and a seamless service offering for our clients ranging from the retail and affluent to the HNWI segment. To expand our already strong position in Switzerland we are continuously adapting our service offering. For instance, to strengthen our position as the market leader in the External Asset Manager business, we have successfully launched eamXchange, an innovative platform that combines business-oriented goals with social media tools.

In **emerging markets** we continue to make focused investments to capture the attractive growth prospects in these regions. Our clients benefit from our broad global footprint and the services we provide in collaboration with Credit Suisse's established global Investment Banking presence. The importance of emerging markets for our Wealth Management Clients business has continued to increase, with assets from emerging markets accounting for 37% of our assets under management as of year-end 2013 (compared to 35% at the end of 2011). We are further increasing depth in key markets like Brazil, China, Indonesia, the Middle East and Russia, and continue to enhance our Singapore and Hong Kong on- and offshore offerings. We expect to further accelerate our emerging markets expansion by extending our secured lending offerings and increasing the hiring of experienced relationship managers in these regions. We also plan to invest in our digital client interface to include a wider product range, portfolio analytics, research and transaction services, particularly in Asia. Our achievements in emerging markets are being recognized with private banking and wealth management awards, including recently the *Euromoney Private Banking Survey 2014* regional award for "Best Private Bank in Central and Eastern Europe" and the *Asian Private Banker Award for Distinction 2013* for "Best Private Bank – Asia".

In **mature markets** in Western Europe, North America, Japan and Australia, we are transforming our businesses to accelerate growth, enhance efficiency and adjust to the new regulatory environment. In Western Europe, the announcement of the sale of our domestic private banking business booked in Germany, which is expected to close in 2014, marks an important achievement. We remain fully committed to serving German wealth management clients and will do so on a cross-border basis, leveraging our comprehensive platforms in Switzerland and Luxembourg. We also plan to continue to grow select profitable onshore markets, including those in Italy and Spain. The launch of our advisory branch in Portugal and our agreement to acquire Morgan Stanley's private wealth management businesses in EMEA, excluding Switzerland, are further evidence of our commitment to successfully grow our presence in mature markets.

In all regions, the **UHNWI** client segment is an important growth driver for our business. By combining individual and comprehensive advice with dedicated investment ideas we continue to focus on this fast-growing client segment. Our offer is complemented by customized and innovative asset management and investment banking solutions based on our integrated bank approach. We continue to successfully execute our growth strategy, as UHNWI clients represented 45% of our assets under management at year-end 2013, compared to 37% at the end of 2011. We plan to continue to build out our specific product capabilities for UHNWI clients to further capture the segment's growth potential, including the expansion of our secured lending offering.

To further reduce operational complexity and respond to increasing regulatory scrutiny, primarily in our cross-border business, we decided to fully exit from serving clients domiciled in over 80 small markets, primarily in Eastern EMEA. Similarly, we decided to discontinue servicing lower band wealth client segments in over 60 additional mainly small markets. These decisions, which are largely scheduled to be implemented through 2014, are expected to have a minor impact on our assets under management while creating efficiency and productivity gains by ensuring that our attention and resources are focused on core markets and client segments.

### Corporate & Institutional Clients

In 2013, we successfully leveraged our strong market position in Switzerland and cross-segment collaboration, while increasing productivity and profitability.

We maintained and selectively improved our leading position in Switzerland as a trusted and proactive partner particularly in our business with corporates as well as with institutional clients. We increased our margins significantly over the whole business portfolio through active loan management. In order to support these measures, we rolled out a comprehensive Sales Excellence Training to all levels. Internationally, we reinforced our growth strategy by strengthening our presence in the Asia Pacific region, while we reduced non-core and capital intensive business activities in line with the Group's goal to further improve capital ratios and focus on core activities.

Also in 2013, we were recognized with several awards, including "Best Trade Finance Bank in Switzerland" by *Global Finance* magazine, "Best Swiss Global Custodian" and "Best European Global Custodian" by *R&M Surveys* and "Best Private Bank for Business Jet Finance 2013" by *Corporate Jet Investor* magazine.

### Asset Management

In 2013, we made significant progress in our strategy, executing several business and assets sales while focusing on growth areas in alternative investment strategies and core investments. We reorganized our distribution efforts to expand our client reach through our own teams and third-party distribution channels. With the formation of a single Private Banking & Wealth Management division, we ensure close collaboration between the wealth and asset management businesses. Our clients benefit from the division-wide alignment and focusing of our investment ideas and our UHNWI clients, in particular, from the increased speed in the delivery of individually customized investment solutions. We continue to streamline and simplify our businesses which is resulting in significant headcount and operating expense reductions.

In alternative investments, we are focusing on providing investors with attractive alternatives to equities and traditional fixed income. With CHF 76.4 billion in assets under management, we are one of the leading alternatives managers globally. Our goal is to further increase scale in our main businesses and to seize opportunities in specialized niche areas. Our highly successful raising of capital for our collateralized loan obligation fund and inflows in our Brazilian hedge funds, securitized products and commodities contributed significantly to net asset inflows of CHF 11.1 billion in alternative assets. In 2013, we successfully launched new products in emerging markets, including Aventicum, our joint venture with Qatar Holdings, and NEXT, a venture capital fund. In addition, we successfully raised funds for Peninsula Investimentos SA, which sponsors and manages hedge funds with a focus on Brazilian macroeconomic funds and private equity funds.

With CHF 275.5 billion assets under management, our core investments business is a leader in the Swiss market, offering equity, fixed income, real estate, index and multi-asset class solutions products. Our strategic areas of focus include positioning our core investments business as a European investment manager, expanding our footprint in Asia and launching dedicated solutions and products for UHNWI clients. Our real estate business is a market leader in Switzerland and the second-largest European property fund manager.

During 2013 we completed the sale of our exchange-traded funds business to BlackRock and the sale of Strategic Partners, our dedicated secondary private equity business, to Blackstone. In August 2013, we announced the sale of the Customized Fund Investment Group, our private equity fund of funds and co-investment business, to Grosvenor Capital Management. This transaction was completed in the first quarter of 2014. Further, we announced an agreement to acquire Morgan Stanley's private wealth management businesses in EMEA, excluding Switzerland; after a first closing in December 2013, we expect to complete this transaction during the course of 2014.

## Products and services

The Private Banking & Wealth Management division offers a variety of products and services. They can be broadly divided into those products and services provided by each of our businesses within the division, as described below.

### Wealth Management Clients

In Wealth Management Clients, our service offering is based on our structured advisory process, client segment specific value propositions, comprehensive investment services and our multi-shore platform.

- **Structured advisory process:** We apply a structured approach based on a thorough understanding of our clients' needs, personal situation, product knowledge, investment objectives and a comprehensive analysis of their financial situation to define individual client risk profiles. On this basis we define together with our clients an individual investment strategy. This strategy is implemented ensuring that portfolio quality standards are adhered to and that all investment instruments are compliant with suitability and appropriateness standards. Responsible for the implementation are either the portfolio managers, in the case of discretionary mandates, or our relationship managers working together with their advisory clients.
- **Client segment specific value propositions:** We offer a wide range of wealth management solutions tailored to specific client segments. UHNWI and HNWI clients contributed 45% and 42%, respectively, of assets under management in Wealth Management Clients at the end of 2013. For entrepreneurs, we offer solutions for a range of private and corporate wealth management needs, including succession planning, tax advisory, financial planning and investment banking services. Our entrepreneur clients benefit from the advice of Credit Suisse's corporate finance advisors, access to a network of international investors and professional support in financial transactions. A specialized team, Solutions Partners, offers holistic and tailor-made business and private financial solutions to our UHNWI clients.
- **Comprehensive investment services:** We offer a comprehensive range of investment advice and discretionary asset management services based on the outcome of our structured advisory process and the guidelines of the Investment Strategy & Research Group and the Credit Suisse Investment Committee. We base our advice and services on the analysis and recommendations of our research teams, which provide a wide range of global research including macroeconomic, equity, bond and foreign-exchange analysis, as well as research on the Swiss economy. Our investment advice covers

a range of services from portfolio consulting to advising on individual investments. We offer our clients portfolio and risk management solutions, including managed investment products. These are products actively managed and structured by our specialists or third parties, providing private investors with access to investment opportunities that otherwise would not be available to them. For clients with more complex requirements, we offer investment portfolio structuring and the implementation of individual strategies, including a wide range of structured products and alternative investments. Discretionary asset management services are available to clients who wish to delegate the responsibility for investment decisions to Credit Suisse. We are an industry leader in alternative investments and, in close collaboration with our Asset Management business and Investment Banking, Wealth Management Clients offers innovative products with limited correlation to equities and bonds, such as hedge funds, private equity, commodities and real estate investments.

- **Multi-shore platform:** With global operations comprising 20 international booking centers in addition to our operations in Switzerland, we are able to offer our clients booking capabilities locally as well as through our international hubs. Our multi-shore offering is designed to serve clients who are focused on geographical risk diversification, have multiple domiciles, seek access to global execution services or are interested in a wider range of products than are available to them locally. In 2013, CHF 23.6 billion of net new assets in Wealth Management Clients were booked outside of Switzerland, and we expect that international clients will continue to drive our growth in assets under management.

### Corporate & Institutional Clients

In Corporate & Institutional Clients, we supply a comprehensive range of financial solutions to companies and institutional clients. Our offering is derived from our clients' needs and delivered through our integrated franchise and growing international presence. With this foundation, we are able to assist our clients in virtually every stage of their business cycle and cover their banking needs in Switzerland and abroad. For corporate clients we provide a wide range of basic banking products such as traditional and structured lending, payment services, foreign exchange, capital goods leasing as well as investment solutions. Furthermore, together with the Investment Banking division we offer tailor-made services in the areas of mergers and acquisitions, syndications and structured finance. For corporations with specific needs for global finance and transaction banking, we provide services in commodity trade finance, export finance as well as trade finance and factoring. For our institutional clients, including pension funds and public sector clients, we offer a wide range of fund solutions and fund-linked services, including fund management and administration, fund design and comprehensive global custody solutions. Our offering also includes ship and aviation finance and a competitive range of services and products for financial institutions such as securities, cash and treasury services.

### Asset Management

In Asset Management, we offer institutional and individual clients a range of products, including alternative and core traditional products. We reach our clients through our own distribution teams in Private Banking & Wealth Management, the Investment Banking division and through third-party distribution channels.

Our alternative investment offerings include hedge fund strategies, alternative beta, commodities and credit investments. We offer access to various asset classes and markets through strategic alliances and key joint ventures with external managers and have a strong footprint in emerging markets.

Our core investment products include multi-asset class solutions, which provides clients with innovative strategies and comprehensive management across asset classes to optimize client portfolios with services that range from funds to fully customized solutions. Other core investment strategies include a suite of fixed income, equity and real estate funds, and our indexed solutions business which provides institutions and individual clients access to a wide variety of asset classes in a cost-effective manner. Stressing investment principles such as risk management and asset allocation, we take an active and disciplined approach to investing.

## INVESTMENT BANKING

### Business profile

Investment Banking provides a broad range of financial products and services, focusing on businesses that are client-driven, flow-based and capital-efficient. Our suite of products and services includes global securities sales, trading and execution, prime brokerage and capital raising and advisory services as well as comprehensive investment research. Our clients include corporations, governments, institutional investors, including pension funds and hedge funds, and private individuals around the world. We deliver our global investment banking capabilities via regional and local teams based in major developed and emerging market centers. Our integrated business model enables us to gain a deeper understanding of our clients and deliver creative, high-value, customized solutions based on expertise from across Credit Suisse.

### Key data – Investment Banking

| | | | in / end of |
|---|---|---|---|
| | **2013** | 2012 | 2011 |
| **Key data** | | | |
| Net revenues (CHF million) | 12,565 | 12,558 | 10,460 |
| Income/(loss) before taxes (CHF million) | 1,719 | 2,002 | (593) |
| Number of employees | 19,700 | 19,800 | 20,700 |

### Industry trends and competition

2013 was a challenging year, particularly in our fixed income sales and trading business, marked by market uncertainty regarding US monetary policy, heightened volatility in emerging markets and the impact of the US government shutdown. As a result of the difficult operating conditions, our fixed income businesses were impacted by subdued corporate and institutional risk appetite and continued low client activity levels. However, the equities sales and trading business benefited from higher client activity, favorable market conditions, increased fund flows and investor rotation into equities throughout the year. In addition, financial institutions across the globe continued to face significant pressure to adapt to the changing regulatory requirements. To this end, we have significantly evolved our business model and were one of the first global banks to be Basel III compliant, beginning in January 2013. Additionally, there has been heightened regulatory focus on leverage and the migration of markets towards cleared and electronic trading across rates businesses. As a result, we expect increased capital and liquidity requirements and derivatives regulation to result in reduced risk-taking and enhanced transparency.

### Strategy

We continue to proactively pursue a client-focused, capital-efficient business model. We believe this strategy, coupled with our conservative funding and liquidity position and strong capitalization, has served us well during a period of market volatility and industry change. In November 2011, we announced a refinement to our strategy aimed at adapting our businesses to the new market and regulatory environment. This includes significantly reducing Basel III risk-weighted assets in fixed income, creating greater financial flexibility by reducing our cost base, optimizing our portfolio towards synergies with the Private Banking & Wealth Management division and delivering sustainable, attractive returns in areas where we have competitive advantages.

Over the past two years, we have made considerable progress in improving capital efficiency. We substantially reduced Basel III risk-weighted assets usage for Investment Banking, reducing total risk-weighted assets by USD 66 billion or 27% from 2011 to USD 176 billion in 2013. As of the end of 2013, we reported total assets of USD 565 billion, exceeding our Investment Banking balance sheet target of less than USD 600 billion of assets by year-end 2013. Additionally, we reported Swiss leverage exposure of USD 812 billion, exceeding our target of less than USD 840 billion by year-end 2013.

As part of continuing to advance our business model, we created a non-strategic unit within Investment Banking, with the goal of reducing costs, capital and leverage exposure in the non-strategic portfolio and redeploying resources to growth initiatives in high returning businesses. Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily non-exchange-cleared instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions. In connection with these actions, we are targeting non-strategic Basel III risk-weighted asset reductions of USD 14 billion from year-end 2013 to USD 6 billion by the end of 2015 and non-strategic Swiss leverage exposure reductions of USD 63 billion from year-end 2013 to USD 24 billion by the end of 2015.

In light of recent developments such as heightened regulatory focus on leverage and the migration of markets towards cleared and electronic trading, we have restructured and simplified our rates business model to focus on increasing returns and meeting client liquidity needs. More specifically, as a part of modifying our business model we are focusing on high volume, high liquidity electronic trading in cash products and exchange-cleared products in derivatives and on reducing capital intensive structured rates activity. Additionally, we have combined our rates, foreign exchange and commodities franchises to create the Global Macro Products Group within our fixed income business. This new cross-asset model is designed to offer clients a holistic approach across the macro asset classes and allow us to create scale in our delivery of macro products, resulting in improved capital and cost efficiency.

Another component of our evolved strategy is our focus on cost initiatives, which have been ongoing since the second quarter of 2011. We have significantly improved the operating efficiency of Investment Banking and have delivered most of our targeted CHF 1.9 billion of direct cost savings compared to the annualized six month 2011 run rate, measured at constant foreign exchange rates and adjusted to exclude significant non-operating expenses and variable compensation expenses. Through these initiatives, we are creating significant flexibility in our Investment Banking cost structure, which is permitting us to adapt to the challenging market environment while taking advantage of favorable market opportunities when they arise.

Looking ahead, we believe our client-focused and cost- and capital-efficient strategy will allow us to deliver strong returns. We continue to refocus resources on opportunities in high-returning businesses such as securitized products, global credit products, cash equities, prime services, and emerging markets, and to reduce the drag from the non-strategic unit.

▸ Refer to "Regulation and supervision" for further information on regulatory developments.

### Significant transactions

We executed a number of noteworthy transactions in 2013, reflecting the breadth and diversity of our Investment Banking franchise:

- **Debt capital markets**: We arranged key financings for a diverse set of clients, including Verizon Communications (broadband and wireless communications services), Wells Fargo (financial services), Électricité de France Group (electric utilities), Volkswagen Group (German auto maker), and Group R (offshore construction and engineering services).
- **Equity capital markets**: We executed a rights issue for Barclays Plc (financial services), a follow-on offering for KAR Holdings (vehicle auction services), an initial public offering (IPO) of Cembra Money Bank (a subsidiary of General Electric Capital EMEA), a follow-on offering for Diamondback Energy (independent oil and natural gas), and a follow-on offering of Fibra Uno de Mexico (commercial real estate trust).
- **Mergers and acquisitions:** We advised on a number of key transactions throughout the year, including the Freeport-McMoRan Copper & Gold (international mining) acquisition of Plains Exploration & Production Company and McMoRan Exploration Co (oil & gas exploration, development and production); the sale of Berry Petroleum (crude oil and natural gas exploration and production) to LINN Energy (holding company of oil and natural gas assets) and Linn Co (subsidiary of LINN Energy); the sale of E.I. du Pont Nemours and Company's (diversified products and services) performance coating business to The Carlyle Group (global alternative asset manager); the sale of Lender Processing Services (loan processing services) to Fidelity National Financial (commercial and residential mortgage and diversified services); and the sale of Neiman Marcus (luxury retail chain) to Ares Management (private investment manager).

### Market share momentum

- Remained #1 ranked European prime broker for the fourth consecutive year according to *EuroHedge Magazine*.
- Advanced to become the second-largest prime broker in Asia, according to the 2013 *AsiaHedge* Survey.
- Advanced to Top 3 ranking in Americas prime brokerage, according to *The Absolute Return* 2013 Prime Brokerage Survey in which we were the only prime broker to increase both market share and rank.
- Retained #1 ranking in US Electronic Trading and US Program Trading and maintained a Top 3 ranking in US Equity Trading, according to the 2013 *Greenwich Associates* Survey.
- Advanced to the #1 rank in overall US Fixed Income by market share according to the 2013 Fixed Income Trading Survey for North America by *Greenwich Associates*. We also advanced to the #1 rank in US Securitized Products, reflecting significant market share gains and increased or maintained market share in Secondary Investment Grade Credit and Secondary Leveraged Loans.

### Products and services

Our comprehensive portfolio of products and services is aimed at the needs of the most sophisticated clients, and we increasingly use integrated platforms to ensure efficiency and transparency. Our activities are organized around two broad functional areas: investment banking and global securities. In investment banking, we work in industry, product and country groups. The industry groups include energy, financial institutions, financial sponsors, industrial and services, healthcare, media and telecom, real estate, and technology. The product groups include mergers and acquisitions (M&A) and financing products. The country groups include Europe, Latin America, North America, Japan, Non-Japan Asia, and Emerging Europe. In global securities, we engage in a broad range of activities across fixed income, currencies, commodities, derivatives and cash equities markets, including sales, structuring, trading, financing, prime brokerage, syndication and origination, with a focus on client-based and flow-based businesses, in line with growing client demand for less complex and more liquid products and structures.

#### Investment banking

The investment banking industry, product and country groups provide the following services.

##### Equity and debt underwriting

Equity capital markets originates, syndicates and underwrites equity in IPOs, common and convertible stock issues, acquisition financing and other equity issues. Debt capital markets originates, syndicates and underwrites corporate and sovereign debt.

##### Advisory services

Advisory services advises clients on all aspects of M&A, corporate sales and restructurings, divestitures and takeover defense strategies. The fund-linked products group is responsible for the structuring, risk management and distribution of structured mutual fund and alternative investment products and develops innovative products to meet the needs of its clients through specially tailored solutions.

### Global securities

Global securities provides access to a wide range of debt and equity securities, derivative products and financing opportunities across the capital spectrum to corporate, sovereign and institutional clients. Global securities is structured into the areas outlined below.

#### Fixed income

- **Credit products** offers a full range of fixed income products and instruments to clients across investment grade and high yield credits, ranging from standard debt issues and credit research to fund-linked products, derivatives instruments and structured solutions that address specific client needs. We are a leading dealer in flow trading of single-name credit default swap (CDS) on individual credits, credit-linked notes and index swaps. Investment grade trades domestic corporate and sovereign debt, non-convertible preferred stock and short-term securities such as floating rate notes and commercial paper. Leveraged finance provides capital raising and advisory services and core leveraged credit products such as bank loans, bridge loans and high yield debt for non-investment grade corporate and financial sponsor-backed companies.
- **Securitized products** trades, securitizes, syndicates, underwrites and provides research for various forms of securities, primarily residential mortgage-backed securities and asset-backed securities. Both the mortgage- and asset-backed securities are based on underlying pools of assets, and include both government- and agency-backed, as well as private label loans.
- **Emerging markets** offers a full range of fixed income products and instruments, including sovereign and corporate securities, local currency derivative instruments and tailored emerging market investment products.
- **Global macro products** is a newly formed group combining our existing rates, foreign exchange and commodities businesses, creating a new cross-asset model that offers a holistic approach across asset classes to our key clients. Our rates business is a global market maker in cash and derivatives markets and a primary dealer in multiple jurisdictions including the US, Europe and Japan. This business covers a spectrum of government bonds, interest rate swaps and options, as well as providing liability and liquidity management solutions. Foreign exchange provides market making in products such as spot and options for currencies in developed markets. The foreign exchange product suite also includes proprietary market leading technology to provide clients with electronic trading solutions. Commodities trades oil, gas and other energy products as well as base, precious and minor metals. The commodities product suite also includes benchmark indices developed by Credit Suisse commodities.

#### Equity

- **Cash equities** provides a comprehensive suite of offerings; such as (i) research, analytics and other content-driven products and services, to meet the needs of clients including mutual funds, investment advisors, banks, pension funds, hedge funds, insurance companies and other global financial institutions; (ii) sales trading, responsible for managing the order flow between our clients and the marketplace and providing clients with trading ideas and capital commitments, identifying trends and delivering the most effective execution; (iii) trading, which executes client orders and makes markets in listed and over-the-counter (OTC) cash securities, exchange-traded funds and programs, providing liquidity to the market through both capital commitments and risk management; and (iv) Credit Suisse's advanced execution services (AES®), a sophisticated suite of algorithmic trading strategies, tools and analytics to facilitate global equity trading. By employing algorithms to execute client orders and limit volatility, AES® helps institutions and hedge funds reduce market impact. AES® is a recognized leader in its field and provides access to exchanges in more than 35 countries worldwide via more than 45 leading trading platforms.
- **Equity derivatives** provides a full range of equity-related products, investment options and financing solutions, as well as sophisticated hedging and risk management expertise and comprehensive execution capabilities to financial institutions, hedge funds, asset managers and corporations.
- **Convertibles** involves both secondary trading and market making and the trading of credit default and asset swaps and distributing market information and research. The global convertibles business is a leading originator of new issues throughout the world.
- **Prime services** offers hedge funds and institutional clients execution, financing, clearing and reporting capabilities across various asset classes through prime brokerage, synthetic financing, listed and OTC derivatives and hedge fund administration. In addition, prime services is a leading provider of advisory services across capital services and consulting for both start-ups and existing clients.

#### Systematic market-making group

The systematic market-making group operates a range of liquidity-providing and market-making strategies in liquid markets.

#### Other

Other products and activities include lending, certain real estate investments and the distressed asset portfolios. Lending includes senior bank debt in the form of syndicated loans and commitments to extend credit to investment grade and non-investment grade borrowers.

### Research and HOLT

Our equity and fixed income businesses are enhanced by the research and HOLT functions. HOLT offers a framework for objectively assessing the performance of 20,000 companies in over 60 countries, with interactive tools and consulting services that clients use to make informed investment decisions.

Equity and fixed income research uses in-depth analytical frameworks, proprietary methodologies and data sources to analyze approximately 3,000 companies worldwide and provide macroeconomic insights into this constantly changing environment.

# Organizational and regional structure

## ORGANIZATIONAL STRUCTURE

We operate in two global divisions and reporting segments – Private Banking & Wealth Management and Investment Banking. Consistent with our client-focused, capital-efficient business strategy, we coordinate activities in four market regions: Switzerland, EMEA, Americas and Asia Pacific. In addition, Shared Services provides centralized corporate services and business support, as well as effective and independent controls procedures in the following areas:

- The Chief Financial Officer (CFO) area covers many diverse functions, including Corporate Development, Information Technology, Corporate Real Estate & Services, Efficiency Management, Financial Accounting, Group Insurance, Group Finance, Investor Relations, New Business, Global Operations, Product Control, Tax and Treasury.
- The General Counsel area provides legal and compliance support to help protect the reputation of Credit Suisse. It does so by giving legal and regulatory advice and providing employees with the tools and expertise to comply with applicable internal policies and external laws, rules and regulations.
- The Chief Risk Officer (CRO) area comprises strategic risk management, credit risk management, risk analytics and reporting, and operational risk management, which cooperate closely to maintain a strict risk control environment and to help ensure that our risk capital is deployed wisely.
- The Talent, Branding and Centers of Excellence area comprises human resources, corporate branding and advertising and our CoE. Human Resources strives to attract, retain and develop staff, while also creating a stimulating working environment for all employees. Branding works closely with the businesses to manage our brand as a common touchstone, a differentiator in a competitive market and a motivator of behavior and our promise to clients. Our CoE support our global operations in process optimization by providing services and best practices away from the on-shore locations and are an essential component in the implementation of our strategy.

Other functions providing corporate services include Corporate Communications, One Bank Collaboration and Public Policy. Corporate Communications provides support in media relations, crisis management, executive and employee communications. One Bank Collaboration facilitates cross-divisional collaboration initiatives throughout the Group and measures and controls collaboration revenues. Public Policy promotes and protects the interests of Credit Suisse and its reputation.

The Chief Executive Officers (CEOs) of the divisions and regions report directly to the Group CEO, and, together with the CFO, CRO, General Counsel and Chief Marketing and Talent Officer, they formed the Executive Board of Credit Suisse in 2013.

Our Internal Audit function reports directly to the Audit Committee of the Board of Directors.

Our structure is designed to promote cross-divisional collaboration while leveraging resources and synergies within our four regions. The regions perform a number of essential functions to coordinate and support the global operations of the two divisions. On a strategic level, regions are responsible for corporate development and the establishment of regional business plans, projects and initiatives. They also have an oversight role in monitoring financial performance. Each region is responsible for the regulatory relationships within its boundaries, as well as for regulatory risk management and the resolution of significant issues in the region as a whole or its constituent countries. Other responsibilities include client and people leadership and the coordination of the delivery of Shared Services and business support in the region.

## MARKET REGIONS

### Switzerland

Switzerland, our home market, represents a broad business portfolio. We have 17,900 employees in Switzerland. The Private Banking & Wealth Management division comprises our Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients, we offer our clients a distinct value proposition combining a global reach with a structured advisory process and access to a broad range of sophisticated products and services tailored to different client groups, from private clients to UHNWI. We serve clients in 214 branches. Additionally, we are dedicated experts for our external asset manager business. In Corporate & Institutional Clients, we provide premium advice and solutions within a broad range of banking services, including lending, cash and liquidity management, trade finance, corporate finance, foreign exchange, investment solutions, ship and aviation finance, global custody and asset and liability management. Clients taking advantage of these solutions include SME, global corporations and commodity traders, banks and Swiss pension funds. Our Asset Management business has a market-leading position in the Swiss traditional and alternative investments businesses, and also offers a broad range of multi-asset class solutions. The Investment Banking division offers a full range of financial services to its Swiss client base, holding market-leading positions in the Swiss debt and capital markets as well as in mergers and acquisition advisory.

**EMEA**
We are active in 29 countries across the EMEA region with 9,600 employees working in 63 offices. Our regional headquarters is in the UK, but we have an onshore presence in every major EMEA country. The EMEA region encompasses both developed markets, such as France, Germany, Italy, Spain and the UK, and emerging markets, including Russia, Poland, Turkey and the Middle East. We implemented our client-focused integrated strategy at the country level, serving corporate, government, institutional and private clients. Both divisions are strongly represented in the EMEA region, with the Investment Banking division providing a spectrum of financial advisory services with strong market shares across many key products and markets. The Private Banking & Wealth Management division continues to further develop its integrated UHNWI offerings and to focus on the distribution of a variety of investment products, including alternative investments and core investments such as equities, fixed income, real estate, multi-asset class solutions and index solutions.

**Americas**
We have operations in the US, Canada, the Caribbean and Latin America with 11,100 employees working in 43 offices spanning 14 countries. In the US, our emphasis is on our core client-focused and high-returning businesses in Investment Banking, and on building on the market share gains we have achieved in a capital-efficient manner. In Private Banking & Wealth Management, we see considerable potential to leverage our cross-divisional capabilities, as we further develop our onshore wealth management platform in the US, Brazil and Mexico. In Latin America, particularly in our key markets of Brazil and Mexico, we continue to focus on providing clients with a full range of cross-divisional services.

**Asia Pacific**
We are present in 12 Asia Pacific countries with 7,400 employees working in 24 offices, giving us one of the broadest footprints among international banks in the region. Singapore and Hong Kong are key hubs for our Private Banking & Wealth Management business, while Australia and Japan are home to our expanding domestic Private Banking franchises. We serve UHNWI and HNWI, combining global reach with a structured advisory process, offering distinct client segment specific value propositions, as well as access to a broad range of comprehensive and sophisticated products and services. We also deliver innovative and integrated solutions in close collaboration with our Investment Banking division. Our market-leading Investment Banking business operates principally in Hong Kong and Singapore. The strong equity and research platform helps underpin a robust capital markets and Investment Banking franchise. The Investment Banking division is recognized as a leader in the industry, contributing thought leadership through research, conferences and industry commentary.

# Regulation and supervision

## OVERVIEW

Our operations are regulated by authorities in each of the jurisdictions in which we have offices, branches and subsidiaries.

Central banks and other bank regulators, financial services agencies, securities agencies and exchanges and self-regulatory organizations are among the regulatory authorities that oversee our businesses. There is coordination among our primary regulators in Switzerland, the US, the EU and the UK.

The supervisory and regulatory regimes of the countries in which we operate determine to some degree our ability to expand into new markets, the services and products that we are able to offer in those markets and how we structure specific operations. We are in compliance with our regulatory requirements in all material respects and in compliance with regulatory capital requirements.

Governments and regulatory authorities around the world have responded to the challenging market conditions beginning in 2007 by proposing and enacting numerous reforms of the regulatory framework for financial services firms such as the Group. In particular, a number of reforms have been proposed and enacted by regulators, including our primary regulators, which could potentially have a material effect on our business. These regulatory developments could result in additional costs or limit or restrict the way we conduct our business. Although we expect regulatory-related costs and capital requirements for all major financial services firms (including the Group) to increase, we cannot predict the likely impact of proposed regulations on our businesses or results. We believe, however, that overall we are well positioned for regulatory reform, as we have reduced risk and maintained strong capital, funding and liquidity.

▸ Refer to “Risk factors” for further information on risks that may arise relating to regulation.

## RECENT REGULATORY DEVELOPMENTS AND PROPOSALS

Some of the most significant regulations proposed or enacted during 2013 and early 2014 are discussed below.

### Basel framework

#### Derivative regulation

In September 2013, the Basel Committee on Banking Supervision (BCBS) and the International Organization of Securities Commissions (IOSCO) published a final global framework on margin requirements applicable to non-centrally cleared derivatives. If the framework is enacted into law at national jurisdiction-level as currently contemplated, margin requirements would be significantly higher than current market practice, dealing firms such as Credit Suisse would be required to post initial and variation margins and the re-hypothecation of posted initial margin would be limited. These margin requirements could significantly increase the cost of non-centrally cleared derivatives and reduce demand for such derivatives, which could in turn adversely affect our derivatives sales and trading businesses. The framework contemplates that these margin requirements would be phased in beginning December 1, 2015. It is anticipated that regulators in the US, EU and other key BCBS/IOSCO jurisdictions will adopt rules implementing the framework during 2014.

### Switzerland

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder. Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements, and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in through year-end 2018.

#### Capital and prudential supervision

On February 13, 2013, the Swiss Federal Council decided to activate the countercyclical capital buffer based on the request of the SNB. This activation of the countercyclical buffer requires banks to hold additional capital in the amount of 1% of their risk-weighted assets pertaining to mortgage loans that finance residential property in Switzerland from September 30, 2013. In January 2014, upon the request of SNB, the Swiss Federal Council further increased the countercyclical buffer from 1% to 2%, effective June 30, 2014.

▸ Refer to “Liquidity and funding management” and “Capital management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information regarding our current regulatory framework and expected changes to this framework affecting capital and liquidity standards.

#### Cross-border cooperation

On August 15, 2013, Switzerland and Germany agreed to increase cross-border cooperation to facilitate the ability of financial institutions in both countries to provide banking services and mutual funds to customers in the other country. The agreement is expected to remain effective under the revised EU Markets in Financial Instruments Directive (MiFID II), subject to the assessment of the Swiss and German authorities on the compatibility of the agreement with MiFID II. The agreement has been supplemented by two implementation agreements defining the scope of cooperation. These implementation agreements have been finalized by Germany’s Federal Financial Supervisory Authority and FINMA and entered into effect on January 1, 2014.

### Derivative regulation

On December 13, 2013, the Swiss Federal Council launched a consultation process for a new act to be named Financial Market Infrastructure Act (FMIA). The core purpose of the FMIA is to adjust Swiss regulation of financial market infrastructure and derivatives trading to market developments and international requirements, in particular the EU regulation on OTC Derivatives, Central Counterparties and Trade Repositories (also known as the European Market Infrastructure Regulation, or EMIR).

### Executive compensation

On March 3, 2013, Swiss citizens approved the so-called "Minder Initiative" intended to strengthen shareholder rights. The initiative requires legislation to be passed to impose board and executive compensation-related requirements on Swiss public companies, including requiring a binding (rather than advisory) shareholder vote on total board and total executive management compensation and prohibiting severance payments, salary prepayments and payments related to the acquisition or disposal of companies. The initiative also provides that the board members, the board chairperson and the compensation committee members be directly elected by shareholders annually. Further, the initiative calls for criminal sanctions in case of noncompliance. The Swiss Federal Council issued the transitional ordinance on November 20, 2013, which entered into force on January 1, 2014. The Ordinance against Excessive Compensation with respect to Listed Stock Corporations implements the initiative until the final legal implementation is approved by the parliament and entered into force. Specifically, according to the ordinance the board members, board chairperson and the compensation committee members must now be directly elected by shareholders annually, for the first time at the annual general meeting in 2014.

### Reimbursement of commissions

The Swiss Federal Supreme Court issued a decision in the fourth quarter of 2012 in a case brought by a client of another bank seeking reimbursement of commissions paid to the client's bank by providers of investment products. The court ruled that such payments ("retrocessions") received in the context of a discretionary asset management mandate from issuers of investment products are owed to the client (including payments from intra-group companies) unless a client waiver is in place. FINMA subsequently issued a notice requiring all banks to inform potentially affected clients and we have done so by informing all of our discretionary mandate clients in the second quarter of 2013. Based on our current evaluation, we expect no material exposure from this decision. In line with industry trends, we continue to adapt our offering by launching a suite of inducement-free mandates.

### Resolution regime

The consultation process launched by the Swiss Federal Council on December 13, 2013 relating to the FMIA also proposes to amend the Swiss Federal Law on Banks and Savings Banks of November 8, 1934, as amended (Bank Law), seeking to subject parent companies of financial groups or conglomerates and certain unregulated companies of the group domiciled in Switzerland to the Swiss resolution regime that applies to banks. If enacted, Credit Suisse Group would, and certain of its unregulated Swiss-domiciled subsidiaries could, become subject to the Swiss bank resolution regime and the resolution authority of FINMA. The consultation process on FMIA ended on March 31, 2014.

On January 1, 2014, revisions of the Federal Act of 11 April 1889 on Debt Enforcement and Bankruptcy entered into effect. The revisions seek to facilitate the restructuring of companies and to strengthen creditors' rights in provisional or definitive stays. In addition, it introduced certain procedural changes and a special treatment of continuing obligations (i.e., contracts such as leases, rentals or loans that contain a continuing and repeated exchange of money, goods or services), which in case of a provisional or definitive stay, may in the future be terminated at will by the debtor at any time with the permission of the receiver against payment of a compensation if a restructuring would otherwise be defeated.

### Tax

On January 1, 2013, the bilateral tax agreements between Switzerland and each of the UK and Austria entered into force, allowing for the regularization of assets in Switzerland of UK and Austrian residents. Past assets are to be regularized through an anonymous one-off payment deducted by paying agents in Switzerland or by a bank client's voluntary disclosure to Austrian or British authorities, as applicable. Austrian and UK clients have two options to regularize their future investment income and capital gains: they can instruct the Swiss bank to either deduct a withholding tax from relevant income and gains (which will grant client anonymity) or report such income and gains to their home authorities. In December 2012, the bilateral tax agreement between Switzerland and Germany was rejected by the German government.

On February 1, 2013, the Swiss Tax Administrative Assistance Act entered into force. The act governs administrative assistance in double taxation and other international agreements that Switzerland has entered into which provide for the exchange of information relating to tax matters consistent with Article 26 of the OECD Model Tax Convention. Under the act, administrative assistance is no longer prohibited for group requests based on a behavioral pattern, but so-called "fishing expeditions" are expressly prohibited. In August 2013, the Swiss Federal Council announced that it would seek to amend the act to comply with international standards. In March 2014, the Swiss Parliament approved amendments relating to the deferred notification of parties concerned, which will allow in certain cases that the affected taxpayer be informed after the information has been communicated to the authorities of the requesting country, and the establishment of a special procedure for informing parties affected by a group request. It is expected that the revised act will enter into force on January 1, 2015.

The Swiss Federal Supreme Court, in a July 2013 decision concerning a former Credit Suisse client, confirmed that so-called group requests which are not targeting an identified client but instead describe a behavioral pattern are permissible under the existing 1996 Swiss/US double taxation treaty for the avoidance of double taxation.

On August 29, 2013, Switzerland and the US signed a joint statement which provides a framework for Swiss banks' cooperation with the US authorities in their investigations focused on tax evasion. The framework applies to all Swiss banks except those banks, including Credit Suisse, which are the target of criminal investigations by the US Department of Justice (DOJ).

In September 2013, the Swiss Parliament approved an intergovernmental agreement with the US to implement the reporting and withholding tax provisions of the Foreign Account Tax Compliance Act (FATCA). FATCA requirements enter into force on July 1, 2014.

On December 18, 2013, the Swiss Federal Council adopted the mandate for negotiations regarding a revision of the taxation of savings agreement between the EU and Switzerland. The envisaged revision should bring the agreement in line with the planned revision of the EU Savings Directive and close current perceived gaps. Switzerland and the EU have officially started negotiations on January 17, 2014. In March 2014, the EC agreed an extension to the EU Savings Directive to cover the automatic information exchange within the EU on all forms of savings income and products that generate interest or equivalent income. The EU is now trying to reach an agreement with third countries such as Switzerland by the end of 2014 regarding amendments to saving taxation agreements implementing the EU Savings Directive. At the global level, in September 2013 the G20 Summit endorsed global automatic information exchange as a new international standard.

## US

In July 2010, the US enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), which provides a broad framework for regulatory changes. Although rulemaking in respect of many of the provisions of the Dodd-Frank Act has already taken place, implementation will require further detailed rulemaking over several years by different regulators, including the US Department of the Treasury (US Treasury), the US Federal Reserve (Fed), the US Securities and Exchange Commission (SEC), the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), the Commodity Futures Trading Commission (CFTC) and the Financial Stability Oversight Council (FSOC).

### Capital and prudential supervision

In July 2013, the Fed, the FDIC and the OCC released final capital rules that overhaul the existing US bank regulatory capital rules and implement the Basel III framework and certain provisions of the Dodd-Frank Act. The final rules are largely consistent with the Basel III framework published by the BCBS, although they diverge in several important respects due to requirements of the Dodd-Frank Act and do not address other, more recent aspects of the Basel III framework. In October 2013, the Fed, the OCC and the FDIC issued a proposed rule to introduce the Basel III liquidity coverage ratio (LCR) in the US, applicable to certain large US banking organizations. The US LCR proposal is generally consistent with the LCR published by the BCBS in January 2013, but it is stricter in certain respects and would be phased in between January 1, 2015 and January 1, 2017. In future separate rulemakings, the Fed may apply the US LCR requirement to the US operations of certain large foreign banking organizations.

The Dodd-Frank Act also provides regulators with tools to impose greater capital, leverage and liquidity requirements and other prudential standards, particularly for financial institutions that pose significant systemic risk. In February 2014, the Fed adopted a rule under the Dodd-Frank Act that creates a new framework for regulation of the US operations of foreign banking organizations. The rule requires Credit Suisse to create a single US intermediate holding company (IHC) to hold all of its US subsidiaries; this will not apply to Credit Suisse AG's New York branch (New York Branch). The IHC will be subject to local risk-based capital and leverage requirements. In addition, both the IHC itself and the combined US operations of Credit Suisse (including the IHC and the New York Branch) will be subjected to other new prudential requirements, including with respect to liquidity risk management, separate liquidity buffers for each of the IHC and the New York Branch, stress testing, and other prudential standards. The new framework's prudential requirements generally become effective in July 2016. Under proposals that remain under consideration, the IHC and the combined US operations of Credit Suisse would become subject to limits on credit exposures to any single counterparty, and the combined US operations of Credit Suisse would also become subject to an early remediation regime which could be triggered by capital, leverage, stress tests, liquidity, risk management and market indicators. On April 15, 2013, the Fed and the FDIC released additional guidance requiring certain financial companies, including Credit Suisse, to provide additional analysis and data in future resolution plans, and extended the deadline to submit an updated plan from July 1, 2013 to October 1, 2013. Our initial resolution plan was submitted on July 1, 2012 and our first annual update was submitted by the October 1, 2013 deadline.

▸ Refer to "Liquidity and funding management" and "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information regarding our current regulatory framework and expected changes to this framework affecting capital and liquidity standards.

On December 10, 2013, US regulators released the final version of the so-called "Volcker Rule", which limits the ability of banking entities to sponsor or invest in certain private equity or hedge funds and to engage in certain types of proprietary trading. The end of the conformance period for the Volcker Rule was extended until July 21, 2015 (with the possibility of extensions under certain circumstances), by which time financial institutions subject to the rule must bring their activities and investments into compliance. We are analyzing the final rule, assessing how it affects our businesses, and re-initiating an implementation program to come into compliance.

### Derivative regulation

On July 1, 2013, Credit Suisse Securities Europe Limited (CSSEL), the entity through which we conduct certain of our equity swap trading business, registered with the CFTC as a swap dealer.

On July 12, 2013, the CFTC adopted final cross-border guidance governing the application of CFTC rules to non-US swap dealers, which include Credit Suisse International (CSI) and CSSEL. The guidance adopted by the CFTC permits non-US swap dealers to comply with comparable home country rules in lieu of complying with certain CFTC rules. In this regard, the European Commission (EC) made an application to the CFTC for substituted compliance on behalf of firms based in the EU, including CSI and CSSEL. The CFTC granted this application in part through comparability determinations it issued on December 20, 2013 for the EU and certain other jurisdictions. As a result of these determinations, CSI and CSSEL may comply with local EU rules in lieu of certain CFTC requirements regarding risk management, internal controls, chief compliance officer duties and reports, recordkeeping, swap confirmations, portfolio reconciliation and compression, and swap valuation. In addition, the CFTC issued two no-action letters deferring certain CFTC requirements, most notably with respect to trade reporting for swaps with non-US persons, thereby allowing the CFTC more time to consider the comparability of similar rules in other jurisdictions. If the CFTC does not ultimately grant substituted compliance for reporting of swaps with non-US persons, CSI and CSSEL could incur significant operational costs.

On November 14, 2013, staff of the CFTC published an advisory stating that CFTC "transaction-level" requirements, such as mandatory clearing, mandatory exchange trading, real-time public reporting and external business conduct, apply to a swap between a non-US swap dealer, such as CSI or CSSEL, and another non-US person if the swap is arranged, negotiated or executed by US personnel or agents of the non-US swap dealer. This advisory is currently scheduled to go into effect on September 15, 2014, and the CFTC has requested public comments on it. If this advisory is not rescinded or modified, it could result in some market disruption and impose significant compliance costs on CSI and CSSEL. In light of this advisory, on December 4, 2013, several US financial trade associations filed a lawsuit in the US District Court for the District of Columbia challenging the advisory and the CFTC's July 2013 guidance regarding the cross-border application of its swaps rules. The lawsuit asks the court to vacate the July 2013 guidance and enjoin the CFTC from enforcing its rules outside the US. Depending on the outcome of this lawsuit, the extent to which CSI and CSSEL are subject to CFTC rules may differ significantly from the framework currently applicable under the CFTC's guidance. We are monitoring the progress of the lawsuit and assessing our contingency plans for the different scenarios that could result from it.

On January 16, 22 and 27, 2014, specified types of interest rate swaps and index credit default swaps were deemed "made available to trade" by CFTC-registered swap execution facilities (SEFs). As a result, since February 15, 21 and 26, 2014, those types of swaps have been required to be executed on a SEF or designated contract market, unless an exception or exemption applies. It is possible that certain market participants, including some of our clients or counterparties, will change their trading behavior as a result of these SEF requirements which could negatively affect swap trading revenue.

### Tax

On July 12, 2013, the US Treasury published a notice postponing the entry into force of FATCA by six months to July 1, 2014.

On August 29, 2013, Switzerland and the US signed a joint statement which provides a framework for Swiss banks' cooperation with the US authorities in their investigations focused on tax evasion. The framework applies to all Swiss banks except those banks, including Credit Suisse, which are the target of criminal investigations by the DOJ.

## EU

The EU, the UK and other national European jurisdictions have also proposed and enacted a wide range of prudential, securities and governance regulations to address systemic risk and to further regulate financial institutions, products and markets. These proposals are at various stages of the EU pre-legislative, legislative and rule making processes, and their final form and cumulative impact remain uncertain.

### Capital and prudential supervision

On June 27, 2013, the final text of the Capital Requirement Directive IV and Capital Requirements Regulation (CRD IV) was published in the Official Journal of the EU. With effect from January 1, 2014, CRD IV has replaced the current CRD with new measures implementing Basel III and other requirements. Compliance with these requirements will include receiving approval by the UK's Prudential Regulation Authority (PRA) of certain models with respect to regulatory capital requirements of our UK subsidiaries.

On July 22, 2013, the Alternative Investment Fund Managers Directive (AIFMD) entered into effect. The AIFMD establishes a comprehensive regulatory and supervisory framework for alternative investment fund managers (AIFMs) managing and/or marketing alternative investment funds (AIFs) in the EU. The AIFMD imposes various substantive requirements to authorized AIFMs, including increased transparency towards investors and regulators, and allows authorized AIFMs to market AIFs to professional investors throughout the EU under an "EU passport". The EU passport has been made available to authorized EU AIFMs since July 2013 and, subject to European Securities and Markets Authority (ESMA) and European Commission's positive opinion, is expected to be made available to authorized non-EU AIFMs from late 2015. In the meantime (and until at least 2018), non-EU AIFMs may continue to market within the EU under the private placement regimes of the individual member states subject to complying with certain minimum requirements imposed by the AIFMD and any additional requirements that individual member states may impose. The AIFMD also imposes a new, strict depositary regime affecting the manner in which prime brokers may provide custody services to fund managers. Although many member states have now implemented the AIFMD, a number of member states did not meet the transposition deadline of July 22, 2013. As clarified by ESMA, for EU AIFMs authorized under the AIFMD in a member state that has transposed the AIFMD, the passport system should be available even in a member state that has not transposed the AIFMD into national law. EU AIFMs established in EU member states that have not yet transposed the AIFMD cannot rely on the marketing and management passport in other member states.

On December 18, 2013, the UK Financial Services Act 2013 (Banking Reform Act) was enacted. Secondary legislation to fully implement the Banking Reform Act is expected to be completed by May 2015. The Banking Reform Act provides for the creation of a "retail ring-fence" that will prohibit large retail deposit banks from carrying out a broad range of investment and other banking activities in the same entity. Banks are expected to be required to comply with the ring-fencing requirements by 2019. However, it is expected that our Private Banking & Wealth Management business in the UK may benefit from the de minimis exemption from the retail ring-fence requirements which is anticipated to exclude certain banks that hold core deposits of below GBP 25 billion. The Banking Reform Act also introduces certain other reforms, including requirements for primary loss absorbing capacity in order to facilitate the use of the new bail-in tool, which is itself introduced by the Banking Reform Act. The Banking Reform Act will also establish a more stringent regulatory regime for certain senior personnel of the bank, as well as create a new criminal offense for reckless mismanagement in the banking industry. The governance rules and the bail-in tool will impact our UK entities, such as CSI and CSSEL.

On January 29, 2014, the EC published a draft Regulation on Structural Measures Improving the Resilience of EU Banks and Transparency of the Financial Sector which, if enacted, would introduce certain structural measures designed to reduce the risk and complexity of large banks in the EU. It is proposed that the measures would apply to EU banks which qualify as global systemically important institutions, or which have for a period of three consecutive years (i) total assets of at least EUR 30 billion, and (ii) trading activities amounting to at least EUR 70 billion or 10% of their total assets. These banks would be prohibited from engaging in proprietary trading in financial instruments and commodities and would become subject to anti-avoidance rules prohibiting certain transactions with the shadow banking sector. In addition, they may be required by their regulator to separate certain trading activities involving increased risks from their deposit-taking, lending and other business activities.

On January 14, 2014, the EC, European Parliament and European Council reached a political agreement on the MiFID II primary legislation and related regulation (MiFIR), which are scheduled to be enacted in the second quarter of 2014. It is expected that the provisions thereof will have to be implemented in the member states and expected to come into effect towards the end of 2016. Although the final text has not yet been published in the Official Journal of the European Union, the EC formally announced that an agreement has been reached to introduce an EU harmonized regime for the cross-border provision of investment services to professional and eligible counterparties in the EU. This new regime for granting access to EU markets for financial services providers based in third countries, including Switzerland, would be based on the positive equivalence determination of the prudential and business conduct requirements in place in the relevant third country jurisdiction by the EC and, subject to equivalence being found, allow for an EU wide passport when providing services to EU professional clients and eligible counterparties. Third country financial services providers would be able to continue to provide services and activities to such clients in member states in accordance with national regimes until three years after the adoption by the EC's of a positive equivalence decision.

### Derivative regulation

In March 2013, certain of the requirements of EMIR came into effect while others will be phased in. EMIR requires that certain standardized OTC derivatives contracts be centrally cleared and, where OTC transactions are not subject to central clearing, specified techniques are employed to monitor, measure and mitigate the operational and counterparty risks presented by those transactions. These risk mitigation techniques include trade confirmation, robust portfolio reconciliation and portfolio compression processes, exchange of margin, and the daily mark-to-market valuation of trades. Certain of these risk mitigation obligations came into effect on September 15, 2013. From February 12, 2014, EU counterparties subject to EMIR are required to report any derivative contract to a trade repository that is authorized or recognized under EMIR.

On September 3, 2013, the ESMA published its technical advice to the EC on the equivalence of a number of third-country derivative regimes with EMIR, recommending "conditional equivalence" for all third country regulatory regimes assessed, except for Switzerland and Australia's rules for central counterparties. The EC is expected to use ESMA advice to make its own assessment and decide whether to adopt an implementing act declaring a third country equivalent with EMIR. EC positive equivalence determination of a third country regime would allow EU counterparties trading with entities established in such third country to meet their EMIR obligations through compliance with the equivalent third country rules. "Conditional" equivalence was proposed by ESMA in relation to certain parts of the CFTC and SEC regimes whereby, subject to the implementation of a number of additional stipulations, adherence to the relevant US regimes would be deemed equivalent to EMIR.

### Resolution regime

On December 11, 2013, the European Parliament reached a political agreement with the European Council on a legislative proposal for a directive establishing a framework for the recovery and resolution of credit institutions and investment firms, known as the Bank Recovery and Resolution Directive. The framework will give national regulators wide-ranging powers (notably new bail-in powers) to intervene where an entity is likely to fail in order to avoid adverse effects on wider financial stability. It is anticipated that the Bank Recovery and Resolution Directive will enter into force on January 1, 2015 and the bail-in powers will become effective on January 1, 2016 at the latest. Our EU subsidiaries will be affected to varying degrees. The Single Resolution Mechanism regulation, agreed by the European Parliament and the European Council in March 2014, will apply substantially identical recovery and resolution powers as those contained within the Bank Recovery and Resolution Directive to institutions located in the eurozone.

On December 19, 2013, the PRA in the UK published updated rules on recovery and resolution plans under the Financial Services Act 2010. Covered entities are required to have recovery plans similar to those proposed by the EC. In addition, they are required to submit certain organizational data in order to allow the PRA and the Bank of England to draw up resolution plans. Credit Suisse provided relevant information to UK regulatory authorities based on existing guidance in 2012.

#### Tax

In January 2013, a group of eleven EU member states (Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia) proposed to adopt a financial transaction tax (FTT) applicable only for those countries, as a proposed EU-wide FTT was unsuccessful. If approved in the proposed form, the tax would apply to a wide range of financial transactions, including minimum rates of 0.01% for derivative products and 0.1% for other financial instruments. The tax would apply to certain financial transactions where at least one party is a financial institution, and at least one party is established in a participating member state. A financial institution may be, or be deemed to be, "established" in a participating member state in a broad range of circumstances, including (a) by transacting with a person established in a participating member state or (b) where the relevant financial instrument is issued in a participating member state. To become effective, the proposed FTT directive will require unanimous agreement of at least nine participating member states. The FTT proposal remains subject to negotiation among the participating member states and is the subject of legal challenge. It may therefore be altered significantly prior to any implementation, the timing of which remains unclear. Where a participating member state already has a financial transaction tax in place, such as France and Italy, the FTT would be expected to replace those existing national FTT regimes.

## REGULATORY FRAMEWORK

The principal regulatory structures that apply to our operations are discussed below.

### Switzerland

#### Banking regulation and supervision

Although Credit Suisse Group is not a bank according to the Bank Law, and its Implementing Ordinance of May 17, 1972, as amended (Implementing Ordinance), the Group is required, pursuant to the provisions on consolidated supervision of financial groups and conglomerates of the Bank Law, to comply with certain requirements for banks. Such requirements include capital adequacy, solvency and risk concentration on a consolidated basis, and certain reporting obligations. Our banks in Switzerland are regulated by FINMA on a legal entity basis and, if applicable, on a consolidated basis.

Our banks in Switzerland operate under banking licenses granted by FINMA pursuant to the Bank Law and the Implementing Ordinance. In addition, certain of these banks hold securities dealer licenses granted by FINMA pursuant to the Swiss Federal Act on Stock Exchanges and Securities Trading (SESTA).

FINMA is the sole bank supervisory authority in Switzerland and is independent from the SNB. Under the Bank Law, FINMA is responsible for the supervision of the Swiss banking system. The SNB is responsible for implementing the government's monetary policy relating to banks and securities dealers and for ensuring the stability of the financial system. Under the "Too Big to Fail" legislation, the SNB is also responsible for determining which banks in Switzerland are systemically relevant banks and which functions are systemically relevant in Switzerland. The SNB has identified the Group as a systemically relevant bank.

Our banks in Switzerland are subject to close and continuous prudential supervision and direct audits by FINMA. Under the Bank Law, our banks are subject to inspection and supervision by an independent auditing firm recognized by FINMA, which is appointed by the bank's shareholder meeting and required to perform annual audits of the bank's financial statements and to assess whether the bank is in compliance with laws and regulations, including the Bank Law, the Implementing Ordinance and FINMA regulations.

Swiss banks are subject to the Basel III framework and the Swiss "Too Big to Fail" legislation and regulations thereunder, which include capital, liquidity, leverage and large exposure requirements, and rule for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency.

Swiss banks are also required to maintain a specified liquidity standard pursuant to the Liquidity Ordinance (Liquidity Ordinance), which was adopted by the Swiss Federal Council in November 2012 and implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making. The Liquidity Ordinance entered into force on January 1, 2013. It requires appropriate management and monitoring of liquidity risks, and applies to all banks, but is tiered according to the type, complexity and degree of risk of a bank's activities. It also contains supplementary quantitative and qualitative requirements for systemically relevant banks, including us, which are generally consistent with existing FINMA liquidity requirements. In January 2014, the Swiss Federal Council and FINMA proposed revisions to the Liquidity Ordinance to reflect the final Basel III LCR rules. Under the proposal, systemically relevant banks like us will be subject to an initial minimum LCR requirement of 100% beginning in 2015.

Our regulatory capital is calculated on the basis of accounting principles generally accepted in the US, with certain adjustments required by, or agreed with, FINMA.

▸ Refer to "Liquidity and funding management" and "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information regarding our current regulatory framework and expected changes to this framework affecting capital and liquidity standards.

Under Swiss banking law, banks and securities dealers are required to manage risk concentration within specific limits. Aggregated credit exposure to any single counterparty or a group of related counterparties must bear an adequate relationship to the bank's core tier 1 capital, taking into account counterparty risks and risk mitigation instruments.

Under the Bank Law and SESTA, Swiss banks and securities dealers are obligated to keep confidential the existence and all aspects of their relationships with customers. These customer confidentiality laws do not, however, provide protection with respect to criminal offenses such as insider trading, money laundering, terrorist financing activities, tax fraud or evasion or prevent the disclosure of information to courts and administrative authorities.

Swiss rules and regulations to combat money laundering and terrorist financing are comprehensive and require banks and other financial intermediaries to thoroughly verify and document customer identity before commencing business. In addition, these rules and regulations include obligations to maintain appropriate policies for dealings with politically exposed persons and procedures and controls to detect and prevent money laundering and terrorist financing activities, including reporting suspicious activities to authorities.

Since January 1, 2010, compensation design and its implementation and disclosure must comply with standards promulgated by FINMA under its Circular on Remuneration Schemes.

### Securities dealer and asset management regulation and supervision

Our securities dealer activities in Switzerland are conducted primarily through the Bank and are subject to regulation under SESTA, which regulates all aspects of the securities dealer business in Switzerland, including regulatory capital, risk concentration, sales and trading practices, record-keeping requirements and procedures and periodic reporting procedures. Securities dealers are supervised by FINMA.

Our asset management activities in Switzerland, which include the establishment and administration of mutual funds registered for public distribution, are conducted under the supervision of FINMA.

### Resolution regime

The Banking Insolvency Ordinance-FINMA (the Banking Insolvency Ordinance) governs resolution (i.e., restructuring or liquidation) procedures of Swiss banks and securities dealers, such as Credit Suisse AG. Instead of prescribing a particular resolution concept, the Banking Insolvency Ordinance provides FINMA with a significant amount of authority and discretion in the case of resolution, as well as various restructuring tools from which FINMA may choose.

FINMA may open resolution proceedings if there is justified concern that the relevant Swiss bank is over-indebted, has serious liquidity problems or no longer fulfills capital adequacy requirements. However, the proceedings may only take the form of restructuring (rather than liquidation) proceedings if (i) the recovery of, or the continued provision of individual banking services by, the relevant bank appears likely and (ii) the creditors of the relevant bank are likely better off in restructuring proceedings than in liquidation proceedings. All realizable assets in the relevant bank's possession will be subject to such proceedings, regardless of where they are located.

If FINMA were to open restructuring proceedings with respect to Credit Suisse AG, it would have discretion to take decisive actions, including (i) transferring the bank's assets or a portion thereof, together with its debt and other liabilities and contracts, to another entity, (ii) staying (for a maximum of 48 hours) the termination of, and the exercise of rights to terminate relating to, financial contracts to which the bank is a party, (iii) converting the bank's debt into equity (a "debt-to-equity swap"), and/or (iv) partially or fully writing off the bank's obligations (a "haircut").

Prior to any debt-to equity swap or haircut, outstanding equity capital and debt instruments issued by Credit Suisse AG that are part of its regulatory capital (including the bank's outstanding high trigger capital instruments and low trigger capital instruments) must be converted or written-off (as applicable) and cancelled. Any debt-to-equity swap, (but not any haircut) would have to follow the hierarchy of claims to the extent such debt is not excluded from such conversion by the Banking Insolvency Ordinance. Contingent liabilities of Credit Suisse AG such as guarantees could also be subjected to a debt-to-equity swap or a haircut to the extent amounts are due and payable thereunder at any time during restructuring proceedings. For systemically relevant banks such as Credit Suisse AG, creditors have no right to reject the restructuring plan approved by FINMA.

## US

### Banking regulation and supervision

Our banking operations are subject to extensive federal and state regulation and supervision in the US. Our direct US offices are composed of our New York Branch and representative offices in California. Each of these offices is licensed with, and subject to examination and regulation by, the state banking authority in the state in which it is located.

Our New York Branch is licensed by the New York Superintendent of Financial Services (Superintendent), examined by the New York State Department of Financial Services, and subject to laws and regulations applicable to a foreign bank operating a New York branch. Under the New York Banking Law, our New York Branch must maintain eligible assets with banks in the state of New York. The amount of eligible assets required, which is expressed as a percentage of third-party liabilities, would increase if our New York Branch is no longer designated well rated by the Superintendent.

The New York Banking Law authorizes the Superintendent to seize our New York Branch and all of our business and property in New York State (which includes property of our New York Branch, wherever it may be located, and all of our property situated in New York State) under circumstances generally including violations of law, unsafe or unsound practices or insolvency. In liquidating or dealing with our New York Branch's business after taking possession, the Superintendent would only accept for payment the claims of depositors and other creditors (unaffiliated with us) that arose out of transactions with our New York Branch. After the claims of those creditors were paid out of the business and property of the Bank in New York, the Superintendent would turn over the remaining assets, if any, to us or our liquidator or receiver.

Under New York Banking Law and US federal banking laws, our New York Branch is generally subject to single borrower lending limits expressed as a percentage of the worldwide capital of the Bank. Under the Dodd-Frank Act, lending limits take into account credit exposure arising from derivative transactions, securities borrowing and lending transactions and repurchase and reverse repurchase agreements with counterparties.

Our operations are also subject to reporting and examination requirements under US federal banking laws. Our US non-banking operations are subject to examination by the Fed in its capacity as our US umbrella supervisor. The New York Branch is also subject to examination by the Fed and is subject to Fed requirements and limitations on the acceptance and maintenance of deposits. Because the New York Branch does not engage in retail deposit taking, it is not a member of, and its deposits are not insured by, the FDIC.

US federal banking laws provide that a state-licensed branch (such as the New York Branch) or agency of a foreign bank may not, as a general matter, engage as principal in any type of activity that is not permissible for a federally licensed branch or agency of a foreign bank unless the Fed has determined that such activity is consistent with sound banking practice. In addition, regulations which the FSOC and the Fed may adopt could affect the nature of the activities which the Bank (including the New York Branch) may conduct, and may impose restrictions and limitations on the conduct of such activities.

The Fed may terminate the activities of a US branch or agency of a foreign bank if it finds that the foreign bank: (i) is not subject to comprehensive supervision in its home country; (ii) has violated the law or engaged in an unsafe or unsound banking practice in the US; or (iii) for a foreign bank that presents a risk to the stability of the US financial system, the home country of the foreign bank has not adopted, or made demonstrable progress toward adopting, an appropriate system of financial regulation to mitigate such risk.

A major focus of US policy and regulation relating to financial institutions has been to combat money laundering and terrorist financing. These laws and regulations impose obligations to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing, verify the identity of customers and comply with economic sanctions. Any failure to maintain and implement adequate programs to combat money laundering and terrorist financing, and violations of such economic sanctions, laws and regulations, could have serious legal and reputational consequences. We take our obligations to prevent money laundering and terrorist financing in the US and globally very seriously, while appropriately respecting and protecting the confidentiality of clients. We have policies, procedures and training intended to ensure that our employees comply with "know your customer" regulations and understand when a client relationship or business should be evaluated as higher risk for us.

Credit Suisse Group and the Bank became financial holding companies for purposes of US federal banking law in 2000 and, as a result, may engage in a broad range of non-banking activities in the US, including insurance, securities, private equity and other financial activities, in each case subject to regulatory requirements and limitations. Credit Suisse Group is still required to obtain the prior approval of the Fed (and potentially other US banking regulators) before acquiring, directly or indirectly, the ownership or control of more than 5% of any class of voting shares of (or otherwise controlling) any US bank, bank holding company or many other US depositary institutions and their holding companies, and as a result of the Dodd-Frank Act, before making certain acquisitions involving large non-bank companies. The New York Branch is also restricted from engaging in certain tying arrangements involving products and services, and in certain transactions with certain of its affiliates. If Credit Suisse Group or the Bank ceases to be well-capitalized or well-managed under applicable Fed rules, or otherwise fails to meet any of the requirements for financial holding company status, it may be required to discontinue certain financial activities or terminate its New York Branch. Credit Suisse Group's ability to undertake acquisitions permitted by financial holding companies could also be adversely affected.

The Dodd-Frank Act requires issuers with listed securities to establish a claw-back policy to recoup erroneously awarded compensation in the event of an accounting restatement, although it is currently unclear if this requirement will apply to foreign private issuers, like the Group.

### Broker-dealer and asset management regulation and supervision

Our US broker-dealers are subject to extensive regulation by US regulatory authorities. The SEC is the federal agency primarily responsible for the regulation of broker-dealers, investment advisers and investment companies. In addition, the US Treasury has the authority to promulgate rules relating to US Treasury and government agency securities, the Municipal Securities Rulemaking Board (MSRB) has the authority to promulgate rules relating to municipal securities, and the MSRB also promulgates regulations applicable to certain securities credit transactions. In addition, broker-dealers are subject to regulation by securities industry self-regulatory organizations, including the Financial Industry Regulation Authority (FINRA), and by state securities authorities.

Our US broker-dealers are registered with the SEC and our primary US broker-dealer is registered in all 50 states, the District of Columbia, Puerto Rico and the US Virgin Islands. Our US registered entities are subject to extensive regulatory requirements that apply to all aspects of their securities, including where applicable: capital requirements; the use and safekeeping of customer funds and securities; the suitability of customer investments; record-keeping and reporting requirements; employee-related matters; limitations on extensions of credit in securities transactions; prevention and detection of money laundering and terrorist financing; procedures relating to research analyst independence; procedures for the clearance and settlement of trades; and communications with the public.

Our US broker-dealers are also subject to the SEC's net capital rule, which requires broker-dealers to maintain a specified level of minimum net capital in relatively liquid form. Compliance with the net capital rule could limit operations that require intensive use of capital, such as underwriting and trading activities and the financing of customer account balances and also could restrict our ability to withdraw capital from our broker-dealers. Our US broker-dealers are also subject to the net capital requirements of FINRA and, in some cases, other self-regulatory organizations.

Our securities and asset management businesses include legal entities registered and regulated as a broker-dealer and investment adviser by the SEC. The SEC-registered mutual funds that we advise are subject to the Investment Company Act of 1940. For pension fund customers, we are subject to the Employee Retirement Income Security Act of 1974 and similar state statutes.

The Dodd-Frank Act grants the SEC discretionary rule-making authority to impose a new fiduciary standard on brokers, dealers and investment advisers and expands the extraterritorial jurisdiction of US courts over actions brought by the SEC or the US with respect to violations of the antifraud provisions in the Securities Act of 1933, Securities Exchange Act of 1934 and Investment Advisers Act of 1940. It also requires broader regulation of hedge funds and private equity funds, as well as credit rating agencies.

### Derivative regulation and supervision

The CFTC is the federal agency primarily responsible for the regulation of futures commission merchants, commodity pool operators and commodity trading advisors. With the effectiveness of the Dodd-Frank Act, these CFTC registration categories have been expanded to include persons engaging in a relevant activity with respect to swaps, and new registration categories have been added for swap dealers and major swap participants. For futures and swap activities, these CFTC registrants are subject to futures industry self-regulatory organizations such as the National Futures Association (NFA).

Each of CSI and CSSEL is registered with the CFTC as a swap dealer as a result of its swap activities with US persons and is therefore subject to requirements relating to reporting, record-keeping, swap confirmation, swap portfolio reconciliation and compression, mandatory clearing, mandatory exchange-trading, swap trading relationship documentation, external business conduct, risk management, chief compliance officer duties and reports and internal controls. It is anticipated that the CFTC will in 2014 finalize rules related to capital and margin requirements and position limits, as well as potentially expand the scope of its mandatory clearing and exchange-trading requirements to cover certain types of foreign exchange transactions.

One of our US broker-dealers, Credit Suisse Securities USA LLC, is also registered as a futures commission merchant and subject to the capital, segregation and other requirements of the CFTC and the NFA.

Our asset management businesses include legal entities registered and regulated as commodity pool operators and commodity trading advisors by the CFTC and the NFA.

In addition, we expect the SEC to finalize its rules implementing the derivatives provisions of the Dodd-Frank Act during 2014. While the SEC's proposals have largely paralleled many of the CFTC's rules, significant differences between the final CFTC and SEC rules could materially increase the compliance costs associated with, and hinder the efficiency of, our equity and credit derivatives businesses with US persons. In particular, significant differences between the SEC rules regarding capital, margin and segregation requirements for OTC derivatives and related CFTC rules, as well as the cross-border application of SEC and CFTC rules, could have such effects.

### Resolution regime

The Dodd-Frank Act also establishes an "Orderly Liquidation Authority", a new regime for the orderly liquidation of systemically significant non-bank financial companies, which could potentially apply to certain of our US entities. To finance a resolution under this new regime, the FDIC may borrow funds from the US Treasury, which must be repaid from the proceeds of the resolution. If such proceeds are insufficient to repay the US Treasury in full, the FDIC is required to assess other large financial institutions, including those that have USD 50 billion or more in total consolidated assets, such as us, in an amount sufficient to repay all of the funds borrowed from the US Treasury in connection with the liquidation under the Orderly Liquidation Authority. In addition, in 2011 the Fed and the FDIC approved final rules to implement the resolution plan requirement in the Dodd-Frank Act, which require bank holding companies with total consolidated assets of USD 50 billion or more, such as us, and certain designated non-bank financial firms to submit annually to the Fed and the FDIC resolution plans describing the strategy for rapid and orderly resolution under the US Bankruptcy Code or other applicable insolvency regimes, though such plans may not rely on the Orderly Liquidation Authority.

### FATCA

FATCA became law in the US on March 18, 2010. The legislation requires Foreign Financial Institutions (FFIs) (such as Credit Suisse) to enter into an FFI agreement and agree to identify and provide the US Internal Revenue Service (IRS) with information on accounts held by US persons and certain US-owned foreign entities, or otherwise face 30% withholding tax on withholdable payments. In addition, FFIs that have entered into an FFI agreement will be required to withhold on such payments made to FFIs that have not entered into an FFI agreement, account holders who fail to provide sufficient information to classify an account as a US or non-US account, and US account holders who do not agree to the FFI reporting their account to the IRS. Switzerland and the US entered into an intergovernmental agreement to implement the reporting and withholding tax provisions of FATCA in February 2013 and the Swiss Parliament ratified it in September 2013. FATCA requirements enter into force on July 1, 2014. The intergovernmental agreement will enable FFIs in Switzerland to comply with FATCA while remaining in compliance with Swiss law. Under the agreement, US authorities may ask Swiss authorities for administrative assistance in connection with group requests where consent to provide information regarding potential US accounts is not provided to the FFI. Complying with the required identification, withholding and reporting obligations requires significant investment in an FFI's compliance and reporting framework. We are continuing to follow developments regarding FATCA closely and are coordinating with all relevant authorities.

## EU

### Financial services regulation and supervision

Since it was announced in 1999, the EU's Financial Services Action Plan has given rise to numerous measures (both directives and regulations) aimed at increasing integration and harmonization in the European market for financial services. While regulations have immediate and direct effect in member states, directives must be implemented through national legislation. As a result, the terms of implementation of directives are not always consistent from country to country. In response to the financial crisis and in order to strengthen European supervisory arrangements, the EU established the European Systemic Risk Board, which has macro-prudential oversight of the financial system. The EU has also established three supervisory authorities responsible for promoting greater harmonization and consistent application of EU legislation by national regulators: the European Banking Authority, the European Securities and Markets Authority and the European Insurance and Occupational Pensions Authority.

The CRD IV came into force on January 1, 2014. The CRD IV implemented in various EU countries, including the UK, the Basel III capital framework for banking groups operating in the EU. The CRD IV wholly replaced the current Capital Requirements Directive, which implemented the Basel II capital framework. The CRD IV creates a single harmonized prudential rule book for banks, introduces new corporate governance and certain new remuneration requirements, including a cap on variable remuneration, and enhances the powers of regulators.

The existing Markets in Financial Instruments Directive (MiFID I) establishes high-level organizational and business conduct standards that apply to all investment firms. These include standards for managing conflicts of interest, best execution, enhanced investor protection, including client classification, and the requirement to assess suitability and appropriateness in providing investment services to clients. MiFID I sets standards for regulated markets (i.e., exchanges) and multilateral trading facilities, and sets out pre-trade and post-trade price transparency requirements for equity trading. MiFID I also sets standards for the disclosure of fees and other payments received from or paid to third parties in relation to investment advice and services and regulates investment services relating to commodity derivatives. In relation to these and other EU-based investment services and activities, MiFID I introduced a "passport" for investment firms, enabling them to conduct cross-border activities and establish branches throughout the EU on the basis of authorization from their home state regulator. It is anticipated that MiFID I will be significantly reformed by MiFID II, which is expected to be implemented in the member states and come into force during the second half of 2016.

The Single Supervisory Mechanism has entered into force and it empowers the European Central Bank (ECB) as a single supervisor for banks in the 17 eurozone countries and for certain non-eurozone countries which may choose to participate in the Single Supervisory Mechanism. The ECB is expected to assume its prudential supervisory duties on November 4, 2014.

## UK

### Banking regulation and supervision

The Financial Services Authority (FSA) was the principal statutory regulator of financial services activity in the UK, deriving its powers from the Financial Services and Markets Act 2000 (FSMA). In April 2013, the FSA was replaced by: the PRA, a subsidiary of the Bank of England, which is responsible for the micro-prudential regulation of banks and larger investment firms; and the Financial Conduct Authority (FCA), which regulates markets, the conduct of business of all financial firms, and the prudential regulation of firms not regulated by the PRA. In addition, the Financial Policy Committee of the Bank of England was established as responsible for macro-prudential regulation.

As a member state of the EU, the UK is required to implement EU directives into national law. The regulatory regime for banks operating in the UK conforms to required EU standards including compliance with capital adequacy standards, customer protection requirements, conduct of business rules and anti-money laundering rules. These standards, requirements and rules are similarly implemented, under the same directives, throughout the other member states of the EU in which we operate.

CSI, Credit Suisse (UK) Limited and Credit Suisse AG, London Branch are authorized to take deposits. We also have a number of entities authorized to conduct investment business and asset management activities. In deciding whether to grant authorization, the PRA must first determine whether a firm satisfies the threshold conditions for authorization, which includes suitability and the requirement for the firm to be fit and proper. In addition to regulation by the PRA, certain wholesale money markets activities are subject to the Non-Investment Products Code, a voluntary code of conduct published by the Bank of England which PRA-regulated firms are expected to follow when conducting wholesale money market business.

Our London Branch will be required to continue to comply principally with Swiss home country regulation. However, as a response to the global financial crisis, the PRA made changes to its prudential supervision rules in its Handbook of Rules and Guidance, applying a principle of "self-sufficiency", such that CSI, CSSEL and Credit Suisse (UK) Limited are required to maintain adequate liquidity resources, under the day-to-day supervision of the entity's senior management, held in a custodian account in the name of the entity, unencumbered and attributed to the entity balance sheet. In addition, the PRA requires CSI, CSSEL and Credit Suisse (UK) Limited to maintain a minimum capital ratio and to monitor and report large exposures in accordance with the rules implementing the CRD.

The PRA has implemented the requirements of CRD IV, which replaced the current CRD as a whole, and imposed a 1:1 cap on variable remuneration which can rise to 1:2 with explicit shareholder approval.

### Broker-dealer and asset management regulation and supervision

Our London bank and broker-dealer subsidiaries are authorized under the FSMA and are subject to regulation by the PRA and FCA. In addition, our asset management companies are authorized under the FSMA and are subject to regulation by the FCA. In deciding whether to authorize an investment firm in the UK, the PRA and FCA will consider the threshold conditions, which includes suitability and the general requirement for a firm to be fit and proper. The PRA and FCA are responsible for regulating most aspects of an investment firm's business, including its regulatory capital, sales and trading practices, use and safekeeping of customer funds and securities, record-keeping, margin practices and procedures, registration standards for individuals carrying on certain functions, anti-money laundering systems and periodic reporting and settlement procedures.

### Tax

Since January 1, 2011, there has been a levy attributable to the UK operations of large banks on certain funding came into effect. During 2013, the levy was 13 basis points for short-term liabilities and 6.5 basis points for long-term equity and liabilities. The levy increased with effect from January 1, 2014 to 15.6 basis points and 7.8 basis points, respectively. The UK government has announced that it will introduce changes to the scope of the levy during 2014 which may have the effect of broadening the base upon which the levy is imposed.

# Risk factors

Our businesses are exposed to a variety of risks that could adversely affect our results of operations and financial condition, including, among others, those described below.

## LIQUIDITY RISK

Liquidity, or ready access to funds, is essential to our businesses, particularly our Investment Banking business. We maintain available liquidity to meet our obligations in a stressed liquidity environment.

▸ Refer to “Liquidity and funding management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for information on our liquidity management.

### Our liquidity could be impaired if we were unable to access the capital markets or sell our assets, and we expect our liquidity costs to increase

Our ability to borrow on a secured or unsecured basis and the cost of doing so can be affected by increases in interest rates or credit spreads, the availability of credit, regulatory requirements relating to liquidity or the market perceptions of risk relating to us or the banking sector, including our perceived or actual creditworthiness. An inability to obtain financing in the unsecured long-term or short-term debt capital markets, or to access the secured lending markets, could have a substantial adverse effect on our liquidity. In challenging credit markets, our funding costs may increase or we may be unable to raise funds to support or expand our businesses, adversely affecting our results of operations. Following the financial crisis in 2008 and 2009, our costs of liquidity have been significant and we expect to incur additional costs as a result of regulatory requirements for increased liquidity and the challenging economic environment in Europe, the US and elsewhere.

If we are unable to raise needed funds in the capital markets, we may need to liquidate unencumbered assets to meet our liabilities. In a time of reduced liquidity, we may be unable to sell some of our assets, or we may need to sell assets at depressed prices, which in either case could adversely affect our results of operations and financial condition.

### Our businesses rely significantly on our deposit base for funding

Our businesses benefit from short-term funding sources, including primarily demand deposits, inter-bank loans, time deposits and cash bonds. Although deposits have been, over time, a stable source of funding, this may not continue. In that case, our liquidity position could be adversely affected and we might be unable to meet deposit withdrawals on demand or at their contractual maturity, to repay borrowings as they mature or to fund new loans, investments and businesses.

### Changes in our ratings may adversely affect our business

Ratings are assigned by rating agencies. They may lower, indicate their intention to lower or withdraw their ratings at any time. The major rating agencies remain focused on the financial services industry, particularly on uncertainties as to whether firms that pose systemic risk would receive government or central bank support in a financial or credit crisis, and on such firms' potential vulnerability to market sentiment and confidence, particularly during periods of severe economic stress. For example, in July 2013, Standard & Poor's lowered its long-term counterparty credit ratings of several European banks, including us, by one notch. Further downgrades in our assigned ratings, including in particular our credit ratings, could increase our borrowing costs, limit our access to capital markets, increase our cost of capital and adversely affect the ability of our businesses to sell or market their products, engage in business transactions – particularly longer-term and derivatives transactions – and retain our clients.

## MARKET RISK

### We may incur significant losses on our trading and investment activities due to market fluctuations and volatility

Although we continued to reduce our balance sheet and accelerated the implementation of our client-focused, capital-efficient strategy in 2013, we continue to maintain large trading and investment positions and hedges in the debt, currency and equity markets, and in private equity, hedge funds, real estate and other assets. These positions could be adversely affected by volatility in financial and other markets, that is, the degree to which prices fluctuate over a particular period in a particular market, regardless of market levels. To the extent that we own assets, or have net long positions, in any of those markets, a downturn in those markets could result in losses from a decline in the value of our net long positions. Conversely, to the extent that we have sold assets that we do not own or have net short positions in any of those markets, an upturn in those markets could expose us to potentially significant losses as we attempt to cover our net short positions by acquiring assets in a rising market. Market fluctuations, downturns and volatility can adversely affect the fair value of our positions and our results of operations. Adverse market or economic conditions or trends have caused, and in the future may cause, a significant decline in our net revenues and profitability.

### Our businesses are subject to the risk of loss from adverse market conditions and unfavorable economic, monetary, political, legal and other developments in the countries we operate in around the world

As a global financial services company, our businesses are materially affected by conditions in the financial markets and economic conditions generally in Europe, the US and elsewhere around the world. The recovery from the economic crisis of 2008 and 2009 continues to be sluggish in several key developed markets. Additionally, the European sovereign debt crisis, as well as concerns over US debt levels and the federal budget process that led to the downgrade of US sovereign debt in 2011 and the temporary shutdown of many federal governmental operations in October 2013, have not been permanently resolved. Our financial condition and results of operations could be materially adversely affected if these conditions do not improve, or if they stagnate or worsen. Further, various countries in which we operate or invest have experienced severe economic disruptions particular to that country or region, including extreme currency fluctuations, high inflation, or low or negative growth, among other negative conditions. In 2013, concerns about weaknesses in the economic and fiscal condition of certain European countries, including Croatia, Cyprus, Greece, Ireland, Italy, Portugal and Spain, continued, especially with regard to how such weaknesses might affect other economies as well as financial institutions (including us) which lent funds to or did business with or in those countries. Continued concern about the European sovereign debt crisis could cause disruptions in market conditions in Europe and around the world. Economic disruption in other countries, even in countries in which we do not currently conduct business or have operations, could adversely affect our businesses and results.

Adverse market and economic conditions continue to create a challenging operating environment for financial services companies. In particular, the impact of interest and currency exchange rates, the risk of geopolitical events, fluctuations in commodity prices, the European sovereign debt crisis and the US federal debt crisis have affected financial markets and the economy. In recent years, the low interest rate environment has adversely affected our net interest income and the value of our trading and non-trading fixed income portfolios. In addition, movements in equity markets have affected the value of our trading and non-trading equity portfolios, while the strength of the Swiss franc has adversely affected our revenues and net income.

Such adverse market or economic conditions may reduce the number and size of investment banking transactions in which we provide underwriting, mergers and acquisitions advice or other services and, therefore, may adversely affect our financial advisory and underwriting fees. Such conditions may adversely affect the types and volumes of securities trades that we execute for customers and may adversely affect the net revenues we receive from commissions and spreads. In addition, several of our businesses engage in transactions with, or trade in obligations of, governmental entities, including super-national, national, state, provincial, municipal and local authorities. These activities can expose us to enhanced sovereign, credit-related, operational and reputational risks, including the risks that a governmental entity may default on or restructure its obligations or may claim that actions taken by government officials were beyond the legal authority of those officials, which could adversely affect our financial condition and results of operations.

Unfavorable market or economic conditions have affected our businesses over the last few years, including the low interest rate environment, continued cautious investor behavior and subdued mergers and acquisitions activity. These negative factors have been reflected in lower commissions and fees from our client-flow sales and trading and asset management activities, including commissions and fees that are based on the value of our clients' portfolios. Investment performance that is below that of competitors or asset management benchmarks could result in a decline in assets under management and related fees and make it harder to attract new clients. There has been a fundamental shift in client demand away from more complex products and significant client deleveraging, and our Private Banking & Wealth Management division's results of operations have been and could continue to be adversely affected as long as this continues.

Adverse market or economic conditions have also negatively affected our private equity investments since, if a private equity investment substantially declines in value, we may not receive any increased share of the income and gains from such investment (to which we are entitled in certain cases when the return on such investment exceeds certain threshold returns), may be obligated to return to investors previously received excess carried interest payments and may lose our pro rata share of the capital invested. In addition, it could become more difficult to dispose of the investment, as even investments that are performing well may prove difficult to exit.

In addition to the macroeconomic factors discussed above, other events beyond our control, including terrorist attacks, military conflicts, economic or political sanctions, disease pandemics, political unrest or natural disasters could have a material adverse effect on economic and market conditions, market volatility and financial activity, with a potential related effect on our businesses and results.

**We may incur significant losses in the real estate sector**

We finance and acquire principal positions in a number of real estate and real estate-related products, primarily for clients, and originate loans secured by commercial and residential properties. As of December 31, 2013, our real estate loans (as reported to the SNB) totaled approximately CHF 137 billion. We also securitize and trade in commercial and residential real estate and real estate-related whole loans, mortgages, and other real estate and commercial assets and products, including commercial and residential mortgage-backed securities. Our real estate-related businesses and risk exposures could continue to be adversely affected by any downturn in real estate markets, other sectors and the economy as a whole. In particular, the risk of potential price corrections in the real estate market in certain areas of Switzerland could have a material adverse effect on our real estate-related businesses.

**Holding large and concentrated positions may expose us to large losses**

Concentrations of risk could increase losses, given that we have sizeable loans to, and securities holdings in, certain customers, industries or countries. Decreasing economic growth in any sector in which we make significant commitments, for example, through underwriting, lending or advisory services, could also negatively affect our net revenues.

We have significant risk concentration in the financial services industry as a result of the large volume of transactions we routinely conduct with broker-dealers, banks, funds and other financial institutions, and in the ordinary conduct of our business we may be subject to risk concentration with a particular counterparty. We, like other financial institutions, continue to adapt our practices and operations in consultation with our regulators to better address an evolving understanding of our exposure to, and management of, systemic risk and risk concentration to financial institutions. Regulators continue to focus on these risks, and there are numerous new regulations and government proposals, and significant ongoing regulatory uncertainty, about how best to address them. There can be no assurance that the changes in our industry, operations, practices and regulation will be effective in managing this risk.

▸ Refer to “Regulation and supervision” for further information.

Risk concentration may cause us to suffer losses even when economic and market conditions are generally favorable for others in our industry.

**Our hedging strategies may not prevent losses**

If any of the variety of instruments and strategies we use to hedge our exposure to various types of risk in our businesses is not effective, we may incur losses. We may be unable to purchase hedges or be only partially hedged, or our hedging strategies may not be fully effective in mitigating our risk exposure in all market environments or against all types of risk.

**Market risk may increase the other risks that we face**

In addition to the potentially adverse effects on our businesses described above, market risk could exacerbate the other risks that we face. For example, if we were to incur substantial trading losses, our need for liquidity could rise sharply while our access to liquidity could be impaired. In conjunction with another market downturn, our customers and counterparties could also incur substantial losses of their own, thereby weakening their financial condition and increasing our credit and counterparty risk exposure to them.

## CREDIT RISK

**We may suffer significant losses from our credit exposures**

Our businesses are subject to the fundamental risk that borrowers and other counterparties will be unable to perform their obligations. Our credit exposures exist across a wide range of transactions that we engage in with a large number of clients and counterparties, including lending relationships, commitments and letters of credit, as well as derivative, currency exchange and other transactions. Our exposure to credit risk can be exacerbated by adverse economic or market trends, as well as increased volatility in relevant markets or instruments. In addition, disruptions in the liquidity or transparency of the financial markets may result in our inability to sell, syndicate or realize the value of our positions, thereby leading to increased concentrations. Any inability to reduce these positions may not only increase the market and credit risks associated with such positions, but also increase the level of risk-weighted assets on our balance sheet, thereby increasing our capital requirements, all of which could adversely affect our businesses.

▸ Refer to “Credit risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management for information on management of credit risk.

Our regular review of the creditworthiness of clients and counterparties for credit losses does not depend on the accounting treatment of the asset or commitment. Changes in creditworthiness of loans and loan commitments that are fair valued are reflected in trading revenues.

Management’s determination of the provision for loan losses is subject to significant judgment. Our banking businesses may need to increase their provisions for loan losses or may record losses in excess of the previously determined provisions if our original estimates of loss prove inadequate, which could have a material adverse effect on our results of operations.

▸ Refer to “Credit risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management and “Note 1 – Summary of significant accounting policies”, “Note 10 – Provision for credit losses” and “Note 18 – Loans, allowance for loan losses and credit quality” in V – Consolidated financial statements – Credit Suisse Group for information on provisions for loan losses and related risk mitigation.

We have experienced in the past, and may in the future experience, competitive pressure to assume longer-term credit risk, extend credit against less liquid collateral and price derivative instruments more aggressively based on the credit risks that we take. We expect our capital and liquidity requirements, and those of the financial services industry, to increase as a result of these risks.

**Defaults by a large financial institution could adversely affect financial markets generally and us specifically**

Concerns or even rumors about or a default by one institution could lead to significant liquidity problems, losses or defaults by other institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships between institutions. This risk is sometimes referred to as systemic risk. Concerns about defaults by and failures of many financial institutions, particularly those with significant exposure to the eurozone, continued in 2013 and could continue to lead to losses or defaults by financial institutions and financial intermediaries with which we interact on a daily basis, such as clearing agencies, clearing houses, banks, securities firms and exchanges. Our credit risk exposure will also increase if the collateral we hold cannot be realized upon or can only be liquidated at prices insufficient to cover the full amount of exposure.

**The information that we use to manage our credit risk may be inaccurate or incomplete**

Although we regularly review our credit exposure to specific clients and counterparties and to specific industries, countries and regions that we believe may present credit concerns, default risk may arise from events or circumstances that are difficult to foresee or detect, such as fraud. We may also fail to receive full information with respect to the credit or trading risks of a counterparty.

## RISKS FROM ESTIMATES AND VALUATIONS

We make estimates and valuations that affect our reported results, including measuring the fair value of certain assets and liabilities, establishing provisions for contingencies and losses for loans, litigation and regulatory proceedings, accounting for goodwill and intangible asset impairments, evaluating our ability to realize deferred tax assets, valuing equity-based compensation awards, modeling our risk exposure and calculating expenses and liabilities associated with our pension plans. These estimates are based upon judgment and available information, and our actual results may differ materially from these estimates.

▸ Refer to “Critical accounting estimates” in II – Operating and financial review and “Note 1 – Summary of significant accounting policies” in V – Consolidated financial statements – Credit Suisse Group for information on these estimates and valuations.

Our estimates and valuations rely on models and processes to predict economic conditions and market or other events that might affect the ability of counterparties to perform their obligations to us or impact the value of assets. To the extent our models and processes become less predictive due to unforeseen market conditions, illiquidity or volatility, our ability to make accurate estimates and valuations could be adversely affected.

## RISKS RELATING TO OFF-BALANCE SHEET ENTITIES

We enter into transactions with special purpose entities (SPEs) in our normal course of business, and certain SPEs with which we transact business are not consolidated and their assets and liabilities are off-balance sheet. We may have to exercise significant management judgment in applying relevant accounting consolidation standards, either initially or after the occurrence of certain events that may require us to reassess whether consolidation is required. Accounting standards relating to consolidation, and their interpretation, have changed and may continue to change. If we are required to consolidate an SPE, its assets and liabilities would be recorded on our consolidated balance sheets and we would recognize related gains and losses in our consolidated statements of operations, and this could have an adverse impact on our results of operations and capital and leverage ratios.

▸ Refer to “Off-balance sheet” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and contractual obligations for information on our transactions with and commitments to SPEs.

## CROSS-BORDER AND CURRENCY EXCHANGE RISK

**Cross-border risks may increase market and credit risks we face**

Country, regional and political risks are components of market and credit risk. Financial markets and economic conditions generally have been and may in the future be materially affected by such risks. Economic or political pressures in a country or region, including those arising from local market disruptions, currency crises, monetary controls or other factors, may adversely affect the ability of clients or counterparties located in that country or region to obtain foreign currency or credit and, therefore, to perform their obligations to us, which in turn may have an adverse impact on our results of operations.

**We may face significant losses in emerging markets**

As a global financial services company doing business in emerging markets, we are exposed to economic instability in emerging market countries. We monitor these risks, seek diversity in the sectors in which we invest and emphasize client-driven business. Our efforts at limiting emerging market risk, however, may not always succeed.

**Currency fluctuations may adversely affect our results of operations**

We are exposed to risk from fluctuations in exchange rates for currencies, particularly the US dollar. In particular, a substantial portion of our assets and liabilities are denominated in currencies other than the Swiss franc, which is the primary currency of our financial reporting. Our capital is also stated in Swiss francs and we do not fully hedge our capital position against changes in currency exchange rates. The Swiss franc remained strong against the US dollar and euro in 2013. The appreciation of the Swiss franc in particular and exchange rate volatility in general have had an adverse impact on our results of operations and capital position in recent years and may have such an effect in the future.

## OPERATIONAL RISK

**We are exposed to a wide variety of operational risks, including information technology risk**

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. In general, although we have business continuity plans, our businesses face a wide variety of operational risks, including technology risk that stems from dependencies on information technology, third-party suppliers and the telecommunications infrastructure. As a global financial services company, we rely heavily on our financial, accounting and other data processing systems, which are varied and complex. Our business depends on our ability to process a large volume of diverse and complex transactions, including derivatives transactions, which have increased in volume and complexity. We are exposed to operational risk arising from errors made in the execution, confirmation or settlement of transactions or in transactions not being properly recorded or accounted for. Regulatory requirements in this area have increased and are expected to increase further.

Information security, data confidentiality and integrity are of critical importance to our businesses. Despite our wide array of security measures to protect the confidentiality, integrity and availability of our systems and information, it is not always possible to anticipate the evolving threat landscape and mitigate all risks to our systems and information. We could also be affected by risks to the systems and information of clients, vendors, service providers, counterparties and other third parties.

If any of our systems do not operate properly or are compromised as a result of cyber-attacks, security breaches, unauthorized access, loss or destruction of data, unavailability of service, computer viruses or other events that could have an adverse security impact, we could be subject to litigation or suffer financial loss not covered by insurance, a disruption of our businesses, liability to our clients, regulatory intervention or reputational damage. Any such event could also require us to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures.

**We may suffer losses due to employee misconduct**

Our businesses are exposed to risk from potential non-compliance with policies, employee misconduct or negligence and fraud, which could result in regulatory sanctions and serious reputational or financial harm. In recent years, a number of multinational financial institutions have suffered material losses due to the actions of "rogue traders" or other employees. It is not always possible to deter employee misconduct and the precautions we take to prevent and detect this activity may not always be effective.

## RISK MANAGEMENT

We have risk management procedures and policies designed to manage our risk. These techniques and policies, however, may not always be effective, particularly in highly volatile markets. We continue to adapt our risk management techniques, in particular value-at-risk and economic capital, which rely on historical data, to reflect changes in the financial and credit markets. No risk management procedures can anticipate every market development or event, and our risk management procedures and hedging strategies, and the judgments behind them, may not fully mitigate our risk exposure in all markets or against all types of risk.

▸ Refer to "Risk management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for information on our risk management.

## LEGAL AND REGULATORY RISKS

**Our exposure to legal liability is significant**

We face significant legal risks in our businesses, and the volume and amount of damages claimed in litigation, regulatory proceedings and other adversarial proceedings against financial services firms are increasing.

We and our subsidiaries are subject to a number of material legal proceedings, regulatory actions and investigations, and an adverse result in one or more of these proceedings could have a material adverse effect on our operating results for any particular period, depending, in part, upon our results for such period.

▸ Refer to "Note 38 – Litigation" in V – Consolidated financial statements – Credit Suisse Group for information relating to these and other legal and regulatory proceedings involving our Investment Banking and other businesses.

It is inherently difficult to predict the outcome of many of the legal, regulatory and other adversarial proceedings involving our businesses, particularly those cases in which the matters are brought on behalf of various classes of claimants, seek damages of unspecified or indeterminate amounts or involve novel legal claims. Management is required to establish, increase or release reserves for losses that are probable and reasonably estimable in connection with these matters.

▸ Refer to "Critical accounting estimates" in II – Operating and financial review and "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group for more information.

**Regulatory changes may adversely affect our business and ability to execute our strategic plans**

As a participant in the financial services industry, we are subject to extensive regulation by governmental agencies, supervisory authorities and self-regulatory organizations in Switzerland, the EU, the UK, the US and other jurisdictions in which we operate around the world. Such regulation is increasingly more extensive and complex and, in recent years, costs related to our compliance with these requirements and the penalties and fines sought and imposed on the financial services industry by regulatory authorities have all increased significantly and may increase further. These regulations often serve to limit our activities, including through the application of increased capital, leverage and liquidity requirements, customer protection and market conduct regulations and direct or indirect restrictions on the businesses in which we may operate or invest. Such limitations can have a negative effect on our business and our ability to implement strategic initiatives. To the extent we are required to divest certain businesses, we could incur losses, as we may be forced to sell such businesses at a discount, which in certain instances could be substantial, as a result of both the constrained timing of such sales and the possibility that other financial institutions are liquidating similar investments at the same time.

Since 2008, regulators and governments have focused on the reform of the financial services industry, including enhanced capital, leverage and liquidity requirements, changes in compensation practices (including tax levies) and measures to address systemic risk, including potentially ring-fencing certain activities and operations within specific legal entities. We are already subject to extensive regulation in many areas of our business and expect to face increased regulation and regulatory scrutiny and enforcement. We expect such increased regulation to continue to increase our costs, including, but not limited to, costs related to compliance, systems and operations, as well as affecting our ability to conduct certain businesses, which could adversely affect our profitability and competitive position. Variations in the details and implementation of such regulations may further negatively affect us, as certain requirements currently are not expected to apply equally to all of our competitors or to be implemented uniformly across jurisdictions.

For example, the additional requirements related to minimum regulatory capital, leverage ratios and liquidity measures imposed by Basel III, together with more stringent requirements imposed by the Swiss "Too Big To Fail" legislation and its implementing ordinances and related actions by our regulators, have contributed to our decision to reduce risk-weighted assets and the size of our balance sheet, and could potentially impact our access to capital markets and increase our funding costs. In addition, the ongoing implementation in the US of the provisions of the Dodd-Frank Act, including the "Volcker Rule", derivatives regulation, and other regulatory developments described in "Regulation and supervision", have imposed, and will continue to impose, new regulatory burdens on certain of our operations. These requirements have contributed to our decision to exit certain businesses (including a number of our private equity businesses) and may lead us to exit other businesses. New CFTC and SEC rules could materially increase the operating costs, including compliance, information technology and related costs, associated with our derivatives businesses with US persons, while at the same time making it more difficult for us to transact derivatives business outside the US. Further, in February 2014, the Fed enacted a final rule under the Dodd-Frank Act that created a new framework for regulation of the US operations of foreign banking organizations such as ours. Although the final impact of the new rule cannot be fully predicted at this time, it is expected to result in our incurring additional costs and to affect the way we conduct our business in the US, including by requiring us to create a single US intermediate holding company. Similarly, recently enacted and possible future cross-border tax regulation with extraterritorial effect, such as the US Foreign Account Tax Compliance Act, and bilateral tax treaties, such as Switzerland's treaties with the UK and Austria, impose detailed reporting obligations and increased compliance and systems-related costs on our businesses. Finally, implementation of EMIR, CRD IV and the proposed revisions to MiFID II may negatively affect our business activities. If Switzerland does not pass legislation that is deemed equivalent to EMIR and MiFID II in a timely manner, Swiss banks, including us, may be limited from participating in businesses regulated by such laws.

We expect the financial services industry, including us, to continue to be affected by the significant uncertainty over the scope and content of regulatory reform in 2014 and beyond. Changes in laws, rules or regulations, or in their interpretation or enforcement, or the implementation of new laws, rules or regulations, may adversely affect our results of operations.

Despite our best efforts to comply with applicable regulations, a number of risks remain, particularly in areas where applicable regulations may be unclear or inconsistent among jurisdictions or where regulators revise their previous guidance or courts overturn previous rulings. Authorities in many jurisdictions have the power to bring administrative or judicial proceedings against us, which could result in, among other things, suspension or revocation of our licenses, cease and desist orders, fines, civil penalties, criminal penalties or other disciplinary action which could materially adversely affect our results of operations and seriously harm our reputation.

‣ Refer to "Regulation and supervision" for a description of our regulatory regime and a summary of some of the significant regulatory and government reform proposals affecting the financial services industry as well as to "Liquidity and funding management" and "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for information regarding our current regulatory framework and expected changes to this framework affecting capital and liquidity standards.

### Swiss resolution proceedings may affect our shareholders and creditors

Pursuant to Swiss banking laws, FINMA has broad powers and discretion in the case of resolution proceedings with respect to a Swiss bank, such as Credit Suisse AG. These broad powers include the power to cancel Credit Suisse AG's outstanding equity (which currently is Credit Suisse Group AG's primary asset), convert debt instruments and other liabilities of Credit Suisse AG into equity and cancel such liabilities in whole or in part. As of the date hereof, FINMA's broad resolution powers apply only to duly licensed banks in Switzerland such as Credit Suisse AG, and not to a parent company of a financial group such as Credit Suisse Group AG. However, a consultation process was recently launched regarding a proposed amendment to the Bank Law that would extend the scope of the Swiss bank resolution regime thereunder to Swiss parent companies of financial groups and certain other unregulated Swiss-domiciled companies belonging to a financial group. It is not possible to predict whether or when any such amendment will be enacted, what final form it would take and what effect it could have on shareholders or creditors of Credit Suisse Group AG or Credit Suisse Group AG generally. However, if the Bank Law were amended so that the same resolution regime that currently applies to Credit Suisse AG were to apply to Credit Suisse Group AG, FINMA would be able to exercise its resolution powers thereunder to, among other things, cancel Credit Suisse Group AG's outstanding equity, convert debt instruments and other liabilities of Credit Suisse Group AG into equity and cancel such liabilities in whole or in part in restructuring proceedings.

‣ Refer to "Recent regulatory developments and proposals – Switzerland" and "Regulatory framework – Switzerland – Resolution regime" in Regulation and supervision for a description of the current resolution regime under Swiss banking laws as it applies to Credit Suisse AG.

### Changes in monetary policy are beyond our control and difficult to predict

We are affected by the monetary policies adopted by the central banks and regulatory authorities of Switzerland, the US and other countries. The actions of the SNB and other central banking authorities directly impact our cost of funds for lending, capital raising and investment activities and may impact the value of financial instruments we hold and the competitive and operating environment for the financial services industry. Many central banks have implemented significant changes to their monetary policy. We cannot predict whether these changes will have a material adverse effect on us or our operations. In addition, changes in monetary policy may affect the credit quality of our customers. Any changes in monetary policy are beyond our control and difficult to predict.

**Legal restrictions on our clients may reduce the demand for our services**

We may be materially affected not only by regulations applicable to us as a financial services company, but also by regulations and changes in enforcement practices applicable to our clients. Our business could be affected by, among other things, existing and proposed tax legislation, antitrust and competition policies, corporate governance initiatives and other governmental regulations and policies, and changes in the interpretation or enforcement of existing laws and rules that affect business and the financial markets. For example, focus on tax compliance and changes in enforcement practices could lead to asset outflows (primarily from customers in mature Western European markets) from our Wealth Management Clients business in Switzerland.

**Any conversion of our convertible capital instruments will dilute the ownership interests of existing shareholders**

Under Swiss regulatory capital rules, we are required to issue a significant amount of contingent capital instruments, certain of which will convert into common equity upon the occurrence of specified triggering events, including our Basel III CET1 ratio falling below prescribed thresholds, or a determination by FINMA that conversion is necessary, or that we require public sector capital support, to prevent us from becoming insolvent. We have already issued in the aggregate an equivalent of CHF 8.1 billion in principal amount of such convertible contingent capital, and we may issue more such convertible contingent capital in the future. The conversion of some or all of our convertible contingent capital due to the occurrence of a triggering event will result in the dilution of the ownership interests of our then existing shareholders, which dilution could be substantial. Additionally, any conversion, or the anticipation of the possibility of a conversion, could depress the market price of our ordinary shares.

▸ Refer to "Banking relationships and related party transactions" in IV – Corporate Governance and Compensation – Corporate Governance for more information on the triggering events related to our convertible contingent capital instruments.

## COMPETITION

**We face intense competition**

We face intense competition in all financial services markets and for the products and services we offer. Consolidation through mergers, acquisitions, alliances and cooperation, including as a result of financial distress, has increased competitive pressures. Competition is based on many factors, including the products and services offered, pricing, distribution systems, customer service, brand recognition, perceived financial strength and the willingness to use capital to serve client needs. Consolidation has created a number of firms that, like us, have the ability to offer a wide range of products, from loans and deposit-taking to brokerage, investment banking and asset management services. Some of these firms may be able to offer a broader range of products than we do, or offer such products at more competitive prices. Current market conditions have resulted in significant changes in the competitive landscape in our industry as many institutions have merged, altered the scope of their business, declared bankruptcy, received government assistance or changed their regulatory status, which will affect how they conduct their business. In addition, current market conditions have had a fundamental impact on client demand for products and services. Although we expect the increasing consolidation and changes in our industry to offer opportunities, we can give no assurance that our results of operations will not be adversely affected.

**Our competitive position could be harmed if our reputation is damaged**

In the highly competitive environment arising from globalization and convergence in the financial services industry, a reputation for financial strength and integrity is critical to our performance, including our ability to attract and maintain clients and employees. Our reputation could be harmed if our comprehensive procedures and controls fail, or appear to fail, to address conflicts of interest, prevent employee misconduct, produce materially accurate and complete financial and other information or prevent adverse legal or regulatory actions.

▸ Refer to "Reputational risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management for more information.

**We must recruit and retain highly skilled employees**

Our performance is largely dependent on the talents and efforts of highly skilled individuals. Competition for qualified employees is intense. We have devoted considerable resources to recruiting, training and compensating employees. Our continued ability to compete effectively in our businesses depends on our ability to attract new employees and to retain and motivate our existing employees. The continued public focus on compensation practices in the financial services industry, and related regulatory changes, may have an adverse impact on our ability to attract and retain highly skilled employees. In particular, new limits on the amount and form of executive compensation imposed by recent regulatory initiatives, including the Ordinance Against Excessive Compensation in Switzerland and the implementation of CRD IV in the UK, could potentially have an adverse impact on our ability to retain certain of our most highly skilled employees and hire new qualified employees in certain businesses.

**We face competition from new trading technologies**

Our businesses face competitive challenges from new trading technologies, which may adversely affect our commission and trading revenues, exclude our businesses from certain transaction flows, reduce our participation in the trading markets and the associated access to market information and lead to the creation of new and stronger competitors. We have made, and may continue to be required to make, significant additional expenditures to develop and support new trading systems or otherwise invest in technology to maintain our competitive position.

## RISKS RELATING TO OUR STRATEGY

### We may not achieve all of the expected benefits of our strategic initiatives

In light of increasing regulatory and capital requirements and continued challenging market and economic conditions, to optimize our use of capital and improve our cost structure we have continued to adapt our client-focused, capital-efficient strategy and have implemented new cost-savings measures while decreasing the size of our balance sheet and reducing our risk-weighted assets. In the fourth quarter of 2013, we created non-strategic units within our Investment Banking and Private Banking & Wealth Management divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and positions and to shift resources to focus on our strategic businesses and growth initiatives. Factors beyond our control, including but not limited to the market and economic conditions, changes in laws, rules or regulations and other challenges discussed in this report, could limit our ability to achieve some or all of the expected benefits of these initiatives.

In addition, acquisitions and other similar transactions we undertake as part of our strategy subject us to certain risks. Even though we review the records of companies we plan to acquire, it is generally not feasible for us to review all such records in detail. Even an in-depth review of records may not reveal existing or potential problems or permit us to become familiar enough with a business to assess fully its capabilities and deficiencies. As a result, we may assume unanticipated liabilities (including legal and compliance issues), or an acquired business may not perform as well as expected. We also face the risk that we will not be able to integrate acquisitions into our existing operations effectively as a result of, among other things, differing procedures, business practices and technology systems, as well as difficulties in adapting an acquired company into our organizational structure. We face the risk that the returns on acquisitions will not support the expenditures or indebtedness incurred to acquire such businesses or the capital expenditures needed to develop such businesses.

We may also seek to engage in new joint ventures and strategic alliances. Although we endeavor to identify appropriate partners, our joint venture efforts may prove unsuccessful or may not justify our investment and other commitments.

### We have announced a program to evolve our legal entity structure and cannot predict its final form or potential effects

In November 2013, we announced key components of our program to evolve our legal entity structure. The program is designed to meet developing and future regulatory requirements. Subject to further analysis and approval by FINMA, implementation of the program is underway, with a number of key components expected to be implemented from mid-2015. This program remains subject to a number of uncertainties that may affect its feasibility, scope and timing. In addition, significant legal and regulatory changes affecting us and our operations may require us to make further changes in our legal structure. The implementation of these changes will require significant time and resources and may potentially increase operational, capital, funding and tax costs as well as our counterparties' credit risk.

▸ Refer to "Evolution of legal entity structure" in II – Operating and financial review – Credit Suisse – Information and developments for further information on our legal entity structure.

# II

# Operating and financial review

# Operating environment

Economic conditions improved in 2013, first in the US and then in Europe. Growth in emerging markets slowed, with China showing signs of stabilization. Equity markets ended the year higher. Interest rates remained low despite government bond yields rising over the course of the year. The performance of the US dollar against most major currencies was mixed.

## ECONOMIC ENVIRONMENT

Global gross domestic product growth improved in 2013 as economic indicators showed solid improvement and the risks of a renewed eurozone crisis waned. In the US, the unemployment rate fell to 6.7% by the end of the year, a five year low, and the housing market continued to improve. The eurozone economy began its recovery in the second half of the year and economic indicators remained consistent with ongoing expansion. The overall growth trend in emerging markets decelerated, and China showed signs of stabilization. Inflation fell in most developed countries; however, there was continued inflationary pressure in emerging markets.

The US Federal Reserve (Fed) announced after its June 2013 meeting that it might reduce the pace of its monthly financial asset purchases associated with its quantitative easing program later in the year, but it continued to signal its intent to keep rates low for the foreseeable future. Meanwhile, both the European Central Bank (ECB) and the Bank of England committed to keep interest rates low for a prolonged period. The ECB cut its main refinancing rate in two steps by 0.5%. Central banks in Brazil and Indonesia, on the other hand, increased interest rates in reaction to declining exchange rates and increasing inflationary pressure. The Bank of Japan announced a massive monetary stimulus program in April in order to achieve a 2% inflation target within two years. As part of the program the monetary base is targeted to almost double by year-end 2014.

Early in the year, equity markets benefited from easy monetary conditions and generally improved corporate earnings as well as moderately increased mergers and acquisitions (M&A) activity. However, renewed uncertainties over the election outcome in Italy combined with the Cyprus bail-out slowed momentum. By mid-year, fears of slowing economic growth, less monetary easing by the Fed and rising interest rates had contributed to underperformance in cyclical stocks, such as materials and energy company shares, and emerging markets. US markets and most European markets were resilient overall. Through the rest of the year, global equity markets had a strong performance, with most regions and all sectors posting solid gains. Equity market volatility, as indicated by the Chicago Board Options Exchange Market Volatility Index (VIX), started to increase in June, but then decreased through year-end despite a temporary spike at the end of August (refer to the charts "Equity markets"). The Credit Suisse Hedge Fund Index increased 9.7% in 2013.

### Yield curves

Yield curves increased across all maturities in 2013.

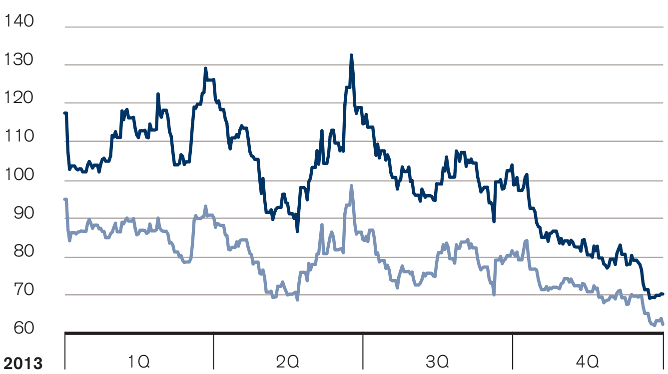
## Credit spreads

Credit spreads tightened in 2013 due to improved economic conditions.



**Source:** Bloomberg, Credit Suisse

In fixed income, major benchmark government bond yields were volatile, increasing significantly until the beginning of September. Following the Fed's mid-September announcement to maintain its pace of monthly asset purchases at USD 85 billion, yields declined and started to increase again through the end of the year when the Fed announced in mid-December its decision to reduce the pace of its monthly asset purchases to USD 75 billion. The fixed income market also reflected forward guidance from other central banks for low interest rates (refer to the charts "Yield curves"). High yield spreads tightened from their highs reached in June and posted a positive performance in 2013 (refer to the chart "Credit spreads"). Emerging market sovereign spreads were volatile, especially as exchange rate volatility affected those in local currency. Overall, emerging market hard currency and local currency bonds posted modest losses in 2013.

The US dollar had a mixed performance against most major currencies in 2013. The euro, Swiss franc and British pound appreciated versus the US dollar. The Swiss National Bank (SNB) maintained its minimum exchange rate for the euro against the Swiss franc at 1.20. Commodity currencies, such as the Australian and Canadian dollars, weakened versus the US dollar on lower growth and accommodative central bank policy. Emerging market economies, such as Brazil, India, South Africa and Turkey, experienced pressure on their foreign exchange rates as US yields increased. The Japanese yen continued to weaken against the US dollar in 2013.

With US yields rising and Chinese growth stabilizing, the environment for commodities has been challenging. Commodity markets generally benefited from stronger growth and suffered from rising bond yields. In 2013, the overall commodity index as measured by the Credit Suisse Commodity Benchmark finished the year 1.8% lower. Energy prices ended the year higher with the US benchmark West Texas Intermediate oil price gaining 5.6%. Gold was among the worst performing commodities during the year, with prices falling more than 28% to almost USD 1,200.

## Market volumes (growth in % year on year)

| 2013 | Global | Europe |
|---|---|---|
| Equity trading volume [1] | (3) | – |
| Announced mergers and acquisitions [2] | 8 | 3 |
| Completed mergers and acquisitions [2] | 2 | 23 |
| Equity underwriting [2] | 32 | 41 |
| Debt underwriting [2] | 1 | 10 |
| Syndicated lending – investment-grade [2] | 14 | – |

1 London Stock Exchange, Borsa Italiana, Deutsche Börse, BME and Euronext. Global also includes New York Stock Exchange and NASDAQ.
2 Dealogic.

### SECTOR ENVIRONMENT

The banking sector benefited from central bank measures while it continued to transition to new regulatory requirements. Global banks took significant steps to restructure businesses and decrease costs while also taking measures to increase capital and liquidity ratios. North American bank stocks performed in-line with global equity indices and ended the year 25% higher. European bank stocks finished the year 21% higher (refer to the charts "Equity markets").

Private banking clients maintained a cautious investment stance amid prevailing market uncertainty, with cash deposits remaining high despite low interest rates. Equity funds witnessed strong net inflows in 2013. In contrast, fixed income funds saw large withdrawals especially in the second half of the year. In Switzerland, concerns about the real estate market overheating in certain areas remained pronounced, with the SNB reiterating concerns about the buildup of imbalances in mortgage and real estate markets. The wealth management sector continued to adapt to further industry-specific regulatory changes.

In investment banking, equity trading volume was comparable to 2012. Trading volumes in Europe were generally higher, while volumes in the US decreased. US fixed income volumes were slightly lower compared to 2012, with weaker federal agency and mortgage backed volumes being partially offset by higher treasuries and corporate volumes. Compared to 2012, activity from global completed M&A volumes increased slightly and global announced M&A volumes rose 8%. Global equity underwriting volumes increased significantly and global debt underwriting volumes remained stable, both compared to 2012.

# Credit Suisse

In 2013, we recorded net income attributable to shareholders of CHF 2,326 million. Diluted earnings per share from continuing operations were CHF 1.14 and return on equity attributable to shareholders was 5.7%.

As of the end of 2013, our CET1 ratio under Basel III was 15.7% and 10.0% on a look-through basis. Our risk-weighted assets decreased 6% compared to 2012 to CHF 273.8 billion.

### DIFFERENCES BETWEEN GROUP AND BANK

Except where noted, the business of the Bank is substantially the same as the business of Credit Suisse Group, and substantially all of the Bank's operations are conducted through the Private Banking & Wealth Management and Investment Banking segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the two segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking & Wealth Management, and hedging activities relating to share-based compensation awards. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

‣ Refer to "Note 40 – Subsidiary guarantee information" in V – Consolidated financial statements – Credit Suisse Group for further information on the Bank.

## Differences between Group and Bank businesses

| **Entity** | **Principal business activity** |
|---|---|
| Neue Aargauer Bank | Banking (in the Swiss canton of Aargau) |
| BANK-now | Private credit and car leasing (in Switzerland) |
| Financing vehicles of the Group | Special purpose vehicles for various funding activities of the Group, including for purposes of raising capital |

## Comparison of consolidated statements of operations

| Dividend [1, 2] | 0.00 [3] | 0.23 |

The Bank's total share capital is fully paid and consisted of 4,399,665,200 and 43,996,652 registered shares as of December 31, 2013 and 2012, respectively. The increase in number of shares reflects the split of the par value per share from CHF 100 to CHF 1 effective November 19, 2013.

[1] Dividends are determined in accordance with Swiss law and the Bank's articles of incorporation.

[2] In 2011, 2010 and 2009, dividends per share issued were CHF 0.23, CHF 0.23 and CHF 68.19, respectively.

[3] Proposal of the Board of Directors to the annual general meeting of the Bank for a dividend of CHF 10 million.

## INFORMATION AND DEVELOPMENTS

### Format of presentation and changes in reporting

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

As of January 1, 2013, the Basel Committee on Banking Supervision Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our calculations of year-end 2012 capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

References to Swiss leverage exposure refer to the aggregate of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments, including cash collateral netting reversals and derivative add-ons.

▸ Refer to "Swiss leverage ratios" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Capital metrics under Swiss requirements for further information.

Beginning in the first quarter of 2013, assets within the Private Banking & Wealth Management and Investment Banking segments exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

### Introduction of non-strategic units

In the fourth quarter of 2013, we created non-strategic units within our Private Banking & Wealth Management and Investment Banking divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and positions and to shift resources to focus on our strategic businesses and growth initiatives. The results are disclosed separately within the divisional results and we have implemented a governance structure to accelerate position and expense reductions. We believe this new reporting structure, which clearly delineates between strategic and non-strategic results, enhances the transparency of our financial disclosures while providing increased focus on our strategic businesses within the business divisions and on the Group level. Prior periods have been restated to conform to the current presentation.

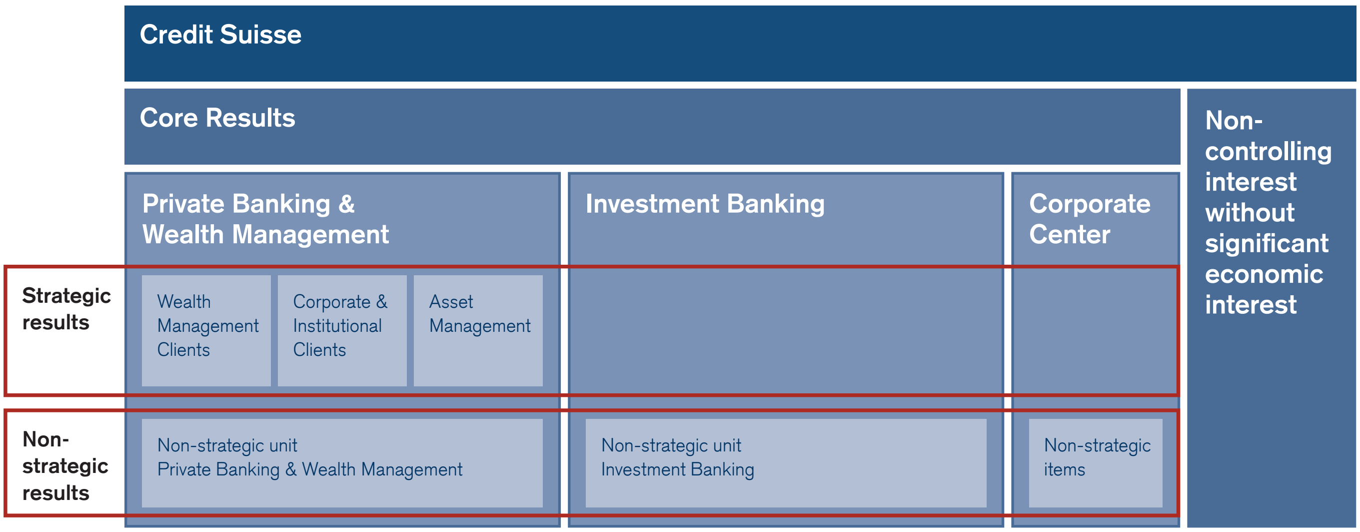
We decided to retain these non-strategic units within the divisions, rather than establishing a single non-strategic unit, so as to benefit from senior management's expertise and focus. The non-strategic units have separate management within each division and a clear governance structure through the establishment of a Non-Strategic Oversight Board. As a result, we expect that the establishment of these non-strategic units will drive further reductions in Swiss leverage exposure and risk-weighted assets. It is also expected to free up capital for future growth in Private Banking & Wealth Management, accelerating a move towards a more balanced capital allocation between Investment Banking and Private Banking & Wealth Management, and to allow us to return capital to our shareholders.

Non-strategic activities and positions are defined as:

- activities with significant capital absorption under new regulations and returns below expectations;
- activities with significant leverage exposures identified for de-risking;
- activities no longer feasible or economically attractive under emerging regulatory frameworks;
- assets and liabilities of business activities we are winding down;
- infrastructure associated with activities deemed non-strategic or redundant; and
- other items reported in the Corporate Center, which we do not consider representative of our core performance.

In Private Banking & Wealth Management, we established a non-strategic unit which includes positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

## Credit Suisse reporting structure



In Investment Banking, we transferred into the divisional non-strategic unit our fixed income wind-down portfolio, legacy rates business, primarily non-exchange-cleared instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

In the Corporate Center, we separately present non-strategic items, which we do not consider representative of our core performance. Such items include the valuation impacts from movements in credit spreads on our own liabilities carried at fair value, certain business realignment costs and IT architecture simplification expenses, certain litigation provisions, business wind-down costs and impairments not included in the divisional non-strategic units and legacy funding costs associated with non-Basel III compliant debt instruments not included in the results of the Investment Banking non-strategic unit. Corporate Center items previously disclosed as adjustments from our reported to underlying results are now presented as non-strategic items, with the exception of business divisions' non-strategic realignment costs, which beginning in the fourth quarter of 2013 are reported directly in the relevant divisional non-strategic unit. Strategic business division realignment costs will continue to be reported in the Corporate Center.

### Discontinued operations

In the third quarter of 2013, the Private Banking & Wealth Management division completed the sales of its exchange-traded funds (ETF) business and Strategic Partners, and announced the sale of Customized Fund Investment Group (CFIG), which was completed in January 2014. In the fourth quarter of 2013, the division announced the sale of its domestic private banking business booked in Germany to ABN AMRO, which is expected to close in 2014. These transactions qualify for discontinued operations treatment under accounting principles generally accepted in the US (US GAAP), and revenues and expenses of these businesses and the relevant gains on disposal are classified as discontinued operations in the Group's consolidated statements of operations. In the Private Banking & Wealth Management segment, the gains and expenses related to the business disposals are included in the segment's non-strategic results. The reclassification of the revenues and expenses from the segment results to discontinued operations for reporting at the Group level is effected through the Corporate Center. Prior periods for the Group's results have been restated to conform to the current presentation.

### Significant litigation matters in 2013

On March 21, 2014, we entered into an agreement with the Federal Housing Finance Agency (FHFA) to settle litigation claims related to the sale of approximately USD 16.6 billion of residential mortgage-backed securities between 2005 and 2007. Under the terms of the agreement, we will pay USD 885 million to resolve all claims in two pending securities lawsuits filed by the FHFA against us.

For 2013, we recorded litigation provisions of CHF 600 million in our Private Banking & Wealth Management division in connection with the US tax matter, where we continue to work towards a resolution, including CHF 175 million in connection with the settlement with the SEC in February 2014.

▸ Refer to "Note 38 – Litigation" in V – Consolidated financial statements – Credit Suisse Group for further information on litigation.

### Board of Directors and management changes

At our Annual General Meeting (AGM) in April 2013, shareholders elected Kai S. Nargolwala as a new member to the Board of Directors, and re-elected Noreen Doyle and Jassim Bin Hamad J.J. Al Thani, each for a term of three years. Robert H. Benmosche, Aziz R.D. Syriani and David W. Syz retired from the Board of Directors at the 2013 AGM.

As of December 31, 2013, Tobias Guldimann stepped down from the Executive Board and his position as Chief Risk Officer. Effective January 1, 2014, Joachim Oechslin assumed the role of Chief Risk Officer and joined the Executive Board.

### Capital distribution proposal

At the AGM on May 9, 2014, the Board of Directors will propose a cash distribution of CHF 0.70 per share to be paid out of reserves from capital contributions for the financial year 2013. The distribution out of reserves from capital contributions will be free of Swiss withholding tax and will not be subject to income tax for Swiss resident individuals holding the shares as a private investment.

### Share issuances

In the second quarter of 2013, we issued 200.0 million Group shares out of conditional, conversion and authorized capital in connection with the conversion of mandatory and contingent convertible securities (MACCS). The shares were delivered on April 8, 2013.

At the 2013 AGM, shareholders approved a distribution in the form of CHF 0.10 per registered share in cash and in the form of new shares with an equivalent value of approximately CHF 0.65 per registered share for the 2012 financial year. As a result, we issued 37.6 million new Group shares out of authorized capital in May 2013.

We also issued 37.8 million new Group shares in connection with share-based compensation awards in 2013.

▸ Refer to "Additional share information" in V – Consolidated financial statements – Credit Suisse Group – Note 25 – Accumulated other comprehensive income and additional share information for further information on share issuances.

### Evolution of legal entity structure

Since 2012, we have been developing a program to evolve the Group's legal entity structure to meet developing and future regulatory requirements. This has been prepared in discussion with our primary regulator Swiss Financial Market Supervisory Authority FINMA (FINMA) and will address regulations in Switzerland, the US and the UK with respect to future requirements for global recovery and resolution planning by systemically important banks such as Credit Suisse that will facilitate resolution of an institution in the event of a failure. We expect these changes will result in a substantially less complex and more efficient operating infrastructure for the Group. Furthermore, Swiss banking law provides for the possibility of a limited reduction in capital requirements in the event of an improvement in resolvability which this program intends to deliver.

The key components of the program are:

- in Switzerland we plan to create a subsidiary for our Swiss-booked business (primarily wealth management, retail and corporate and institutional clients as well as the product and sales hub in Switzerland);
- our UK operations will remain the hub of our European investment banking business and we are planning that our two principal UK operating subsidiaries will be consolidated into a single subsidiary. The program will look to align non-European business to the appropriate entities in the Americas and in Asia Pacific;
- in the US, our existing broker-dealer subsidiary is planned to remain a subsidiary of our existing US holding company. The holding company will hold its US-based operating businesses and be subject to the Fed final rules for supervision of foreign banking operations in the US. Additionally, subject to US regulatory approvals, our US derivatives business, currently booked in one of the above noted UK operating subsidiaries, is anticipated to be transferred to the existing US broker-dealer;
- we intend to create a separately capitalized global infrastructure legal entity in Switzerland and a US subsidiary of the above noted US holding company. In principle, these will include all Shared Services functions; and
- once the legal framework is finalized, we plan to issue bail-in eligible debt out of the existing Group holding company to enable a single point of entry bail-in resolution strategy.

The program has been approved by the Board of Directors of the Group, but is subject to final approval by FINMA. Implementation of the program is underway, with a number of key components expected to be implemented from mid-2015.

### Risk trends

The prudent taking of risk in line with our strategic priorities is fundamental to our business as a leading global bank and continued to be a key focus area in 2013. During the year, we took additional steps to adapt our businesses and our risk management approaches and methodologies to the new regulatory requirements. In 2013, overall position risk increased 7%, utilized economic capital increased 4%, average risk management value-at-risk in US dollars for our trading books decreased 27% and our impaired loans decreased 14% to CHF 1.5 billion.

▸ Refer to "Risk management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on risk trends.

### Allocations and funding

#### Revenue sharing and cost allocation

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements govern the compensation received by one segment for generating revenue or providing services on behalf of another. These agreements are negotiated periodically by the relevant segments on a product-by-product basis.

The aim of revenue-sharing and service level agreements is to reflect the pricing structure of unrelated third-party transactions.

Corporate services and business support in finance, operations, including human resources, legal and compliance, risk management and IT are provided by the Shared Services area. Shared Services costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

### Funding

We centrally manage our funding activities. New securities for funding and capital purposes are issued primarily by the Bank.

▸ Refer to "Funding" in V – Consolidated financial statements – Credit Suisse Group – Note 5 – Segment information for further information.

## Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

▸ Refer to "Note 1 – Summary of significant accounting policies" and "Note 34 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group for further information.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets (level 1) or observable inputs (level 2). These instruments include government and agency securities, certain commercial paper, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain over-the-counter (OTC) derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs (level 3). For these instruments, the determination of fair value requires subjective assessment and judgment depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and collateralized debt obligation securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

Models were used to value these products. Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 2013, 47% and 33% of our total assets and total liabilities, respectively, were measured at fair value.

While the majority of our level 3 assets are recorded in Investment Banking, some are recorded in Private Banking & Wealth Management's Asset Management business, specifically certain private equity investments. Total assets recorded as level 3 declined by CHF 0.6 billion during 2013, primarily reflecting decreases in trading assets and other investments, partially offset by increases in loans and loans held-for-sale. The decrease in trading assets primarily reflected net transfers out of level 3 due to improved observability of pricing data and net settlements, partially offset by realized and unrealized gains. The decrease in other investments primarily reflected net sales, partially offset by realized and unrealized gains. The increase in loans primarily reflected net issuances, partially offset by net transfers out of level 3 due to improved observability of pricing data and net sales. The increase in loans held-for-sale primarily reflected net transfers into level 3 due to limited observability of pricing data and net purchases.

Our level 3 assets, excluding noncontrolling interests and assets of consolidated variable interest entities (VIEs) that are not risk-weighted assets under the Basel framework, were CHF 29.8 billion, compared to CHF 29.7 billion as of the end of 2012. As of the end of 2013, these assets comprised 4% of total assets and 8% of total assets measured at fair value, both adjusted on the same basis, compared to 3% and 7% as of the end of 2012, respectively.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition, however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

## Regulatory developments and proposals

Government leaders and regulators continued to focus on reform of the financial services industry, including enhanced capital, leverage and liquidity requirements, changes in compensation practices and measures designed to reduce systemic risk.

▸ Refer to "Regulation and supervision" in I – Information on the company for further information.

# Core Results

For 2013, net income attributable to shareholders was CHF 2,326 million. Net revenues were CHF 25,217 million and total operating expenses were CHF 21,546 million.

In our strategic businesses, we reported income from continuing operations before taxes of CHF 7,132 million and in our non-strategic businesses we reported a loss from continuing operations before taxes of CHF 3,628 million in 2013.

### RESULTS OVERVIEW

Core Results include the results of our two segments, the Corporate Center and discontinued operations. Core Results exclude revenues and expenses in respect of noncontrolling interests in which we do not have significant economic interest (SEI).

Certain reclassifications have been made to prior periods to conform to the current presentation.

▸ Refer to "Format of presentation and changes in reporting" in Credit Suisse – Information and developments for further information.

#### 2013 versus 2012

In 2013, Core Results net income attributable to shareholders was CHF 2,326 million, up 72% compared to 2012, and net revenues of CHF 25,217 million increased 8% compared to 2012.

Strategic net revenues were stable at CHF 25,543 million compared to 2012, with stable net revenues for Private Banking & Wealth Management, reflecting higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and other revenues. Strategic net revenues for Investment Banking were slightly lower, reflecting decreased revenues in fixed income sales and trading and advisory revenues, partially offset by increased revenues in equity sales and trading and debt and equity underwriting.

In our non-strategic businesses, net revenue losses of CHF 326 million in 2013 improved from net revenue losses of CHF 2,242 million in 2012. An improvement in Corporate Center mainly reflected fair value losses of CHF 315 million from movements in own credit spreads in 2013 compared to fair value losses from movements in own credit spreads of CHF 2,939 million in 2012. Improved results in Investment Banking were driven by portfolio valuation gains and lower funding costs, while a decrease in Private Banking & Wealth Management reflected lower gains on sales of businesses and lower fee-based revenues resulting from those sales.

**Provision for credit losses** of CHF 167 million reflected net provisions of CHF 152 million in Private Banking & Wealth Management and CHF 13 million in Investment Banking.

**Total operating expenses** of CHF 21,546 million increased 2% compared to 2012, primarily reflecting 19% higher general and administrative expenses, partially offset by 9% lower compensation and benefits. In strategic businesses, total operating expenses of CHF 18,316 million decreased 4% from 2012, mainly reflecting lower compensation and benefits, driven by lower deferred compensation expense from prior-year awards and lower salary expenses, reflecting lower headcount. In non-strategic businesses, total operating expenses of CHF 3,230 million increased 54% from 2012, primarily reflecting higher general and administrative expenses, partially offset by a decrease in compensation and benefits. The increase in general and administrative expenses was primarily due to substantially higher litigation provisions in Investment Banking and Private Banking & Wealth Management. In 2013, we recorded provisions of CHF 1,117 million in connection with mortgage-related matters, including in connection with the agreement with the Federal Housing Finance Agency (FHFA) on March 21, 2014 to settle certain litigation relating to mortgage-backed securities, and CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014.

▸ Refer to "Note 38 – Litigation" in V – Consolidated financial statements – Credit Suisse Group for further information on litigation.

The **Core Results effective tax rate** was 36.4% in 2013, compared to 24.6% in 2012. The effective tax rate for full-year 2013 was mainly impacted by the geographical mix of results, an increase and a re-assessment in deferred tax balances in Switzerland and also reflected changes in valuation allowances against deferred tax assets mainly in the UK. In addition, the tax charge was negatively affected by the impact of the change in UK corporation tax from 23% to 20%. Overall, net deferred tax assets decreased CHF 1,181 million to CHF 5,791 million during 2013.

‣ Refer to "Note 27 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information.

**2012 versus 2011**

In 2012, Core Results net income attributable to shareholders was CHF 1,349 million, down 31% compared to 2011, and net revenues of CHF 23,251 million in 2012 decreased 7% compared to 2011.

Strategic net revenues increased 9% to CHF 25,493 million compared to 2011. An increase in Investment Banking was primarily driven by substantially improved performance in our fixed income sales and trading business and higher revenues in our underwriting and advisory franchises. Strategic net revenues for Private Banking & Wealth Management were stable, reflecting lower recurring commissions and fees offset by slightly higher transaction- and performance-based revenues and higher other revenues.

In our non-strategic businesses, net revenues decreased from CHF 1,641 million in 2011 to net revenue losses of CHF 2,242 million in 2012. A decrease in Corporate Center mainly reflected fair value losses of CHF 2,939 million from movements in own credit spreads in 2012 compared to fair value gains from movements in own credit spreads of CHF 1,616 million in 2011. A decrease in Investment Banking was driven by increased losses from the fixed income wind-down portfolio and higher funding costs. An increase in Private Banking & Wealth Management was primarily due to the gain of CHF 384 million in 2012 on the sale of our ownership interest in Aberdeen Asset Management (Aberdeen).

**Provision for credit losses** of CHF 170 million reflected net provisions of CHF 182 million in Private Banking & Wealth Management and releases of CHF 12 million in Investment Banking in 2012.

**Total operating expenses** of CHF 21,193 million were down 4% compared to 2011, primarily reflecting 5% lower compensation and benefits and 12% lower commission expenses. In strategic businesses, total operating expenses of CHF 19,099 million decreased 4% from 2011, mainly reflecting lower compensation and benefits, driven by lower deferred compensation expense from prior-year awards, lower salary expenses, reflecting lower headcount, and lower discretionary performance-related compensation expense. In non-strategic businesses, total operating expenses of CHF 2,094 million decreased 4% from 2011, primarily due to lower compensation and benefits.

The **Core Results effective tax rate** was 24.6% in 2012, compared to 23.8% in 2011. The effective tax rate for full-year 2012 was mainly impacted by the geographical mix of results, an increase and a re-assessment in deferred tax balances in Switzerland and the release of tax contingency accruals. The effective tax rate also reflected changes in valuation allowances against deferred tax assets in the US, the UK and Asia. In addition, the tax charge was negatively influenced by the impact of the change in UK corporation tax from 25% to 23%. Overall, net deferred tax assets decreased CHF 1,538 million to CHF 6,972 million during 2012.

‣ Refer to "Note 27 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information.

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Wealth Management Clients and Corporate & Institutional Clients, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Asset Management, results are allocated based on the location of the investment advisors and sales teams. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled.

## INFORMATION AND DEVELOPMENTS

### Key performance indicators

Our historical key performance indicators (KPIs) are provided in the table below. We assess our KPIs as part of our normal planning process and, beginning in the first quarter of 2013, we adjusted our KPIs for the Group and for our Private Banking & Wealth Management and Investment Banking divisions to reflect our strategic plan, the regulatory environment and the market cycle.

For the Group, we replaced the previous Core Results pre-tax income margin KPI with a Core Results cost/income ratio target of below 70%, and maintained a return on equity attributable to shareholders target of above 15%. Our capital measures continue to be based on compliance with Swiss "Too Big to Fail" and Basel III capital standards, and we target a Look-through Swiss Core Capital ratio above 10%. Our KPIs for collaboration revenues and total shareholder return are unchanged.

In our Private Banking & Wealth Management division, the KPI for net new asset growth of 6% is now measured at both the Wealth Management Clients and the Asset Management business levels instead of solely at the division level. For the division we replaced the pre-tax income margin KPI with a cost/income ratio of 65%.

In our Investment Banking division, we replaced the pre-tax income margin KPI with a cost/income ratio target of 70%.

From the first quarter of 2013 to the third quarter of 2013, income statement-based KPIs were measured in the related quarterly reports on underlying results, which are non-GAAP financial measures that excluded valuation impacts from movements in own credit spreads and certain other significant items. With the revised presentation of strategic and non-strategic results for the Group introduced in the fourth quarter of 2013, our stated KPIs are measured on the basis of reported results as they were in 2012. We believe the execution of our strategic initiatives, including the run-off of non-strategic operations, will enable us to achieve our targets over a three to five year period across market cycles. Prior periods have been restated to conform to the current presentation.

#### Collaboration revenues

Beginning in the second quarter of 2013, collaboration revenues are calculated as the percentage of the Group's net revenues represented by the aggregate collaboration revenues arising when more than one of the Group's divisions participate in a transaction.

Additionally, within the Private Banking & Wealth Management division, collaboration revenues include revenues arising from cross-selling and client referral activities between the Wealth Management Clients and Corporate & Institutional Clients businesses on the one hand and the Asset Management and the securities trading and sales businesses on the other hand. Prior period measures of collaboration revenues were not materially impacted by this change and have not been restated. Collaboration revenues are measured by a dedicated governance structure and implemented through an internal revenue sharing structure. Only the net revenues generated by a transaction are considered. Position risk related to trading revenues, private equity and other investment-related gains, valuation adjustments and centrally managed treasury revenues are not included in collaboration revenues.

### Key performance indicators

Our KPIs are targets to be achieved over a three to five year period across market cycles. Our KPIs are assessed annually as part of our normal planning process and may be revised to reflect our strategic plan, the regulatory environment and market and industry trends.

| in / end of | Target | 2013 | 2012 | 2011 |
|---|---|---|---|---|
| **Growth (%)** | | | | |
| Collaboration revenues | 18–20% of net revenues | 17.7 | 18.6 | 16.8 |
| **Efficiency and performance (%)** | | | | |
| Total shareholder return (Credit Suisse) [1] | Superior return vs peer group | 26.0 | 4.8 | (39.4) |
| Total shareholder return of peer group [1, 2] | – | 26.7 | 49.2 | (35.0) |
| Return on equity attributable to shareholders | Above 15% | 5.7 | 3.9 | 6.0 |

[1] Source: Bloomberg. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value as of the beginning of the period.
[2] The peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase, Société Générale and UBS. The total shareholder return of this peer group is calculated as a simple, unweighted average of the return reported by Bloomberg for each of the members of the peer group.

[1] Core Results include the results of our integrated banking business, excluding revenues and expenses in respect of noncontrolling interests without SEI.
[2] Calculated using income after tax denominated in CHF; assumes tax rate of 27% (28% for strategic results) in 2013, 25% in 2012 and capital allocated at 10% of average risk-weighted assets.
[3] Represents risk-weighted assets on a fully phased-in "look-through" basis.

### Cost savings and strategy implementation

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve our cost structure. We target cost savings of CHF 3.8 billion by the end of 2014 and more than CHF 4.5 billion by the end of 2015. These targets are measured against our annualized six month 2011 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

The majority of the expected future savings is expected to be realized from shared infrastructure and support services across the Group, mainly through the consolidation of fragmented and duplicate functions globally and the continued consolidation of IT applications and functions.

We have also targeted further savings within our two operating divisions. Within Private Banking & Wealth Management, we expect to deliver cost benefits from the creation of the integrated Private Banking & Wealth Management division, exiting a number of small non-strategic markets, repositioning select non-profitable onshore operations, rationalization of front office and support functions, including simplification of our operating platform, streamlining of the offshore affluent and Swiss client coverage model and from announced divestitures.

Within Investment Banking, we expect to deliver cost benefits from the restructuring of our rates business, the initiatives already completed in 2012, from continuing to review and realize efficiencies across business lines and geographic regions and from continuing to refine our business mix and align resources with highest returning opportunities.

We expect to incur approximately CHF 1.4 billion of business realignment costs associated with these measures during the course of 2014 to 2015.

We incurred CHF 394 million of business realignment costs associated with these measures in 2013.

As of the end of 2013, total assets for the Group were CHF 872.8 billion, down CHF 51.5 billion, or 6%, from 2012, reflecting measures taken in connection with our announced balance sheet reduction initiative and the foreign exchange translation impact.

▸ Refer to “Strategy” in I – Information on the company for further information.

### Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component. The variable component reflects the performance-based variable compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

Our shareholders' equity reflects the effect of share-based compensation. Share-based compensation expense (which is generally based on fair value at the time of grant) reduces equity; however, the recognition of the obligation to deliver the shares increases equity by a corresponding amount. Equity is generally unaffected by the granting and vesting of share-based awards and from the settlement of these awards through the issuance of shares from approved conditional capital. The Group issues shares from conditional capital to meet its obligations to deliver share-based compensation awards. If Credit Suisse purchases shares from the market to meet its obligation to employees, these purchased treasury shares reduce equity by the amount of the purchase price. Shareholders' equity also includes, as additional paid-in capital, the excess tax benefits/charges that arise at settlement of share-based awards.

#### Variable compensation for 2013

Part of deferred compensation for 2013 was awarded in the form of Contingent Capital Awards (CCA). The CCA plan is a new deferred compensation plan for Executive Board members, managing directors and directors. These awards convey similar rights and risks to those of certain of the contingent capital instruments that have been issued by us in the market. As CCA qualify as additional tier 1 capital of the Group, their vesting and the form of distribution to employees upon settlement is subject to approval by FINMA. Prior to settlement, CCA are subject to being cancelled in full upon specified triggering events, including the Group's Basel III common equity tier 1 (CET1) ratio falling below specified levels, or a determination by FINMA that cancellation of the CCA and other similar capital instruments is necessary, or that we require public sector capital support, to prevent us from becoming insolvent.

‣ Refer to "Compensation" in IV – Corporate Governance and Compensation for further information.

‣ Refer to "Consolidated statements of changes in equity" and "Note 28 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group for further information.

‣ Refer to "Tax benefits associated with share-based compensation" in Note 27 – Tax in V – Consolidated financial statements – Credit Suisse Group for further information.

### Personnel

Headcount at the end of 2013 was 46,000, down 1,400 from the end of 2012. This reflected reductions in headcount of 2,000 employees in connection with our cost efficiency initiatives in Investment Banking and Private Banking & Wealth Management, partially offset by graduate hiring and contractor employee conversion. Compared to year-end 2011, headcount decreased 3,700.

‣ Refer to "Overview" in IV – Corporate Governance and Compensation – Corporate Governance for additional information on personnel.

# Private Banking & Wealth Management

For 2013, we reported income before taxes of CHF 3,240 million and net revenues of CHF 13,442 million.

In our strategic businesses, we reported income before taxes of CHF 3,627 million and net revenues of CHF 12,434 million. Compared to 2012, income before taxes increased 7%, with higher transaction- and performance-based revenues, higher recurring commissions and fees, lower net interest income and stable operating expenses.

In our non-strategic businesses, we reported a loss before taxes of CHF 387 million in 2013, including litigation provisions in connection with the US tax matter, partially offset by gains from the sale of former Asset Management businesses. In 2012, we reported income before taxes of CHF 401 million, which included gains from the sale of former Asset Management businesses.

### KEY PERFORMANCE INDICATORS

We target a divisional cost/income ratio of 65% for the Private Banking & Wealth Management division. In 2013, the cost/income ratio was 74.8%, up four percentage points compared to 2012 and down two percentage points compared to 2011. The cost/income ratio for our strategic results was 70.2% in 2013, down one percentage point compared to 2012 and down five percentage points compared to 2011.

We also target net new asset growth of 6% for both the Wealth Management Clients and Asset Management businesses. In 2013, the growth rates in Wealth Management Clients and Asset Management were 2.5% and 4.6%, respectively.

▸ Refer to “Key performance indicators” in Core Results – Information and developments for further information.

# Strategic results

## OVERVIEW

Our strategic results comprise businesses from Wealth Management Clients, Corporate & Institutional Clients and Asset Management.

### Full-year 2013 results

In 2013, our strategic businesses reported income before taxes of CHF 3,627 million and net revenues of CHF 12,434 million.

Net revenues were stable compared to 2012, with higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and lower other revenues. Higher transaction- and performance-based revenues reflected higher revenues across all major revenue categories. Higher recurring commissions and fees mainly reflected higher investment account and service fees as well as higher asset management fees. Lower net interest income mainly reflected lower deposit margins, partially offset by higher average deposit and loan volumes. Other revenues were lower compared to 2012, mainly reflecting lower investment-related gains and lower equity participation gains, reflecting the gain of CHF 45 million on the sale of Wincasa in 2012.

Provision for credit losses was CHF 82 million in 2013, compared to CHF 139 million in 2012, on a net loan portfolio of CHF 212 billion.

Total operating expenses were stable compared to 2012, reflecting slightly lower compensation and benefits offset by higher commission expenses.

### Full-year 2012 results

In 2012, our strategic businesses reported income before taxes of CHF 3,374 million and net revenues of CHF 12,343 million.

Net revenues were stable compared to 2011, with 5% lower recurring commissions and fees offset by slightly higher transaction- and performance-based revenues and higher other revenues.

Provision for credit losses was CHF 139 million in 2012, compared to CHF 73 million in 2011, on a net loan portfolio of CHF 204 billion.

Total operating expenses were 6% lower compared to 2012, reflecting lower general and administrative expenses and lower compensation and benefits from our efficiency measures and lower headcount.

[1] Calculated using income after tax denominated in CHF; assumes tax rate of 29% in 2013, 25% in 2012 and capital allocated at 10% of average risk-weighted assets.
[2] Includes the impact of an operational risk add-on of CHF 1.6 billion in 2013.

## RESULTS DETAIL

The following provides a comparison of our 2013 strategic results versus 2012 and 2012 results versus 2011.

### Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

**2013 vs 2012: Stable at CHF 12,434 million**

Net revenues were stable, with higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and lower other revenues. Higher transaction- and performance-based revenues reflected higher revenues across all major revenue categories, primarily higher performance fees and carried interest as well as higher brokerage and product issuing fees. Higher recurring commissions and fees mainly reflected higher investment account and service fees as well as higher asset management fees. Lower net interest income reflected significantly lower deposit margins and stable loan margins on higher average deposit and loan volumes. Other revenues decreased mainly due to a decrease in investment-related gains as well as equity participations gains, mainly due to a gain of CHF 45 million in 2012 from the sale of Wincasa.

**2012 vs 2011: Stable at CHF 12,343 million**

Net revenues were stable, with lower recurring commissions and fees offset by slightly higher transaction- and performance-based revenues and higher other revenues. Net interest income was stable. Lower recurring commissions and fees mainly reflected lower investment product management fees, driven by lower fund management fees, and lower discretionary mandate management fees. Transaction- and performance-based revenues were slightly higher with higher performance fees from our Hedging-Griffo subsidiary, single manager hedge funds and credit strategies, higher revenues from integrated solutions, partially offset by lower brokerage and product issuing fees. Other revenues of CHF 94 million mainly reflected a gain of CHF 45 million from the sale of Wincasa and a CHF 41 million gain related to the sale of a business, with higher investment-related gains offset by impairment charges of CHF 61 million related to Asset Management Finance LLC (AMF). Net interest income was stable, as the impact of lower deposit margins, reflecting the continued low interest rate environment, and lower loan margins were offset by higher average deposit and loan volumes.

### Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

**2013 vs 2012: Down 41% from CHF 139 million to CHF 82 million**

Provision for credit losses of CHF 82 million was down CHF 57 million compared to 2012. Provision for credit losses reflected net provisions of CHF 78 million in Wealth Management Clients and CHF 4 million in Corporate & Institutional Clients.

**2012 vs 2011: Up 90% from CHF 73 million to CHF 139 million**

Provision for credit losses of CHF 139 million was up CHF 66 million compared to 2011. Provision for credit losses reflected net provisions of CHF 110 million in Wealth Management Clients and CHF 29 million in Corporate & Institutional Clients.

### Operating expenses

#### Compensation and benefits

**2013 vs 2012: Down 3% from CHF 5,186 million to CHF 5,027 million**

Compensation and benefits decreased slightly, driven by lower salary expenses, reflecting lower headcount.

**2012 vs 2011: Down 3% from CHF 5,350 million to CHF 5,186 million**

Compensation and benefits decreased slightly, driven by lower salary expenses, reflecting lower headcount, and lower discretionary performance-related compensation.

#### General and administrative expenses

**2013 vs 2012: Stable at CHF 2,938 million**

General and administrative expenses were stable and included higher expense provisions, higher professional services and lower travel and entertainment expenses.

**2012 vs 2011: Down 9% from CHF 3,261 million to CHF 2,963 million**

Lower general and administrative expenses reflected our cost efficiency measures.

## WEALTH MANAGEMENT CLIENTS

### Net revenues

#### Net interest income

**2013 vs 2012: Down 7% from CHF 3,268 million to CHF 3,050 million**

The decrease in net interest income reflected significantly lower deposit margins on slightly higher average deposit volumes and slightly lower loan margins on higher average loan volumes.

**2012 vs 2011: Stable at CHF 3,268 million**

Stable net interest income reflected lower deposit and loan margins on higher average deposit and loan volumes.

#### Recurring commissions and fees

**2013 vs 2012: Up 5% from CHF 2,811 million to CHF 2,956 million**

The increase reflected higher revenues across all major revenue categories, primarily higher investment account and services fees, driven by higher investment advisory fees as well as higher security account fees.

**2012 vs 2011: Down 7% from CHF 3,030 million to CHF 2,811 million**

The decrease reflected lower revenues across all major revenue categories, primarily lower investment product management fees, driven by lower fund management fees, and lower discretionary mandate management fees.

#### Transaction- and performance-based revenues

**2013 vs 2012: Up 4% from CHF 2,355 million to CHF 2,438 million**

Higher transaction- and performance-based revenues reflected higher brokerage and product issuing fees, primarily in equities and funds, higher equity participations income as well as higher foreign exchange client business.

**2012 vs 2011: Stable at CHF 2,355 million**

Stable transaction- and performance-based revenues reflected lower brokerage and product issuing fees, primarily in equities and mutual funds, and lower foreign exchange client business, offset by gains of CHF 16 million in 2012 related to a change in life insurance accounting, higher performance fees from Hedging-Griffo and higher revenues from integrated solutions.

[1] Reflects gains related to the sale of a business from the integration of Clariden Leu in 2012.
[2] Net revenues divided by average assets under management.

### Gross margin

Our gross margin was 107 basis points in 2013, seven basis points lower compared to 2012 and 15 basis points lower than 2011. Compared to 2012, the net interest income margin decreased six basis points due to the low interest rate environment. The recurring commissions and fees margin was stable. The transaction- and performance-based margin decreased one basis point, reflecting the increase in average assets under management more than offsetting higher transaction- and performance-based revenues.

# CORPORATE & INSTITUTIONAL CLIENTS

## Net revenues

### Net interest income

**2013 vs 2012: Down 6% from CHF 1,170 million to CHF 1,105 million**

The decrease reflected significantly lower deposit margins and higher loan margins on higher average deposit and loan volumes.

**2012 vs 2011: Up 2% from CHF 1,152 million to CHF 1,170 million**

The slight increase reflected lower deposit and loan margins on higher average deposit and loan volumes.

### Recurring commissions and fees

**2013 vs 2012: Stable at CHF 451 million**

Recurring commissions and fees were stable. Higher investment account and services fees, primarily from custody services, were offset by lower investment product management fees, mainly from lower funds management fees.

**2012 vs 2011: Up 6% from CHF 422 million to CHF 448 million**

The increase was driven by higher banking services fees and higher investment account and services fees, primarily from custody services, partially offset by lower investment product management fees, mainly from lower fund management fees.

### Transaction- and performance-based revenues

**2013 vs 2012: Stable at CHF 455 million**

Stable transaction- and performance-based revenues reflected higher foreign exchange client business, offset by lower revenues from integrated solutions and lower trading and sales income.

**2012 vs 2011: Stable at CHF 457 million**

Stable transaction- and performance-based revenues reflected higher revenues from integrated solutions, higher trading and sales income and higher foreign exchange client business, offset by lower brokerage and product issuing fees.

[1] Includes fair value losses of CHF 35 million on the Clock Finance transaction and gains of CHF 25 million related to a recovery case in 2012. Prior periods relate to fair value losses on the Clock Finance transaction.

## ASSET MANAGEMENT

### Net revenues

#### Fee-based revenues

**2013 vs 2012: Up 20% from CHF 1,675 million to CHF 2,017 million**

The increase primarily reflected higher performance fees, asset management fees and private equity placement fees. Higher performance fees were recognized primarily from single manager hedge funds and Hedging-Griffo. The higher asset management fees, primarily in our alternatives business, reflected higher average assets under management driven in part by net new assets of CHF 15.0 billion for the year.

**2012 vs 2011: Up 4% from CHF 1,618 million to CHF 1,675 million**

The increase primarily reflected higher performance fees, partially offset by lower carried interest from realized private equity gains, lower placement fees, lower transaction fees and lower asset management fees. Higher performance fees were recognized from Hedging-Griffo, credit strategies, single manager hedge funds and from the management of the 2008 Partner Asset Facility. Carried interest from realized private equity gains in 2012 was lower than a strong 2011, which included the sale of a portfolio company in the healthcare sector. The decrease in placement, transaction and other fees mainly reflected lower private equity placement fees and lower real estate transaction fees. Asset management fees decreased as a result of lower average assets under management in traditional products.

| Fee-based margin [2] | 58 | 52 | 49 | – | – |

[1] Includes allocated funding costs.
[2] Fee-based revenues divided by average assets under management.

### Investment-related gains/(losses)

**2013 vs 2012: Down 63% from CHF 139 million to CHF 52 million**

The gains of CHF 52 million in 2013 and CHF 139 million in 2012 primarily reflected gains in hedge fund investments and the real estate sector.

**2012 vs 2011: Up 60% from CHF 87 million to CHF 139 million**

The gains of CHF 139 million in 2012 and CHF 87 million in 2011 primarily reflected gains in hedge fund investments and the real estate sector.

### Equity participations and other gains/(losses)

**2013 vs 2012: Down from CHF (7) million to CHF (86) million**

In 2013 we recognized impairments of CHF 86 million related to AMF. The loss of CHF 7 million in 2012 primarily reflected impairment charges of CHF 61 million related to AMF, partially offset by a gain of CHF 45 million from the sale of Wincasa.

**2012 vs 2011: Down from CHF (4) million to CHF (7) million**

The loss of CHF 7 million in 2012 primarily reflected impairment charges of CHF 61 million related to AMF, partially offset by the gain of CHF 45 million from the sale of Wincasa. The loss in 2011 reflected an impairment related to AMF.

# Non-strategic results

## OVERVIEW

Our non-strategic businesses for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

### Full-year 2013 results

For 2013, our non-strategic businesses reported a loss before taxes of CHF 387 million compared to income before taxes of CHF 401 million in 2012.

Net revenues of CHF 1,008 million were 11% lower than the CHF 1,131 million reported in 2012, reflecting lower gains on sale of businesses and lower fee-based revenues resulting from those sales.

Provision for credit losses was CHF 70 million in 2013, compared to CHF 43 million in 2012, on a net loan portfolio of CHF 4 billion.

Total operating expenses in 2013 were higher than in 2012, mainly reflecting substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014.

### Full-year 2012 results

For 2012, our non-strategic businesses reported income before taxes of CHF 401 million compared to a loss before taxes of CHF 31 million in 2011. Net revenues of CHF 1,131 million were significantly higher compared to 2011 due to the gain of CHF 384 million in 2012 on the sale of our ownership interest in Aberdeen.

Provision for credit losses was CHF 43 million in 2012, compared to CHF 38 million in 2011, on a net loan portfolio of CHF 4 billion.

Total operating expenses in 2012 were lower than in 2011, which included significant litigation provisions.

## RESULTS DETAIL

The following provides a comparison of our 2013 non-strategic results versus 2012 and 2012 results versus 2011.

### Net revenues

**2013 vs 2012: Down 11% from CHF 1,131 million to CHF 1,008 million**

The decrease primarily reflected lower recurring commissions and fees and lower transaction- and performance-based revenues, reflecting the impact of sales of non-strategic businesses during 2013 and lower gains from sales of businesses, partially offset by significantly higher investment-related gains. We recognized gains of CHF 146 million on the sale of our ETF business, CHF 91 million on the sale of Strategic Partners, our secondary private equity business, and CHF 28 million from the sale of JO Hambro during the year, compared with a gain of CHF 384 million in 2012 from the sale of our remaining ownership interest in Aberdeen. Investment-related gains of CHF 128 million were significantly higher than the CHF 16 million recorded in 2012, which included losses of CHF 82 million in connection with the planned sale of certain private equity investments.

**2012 vs 2011: Up 17% from CHF 966 million to CHF 1,131 million**

The increase primarily reflected the gain from the sales of our ownership interest in Aberdeen, partially offset by significantly lower investment-related gains and lower equity participations income. Investment-related gains of CHF 16 million, including the losses in connection with the planned sale of the private equity investments, were significantly lower than the CHF 218 million recorded in 2011. Equity participations income was lower due to the sale of our ownership interest in Aberdeen.

### Operating expenses

**2013 vs 2012: Up 93% from CHF 687 million to CHF 1,325 million**

Higher operating expenses reflected substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014. We also had higher professional services fees resulting from the sale of former Asset Management businesses, partially offset by lower commission and compensation expenses relating to the sales. We also recognized a goodwill impairment of CHF 12 million resulting from the creation of the non-strategic reporting unit in the fourth quarter of 2013.

**2012 vs 2011: Down 28% from CHF 959 million to CHF 687 million**

The decrease primarily reflected 2011 litigation provisions of CHF 478 million in connection with the German and US tax matters.

# Assets under management

**2013**

In 2013, assets under management of CHF 1,282.4 billion increased 2.5% compared to the end of 2012, reflecting net new assets of CHF 32.1 billion and positive market movements, partially offset by adverse foreign exchange-related movements and structural effects, primarily from the sales of businesses.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 18.9 billion, particularly from inflows from emerging markets and our ultra-high-net-worth individual (UHNWI) client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported strong net new assets of CHF 8.8 billion. Asset Management reported significant net new assets of CHF 15.0 billion, mainly from credit, index strategies and hedge fund products, partially offset by outflows from fixed income. Assets under management continued to reflect a risk-averse asset mix, with investments in less complex, lower-margin products and a significant portion of assets in cash and money market products.

In our non-strategic portfolio, assets under management declined 47.6% to CHF 44.4 billion mainly reflecting the sale of our ETF and secondary private equity businesses.

**2012**

Assets under management as of the end of 2012 were CHF 1,250.8 billion, CHF 65.6 billion higher compared to the end of 2011, driven primarily by positive market movements and by net new assets of CHF 10.8 billion, partially offset by adverse foreign exchange-related movements.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 20.6 billion with inflows particularly from emerging markets and from our UHNWI client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients reported net new assets of CHF 1.5 billion. Asset Management reported net asset outflows of CHF 8.3 billion primarily from multi-asset class solutions which included redemptions of CHF 14.7 billion from a single fixed income mandate, partially offset by inflows in index strategies and credit products.

In our non-strategic portfolio, assets under management were stable at CHF 84.7 billion.

# Investment Banking

For 2013, total Investment Banking income before taxes was CHF 1,719 million, with net revenues of CHF 12,565 million. Our strategic businesses reported income before taxes of CHF 3,853 million and net revenues of CHF 13,164 million. Our non-strategic businesses reported a loss before taxes of CHF 2,134 million, including litigation provisions in connection with the agreement with the Federal Housing Finance Agency (FHFA) on March 21, 2014 to settle certain litigation relating to mortgage-backed securities.

We made continued progress in improving capital efficiency in 2013. We reported total assets of USD 565 billion exceeding our Investment Banking balance sheet target of less than USD 600 billion of assets by year-end 2013. Additionally, we reported Swiss leverage exposure of USD 812 billion, exceeding our Investment Banking target of less than USD 840 billion by year-end 2013.

In 2013, we reduced risk-weighted assets under Basel III by USD 11 billion to USD 176 billion as of the end of 2013, compared to our year-end target of less than USD 175 billion. Business reductions of USD 27 billion were partially offset by increases of USD 10 billion from methodology changes and parameter updates, and an operational risk add-on of USD 6 billion.

# Strategic results

## OVERVIEW

The transformed Investment Banking division delivered strong profitability in 2013 on slightly lower revenues, a reduced cost base and lower leverage and capital usage. For 2013, our strategic businesses reported income before taxes of CHF 3,853 million compared to income before taxes of CHF 3,427 million in 2012. Net revenues were CHF 13,164 million compared to CHF 13,385 million in 2012.

Revenues in our strategic businesses were slightly lower as strong performance in our equities, credit and underwriting franchises were offset by lower rates and advisory results. Fixed income sales and trading revenues declined 15% compared to 2012, reflecting difficult trading conditions across most fixed income businesses. Equity sales and trading revenues increased 13%, reflecting continued market leadership and increased client activity notwithstanding reduced balance sheet usage. Underwriting and advisory results increased, reflecting significantly higher debt and equity underwriting results. These increases were partially offset by significantly lower advisory revenues, reflecting a decline in the total industry M&A fee pool.

Total operating expenses were CHF 9,300 million, down 7% from 2012. Compensation and benefits of CHF 5,326 million decreased by CHF 555 million, or 9%, from 2012, primarily reflecting lower deferred compensation expense from prior-year awards as 2012 included 2011 Partner Asset Facility (PAF2) expenses of CHF 411 million. Total other operating expenses of CHF 3,974 million were down 3% compared to 2012.

For 2012, our strategic business reported income before taxes of CHF 3,427 million compared to CHF 789 million in 2011. Net revenues were CHF 13,385 million compared to CHF 11,129 million in 2011. Results were stronger compared to 2011 driven by substantially improved performance in our fixed income sales and trading business and higher revenues in our underwriting and advisory franchises.

Fixed income sales and trading revenues increased 53%, compared to a weak 2011, reflecting significantly higher revenues from securitized products and global credit products due to improved market conditions in 2012. Equity sales and trading revenues were stable compared to 2011 as substantially improved derivatives results and higher prime services revenues were offset by weaker cash equities performance due to muted client activity and lower trading volumes compared to 2011. Underwriting and advisory results were higher compared to 2011 reflecting strong debt underwriting results, partially offset by lower equity underwriting revenues. Additionally, advisory revenues were significantly higher as market share gains more than offset lower industry-wide completed M&A activity.

Total operating expenses were CHF 9,970 million, down 3% from 2011. Compensation and benefits of CHF 5,881 million decreased by CHF 285 million, or 5%, from 2011. Total other operating expenses of CHF 4,089 million were down 1% compared to 2011.

As of the end of 2013, our strategic businesses reported risk-weighted assets under Basel III of USD 156 billion reflecting further progress in reducing our risk-weighted assets. We reduced risk-weighted assets under Basel III by USD 8 billion from 2012, as USD 22 billion of position reductions offset increases of USD 8 billion due to methodology changes and parameter updates and an operational risk add-on of USD 6 billion in the fourth quarter of 2013. Additionally, we made significant progress reducing Swiss leverage exposure, reporting year-end leverage exposure of USD 725 billion.

[1] Calculated using income after tax denominated in USD; assumes tax rate of 28% in 2013, 25% in 2012, 25% in 2011 and capital allocated at 10% of average risk-weighted assets.

The following provides a comparison of our strategic 2013 results versus 2012 and 2012 results versus 2011.

### Net revenues

#### Debt underwriting

**2013 vs 2012: Up 18% from CHF 1,617 million to CHF 1,902 million**

The increase was driven by higher revenues in emerging markets, particularly in structured lending. We also had higher revenues from investment grade driven by market share gains and strong leveraged finance results, as robust high yield industry-wide issuance volumes offset lower market share.

**2012 vs 2011: Up 15% from CHF 1,404 million to CHF 1,617 million**

The increase was primarily due to higher results in leveraged finance, reflecting significantly higher industry-wide high yield issuance volumes. We also had higher investment grade revenues, driven by higher industry-wide issuance volumes that more than offset a modest decline in market share.

#### Equity underwriting

**2013 vs 2012: Up 39% from CHF 552 million to CHF 766 million**

The improvement was driven by strong performance across most major equity markets. We had significantly higher revenues from initial public offerings (IPOs) and follow-on offerings, as higher industry-wide issuance activity more than offset lower market share for both products.

**2012 vs 2011: Down 23% from CHF 713 million to CHF 552 million**

The decrease was due to lower revenues from follow-on offerings as lower market share more than offset higher industry-wide issuance volumes. We also had lower revenues from IPOs, reflecting lower industry-wide issuance volumes compared to 2011.

#### Advisory and other fees

**2013 vs 2012: Down 37% from CHF 1,042 million to CHF 658 million**

The decrease was primarily due to significantly lower M&A fees reflecting a decline in the total industry fee pool, which more than offset higher completed M&A market share and higher completed M&A volumes.

**2012 vs 2011: Up 22% from CHF 856 million to CHF 1,042 million**
The increase reflected substantially higher M&A fees and other advisory fees, driven by higher completed M&A market share, more than offsetting an industry-wide decline in completed M&A activity. We also had higher private placement fees, reflecting a large Private Investment in Public Equity transaction in the energy sector in 3Q12.

### Fixed income sales and trading

**2013 vs 2012: Down 15% from CHF 6,221 million to CHF 5,300 million**
Fixed income sales and trading revenues declined significantly, reflecting difficult trading conditions across many businesses. Global macro products revenues declined substantially, primarily driven by significantly weaker results from our rates franchise, reflecting reduced client activity and low trading volumes. Emerging markets revenues decreased, driven by lower trading and financing activity, reflecting less favorable market conditions. Securitized products revenues decreased as higher asset finance origination was more than offset by lower agency security trading activities. Corporate lending revenues also declined. These declines were partially offset by increased global credit products revenues, reflecting strong leveraged finance revenues. At the end of 2013, fixed income risk-weighted assets under Basel III totaled USD 91 billion, a reduction of USD 10 billion, or 10%, from the prior year.

**2012 vs 2011: Up 53% from CHF 4,057 million to CHF 6,221 million**
The increase was primarily due to significantly improved results in securitized products compared to a weak performance in 2011. The weak 2011 results reflected valuation reductions on client inventory, including commercial mortgage-backed securities and residential mortgage-backed securities, losses on sales of client inventory as we reduced risk-weighted assets, and subdued client flow. In 2012, we had higher revenues in global credit products due to improved market conditions and increased client appetite for high-yielding products. Substantial inventory reductions in securitized products and global credit products in late 2011 and early 2012 resulted in lower revenue volatility in 2012. In addition, we had higher results in emerging markets, reflecting strong performance in Latin America. Revenues from corporate lending also increased. These increases were partially offset by weaker results in global macro products, reflecting strong foreign exchange performance but lower rates revenues due to subdued client activity.

### Equity sales and trading

**2013 vs 2012: Up 13% from CHF 4,285 million to CHF 4,849 million**
The increased result reflected continued market leadership, higher equity values and increased client activity during the year. The increases were driven by substantially higher derivatives revenues due to robust client activity and strong performance in Asia. We also had higher results from systematic market making driven by improved global coverage and significant market events including quantitative easing in Japan and strong US equity markets that resulted in higher global equity volumes. Cash equities revenues increased, driven by market share gains in the US and Europe and more favorable trading conditions. Prime services revenues were resilient, albeit lower, reflecting sustained market leadership and increased client balances.

**2012 vs 2011: Stable at CHF 4,285 million**
We delivered significantly improved derivatives results compared to weak performance in 2011. We had higher results in prime services with increased market share ranking and higher client balances that more than offset lower hedge fund activity and leverage levels. These revenue increases were offset by lower results in cash equities due to muted client activity and lower trading volumes compared to 2011.

## Operating expenses

### Compensation and benefits

**2013 vs 2012: Down 9% from CHF 5,881 million to CHF 5,326 million**
The decrease was primarily driven by lower deferred compensation expense from prior-year awards, as 2012 included PAF2 expenses of CHF 411 million, and lower salaries and other employee benefits, reflecting lower headcount.

**2012 vs 2011: Down 5% from CHF 6,166 million to CHF 5,881 million**
The decrease was primarily due to lower deferred compensation expense from prior-year awards. We also had lower salaries, reflecting lower headcount and lower discretionary performance-related compensation expense.

### General and administrative expenses

**2013 vs 2012: Down 2% from CHF 3,149 million to CHF 3,078 million**
The decrease was primarily driven by lower litigation provisions and lower technology costs.

**2012 vs 2011: Up 4% from CHF 3,022 million to CHF 3,149 million**
The increase reflected the foreign exchange translation impact. In US dollars, expenses decreased 2%, reflecting lower technology costs.

# Non-strategic results

## OVERVIEW

Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily non-exchange-cleared instruments and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

Results reflected net revenue losses of CHF 599 million in 2013 compared to net revenue losses of CHF 827 million in 2012, driven by portfolio valuation gains and lower funding costs. Total operating expenses increased, primarily driven by significantly higher litigation provisions related to mortgage-related matters. In 2013, we reduced risk-weighted assets under Basel III by USD 3 billion to USD 20 billion from the end of 2012. This compares to our target of USD 6 billion by year-end 2015. Additionally, we reported Swiss leverage exposure of USD 87 billion. This compares to our target of USD 24 billion in Swiss leverage exposure by year-end 2015.

In 2012, results reflected net revenue losses of CHF 827 million compared to net revenue losses of CHF 669 million in 2011, driven by increased losses from our fixed income wind-down portfolio and higher funding costs. Total operating expenses decreased, primarily driven by significantly lower compensation and benefits expense.

| Total assets | 27,283 | 34,106 | 40,586 | (20) | (16) |
| Swiss leverage exposure | 77,700 | – | – | – | – |

The following provides a comparison of our non-strategic 2013 results versus 2012 and 2012 results versus 2011.

### Net revenues

**2013 vs 2012: Up 28% from CHF (827) million to CHF (599) million**

We had reduced net revenue losses reflecting significant valuation gains in our fixed income wind-down portfolio driven by various portfolio management measures and lower funding costs. At the end of 2013, risk-weighted assets under Basel III totaled USD 20 billion, a reduction of USD 3 billion from 2012.

**2012 vs 2011: Down 24% from CHF (669) million to CHF (827) million**

Results reflected increased losses from our fixed income wind-down portfolio and higher funding costs, partially offset by improved revenues from our legacy rates business and lower losses in other non-strategic positions.

### Total operating expenses

**2013 vs 2012: Up 156% from CHF 598 million to CHF 1,533 million**

The increase was driven by significantly higher litigation provisions, primarily CHF 1,117 million in connection with mortgage-related matters in 2013, including in connection with the March 2014 FHFA settlement.

**2012 vs 2011: Down 11% from CHF 669 million to CHF 598 million**

The decrease was driven by significantly lower compensation and benefits partially offset by higher general and administrative expenses, driven by the higher litigation provisions.

# Corporate Center

In 2013, we recorded a loss before taxes of CHF 1,455 million, primarily reflecting business realignment costs, fair value losses from movements in own credit spreads, reclassifications to discontinued operations and IT architecture simplification expenses.

## RESULTS OVERVIEW

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Corporate Center separately presents non-strategic items, which management does not consider representative of our core performance.

▸ Refer to "Introduction of non-strategic units" in Credit Suisse – Information and developments – Format of presentation and changes in reporting for further information on non-strategic items.

The following provides a comparison of our 2013 results versus 2012 and 2012 results versus 2011.

### Income/(loss) before taxes

**2013 vs 2012: From CHF (3,889) million to CHF (1,455) million**

Improved results mainly reflected lower fair value losses on own credit spreads of CHF 315 million, compared to CHF 2,939 million in 2012. The fair value losses on own long-term vanilla debt reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. 2013 results also included lower business realignment costs of CHF 394 million, compared to CHF 680 million in 2012. Business realignment costs in 2013 primarily consisted of severance and other compensation expenses relating to Group-wide cost efficiency initiatives. 2012 results included litigation provisions related to National Century Financial Enterprises, Inc. (NCFE), with no litigation provisions in Corporate Center in 2013. These positive impacts on 2013 results were partly offset by lower gains on sale of real estate of CHF 68 million in 2013, compared to CHF 533 million in 2012, and IT architecture simplification costs of CHF 128 million in 2013. Additionally, Corporate Center's 2013 results included losses of CHF 220 million comprising reclassifications to discontinued operations of revenues and expenses relating to the 2013 sales of our ETF business and Strategic Partners, and the announced sales of CFIG, which was completed in January 2014, and our domestic private banking business booked in Germany.

**2012 vs 2011: From CHF 391 million to CHF (3,889) million**

The decrease from a gain to a loss primarily reflected fair value losses on own credit spreads of CHF 2,939 million in 2012, compared to fair value gains of CHF 1,616 million in 2011. The fair value losses on own long-term vanilla debt reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. The 2012 losses also included litigation provisions of CHF 227 million from the settlement of NCFE-related litigation. The losses in 2012 were partially offset by higher gains from the sale of real estate of CHF 533 million in 2012, compared to CHF 72 million in 2011 and lower business realignment costs of CHF 680 million in 2012, compared to CHF 847 million in 2011. The business realignment costs primarily consisted of severance and other compensation expenses relating to the Group-wide cost efficiency initiatives.

[1] Business realignment costs relating to divisional realignment costs are prospectively presented in the relevant divisional non-strategic results beginning in the fourth quarter of 2013.
[2] Represents litigation provisions related to NCFE.
[3] Represents legacy funding costs associated with non-Basel III compliant debt instruments.
[4] Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of our ETF business, Strategic Partners and CFIG and the announced sale of our domestic private banking business booked in Germany.

## Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

| of which fair value gains/(losses) on stand-alone derivatives | 83 | (318) | (291) |

# Assets under management

As of December 31, 2013, assets under management from continuing operations were CHF 1,253.4 billion, up 4.6% compared to December 31, 2012, primarily reflecting positive market movements and net new assets of CHF 36.1 billion.

## ASSETS UNDER MANAGEMENT

Assets under management reflect the changes in reporting as discussed in "Credit Suisse – Information and developments – Format of presentation and changes in reporting".

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic business are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

▸ Refer to "Private Banking & Wealth Management" and "Note 37 – Assets under management" in V – Consolidated financial statements – Credit Suisse Group for further information on assets under management.

[1] Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned.
[2] Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and non-strategic businesses.

In 2013, assets under management from continuing operations of CHF 1,253.4 billion increased by CHF 55.6 billion, or 4.6%, compared to the end of 2012, reflecting positive market movements and net new assets, partly offset by adverse foreign exchange-related movements and structural effects, primarily from the sales of businesses.

In our strategic portfolio, Wealth Management Clients contributed assets under management of CHF 790.7 billion, which increased 4.3% compared to the end of 2012, as positive market movements and net new assets of CHF 18.9 billion were partially offset by adverse foreign exchange-related movements. In Corporate & Institutional Clients in Switzerland, assets under management of CHF 250.0 billion increased CHF 26.2 billion, or 11.7%, compared to the end of 2012, mainly driven by positive market movements and CHF 8.8 billion of net new assets. In Asset Management, assets under management were CHF 352.3 billion, an increase of CHF 27.0 billion, or 8.3%, compared to the end of 2012, reflecting positive market performance and net asset inflows of CHF 15.0 billion, partially offset by negative foreign exchange-related movements.

In our non-strategic portfolio, assets under management declined 47.6% to CHF 44.4 billion mainly reflecting the sale of our ETF and secondary private equity businesses, of which CHF 29.0 billion were classified as discontinued operations.

## CLIENT ASSETS

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

## NET NEW ASSETS

Net new assets include individual cash payments, delivery of securities and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management.

Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

In 2013, we recorded net new assets from continuing operations of CHF 36.1 billion.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 18.9 billion, particularly with inflows from emerging markets and our UHNWI client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported strong net new assets of CHF 8.8 billion. Asset Management recorded significant net new assets of CHF 15.0 billion, mainly from credit and index strategies and hedge fund products, partially offset by outflows from fixed income.

In our non-strategic portfolio, net asset outflows of CHF 5.9 billion reflected the exit of certain businesses, of which CHF 4.0 billion were classified as discontinued operations.

In February 2014, we advised the Permanent Subcommittee on Investigations of the US Senate, among other authorities, that we would undertake a review of our internal processes relating to net new assets.

## Net new assets

| in | **2013** | 2012 | 2011 |
|---|---|---|---|
| **Net new assets (CHF billion)** | | | |

# Critical accounting estimates

In order to prepare the consolidated financial statements in accordance with US GAAP, management is required to make certain accounting estimates to ascertain the value of assets and liabilities. These estimates are based upon judgment and the information available at the time, and actual results may differ materially from these estimates. Management believes that the estimates and assumptions used in the preparation of the consolidated financial statements are prudent, reasonable and consistently applied.

We believe that the critical accounting estimates discussed below involve the most complex judgments and assessments.

▸ Refer to "Note 1 – Summary of significant accounting policies" and "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group for further information on significant accounting policies and new accounting pronouncements. For financial information relating to the Bank, refer to the corresponding notes in the consolidated financial statements of the Bank.

## FAIR VALUE

A significant portion of our assets and liabilities are carried at fair value. The fair value of the majority of these financial instruments is based on quoted prices in active markets or observable inputs.

In addition, we hold financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These instruments include certain OTC derivatives including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and CDO securities, private equity investments, certain loans and credit products (including leveraged finance, certain syndicated loans and certain high yield bonds) and life finance instruments.

We have availed ourselves of the simplification in accounting offered under the fair value option guidance in Accounting Standards Codification (ASC) Topic 825 – Financial Instruments, primarily in Investment Banking and in Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. For instruments for which hedge accounting could not be achieved and for which we are economically hedged, we have elected the fair value option. Where we manage an activity on a fair value basis but previously have been unable to achieve fair value accounting, we have utilized the fair value option to align our financial accounting to our risk management reporting.

Control processes are applied to ensure that the fair values of the financial instruments reported in the consolidated financial statements, including those derived from pricing models, are appropriate and determined on a reasonable basis.

▸ Refer to "Note 34 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group for further information on fair value and related control processes of the Group.

## VARIABLE INTEREST ENTITIES

As a normal part of our business, we engage in various transactions that include entities which are considered VIEs. VIEs are special purpose entities that typically lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. Such entities are required to be assessed for consolidation under US GAAP, compelling the primary beneficiary to consolidate the VIE. The primary beneficiary is the party that has the power to direct the activities that most significantly affect the economics of the VIE and potentially has significant benefits or losses in the VIE. We consolidate all VIEs where we are the primary beneficiary. VIEs may be sponsored by us, unrelated third parties or clients. Application of the accounting requirements for consolidation of VIEs, including ongoing reassessment of VIEs for possible consolidation, may require the exercise of significant management judgment.

▸ Refer to "Note 1 – Summary of significant accounting policies" and "Note 33 – Transfers of financial assets and variable interest entities" in V – Consolidated financial statements – Credit Suisse Group for further information on VIEs.

## CONTINGENCIES AND LOSS PROVISIONS

A contingency is an existing condition that involves a degree of uncertainty that will ultimately be resolved upon the occurrence or non-occurrence of future events.

### Litigation contingencies

We are involved in a variety of judicial, regulatory and arbitration matters in connection with the conduct of our businesses. It is inherently difficult to predict the outcome of many of these matters, particularly those cases in which the matters are brought on behalf of various classes of claimants, seek damages of unspecified or indeterminate amounts or involve novel legal claims. In presenting our consolidated financial statements, management makes estimates regarding the outcome of judicial, regulatory and arbitration matters and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Charges, other than those taken for costs of defense, are not established for matters when losses cannot be reasonably estimated. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, our defenses and experience in similar matters, as well as our assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings.

▸ Refer to "Note 38 – Litigation" in V – Consolidated financial statements – Credit Suisse Group for further information on legal proceedings.

### Allowance and provision for credit losses

As a normal part of our business, we are exposed to credit risk through our lending relationships, commitments and letters of credit as well as counterparty risk on derivatives, foreign exchange and other transactions. Credit risk is the possibility of a loss being incurred as a result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a default, we generally incur a loss equal to the amount owed by the debtor, less any recoveries resulting from foreclosure, liquidation of collateral or the restructuring of the debtor company. The allowance for loan losses is considered a reasonable estimate of credit losses existing at the dates of the consolidated balance sheets. This allowance is for probable credit losses inherent in existing exposures and credit exposures specifically identified as impaired.

▸ Refer to "Note 1 – Summary of significant accounting policies" and "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group for further information on allowance for loan losses.

#### Inherent loan loss allowance

The inherent loan loss allowance is for all credit exposures not specifically identified as impaired and that, on a portfolio basis, are considered to contain probable inherent loss. The estimate of this component of the allowance for the consumer loans portfolio involves applying historical and current default probabilities, historical recovery experience and related current assumptions to homogenous loans based on internal risk rating and product type. To estimate this component of the allowance for the corporate & institutional loans portfolio, the Group segregates loans by risk, industry or country rating. The methodology for Investment Banking adjusts the rating-specific default probabilities to incorporate not only historic third-party data but also those implied from current quoted credit spreads.

Many factors are evaluated in estimating probable credit losses inherent in existing exposures. These factors include: the volatility of default probabilities; rating changes; the magnitude of the potential loss; internal risk ratings; geographic, industry and other economic factors; and imprecision in the methodologies and models used to estimate credit risk. Overall credit risk indicators are also considered, such as trends in internal risk-rated exposures, classified exposures, cash-basis loans, recent loss experience and forecasted write-offs, as well as industry and geographic concentrations and current developments within those segments or locations. Our current business strategy and credit process, including credit approvals and limits, underwriting criteria and workout procedures, are also important factors.

Significant judgment is exercised in the evaluation of these factors. For example, estimating the amount of potential loss requires an assessment of the period of the underlying data. Data that does not capture a complete credit cycle may compromise the accuracy of loss estimates. Determining which external data relating to default probabilities should be used and when it should be used also requires judgment. The use of market indices and ratings that do not sufficiently correlate to our specific exposure characteristics could also affect the accuracy of loss estimates. Evaluating the impact of uncertainties regarding macroeconomic and political conditions, currency devaluations on cross-border exposures, changes in underwriting criteria, unexpected correlations among exposures and other factors all require significant judgment. Changes in our estimates of probable loan losses inherent in the portfolio could have an impact on the provision and result in a change in the allowance.

#### Specific loan loss allowances

We make provisions for specific loan losses on impaired loans based on regular and detailed analysis of each loan in the portfolio. This analysis includes an estimate of the realizable value of any collateral, the costs associated with obtaining repayment and realization of any such collateral, the counterparty's overall financial condition, resources and payment record, the extent of our other commitments to the same counterparty and prospects for support from any financially responsible guarantors.

The methodology for calculating specific allowances involves judgments at many levels. First, it involves the early identification of deteriorating credit. Extensive judgment is required in order to properly evaluate the various indicators of the financial condition of a counterparty and likelihood of repayment. The failure to identify certain indicators or give them proper weight could lead to a different conclusion about the credit risk. The assessment of credit risk is subject to inherent limitations with respect to the completeness and accuracy of relevant information (for example, relating to the counterparty, collateral or guarantee) that is available at the time of the assessment. Significant judgment is exercised in determining the amount of the allowance. Whenever possible, independent, verifiable data or our own historical loss experience is used in models for estimating loan losses. However, a significant degree of uncertainty remains when applying such valuation techniques. Under our loan policy, the classification of loan status also has a significant impact on the subsequent accounting for interest accruals.

▸ Refer to "Risk Management" in III – Treasury, Risk, Balance sheet and Off-balance sheet and "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group for loan portfolio disclosures, valuation adjustment disclosures and certain other information relevant to the evaluation of credit risk and credit risk management.

## GOODWILL IMPAIRMENT

Under US GAAP, goodwill is not amortized, but is reviewed for potential impairment on an annual basis as of December 31 and at any other time that events or circumstances indicate that the carrying value of goodwill may not be recoverable.

For the purpose of testing goodwill for impairment, each reporting unit is assessed individually. A reporting unit is an operating segment or one level below an operating segment, also referred to as a component. A component of an operating segment is deemed to be a reporting unit if the component constitutes a business for which discrete financial information is available and management regularly reviews the operating results of that component. In Private Banking & Wealth Management, Wealth Management Clients, Corporate & Institutional Clients, Asset Management and Private Banking & Wealth Management's non-strategic unit are considered to be reporting units. Investment Banking is considered to be one reporting unit.

With the adoption of Accounting Standards Update 2011-08, "Testing Goodwill for Impairment" (ASU 2011-08), on January 1, 2012 a qualitative assessment is permitted to evaluate whether a reporting unit's fair value is less than its carrying value. If on the basis of the qualitative assessment it is more likely than not that the reporting unit's fair value is higher than its carrying value, no quantitative goodwill impairment test is required. If on the basis of the qualitative assessment it is more likely than not that the reporting unit's fair value is lower than its carrying value, the first step of the quantitative goodwill impairment test must be performed, by calculating the fair value of the reporting unit and comparing that amount to its carrying value. If the fair value of a reporting unit exceeds its carrying value, there is no goodwill impairment. If the carrying value exceeds the fair value, the second step of the quantitative goodwill impairment test, measuring the amount of an impairment loss, if any, has to be performed.

The qualitative assessment is intended to be a simplification of the annual impairment test and can be bypassed for any reporting unit and any period to proceed directly to performing the first step of the quantitative goodwill impairment test. When bypassing the qualitative assessment in any period as per the current practice of the Group, the preparation of a qualitative assessment can be resumed in any subsequent period.

Circumstances that could trigger an initial qualitative assessment or the first step of the goodwill impairment test include, but are not limited to: (i) macroeconomic conditions such as a deterioration in general economic conditions or other developments in equity and credit markets; (ii) industry and market considerations such as a deterioration in the environment in which the entity operates, an increased competitive environment, a decline in market-dependent multiples or metrics (considered in both absolute terms and relative to peers), and regulatory or political developments; (iii) other relevant entity-specific events such as changes in management, key personnel or strategy; (iv) a more-likely-than-not expectation of selling or disposing of all, or a portion, of a reporting unit; (v) results of testing for recoverability of a significant asset group within a reporting unit; (vi) recognition of a goodwill impairment in the financial statements of a subsidiary that is a component of a reporting unit; and (vii) a sustained decrease in share price (considered in both absolute terms and relative to peers).

The carrying value of each reporting unit for the purpose of the goodwill impairment test is determined by considering the reporting units' risk-weighted assets usage, leverage ratio exposure, deferred tax assets, cumulative translation adjustments, goodwill and intangible assets. Any residual equity, after considering the total of these elements, is allocated to the reporting units on a pro-rata basis. As of December 31, 2013, such residual equity was equal to CHF 9,425 million. Previously, the carrying value of each reporting unit was determined on the basis of the reporting units' allocated economic capital. The enhanced method of determining the carrying value of the reporting units reflects the current manner in which these businesses are managed as well as the regulatory capital constraints faced by each reporting unit. As of December 31, 2013, the goodwill was tested for impairment under both methods for determining the carrying value of each reporting unit.

Factors considered in determining the fair value of reporting units include, among other things: an evaluation of recent acquisitions of similar entities in the market place; current share values in the market place for similar publicly traded entities, including price multiples; recent trends in our share price and those of competitors; estimates of our future earnings potential based on our three-year strategic business plan; and the level of interest rates.

Estimates of our future earnings potential, and that of the reporting units, involve considerable judgment, including management's view on future changes in market cycles, the regulatory environment, the anticipated result of the implementation of business strategies, competitive factors and assumptions concerning the retention of key employees. Adverse changes in the estimates and assumptions used to determine the fair value of the Group's reporting units may result in a goodwill impairment in the future.

An estimated balance sheet for each reporting unit is prepared on a quarterly basis. If the second step of the goodwill impairment test is required, the implied fair value of the relevant reporting unit's goodwill is compared with the carrying value of that goodwill. If the carrying value exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to that excess. The loss recognized as a goodwill impairment cannot exceed the carrying value of that goodwill. The implied fair value of goodwill is calculated in the same manner as the amount of goodwill recognized in a business combination and, as such, the current fair value of a reporting unit is assigned to all of the assets and liabilities of that unit (including any unrecognized intangible assets, but excluding goodwill) as if the reporting unit had been acquired in a business combination. An independent valuation expert would likely be engaged to assist in the valuation of the reporting unit's unrecognized intangible assets.

Based on our goodwill impairment analysis performed as of December 31, 2013, we concluded that the estimated fair value for three of the reporting units in the Private Banking & Wealth Management division substantially exceeded their related carrying values and no impairment was necessary as of December 31,

2013. The fair value of Private Banking & Wealth Management's non-strategic reporting unit at the date of its creation in the fourth quarter of 2013 was lower than the estimated book value and as a result we recorded a CHF 12 million goodwill impairment charge.

There was no impairment necessary for our Investment Banking reporting unit as the estimated fair value substantially exceeded its carrying value. The Group engaged the services of an independent valuation specialist to assist in the valuation of the reporting unit as of December 31, 2013 using a combination of the market approach and income approach. Under the market approach, consideration is given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows.

The results of the impairment evaluation of each reporting unit's goodwill would be significantly impacted by adverse changes in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a sufficient margin from our best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, we could potentially incur material impairment charges in the future.

▸ Refer to "Note 20 – Goodwill" in V – Consolidated financial statements – Credit Suisse Group for further information on goodwill.

## TAXES

### Uncertainty of income tax positions

We follow the guidance in ASC Topic 740 – Income Taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain income tax positions.

Significant judgment is required in determining whether it is more likely than not that an income tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Further judgment is required to determine the amount of benefit eligible for recognition in the consolidated financial statements.

▸ Refer to "Note 27 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information on income tax positions.

### Deferred tax valuation allowances

Deferred tax assets and liabilities are recognized for the estimated future tax effects of operating loss carry-forwards and temporary differences between the carrying values of existing assets and liabilities and their respective tax bases at the dates of the consolidated balance sheets.

The realization of deferred tax assets on temporary differences is dependent upon the generation of taxable income during the periods in which those temporary differences become deductible. The realization of deferred tax assets on net operating losses is dependent upon the generation of taxable income during the periods prior to their expiration, if applicable. Management regularly evaluates whether deferred tax assets will be realized. If management considers it more likely than not that all or a portion of a deferred tax asset will not be realized, a corresponding valuation allowance is established. In evaluating whether deferred tax assets will be realized, management considers both positive and negative evidence, including projected future taxable income, the reversal of deferred tax liabilities which can be scheduled and tax planning strategies.

This evaluation requires significant management judgment, primarily with respect to projected taxable income. Future taxable income can never be predicted with certainty. It is derived from budgets and strategic business plans but is dependent on numerous factors, some of which are beyond management's control. Substantial variance of actual results from estimated future taxable profits, or changes in our estimate of future taxable profits and potential restructurings, could lead to changes in deferred tax assets being realizable, or considered realizable, and would require a corresponding adjustment to the valuation allowance.

As part of its normal practice, management has conducted a detailed evaluation of its expected future results. This evaluation has taken into account the Group's commitment to the integrated banking model and the importance of the Investment Banking segment within the integrated bank, as well as the changes announced in 2012 and the reduction in risk since 2008. This evaluation has indicated the expected future results that are likely to be earned in jurisdictions where the Group has significant deferred tax assets, such as the US, the UK and Switzerland. Management then compared those expected future results with the applicable law governing utilization of deferred tax assets. US tax law allows for a 20-year carry-forward period for net operating losses, UK tax law allows for an unlimited carry-forward period for net operating losses and Swiss tax law allows for a seven-year carry-forward period for net operating losses.

▸ Refer to "Note 27 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information on deferred tax assets.

## PENSION PLANS

### The Group

The Group covers pension requirements, in both Swiss and non-Swiss locations, through various defined benefit pension plans and defined contribution pension plans.

Our funding policy with respect to these pension plans is consistent with local government and tax requirements.

The calculation of the expense and liability associated with the defined benefit pension plans requires an extensive use of assumptions, which include the discount rate, expected return on plan assets and rate of future compensation increases. Management determines these assumptions based upon currently available market and industry data and historical experience of the plans. Management also consults with an independent actuarial firm to assist in selecting appropriate assumptions and valuing its related liabilities. The actuarial assumptions used by us may differ materially from actual results due to changing market and economic conditions and specific experience of the plans (such as investment management over- or underperformance, higher or lower withdrawal rates and longer or shorter life spans of the participants). Any such differences could have a significant impact on the amount of pension expense recorded in future years.

The funded status of our defined benefit pension and other post-retirement defined benefit plans are recorded in the consolidated balance sheets. The impacts from re-measuring the funded status (reflected in actuarial gains or losses) and from amending the plan (reflected in prior service cost or credits) are recognized in equity as a component of accumulated other comprehensive income/(loss) (AOCI).

The projected benefit obligation (PBO) of our total defined benefit pension plans as of December 31, 2013 included an amount related to our assumption for future salary increases of CHF 488 million, compared to CHF 534 million as of December 31, 2012. The accumulated benefit obligation (ABO) is defined as the PBO less the amount related to estimated future salary increases. The difference between the fair value of plan assets and the ABO was an overfunding of CHF 2,091 million for 2013, compared to an overfunding of CHF 698 million for 2012.

We are required to estimate the expected long-term rate of return on plan assets, which is then used to compute benefit costs recorded in the consolidated statements of operations. Estimating future returns on plan assets is particularly subjective, as the estimate requires an assessment of possible future market returns based on the plan asset mix. In calculating pension expense and in determining the expected long-term rate of return, we use the market-related value of assets. The assumptions used to determine the benefit obligation as of the measurement date are also used to calculate the net periodic benefit costs for the 12-month period following this date.

The expected weighted-average long-term rate of return used to determine the expected return on plan assets as a component of the net periodic benefit costs in 2013 and 2012 was 4.0% and 4.3%, respectively, for the Swiss plans and 6.2% and 6.4%, respectively, for the international plans. In 2013, if the expected long-term rate of return had been increased/decreased one percentage point, net pension expense for the Swiss plans would have decreased/increased CHF 144 million and net pension expense for the international plans would have decreased/increased CHF 26 million.

The discount rate used in determining the benefit obligation is based either upon high-quality corporate bond rates or government bond rates plus a premium in order to approximate high-quality corporate bond rates. In estimating the discount rate, we take into consideration the relationship between the corporate bonds and the timing and amount of the future cash outflows from benefit payments. The discount rate used for Swiss plans increased 0.4 percentage point from 2.2% as of December 31, 2012, to 2.6% as of December 31, 2013, mainly due to an increase in Swiss bond market rates. The average discount rate used for international plans increased 0.2 percentage point from 4.5% as of December 31, 2012, to 4.7% as of December 31, 2013, mainly due to an increase in bond market rates in the EU and the US, partially offset by a decrease in UK bond market rates. The discount rate affects both the pension expense and the PBO. For the year ended December 31, 2013, a one percentage point decline in the discount rate for the Swiss plans would have resulted in an increase in the PBO of CHF 1,688 million and an increase in pension expense of CHF 126 million, and a one percentage point increase in the discount rate would have resulted in a decrease in the PBO of CHF 1,486 million and a decrease in the pension expense of CHF 141 million. A one percentage point decline in the discount rate for the international plans as of December 31, 2013 would have resulted in an increase in the PBO of CHF 604 million and an increase in pension expense of CHF 49 million, and a one percentage point increase in the discount rate would have resulted in a decrease in the PBO of CHF 487 million and a decrease in the pension expense of CHF 40 million.

Actuarial losses and prior service cost are amortized over the average remaining service period of active employees expected to receive benefits under the plan, which, as of December 31, 2013, was approximately nine years for the Swiss plans and 3 to 25 years for the international plans. The pre-tax expense associated with the amortization of net actuarial losses and prior service cost for defined benefit pension plans for the years ended December 31, 2013, 2012 and 2011 was CHF 245 million, CHF 165 million and CHF 152 million, respectively. The amortization of recognized actuarial losses and prior service cost for defined benefit pension plans for the year ending December 31, 2014, which is assessed at the beginning of the year, is expected to be CHF 77 million, net of tax. The impact from deviations between our actuarial assumptions and the actual developments of such parameters observed for our pension plans further impacts the amount of net actuarial losses or gains recognized in equity, resulting in a higher or lower amount of amortization expense in periods after 2014.

▸ Refer to "Note 30 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for further information on pension benefits.

**The Bank**

The Bank covers pension requirements for its employees in Switzerland through participation in a defined benefit pension plan sponsored by the Group (Group plan). Various legal entities within the Group participate in the Group plan, which is set up as an independent trust domiciled in Zurich. The Group accounts for the Group plan as a single-employer defined benefit pension plan and uses the projected unit credit actuarial method to determine the net periodic pension expense, PBO, ABO and the related amounts recognized in the consolidated balance sheets. The funded status of the Group plan is recorded in the consolidated balance sheets. The actuarial gains and losses and prior service costs or credits are recognized in equity as a component of AOCI.

The Bank accounts for the Group plan on a defined contribution basis whereby it only recognizes the amounts required to be contributed to the Group plan during the period as net periodic pension expense and only recognizes a liability for any contributions due and unpaid. No other expense or balance sheet amounts related to the Group plan are recognized by the Bank.

The Bank covers pension requirements for its employees in international locations through participation in various pension plans, which are accounted for as single-employer defined benefit pension plans or defined contribution pension plans.

In 2013, if the Bank had accounted for the Group plan as a defined benefit plan, the expected long-term rate of return used to determine the expected return on plan assets as a component of the net periodic benefit costs would have been 4.0%. In 2013, the weighted-average expected long-term rate of return used to calculate the expected return on plan assets as a component of the net periodic benefit costs for the international single-employer defined benefit pension plans was 6.2%.

The discount rate used in determining the benefit obligation is based either upon high-quality corporate bond rates or government bond rates plus a premium in order to approximate high-quality corporate bond rates. For the year ended December 31, 2013, if the Bank had accounted for the Group plan as a defined benefit plan, the discount rate used in the measurement of the benefit obligation and net periodic benefit costs would have been 2.6% and 2.2%, respectively. For the year ended December 31, 2013, the weighted-average discount rates used in the measurement of the benefit obligation and the net periodic benefit costs for the international single-employer defined benefit pension plans were 4.7% and 4.5%, respectively. A one percentage point decline in the discount rate for the international single-employer plans would have resulted in an increase in PBO of CHF 604 million and an increase in pension expense of CHF 49 million, and a one percentage point increase in the discount rate would have resulted in a decrease in PBO of CHF 487 million and a decrease in pension expense by CHF 40 million.

The Bank does not recognize any amortization of actuarial losses and prior service cost for the Group pension plan. Actuarial losses and prior service cost related to the international single-employer defined benefit pension plans are amortized over the average remaining service period of active employees expected to receive benefits under the plan. The pre-tax expense associated with the amortization of recognized net actuarial losses and prior service cost for the years ended December 31, 2013, 2012 and 2011 was CHF 79 million, CHF 73 million and CHF 51 million, respectively. The amortization of recognized actuarial losses and prior service cost for the year ending December 31, 2014, which is assessed at the beginning of the year, is expected to be CHF 38 million, net of tax.

# III

# Treasury, Risk, Balance sheet and Off-balance sheet

# Liquidity and funding management

During 2013, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

## OVERVIEW

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Our liquidity and funding strategy is approved by the Capital Allocation and Risk Management Committee (CARMC) and overseen by the Board of Directors. The implementation and execution of the funding and liquidity strategy is managed by Treasury. Treasury ensures adherence to our funding policy and the efficient coordination of the secured funding desks. This approach enhances our ability to manage potential liquidity and funding risks and to promptly adjust our liquidity and funding levels to meet stress situations. Our liquidity and funding profile is regularly reported to CARMC and the Board of Directors, who define our risk tolerance, including liquidity risk, and set parameters for the balance sheet and funding usage of our businesses. The Board of Directors is responsible for defining our overall tolerance for risk in the form of a risk appetite statement.

Our liquidity and funding profile reflects our strategy and risk appetite and is driven by business activity levels and the overall operating environment. We have adapted our liquidity and funding profile to reflect lessons learned from the financial crisis, the subsequent changes in our business strategy and regulatory developments. We have been an active participant in regulatory and industry forums to promote best practice standards on quantitative and qualitative liquidity management. Our internal liquidity risk management framework is subject to review and monitoring by the Swiss Financial Market Supervisory Authority FINMA (FINMA), other regulators and rating agencies.

## REGULATORY FRAMEWORK

In April 2010 and March 2011, we implemented revised liquidity principles agreed with FINMA, following its consultation with the Swiss National Bank (SNB), to ensure that the Group and the Bank have adequate holdings on a consolidated basis of liquid, unencumbered, high-quality securities available in a crisis situation for designated periods of time.

In December 2010, the Basel Committee on Banking Supervision (BCBS) issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR).

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of the stock of high-quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and should always be at least 100%.

In January 2014, the BCBS issued final LCR rules and disclosure requirements that are to be implemented as part of banks' regular disclosures after January 1, 2015. The BCBS also proposed revisions to the NSFR, which are expected to become the minimum standard by the previously announced date of January 1, 2018.

In November 2012, the Swiss Federal Council adopted a liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making. The Liquidity Ordinance entered into force on January 1, 2013. It requires appropriate management and monitoring of liquidity risks, and applies to all banks, but is tiered according to the type, complexity and degree of risk of a bank's activities. It also contains supplementary quantitative and qualitative requirements for systemically relevant banks, including us, which are generally consistent with existing FINMA liquidity requirements. In January 2014, the Swiss Federal Council and FINMA proposed revisions to the Liquidity Ordinance to reflect the final Basel III LCR rules. Under the proposal, systemically relevant banks like us will be subject to an initial minimum LCR requirement of 100% beginning in 2015.

Our revised liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

▸ Refer to "Basel framework" and "US – Capital and prudential supervision" in I – Information on the company – Regulation and supervision – Recent regulatory developments and proposals for further information.

## LIQUIDITY RISK MANAGEMENT FRAMEWORK

### Our approach to liquidity risk management

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as the primary tool to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. Pursuant to our announced plans to reduce our balance sheet, we further strengthened our long-term funding profile to accelerate the increase of our NSFR. We estimate that our NSFR under the current FINMA framework was in excess of 100% as of the end of 2013.

Our estimate is based on the definitions and methodologies outlined in the aforementioned BCBS Basel III international framework for liquidity risk measurement, standards and monitoring issued in December 2010, the previously noted Liquidity Ordinance implementing the Basel III liquidity requirements into Swiss law, and other guidance and requirements of FINMA. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions which may not be consistent with those of other financial institutions. NSFR metrics are regulatory ratios whose disclosure is not yet formally required and, as such, represent non-GAAP financial measures.

In parallel with the NSFR, we continue to use our internal liquidity barometer to manage liquidity to internal targets and as a basis to model both Credit Suisse-specific and systemic market stress scenarios and their impact on funding and liquidity. Our internal barometer framework supports the management of our funding structure. It allows us to manage the time horizon over which the adjusted market value of unencumbered assets (including cash) exceeds the aggregate value of contractual outflows of unsecured liabilities plus a conservative forecast of anticipated contingent commitments. This barometer framework allows us to manage liquidity to a desired profile under stress in order to be able to continue to pursue activities for an extended period of time (also known as a liquidity horizon) without changing business plans during times of Credit Suisse-specific or market-specific stress. Under this framework, we also have short-term targets based on additional stress scenarios to ensure uninterrupted liquidity for short time frames.

Our liquidity management framework allows us to run stress analyses on our balance sheet and off-balance sheet positions, which include, but are not limited to, the following:

- A multiple-notch downgrade in the Bank's long-term debt credit ratings, which would require additional funding as a result of certain contingent off-balance sheet obligations;
- Significant withdrawals from private banking client deposits;
- Potential cash outflows associated with the prime brokerage business;
- Availability of secured funding becomes subject to significant over-collateralization;
- Capital markets, certificates of deposit and commercial paper markets will not be available;
- Other money market access will be significantly reduced;
- A loss in funding value of unencumbered assets;
- The inaccessibility of assets held by subsidiaries due to regulatory, operational and other constraints;
- The possibility of providing non-contractual liquidity support in times of market stress, including purchasing our unsecured debt;
- Monitoring the concentration in sources of wholesale funding and thus encourage funding diversification;
- Monitoring the composition and analysis of the unencumbered assets;
- Restricted availability of foreign currency swap markets; and
- Other scenarios as deemed necessary from time to time.

### Governance

Funding, liquidity, capital and our foreign exchange exposures in the banking book are managed centrally by Treasury. Oversight of these activities is provided by the CARMC, a committee that includes the chief executive officers (CEOs) of the Group and the divisions, the Chief Financial Officer, the Chief Risk Officer (CRO) and the Treasurer.

It is CARMC's responsibility to review the capital position, balance sheet development, current and prospective funding, interest rate risk and foreign exchange exposure and to define and monitor adherence to internal risk limits. CARMC regularly reviews the methodology and assumptions of our liquidity risk management framework and determines the liquidity horizon to be maintained.

All liquidity stress tests are coordinated and overseen by the CRO to ensure a consistent and coordinated approach across all risk disciplines.

### Contingency planning

In the event of a liquidity crisis, our liquidity contingency plan provides for specific actions to be taken depending on the nature of the crisis. Our Treasurer activates the contingency plan upon receipt of various reports that pre-established trigger levels have been breached. Pre-defined further escalation ensures the involvement of senior management and CARMC, the delivery of information to regulators and the meeting of the funding execution committee, which establishes a specific action plan and coordinates business and funding activities. In all cases, the plan's priorities are to strengthen liquidity (immediate), reduce funding needs (medium term) and assess recovery options (longer term).

### Liquidity pool

Treasury manages a sizeable portfolio of liquid assets, comprised of cash, high grade bonds, major market equity securities and other liquid securities, which serves as a liquidity pool. A portion of the liquidity pool is generated through reverse repurchase agreements with top-rated counterparties. Most of these liquid assets qualify as eligible assets under the BCBS liquidity standards. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash held at central banks and highly rated government bonds, also from short-term reverse repurchase agreements. These bonds are eligible as collateral for liquidity facilities with various central banks including the SNB, the US Federal Reserve (Fed), the European Central Bank (ECB) and the Bank of England. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities. These securities may also serve to meet liquidity requirements for our local businesses.

All securities, including those obtained from reverse repurchase agreements, are subject to a stress level haircut that we apply for stress scenarios to reflect the risk that emergency funding may not be available at market value.

We centrally manage the liquidity pool and hold it at our main operating entities. Holding securities in these entities ensures that we can make liquidity and funding available to local entities in need without delay.

As of December 31, 2013, our liquidity pool, based on our internal model, was CHF 140 billion, net of the stress level haircut. The liquidity pool consisted of CHF 55 billion of cash held by major central banks, primarily the Fed, the SNB and the ECB, CHF 52 billion of securities issued by governments and government agencies, primarily of the US, Britain, France, Germany and Switzerland, and other highly liquid assets including fixed income securities of CHF 15 billion and liquid equity securities of CHF 18 billion that form part of major indices. As of December 31, 2013, our internal model included the application of a stress test level haircut equal to approximately 60% of the market value of non-cash positions in the liquidity pool. The haircut reflects our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

## Liquidity pool

| December 31, 2013 | Swiss franc | US dollar | Euro | Other currencies | Total |
|---|---|---|---|---|---|
| **Liquidity pool by currencies (CHF billion)** | | | | | |
| Cash held at central banks | 23.8 | 27.5 | 2.5 | 0.7 | 54.5 |
| Government bonds | 3.1 | 23.5 | 10.3 | 15.1 | 52.0[1] |
| Fixed income securities | 0.6 | 12.6 | 0.0 | 1.9 | 15.1 |
| Liquid equity securities | 0.0 | 11.4 | 0.1 | 7.0 | 18.5 |
| **Total liquidy pool (based on internal model)** | **27.5** | **75.0** | **12.9** | **24.7** | **140.1** |

[1] Includes reverse repurchases of government bonds of CHF 19.1 billion.

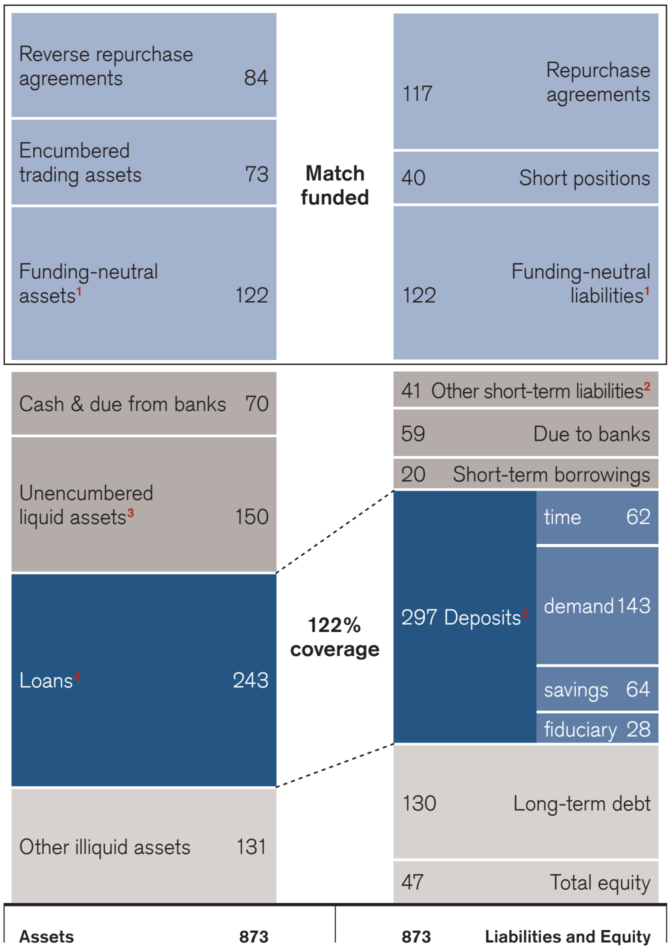
## FUNDING SOURCES AND USES

We fund our balance sheet primarily through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency, tenor, geography and maturity, and whether they are secured or unsecured. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

## Balance sheet funding structure

as of December 31, 2013 (CHF billion)



[1] Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.
[2] Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.
[3] Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.
[4] Excludes loans with banks.
[5] Excludes due to banks and certificates of deposit.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 22% as of the end of 2013, compared to 20% as of the end of 2012, reflecting an increase in core customer deposits that more than offset an increase in loans. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as a haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 297 billion as of the end of 2013, an increase of 4% compared to CHF 285 billion as of the end of 2012 and an increase of 7% compared to CHF 278 billion as of the end of 2011, reflecting growth in the customer deposit base in Private Banking & Wealth Management in 2013 and 2012. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

▸ Refer to the chart “Balance sheet funding structure” and “Balance sheet and off-balance sheet” for further information.

### Funding management

Treasury is responsible for the development, execution and regular updating of our funding plan. The plan reflects projected business growth, development of the balance sheet, future funding needs and maturity profiles as well as the effects of changing market conditions.

Interest expense on long-term debt, excluding structured notes, is monitored and managed relative to certain indices, such as the London Interbank Offered Rate (LIBOR), that are relevant to the financial services industry. This approach to term funding best reflects the sensitivity of both our liabilities and our assets to changes in interest rates. Our average funding cost, which is allocated to the divisions, remained largely unchanged compared to the end of 2012.

We continually manage the impact of funding spreads through careful management of our liability maturity mix and opportunistic issuance of debt. The effect of funding spreads on interest expense depends on many factors, including the absolute level of the indices on which our funding is based.

We diversify our long-term funding sources by issuing structured notes, which are debt securities on which the return is linked to commodities, stocks, indices or currencies or other assets, as well as covered bonds. We generally hedge structured notes with positions in the underlying assets or derivatives.

We also use other collateralized financings, including repurchase agreements and securities lending agreements. The level of our repurchase agreements fluctuates, reflecting market opportunities, client needs for highly liquid collateral, such as US treasuries and agency securities, and the impact of balance sheet and risk-weighted asset (RWA) limits. In addition, matched book trades, under which securities are purchased under agreements to resell and are simultaneously sold under agreements to repurchase with comparable maturities, earn spreads, are relatively risk free and are generally related to client activity.

Our primary source of liquidity is funding through consolidated entities. The funding through non-consolidated special purpose entities (SPEs) and asset securitization activity is immaterial.

## CONTRACTUAL MATURITY OF ASSETS AND LIABILITIES

The table below provides contractual maturities of the assets and liabilities specified as of the end of 2013. The contractual maturities are an important source of information for liquidity risk management. However, liquidity risk is also managed based on an expected maturity that considers counterparty behavior and in addition takes into account certain off-balance sheet items such as derivatives. Liquidity risk management performs extensive analysis of counterparty behavioral assumptions under various stress scenarios.

### Contractual maturity of assets and liabilities

| end of 2013 | On demand | Less than 1 month | Between 1 to 3 months | Between 3 to 12 months | Between 1 to 5 years | Greater than 5 years | Total |
|---|---|---|---|---|---|---|---|
| **Assets (CHF million)** | | | | | | | |
| Cash and due from banks | 62,251 | 2,523 | 965 | 523 | 0 | 2,430 | 68,692 |
| Interest-bearing deposits with banks | 0 | 463 | 314 | 482 | 202 | 54 | 1,515 |
| Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions | 65,784 | 67,662 | 18,426 | 7,497 | 461 | 192 | 160,022 |
| Securities received as collateral, at fair value | 20,944 | 1,856 | 0 | 0 | 0 | 0 | 22,800 |
| Trading assets, at fair value | 229,413 | 0 | 0 | 0 | 0 | 0 | 229,413 |
| Investment securities | 4 | 103 | 53 | 480 | 1,768 | 579 | 2,987 |
| Other investments | 839 | 38 | 0 | 0 | 47 | 9,405 | 10,329 |
| Net loans | 6,990 | 49,039 | 25,371 | 44,550 | 84,454 | 36,650 | 247,054 |
| Premises and equipment | 0 | 0 | 0 | 0 | 0 | 5,091 | 5,091 |
| Goodwill | 0 | 0 | 0 | 0 | 0 | 7,999 | 7,999 |
| Other intangible assets | 0 | 0 | 0 | 0 | 0 | 210 | 210 |
| Brokerage receivables | 52,045 | 0 | 0 | 0 | 0 | 0 | 52,045 |
| Other assets | 28,363 | 11,938 | 498 | 1,863 | 9,342 | 11,061 | 63,065 |
| Assets of discontinued operations held-for-sale | 299 | 185 | 13 | 1,087 | 0 | 0 | 1,584 |
| **Total assets** | **466,932** | **133,807** | **45,640** | **56,482** | **96,274** | **73,671** | **872,806** |
| **Liabilities (CHF million)** | | | | | | | |
| Due to banks | 12,433 | 5,103 | 2,123 | 2,776 | 332 | 341 | 23,108 |
| Customer deposits | 248,744 | 20,338 | 29,529 | 29,318 | 4,560 | 600 | 333,089 |
| Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions | 20,365 | 53,683 | 12,460 | 6,664 | 809 | 51 | 94,032 |
| Obligation to return securities received as collateral, at fair value | 20,944 | 1,856 | 0 | 0 | 0 | 0 | 22,800 |
| Trading liabilities, at fair value | 76,635 | 0 | 0 | 0 | 0 | 0 | 76,635 |
| Short-term borrowings | 0 | 5,901 | 4,867 | 9,425 | 0 | 0 | 20,193 |
| Long-term debt | 0 | 6,825 | 3,402 | 10,887 | 68,919 | 40,009 | 130,042 |
| Brokerage payables | 73,154 | 0 | 0 | 0 | 0 | 0 | 73,154 |
| Other liabilities | 27,358 | 18,780 | 335 | 400 | 2,871 | 1,703 | 51,447 |
| Liabilities of discontinued operations held-for-sale | 1,093 | 8 | 13 | 26 | 0 | 0 | 1,140 |
| **Total liabilities** | **480,726** | **112,494** | **52,729** | **59,496** | **77,491** | **42,704** | **825,640** |

▸ Refer to "Contractual obligations and other commercial commitments" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and other contractual obligations and "Note 32 – Guarantees and commitments" in V – Consolidated financial statements – Credit Suisse Group for further information on contractual maturities of guarantees and commitments.

## DEBT ISSUANCES AND REDEMPTIONS

Our long term debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

Our issuances span a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

The table below provides information on long-term debt issuances, maturities and redemptions in 2013, excluding structured notes.

### Debt issuances and redemptions

| in 2013 | Senior | Sub-ordinated | Long-term debt |
|---|---|---|---|
| **Long-term debt (CHF billion, notional value)** | | | |
| **Issuances** | **2.3** | **6.1** | **8.4** |
| of which unsecured | 2.3 | 6.1 | 8.4 |
| **Maturities / Redemptions** | **(16.7)** | **(3.8)** | **(20.5)** |
| of which unsecured | (15.8) | (3.8) | (19.6) |
| of which secured [1] | (0.9) | 0.0 | (0.9) |

Excludes structured notes.
[1] Includes covered bonds.

As of the end of 2013, we had outstanding long-term debt of CHF 130 billion, which included senior and subordinated instruments. We had CHF 34.8 billion and CHF 14.3 billion of structured notes and covered bonds outstanding, respectively, as of the end of 2013 compared to CHF 36.6 billion and CHF 15.2 billion, respectively, as of the end of 2012. The weighted average maturity of long-term debt was 6.7 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity or in 2030 for instruments without a stated final maturity).

▸ Refer to "Note 24 – Long-term debt" in V – Consolidated financial statements – Credit Suisse Group for further information.

Short-term borrowings increased 8% to CHF 20.2 billion as of the end of 2013 compared to CHF 18.6 billion in 2012.

▸ Refer to "Capital issuances and redemptions" in Capital management for further information on capital issuances, including buffer and progressive capital notes.

## FUNDS TRANSFER PRICING

We maintain an internal funds transfer pricing system based on market rates. Our funds transfer pricing system is designed to allocate to our businesses all funding costs in a way that incentivizes their efficient use of funding. Our funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet usages and off-balance sheet contingencies. The funds transfer pricing framework ensures the full funding costs allocation under normal business conditions, but it is even of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this framework, our businesses are also credited to the extent they provide long-term stable funding.

## CASH FLOWS FROM OPERATING, INVESTING AND FINANCING ACTIVITIES

As a global financial institution, our cash flows are complex and interrelated and bear little relation to our net earnings and net assets. Consequently, we believe that traditional cash flow analysis is less meaningful in evaluating our liquidity position than the funding and liquidity policies described above. Cash flow analysis may, however, be helpful in highlighting certain macro trends in our business.

For the year ended December 31, 2013, net cash provided by operating activities of continuing operations was CHF 22.1 billion, primarily reflecting a decrease in trading assets and liabilities, an increase in other liabilities and the 2013 income from continuing operations, partially offset by an increase in other assets. Our operating assets and liabilities vary significantly in the normal course of business due to the amount and timing of cash flows. Management believes cash flows from operations, available cash balances and short-term and long-term borrowings will be sufficient to fund our operating liquidity needs.

Our investing activities primarily include originating loans to be held to maturity, other receivables and the investment securities portfolio. For the year ended December 31, 2013, net cash of CHF 11.5 billion was provided by investing activities from continuing operations, primarily due to a decrease in central bank funds sold, securities purchased under resale agreements and securities borrowing transactions and an increase in loans.

Our financing activities primarily include the issuance of debt and receipt of customer deposits. We pay annual dividends on our common shares. In 2013, net cash used in financing activities of continuing operations was CHF 24.4 billion, mainly reflecting repayments of long-term debt and a decrease in central bank funds purchased, securities sold under repurchase agreements and securities lending transactions, partly offset by the issuances of long-term debt and an increase in due to banks and customer deposits.

## CREDIT RATINGS

Our access to the debt capital markets and our borrowing costs depend significantly on our credit ratings. Rating agencies take many factors into consideration in determining a company's rating, including such factors as earnings performance, business mix, market position, ownership, financial strategy, level of capital, risk management policies and practices, management team and the broader outlook for the financial services industry. The rating agencies may raise, lower or withdraw their ratings, or publicly announce an intention to raise or lower their ratings, at any time.

Although retail and private bank deposits are generally less sensitive to changes in a bank's credit ratings, the cost and availability of other sources of unsecured external funding is generally a function of credit ratings. Credit ratings are especially important to us when competing in certain markets and when seeking to engage in longer-term transactions, including over-the-counter (OTC) derivative instruments.

A downgrade in credit ratings could reduce our access to capital markets, increase our borrowing costs, require us to post additional collateral or allow counterparties to terminate transactions under certain of our trading and collateralized financing and derivative contracts. This, in turn, could reduce our liquidity and negatively impact our operating results and financial position. Our liquidity barometer takes into consideration contingent events associated with a two-notch downgrade in our credit ratings. The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 1.4 billion, CHF 3.4 billion and CHF 4.8 billion, respectively, as of December 31, 2013, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller. In July 2013, Standard & Poor's announced a one-notch rating downgrade on our long-term debt.

As of the end of 2013, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

▸ Refer to "Investor information" in the Appendix for further information on Group and Bank credit ratings.

# Capital management

As of the end of 2013, our capital position remained strong with a CET1 ratio of 15.7% under Basel III and 10.0% on a look-through basis. Our RWA under Basel III decreased CHF 18.6 billion to CHF 273.8 billion compared to year-end 2012 and our tier 1 capital increased CHF 1.7 billion to CHF 46.1 billion. Our Swiss leverage ratio was 5.1%.

## CAPITAL STRATEGY AND FRAMEWORK

Credit Suisse considers a strong and efficient capital position to be a priority. Through our capital strategy, we continue to strengthen our capital position and optimize the use of risk-weighted assets (RWA), particularly in light of emerging regulatory capital requirements.

The overall capital needs of Credit Suisse reflect management's regulatory and credit rating objectives as well as our underlying risks. Our framework considers the capital needed to absorb losses, both realized and unrealized, while remaining a strongly capitalized institution. Multi-year projections and capital plans are prepared for the Group and its major subsidiaries and reviewed throughout the year with its regulators. These plans are subjected to various stress tests, reflecting both macroeconomic and specific risk scenarios. Capital contingency plans are developed in connection with these stress tests to ensure that possible mitigating actions are consistent with both the amount of capital at risk and the market conditions for accessing additional capital.

Our capital management framework relies on economic capital, which is a comprehensive tool that is also used for risk management and performance measurement. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength as reflected in our long-term credit rating.

▸ Refer to "Economic capital and position risk" in Risk Management for further information on economic capital.

## REGULATORY CAPITAL FRAMEWORK

### Overview

Effective January 1, 2013, the Basel II.5 framework, under which we operated in 2012, was replaced by the Basel III framework, which was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements). Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business. Our 2012 calculations of capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

The Basel framework describes a range of options for determining capital requirements in order to provide banks and supervisors the ability to select approaches that are most appropriate for their operations and their financial market infrastructure. In general, Credit Suisse has adopted the most advanced approaches, which align with the way that risk is internally managed and provide the greatest risk sensitivity.

For measuring credit risk, we received approval from FINMA to use the advanced internal ratings-based approach (A-IRB). Under the A-IRB for measuring credit risk, risk weights are determined by using internal risk parameters for probability of default (PD), loss given default (LGD) and effective maturity. The exposure at default is either derived from balance sheet values or by using models.

For calculating the capital requirements for market risk, the internal models approach, the standardized measurement method and the standardized approach are used.

Non-counterparty risk arises from holdings of premises and equipment, real estate and investments in real estate entities.

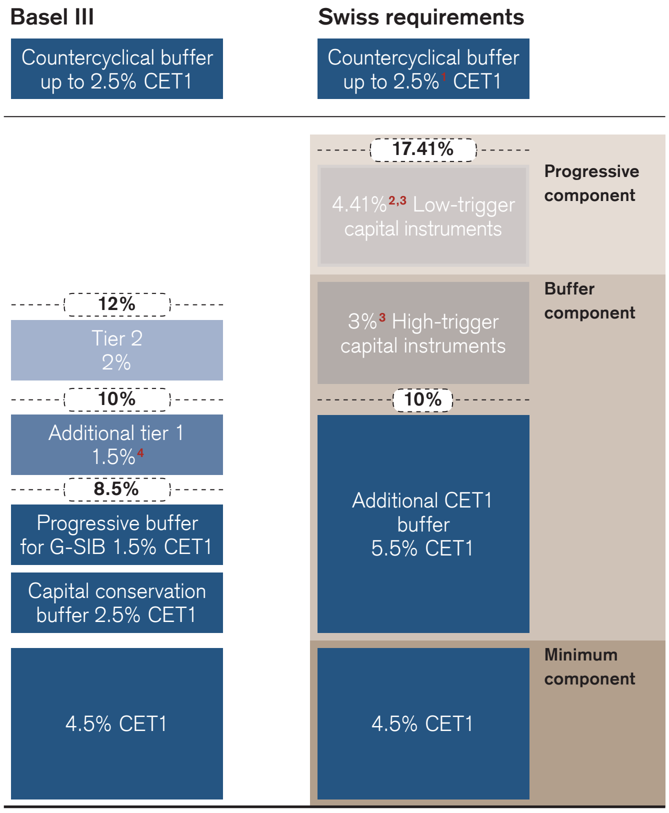
Under the Basel framework, operational risk is included in RWA and we received approval from FINMA to use the advanced measurement approach (AMA). Under the AMA for measuring operational risk, we identified key scenarios that describe our major operational risks using an event model.

### Capital structure under Basel III

The BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

▸ Refer to the table "Basel III phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

## Capital frameworks for Credit Suisse



[1] As of September 30, 2013, banks are required to hold CET1 capital in the amount of 1% of RWA pertaining to mortgage loans that finance residential property in Switzerland.

[2] The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2014, FINMA reduced our 2019 progressive component requirement from 4.41% to 3.66%.

[3] Counts towards Basel III minimum requirements as tier 1 or tier 2 capital depending on the quality of the underlying instruments.

[4] Additional tier 1 instruments must provide for principal loss absorption through a conversion into common equity or write-down feature. The trigger for such a conversion or write-down must include a CET1 ratio of at least 5.125%.

Under Basel III, the minimum common equity tier 1 (CET1) requirement is 4.5% of RWA.

In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends or make discretionary bonus payments or other earnings distributions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified us as a G-SIB and requires us to maintain a 1.5% progressive buffer.

CET1 capital is subject to certain regulatory deductions and other adjustments to common equity, including the deduction of deferred tax assets for tax-loss carry-forwards, goodwill and other intangible assets and investments in banking and finance entities.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital. To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125%.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1 or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through January 1, 2019.

Beginning January 1, 2013, capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, will be phased out at their effective maturity date, generally the date of the first step-up coupon.

## Basel III phase-in requirements for Credit Suisse

| Effective January 1, for the applicable year | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |
|---|---|---|---|---|---|---|---|
| **Capital ratios** | | | | | | | |
| CET1 | 3.5% [1] | 4.0% [1] | 4.5% | 4.5% | 4.5% | 4.5% | 4.5% |
| Capital conservation buffer | | | | 0.625% [1] | 1.250% [1] | 1.875% [1] | 2.5% |
| Progressive buffer for G-SIB | | | | 0.375% [1] | 0.750% [1] | 1.125% [1] | 1.5% |
| **Total CET1** | **3.5%** | **4.0%** | **4.5%** | **5.5%** | **6.5%** | **7.5%** | **8.5%** |
| Additional tier 1 | 1.0% [1] | 1.5% | 1.5% | 1.5% | 1.5% | 1.5% | 1.5% |
| **Total tier 1** | **4.5%** | **5.5%** | **6.0%** | **7.0%** | **8.0%** | **9.0%** | **10.0%** |
| Tier 2 | 3.5% [1] | 2.5% [1] | 2.0% | 2.0% | 2.0% | 2.0% | 2.0% |
| **Total capital** | **8.0%** | **8.0%** | **8.0%** | **9.0%** | **10.0%** | **11.0%** | **12.0%** |
| Phase-in deductions from CET1 [2] | | 20.0% [1] | 40.0% [1] | 60.0% [1] | 80.0% [1] | 100.0% | 100.0% |
| Capital instruments subject to phase out | Phased out over 10-year horizon beginning 2013 through 2022 | | | | | | |

[1] Indicates transition period.
[2] Includes goodwill and other intangible assets, certain deferred tax assets and participations in financial institutions.

### Swiss Requirements

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss Requirements. Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in from 2013 through 2018 and are fully effective January 1, 2019. The legislation on capital requirements builds on Basel III, but in respect of systemically relevant banks goes beyond its minimum standards, including requiring us, as a systemically relevant bank, to have the following minimum, buffer and progressive components.

▸ Refer to the chart "Swiss capital and leverage ratio phase-in requirements for Credit Suisse" for Swiss capital requirements and applicable effective dates during the phase-in period.

The minimum requirement of CET1 capital is 4.5% of RWA.
